Asynchronous design for parallel processing architectures
[AD-A266523] p 1160 N94-16791
Applications of the phi-transform
[AD-A266247] p 1170 N94-16940
Missile datcom user's manual
[AD-A267447] p 1152 N94-17032
Computer modeling and animation of mechanical systems
[NIAR-93-3] p 1153 N94-17299
Binary optics at Hughes Danbury Optical Systems
p 1195 N94-17344
Fabrication techniques for very fast diffractive lenses
p 1196 N94-17345

Computer-aided design package for designers of digital optical computers
[AD-A267866] p 1154 N94-17390
Structural mechanics division research and technology accomplishments for CY 1992 and plans for CY 1993
[NASA-TM-107752] p 1062 N94-17479
X ray computed tomography for geometry acquisition
[AD-A268085] p 1157 N94-17590
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651

COMPUTER AIDED MANUFACTURING

Applying paperless technology to achieve excellence in manufacturing operations
[TABES PAPER 93-630] p 1052 N94-16147
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
A decision criteria to select an associative-memory organization that minimizes the execution time of a mix of associative-search operations
[AD-A266438] p 1149 N94-16560

COMPUTER AIDED MAPPING

Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush
p 1086 N94-16318
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467

COMPUTER AIDED TOMOGRAPHY

X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
X ray computed tomography for geometry acquisition
[AD-A268085] p 1157 N94-17590
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596

COMPUTER ANIMATION

Galileo probe spacecraft mission to Jupiter
[NASA-TM-109646] p 1247 N94-16070
Computer modeling and animation of mechanical systems
[NIAR-93-3] p 1153 N94-17299

COMPUTER ASSISTED INSTRUCTION

The application of compiler-assisted multiple instruction retry to VLIW architectures
[AD-A266930] p 1158 N94-15173
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
The planetary data system educational CD-ROM
p 1234 N94-16209
A computer-based training system combining virtual reality and multimedia
[DE93-013768] p 1132 N94-16819
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403

COMPUTER DESIGN

The design of self-checking reduced instruction set computers
[AD-A267012] p 1140 N94-15763

COMPUTER GRAPHICS

TOMS computer graphics
[NASA-TM-109597] p 1094 N94-15290
Text and graphics systems
[NASA-TM-109570] p 1229 N94-15300
The 1988 computational fluid dynamics highlights
[NASA-TM-109645] p 1019 N94-15431
Freedom system Text and Graphics Systems (TAGS)
[NASA-TM-109509] p 1140 N94-15455
Using interactive sketch interpretation to design solid objects
[AD-A266637] p 1147 N94-15743
Flight instrument software for the F/A-18 research simulator
[AD-A267170] p 872 N94-15856
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050
A task adaptive parallel graphics renderer
[DE93-017123] p 1149 N94-16119
Computing science and statistics. Volume 24: Graphics and visualization
[AD-A266571] p 1150 N94-16721
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
Display of dynamic, volume graphic images by holographic voxel projection: Initial investigation
[AD-A267622] p 1035 N94-17197
Module interconnection frameworks for a real-time spreadsheet
[AD-A267317] p 1153 N94-17220
Computer modeling and animation of mechanical systems
[NIAR-93-3] p 1153 N94-17299
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319
TDNOVA interactive graphics
[AD-A268000] p 1156 N94-17530

COMPUTER INFORMATION SECURITY

VDM specification of the MD4 message digest algorithm
[NPL-DITC-204/92] p 1142 N94-14944
The use of formal methods in data security standards
[NPL-DITC-205/92] p 1142 N94-15008
RAISE specification of the MD4 message digest algorithm
[NPL-DITC-206/92] p 1142 N94-15010
The value of reference implementations and prototyping in a formal design and testing methodology
[NPL-DITC-208/92] p 1142 N94-15011
Standards and conformance testing in data security: Results of initial programme of investigation
[NPL-DITC-218/92] p 1143 N94-15014
Testability of data security standards
[NPL-DITC-217/93] p 1143 N94-15022
The Third Annual NASA Science Internet User Working Group Conference
[NASA-CP-3170] p 1228 N94-15116
Integrated trusted systems development environment
[AD-A267029] p 1146 N94-15674
NASA Electronic Library System (NELS): The system impact of security
[NASA-CR-194614] p 1231 N94-16499
A security architecture for fault-tolerant systems
[AD-A266178] p 1152 N94-16982
An internetwork authentication architecture
[AD-A268579] p 1162 N94-17622

COMPUTER NETWORKS

The Third Annual NASA Science Internet User Working Group Conference
[NASA-CP-3170] p 1228 N94-15116
A TRALINET guide to the Internet
[AD-A266946] p 1229 N94-15178
A browsing tool for the Internet Logical Library of the HPCC Software Exchange
[NASA-CR-194545] p 1143 N94-15189
Computer networking at SLR stations
p 917 N94-15594
Bandwidth characteristics of multimedia data traffic on a local area network
[NASA-TM-104026] p 883 N94-15648
The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
Report on computing and networking in the Space Science Laboratory by the SSL Computer Committee
[NASA-TM-108422] p 1147 N94-15721
Congestion control of high-speed networks
[AD-A267013] p 989 N94-15748
Unipolar terminal-attractor based neural associative memory with adaptive threshold
[NASA-CASE-NPO-18790-1-CU] p 1165 N94-15958
Consistent failure reporting in reliable communication systems
[AD-A266298] p 997 N94-16477
The ESA Tele-Invoicing System (ETIS)
[ESA-INT-6] p 1150 N94-16591
A comparison of queueing, cluster and distributed computing systems
[NASA-TM-109025] p 1160 N94-16878
A modular control architecture for real-time synchronous and asynchronous systems
[DE93-015439] p 1166 N94-16888
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
The IMS software integration platform
[AD-A266285] p 1151 N94-16910
Understanding partitions and the no partition assumption
[AD-A266296] p 1000 N94-16911
Computer Science and Telecommunications Board activities
[DE93-018141] p 1000 N94-17000
Networked workstations and parallel processing utilizing functional languages
[AD-A267464] p 1160 N94-17034
Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118
CALS test network handbook
[AD-A267587] p 1160 N94-17209
Isochronets: A high-speed network switching architecture
[AD-A267811] p 1161 N94-17409
A protocol validator for the SCM and CFSM models
[AD-A268523] p 1156 N94-17541
An internetwork authentication architecture
[AD-A268579] p 1162 N94-17622

COMPUTER PROGRAM INTEGRITY

Automatic generation of production rules for integrity maintenance
[REPT-92-054] p 1156 N94-17501
Automatic translation of database integrity constraints into compensating production rules
[REPT-92-055] p 1234 N94-17502

COMPUTER PROGRAMMING

Concurrent garbage collection of persistent heaps
[AD-A266831] p 1141 N94-14915
Lecture notes on engineering measurement for software engineers
[AD-A266959] p 1142 N94-14967
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Software architecture for shared information systems
[AD-A266995] p 1144 N94-15216
Open environments to support systems engineering tool integration: A study using the Portable Common Tool Environment (PCTE)
[NASA-TM-4489] p 1144 N94-15486
Process-centered development environments: An exploration of issues
[AD-A266997] p 1145 N94-15630
Multiobjective functions optimization for task allocation mapping to multicomputer nodes
[AD-A267071] p 1146 N94-15670
Integrated trusted systems development environment
[AD-A267029] p 1146 N94-15674
ACM SIGPLAN Workshop on ML and Its Applications
[AD-A266617] p 1147 N94-15725
Architectures for software systems: A curriculum development proposal in undergraduate software engineering
[AD-A266703] p 1147 N94-15728
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 3: Programmer's reference
[NASA-TM-106341] p 1022 N94-15865
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 3: Programmer's reference
[NASA-TM-106339] p 1022 N94-15867
C++ as a language for object-oriented numerics
[DE93-015027] p 1148 N94-15985
Consistent failure reporting in reliable communication systems
[AD-A266298] p 997 N94-16477
Models for reactivity
[AD-A266419] p 1149 N94-16554
Reductions to sets of low information content
[TR-417] p 1150 N94-16579
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656
ASTROS enhancements. Volume 1: ASTRO user's manual
[AD-A266818] p 1151 N94-16768
ASTROS enhancements. Volume 2: ASTRO programmer's manual
[AD-A266819] p 1151 N94-16769
KBSA concept demo
[AD-A267054] p 1166 N94-16770
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
Monads and comonads in intensional semantics
[AD-A266522] p 1151 N94-16790
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
Sequential functions on indexed domains and full abstraction for a sub-language of PCF
[AD-A267838] p 1152 N94-17009
Detailed example of using ACEC release 3.0 with the DEC VAX Ada compiler
[AD-A267880] p 1152 N94-17014
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027

Design and implementation of an interface editor for the Amadeus multi-relational database front-end system
[AD-A267403] p 1233 N94-17114
Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118
Module interconnection frameworks for a real-time spreadsheet
[AD-A267317] p 1153 N94-17220
Module interconnection frameworks for a real-time spreadsheet
[AD-A267752] p 1153 N94-17231
Software Capability Evaluation (SCE) version 1.5 method description. Software capability evaluation project
[AD-A267895] p 1154 N94-17395
Process evolution for the MARVEL environment
[AD-A267813] p 1155 N94-17398
Concurrency control in rule-based software development environments
[AD-A267829] p 1155 N94-17404
ACE: Lessons learned, volume 1
[AD-A267979] p 1155 N94-17411
Incremental rederivation of software artifacts: FY 1992
[AD-A267968] p 1155 N94-17491
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517
A protocol validator for the SCM and CFSM models
[AD-A268523] p 1156 N94-17541
A software process framework for the SEI capability maturity model: Repeatable level
[AD-A268059] p 1157 N94-17588

COMPUTER PROGRAMS

A CENTAUR tutorial
[INRIA-RT-140] p 1142 N94-14978
The CAML numbers reference manual
[INRIA-RT-141] p 1142 N94-14979
Global auroral imaging: Dynamics of Explorer Miss ion
[NASA-CR-194284] p 1097 N94-15003
Testability of data security standards
[NPL-DITC-217/93] p 1143 N94-15022
The alignment-distribution graph
[NASA-CR-194292] p 1168 N94-15112
Software reliability through fault-avoidance and fault-tolerance
[NASA-CR-194353] p 1143 N94-15114
Rotary engine performance computer program (RCEMAP and RCEMAPPC): User's guide
[NASA-CR-191192] p 869 N94-15192
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Software architecture for shared information systems
[AD-A266995] p 1144 N94-15216
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
An analysis of SEI software process assessment results: 1987-1991
[AD-A266996] p 1145 N94-15629
Statistical analysis of trigonometric parallaxes
[NASA-CR-194558] p 1172 N94-15641
Software reliability management through metrics
[AD-A267129] p 1146 N94-15687
The free decay of coupled heave and pitch motions of a model frigate
[DRA/TM(AWMH)92340] p 1146 N94-15702
Architectures for software systems: A curriculum development proposal in undergraduate software engineering
[AD-A266703] p 1147 N94-15728
An analysis of tactical airlifter characteristics and their impact on theater airlift system performance
[AD-A266719] p 866 N94-15731
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847
Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
Database for propagation models p 996 N94-16049
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Applying paperless technology to achieve excellence in manufacturing operations
[TABES PAPER 93-630] p 1052 N94-16147
Consistent failure reporting in reliable communication systems
[AD-A266298] p 997 N94-16477
Laser ranging data analysis
[NASA-CR-193547] p 1041 N94-16719
ASTROS enhancements. Volume 1: ASTRO user's manual
[AD-A266818] p 1151 N94-16768
ASTROS enhancements. Volume 2: ASTRO programmer's manual
[AD-A266819] p 1151 N94-16769
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
The IMS software integration platform
[AD-A266285] p 1151 N94-16910
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
Conflict Resolution (CORE) for software quality factors
[AD-A267248] p 1151 N94-16941
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
Integration ToolKit and Methods (ITKM) manufacturing methods and prototype toolkit. A combined modeling method using IDEFO, IDEF1x and XSpec
[AD-A266176] p 984 N94-16981
Embedded computer systems: Status of C-17 software
[AD-A267307] p 1160 N94-16993
Detailed example of using ACEC release 3.0 with the DEC VAX Ada compiler
[AD-A267880] p 1152 N94-17014
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027
Design and implementation of an interface editor for the Amadeus multi-relational database front-end system
[AD-A267403] p 1233 N94-17114
Sound exposure level prediction for impulse sound sources above variable terrain
[AD-A267535] p 1178 N94-17119
A proposed ground segment design for small satellites p 878 N94-17154
OREMUS: Prototype of an orbit determination center dedicated to mini-satellite control p 878 N94-17156
Data processing system for ARSENE ground station: A tool for small satellite control and development p 878 N94-17157
Defense Logistics Information System (DLIS). Procedures manual: Logistics On-Line Access (LOLA) procedures manual
[AD-A267685] p 1233 N94-17229
Module interconnection frameworks for a real-time spreadsheet
[AD-A267752] p 1153 N94-17231
ONRASIA scientific information bulletin, volume 18, number 2
[AD-A267798] p 1304 N94-17305
Concurrency control in rule-based software development environments
[AD-A267829] p 1155 N94-17404
Incremental rederivation of software artifacts: FY 1992
[AD-A267968] p 1155 N94-17491
Micro- and meso-scale simulations of magnetospheric processes related to the aurora and substorm morphology
[NASA-CR-193437] p 1102 N94-17527
TDNOVA interactive graphics
[AD-A268000] p 1156 N94-17530
Structured finite volume modeling of US Navy aircraft engine test cells. Task 2: Turboprop engine. Volume 2: Code documentation and listings
[AD-A268386] p 873 N94-17569
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677

COMPUTER STORAGE DEVICES

Concurrent garbage collection of persistent heaps
[AD-A266831] p 1141 N94-14915
Relaxing consistency in recoverable distributed shared memory
[AD-A266931] p 1140 N94-15174
The design of self-checking reduced instruction set computers
[AD-A267012] p 1140 N94-15763
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Detailed example of using ACEC release 3.0 with the DEC VAX Ada compiler
[AD-A267880] p 1152 N94-17014
Experience with disconnected operation in a mobile computing environment
[AD-A267524] p 1141 N94-17115
Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118
3-D optical memory disk
[AD-A267908] p 1141 N94-17380

COMPUTER SYSTEMS DESIGN

Software architecture for shared information systems
[AD-A266995] p 1144 N94-15216
Reengineering: An engineering problem
[AD-A267117] p 1146 N94-15653
Multiobjective functions optimization for task allocation mapping to multicomputer nodes
[AD-A267071] p 1146 N94-15670
Report on computing and networking in the Space Science Laboratory by the SSL Computer Committee
[NASA-TM-108422] p 1147 N94-15721
The design of self-checking reduced instruction set computers
[AD-A267012] p 1140 N94-15763
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
NASA Electronic Library System (NELS): The system impact of security
[NASA-CR-194614] p 1231 N94-16499
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
A security architecture for fault-tolerant systems
[AD-A266178] p 1152 N94-16982
Fault-tolerant architectures for multiprocessor and VLSI-based systems
[AD-A267370] p 1140 N94-17005
Data handling strategy for the Spanish small satellite program (MINISAT) p 895 N94-17177
Light-weight process groups in the ISIS system
[NASA-CR-194544] p 1161 N94-17239
Computer-aided design package for designers of digital optical computers
[AD-A267866] p 1154 N94-17390
Integration of several computer systems within a heterogeneous environment
[AD-A267978] p 1155 N94-17500
Orpheus: A synthesis framework for regular architectures
[REPT-93-016] p 1156 N94-17504
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551

COMPUTER SYSTEMS PERFORMANCE

Applicability of the session and the presentation layers for the support of high speed applications
[INRIA-RT-144] p 1158 N94-14980
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Process-centered development environments: An exploration of issues
[AD-A266997] p 1145 N94-15630
Reengineering: An engineering problem
[AD-A267117] p 1146 N94-15653
NASA trend analysis procedures
[NASA-RP-1290] p 1223 N94-15782
Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
Performance Information Management System (PIMS) communication
[AD-A267040] p 1231 N94-16458
Shared-memory multiprocessor trends and the implications for parallel program performance
[TR-420] p 1159 N94-16578
Estimating task execution delay in a real-time system via static source code analysis
[AD-A267496] p 1161 N94-17367
Benchmarking massively parallel architectures
[DE93-016486] p 1162 N94-17646

COMPUTER SYSTEMS PROGRAMS

Software architecture for shared information systems
[AD-A266995] p 1144 N94-15216
Software reliability management through metrics
[AD-A267129] p 1146 N94-15687
Orpheus: A synthesis framework for regular architectures
[REPT-93-016] p 1156 N94-17504

COMPUTER TECHNIQUES

NASA's online machine aided indexing system
[NASA-CR-4518] p 1228 N94-15009
Report on computing and networking in the Space Science Laboratory by the SSL Computer Committee
[NASA-TM-108422] p 1147 N94-15721
A scientific basis for computational science
[AD-A266697] p 1148 N94-15841

Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
Plasma arc welding repair of space flight hardware
[TABES PAPER 93-603] p 1049 N94-16139
A computer-based training system combining virtual reality and multimedia
[DE93-013768] p 1132 N94-16819
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974
Experience with disconnected operation in a mobile computing environment
[AD-A267524] p 1141 N94-17115
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
Low cost paths to binary optics p 1197 N94-17353
Design and diagnosis problem solving with multifunctional technical knowledge bases
[AD-A268375] p 1234 N94-17419
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
X ray computed tomography for geometry acquisition
[AD-A268085] p 1157 N94-17590

COMPUTER VISION
YARF: An open-ended framework for robot road following
[AD-A266788] p 1163 N94-14910
Perception for outdoor navigation
[AD-A266867] p 863 N94-14919
Segmenting textured 3D surfaces using the space/frequency representation
[AD-A266960] p 1163 N94-14968
RACCOON: A Real-Time Autonomous Car Chaser Operating Optimally at Night
[AD-A266963] p 863 N94-14971
Panacea: An active sensor controller for the ALVINN autonomous driving system
[AD-A266964] p 864 N94-14972
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498
Programmable Remapper project
[NASA-TM-109508] p 1164 N94-15515
Exploiting world structure to efficiently search for objects
[TR-434] p 1231 N94-16576
Reference frames in vision
[AD-A266174] p 1132 N94-16925
ARPA unmanned ground vehicle stereo vision program at Teleos Research
[AD-A267632] p 1167 N94-17202
A high-speed object recognition chip based on a biologically-realistic hybrid temporal processing
[AD-A268270] p 1134 N94-17576

COMPUTERIZED SIMULATION
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
Multiple process simulations for correction factor calculations in experiments with neutrons. LUSMK program
[DE93-623957] p 1179 N94-14932
Rotorcraft research
[NASA-TM-109452] p 871 N94-15325
STS-26 EVA rescue training
[NASA-TM-109563] p 875 N94-15333
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows
[NASA-CR-193131] p 1018 N94-15427
The 1988 computational fluid dynamics highlights
[NASA-TM-109645] p 1019 N94-15431
Parallel spatial direct numerical simulations on the Intel iPSC/860 hypercube
[NASA-CR-191513] p 1144 N94-15483
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526
Statistical computation of tolerance limits
[NASA-TM-108424] p 1172 N94-15535
Numerical simulation of three-dimensional self-gravitating flow
[NASA-TM-109021] p 1021 N94-15768
NAS technical summaries: Numerical aerodynamic simulation program, March 1991 - February 1992
[NASA-TM-109335] p 854 N94-15798
An experimental comparison of CLOS and C(++) implementations of an object-oriented graphical simulation of walking robot kinematics
[AD-A267168] p 1165 N94-15855
Clouding tracing: Visualization of the mixing of fluid elements in convection-diffusion systems
[NASA-CR-191529] p 1148 N94-15965
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050
Modeling and simulation: A key to future defense technology
[TABES PAPER 93-654] p 1054 N94-16153
Evaporation kinetics of Mg2SiO4 crystals and melts from molecular dynamics simulations p 1219 N94-16331
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388
A trace-based comparison of shared memory multiprocessor architectures
[TR-432] p 1159 N94-16577
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
Linear and non-linear studies of Alfven waves in space. Stationary and dynamic processes in magnetospheric plasmas
[NASA-CR-193585] p 1239 N94-16647
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722
A computer-based training system combining virtual reality and multimedia
[DE93-013768] p 1132 N94-16819
Simulation of enhanced tokamak performance on D3-D using fast wave current drive
[DE93-014009] p 1203 N94-16823
Crystalline beam ground state
[DE93-014331] p 1211 N94-16827
Influence of fiber packing structure on permeability p 938 N94-16857
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027
The influence of the level formants on the perception of synthetic vowel sounds
[IFTR-41/1991] p 1002 N94-17064
Module interconnection frameworks for a real-time spreadsheet
[AD-A267752] p 1153 N94-17231
An introduction to structural models
[AD-A268151] p 1155 N94-17429
Space Station Freedom electrical performance model
[NASA-TM-106395] p 929 N94-17483
Research in presistent simulation: Development of the persistent ModSim object-oriented programming language
[AD-A268568] p 1157 N94-17620
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670

COMPUTERS
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
NASA Spacelink computer
[NASA-TM-109657] p 1140 N94-15228

CONCENTRATING
Investigations into the recovery of waste sulfuric acid with concentrated solar radiation
[DLR-FB-93-11] p 952 N94-17594

CONCENTRATION (COMPOSITION)
Second flight of the Spacelab grille spectrometer during the Atlas-1 mission
[AERONAUTICA-ACTA-A-367-199] p 923 N94-17592

CONCENTRATORS
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1046 N94-15873
Progress in the concentrator initiative program
[DE93-015006] p 1091 N94-15984

CONCENTRIC CYLINDERS
Numerical study of compressible boundary-level transition between two concentric cylinders
[NASA-CR-194622] p 1025 N94-16842
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269

CONCRETE STRUCTURES
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473

CONCRETES
User's guide: Hot-mix recycling of asphalt concrete pavements
[AD-A266939] p 983 N94-15177

CONCURRENT PROCESSING
Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
Concurrency control in rule-based software development environments
[AD-A267829] p 1155 N94-17404

CONDENSATES
Mesons at finite temperature in the NJL model with gluon condensate
[DE93-626697] p 1185 N94-17310
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452

CONDENSED MATTER PHYSICS
The Megascience Forum
[DE93-014445] p 1303 N94-16804

CONDENSERS (LIQUEFIERS)
Theoretical study of laminar film condensation on horizontal elliptical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737

CONDENSING
Gravity dependent condensation pressure drop and heat transfer in ammonia two-phase heat transport systems
[NLR-TP-92121-U] p 1031 N94-17615

CONDUCTING POLYMERS
Photochemistry in thin polymeric films
[AD-A266716] p 964 N94-15729
Synthesis of novel electrically conducting polymers: Potential conducting Langmuir-Blodgett films and conducting polymers on defined surfaces
[NASA-CR-194651] p 972 N94-17297
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494

CONDUCTION BANDS
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848

CONDUCTION ELECTRONS
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992

CONDUCTIVE HEAT TRANSFER
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
On the a-posteriori estimation of the modelling error for the heat conduction in a plate and its use for adaptive hierarchic modelling
[AD-A267965] p 1029 N94-17384
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543

CONDUCTIVITY
Theoretical studies of nonlinear optical properties of conjugated polymers
[AD-A267390] p 1193 N94-17024

CONDUCTORS
A device for testing cables
[NASA-CASE-LAR-14093-1] p 1010 N94-15988
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928

CONES (VOLCANOES)
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus p 1260 N94-16235
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling p 1286 N94-16381

CONFERENCES
The Third Annual NASA Science Internet User Working Group Conference
[NASA-CP-3170] p 1228 N94-15116
Symposium on the Future of Aeronautics in the Netherlands
[ETN-93-93780] p 853 N94-15120
Materials Research Society Symposium Proceedings, Volume 292: Biomolecular Materials
[AD-A265776] p 1116 N94-15138
Eighth International Workshop on Laser Ranging Instrumentation
[NASA-CP-3214] p 911 N94-15552
ACM SIGPLAN Workshop on ML and Its Applications
[AD-A266617] p 1147 N94-15725
Papers presented at the Eleventh International Symposium on Earth Tides
[COMMUNICATIONS-SER-B-158] p 1098 N94-15800

Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
Proceedings of the Fifteenth NASA Propagation Experimenters Meeting (NAPEX 15) and the Advanced Communications Technology Satellite (ACTS) Propagation Studies Miniworkshop
[NASA-CR-194539] p 994 N94-16035
A review of OPEX activities and measurement results p 994 N94-16036
Proceedings of the Second Workshop on Microgravity Experimentation
[DSS-NR15-43-1990] p 977 N94-16071
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Controlling chaotic behavior in CO2 and other lasers
[AD-A266431] p 1040 N94-16546
Proceedings of the Association for Computing Machinery Special Interest Group for Ada Artificial Intelligence Working Group
[AD-A266422] p 1165 N94-16559
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Neutrino mass and mixing: Summary of the neutrino sessions
[DE93-014342] p 1183 N94-16801
Fundamental-mode RF design in e(+)e(-) storage ring factories
[DE93-015249] p 1183 N94-16809
Plasma Science Committee (PLSC) and the Panel on Opportunities in Plasma Science and Technology (OPST)
[DE93-018142] p 1204 N94-16995
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331
Proceedings of the 1992 Antenna Applications Symposium, volume 1
[AD-A268167] p 1005 N94-17431
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485
Proceedings of the 6th International Conference on Narrow Gap Semiconductors
[AD-A268097] p 1015 N94-17570

CONFIDENCE LIMITS
Study of the rare decays K(sub L)(sup 0) yields (mu)e, K(sub L)(sup 0) yields ee, and K(sub L)(sup 0) yields (mu)(mu) at KEK
[DE93-753247] p 1180 N94-15135
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662

CONFIGURATION MANAGEMENT
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656

CONFINEMENT
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Confinement and stability of a Crystal Beam
[DE93-015400] p 1181 N94-16020
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
High beta and confinement studies of TFTR
[DE93-016204] p 1202 N94-16446

CONGESTION
Congestion control of high-speed networks
[AD-A267013] p 989 N94-15748

CONGRESSIONAL REPORTS
Naval aviation: The Navy is taking actions to improve the combat capabilities of its tactical aircraft. Report to Congressional Requesters
[AD-A268002] p 868 N94-17472

CONICAL FLOW
Thin-layer and full Navier-Stokes calculations for turbulent supersonic flow over a cone at an angle of attack
[NASA-CR-189103] p 861 N94-17558

CONICAL SCANNING
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1194 N94-17321

CONIFERS
Radar response of vegetation: An overview p 991 N94-15898
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
SAR backscatter from coniferous forest gaps p 1076 N94-16736

CONJUGATES
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088

CONJUGATION
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273

CONNECTIVE TISSUE
Micromechanics modeling and analysis of Haversian compact bone tissues as a fiber reinforced composite material
[AD-A268250] p 1129 N94-17456

CONNECTORS
Connector systems for structures
[NASA-CASE-MSC-21998-1] p 1046 N94-15707
A device for testing cables
[NASA-CASE-LAR-14093-1] p 1010 N94-15988

CONSERVATION
Soil conservation applications with C-band SAR p 1080 N94-16760

CONSERVATION EQUATIONS
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060

CONSISTENCY
Process evolution for the MARVEL environment
[AD-A267813] p 1155 N94-17398

CONSOLES
Ergonomics in the office environment p 1124 N94-16612

CONSOLIDATION
Processing, properties and applications of composites using powder-coated epoxy towpreg technology p 933 N94-15277

CONSONANTS (SPEECH)
The influence of the level formants on the perception of synthetic vowel sounds
[IFTR-41/1991] p 1002 N94-17064

CONSTITUTIVE EQUATIONS
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642

CONSTRAINTS
Automatic generation of production rules for integrity maintenance
[REPT-92-054] p 1156 N94-17501
Automatic translation of database integrity constraints into compensating production rules
[REPT-92-055] p 1234 N94-17502

CONSTRICTIONS
The nature of dynamic arteriolar vasoreactivity: A mini-review and A classification scheme
[AD-A266499] p 1128 N94-16783

CONSTRUCTION
Unitary plan wind tunnel landmark dedication and revitalization
[NASA-TM-109649] p 1302 N94-15434
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
Study of the National Science Foundation's South Pole Station as an analogous data base for the logistical support of a Moon laboratory
[NASA-TM-108429] p 1174 N94-17469

CONSTRUCTION INDUSTRY
Assessment of trends in the development of residential buildings from the standpoint of the fuel and energy requirements
[IFTR-6/1991] p 1093 N94-17092

CONSTRUCTION MATERIALS
Building a lunar base
[NASA-TM-109674] p 983 N94-15519
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408

CONSUMABLES (SPACECREW SUPPLIES)
Supporting life in space
[NASA-TM-109593] p 1135 N94-15285
STS-29 crew food tasting in building 45
[NASA-TM-109547] p 1136 N94-15382
Food for space
[NASA-TM-109668] p 1136 N94-15435
STS-31 crew training: firefighting, food tasting, EVA prep and post
[NASA-TM-109484] p 876 N94-15451

CONTACTORS
Hollow cathode heater development for the Space Station plasma contactor
[NASA-CR-191131] p 926 N94-16880

CONTAINMENT
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites
[DE93-015155] p 934 N94-16057

CONTAMINANTS
HyperVentilate: Decision-support software for soil vapor extraction technology application
[PB93-134880] p 1094 N94-15136
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857
Polished substrate surface and cleaning study for coated optic quality
[DE93-014116] p 1190 N94-15975
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727
Emissions of volatile organic compounds from stationary combustion sources: Numerical modeling capabilities
[DE93-014123] p 1096 N94-16825

CONTAMINATION
On the composition of neuKREEP: QMD contamination at Apollo 11? p 1266 N94-16276
Possible dust contamination of the early solar system p 1244 N94-16352
Field emitter arrays for RF vacuum microelectronics
[AD-A268595] p 1015 N94-17608
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649

CONTEXT
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974

CONTINENTAL SHELVES
Ray tracing on topographic Rossby waves
[AD-A267014] p 1112 N94-15844

CONTINUOUS WAVE LASERS
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Study of high speed interference photography with two-dimensional acousto-optical lattice deflection
[AD-A267823] p 1035 N94-17402
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538

CONTINUOUS WAVE RADAR
Microwave reflectometer ionization sensor
[NASA-CR-191464] p 922 N94-17083

CONTINUUM MECHANICS
Stability of flows in fluidized beds
[DE93-000245] p 1024 N94-16763

CONTINUUM MODELING
Progress in the modeling of the shock response and mitigation of thick composite shells
[AD-A267009] p 1057 N94-15524
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642
Continuum solvent models for computational chemistry
[DE93-016329] p 953 N94-17660

CONTOURS
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267

CONTRACT MANAGEMENT
Industrial labor relations manual
[NHB-5200.1B] p 1224 N94-15939
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941

CONTRACT NEGOTIATION
Industrial labor relations manual
[NHB-5200.1B] p 1224 N94-15939

CONTRACTORS
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
Government/contractor development teams
[TABES PAPER 93-460] p 1050 N94-16134
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
Emergency preparedness and planning p 1124 N94-16613

CONTRACTS
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
CONTRAST
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513
CONTROL EQUIPMENT
Serpentine manipulator planning and control for NASA Space-Shuttle payload servicing
[AD-A266961] p 879 N94-14969
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
CONTROL SIMULATION
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403
CONTROL STABILITY
Three axis force override rate control of a PUMA 560 manipulator
[AD-A267313] p 1048 N94-16944
Robust control of uncertain nonlinear systems
[AD-A268056] p 1167 N94-17506
CONTROL STICKS
Unistick vehicle controller
[NASA-TM-109618] p 1046 N94-15347
CONTROL SURFACES
Static aeroelastic response of an aircraft with asymmetric wing planforms representative of combat damage
[AD-A266890] p 865 N94-14951
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 1: Static water tunnel tests
[NASA-CR-177626-VOL-1] p 855 N94-15655
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 2: Static wind tunnel tests
[NASA-CR-177626-VOL-2] p 856 N94-15677
Aerodynamic control of NASP-type vehicles through vortex manipulation, volume 4
[NASA-CR-177626-VOL-4] p 857 N94-15720
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435
CONTROL SYSTEMS DESIGN
Research in robust control for hypersonic aircraft
[NASA-CR-194106] p 870 N94-15416
Transputer based control system for MTLRS
p 877 N94-15613
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Adaptive weld control for high-integrity welding applications
[TABES PAPER 93-604] p 1049 N94-16140
Controls of maglev suspension systems
[DE93-015540] p 1011 N94-16443
ALS engine controller system
[NASA-CR-194647] p 926 N94-16654
Cognitive engineering models in space systems
[NASA-CR-193473] p 1140 N94-16716
A modular control architecture for real-time synchronous and asynchronous systems
[DE93-015439] p 1166 N94-16888
Development and analysis of startup strategies for particle bed nuclear rocket engine
[AD-A267949] p 927 N94-17053
A proposed ground segment design for small satellites
p 878 N94-17154
Ground segment definition for the Spanish small satellite program (MINISAT) p 878 N94-17155
Discrete sliding mode control for nonlinear sampled data systems
[AD-A267500] p 1167 N94-17369
CONTROL THEORY
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
Contribution to the elaboration of some adaptive control algorithms for fermentation processes monitoring
[LAAS-92513] p 1116 N94-15643
The design and analysis of robust feedback systems
[AD-A267152] p 1165 N94-15778
Controls of maglev suspension systems
[DE93-015540] p 1011 N94-16443
Computation of the Fluid and Optical Fields About the Stratospheric Observatory for Infrared Astronomy (SOFIA) and the Coupling of Fluids, Dynamics, and Control Laws on Parallel Computers
[NASA-CR-193168] p 858 N94-16510
Cognitive engineering models in space systems
[NASA-CR-193473] p 1140 N94-16716
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
Modeling, estimation and control of distributed parameter systems
[AD-A267325] p 1026 N94-17003
Hypervelocity orbital intercept guidance using certainty control
[AD-A267297] p 1174 N94-17219
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286
Discrete sliding mode control for nonlinear sampled data systems
[AD-A267500] p 1167 N94-17369
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412
CONTROL VALVES
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
CONTROLLABILITY
Aerodynamic control of NASP-type vehicles through vortex manipulation, volume 4
[NASA-CR-177626-VOL-4] p 857 N94-15720
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793
CONTROLLED FUSION
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670
CONTROLLERS
A microprocessor controller for a towing tank drive and flow visualisation system
[AD-A267087] p 872 N94-15543
ALS engine controller system
[NASA-CR-194647] p 926 N94-16654
Three axis force override rate control of a PUMA 560 manipulator
[AD-A267313] p 1048 N94-16944
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
CONVECTION
Clouding tracing: Visualization of the mixing of fluid elements in convection-diffusion systems
[NASA-CR-191529] p 1148 N94-15965
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Unsteady fluid and optical simulation of transonic aero-windows
[AIAA PAPER 93-3017] p 858 N94-16512
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
Propagation characteristics of mesoscale convective systems
[AD-A268130] p 1109 N94-17522
CONVECTION CURRENTS
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247
A correlative comparison of geomagnetic storms and auroral substorms using geomagnetic indeces
[AD-A268081] p 1102 N94-17512
Propagation characteristics of mesoscale convective systems
[AD-A268130] p 1109 N94-17522
Further development and testing of a second-order bulk boundary layer model
[AD-A268071] p 1109 N94-17552
CONVECTION-DIFFUSION EQUATION
Convective flow effects on protein crystal growth
[NASA-CR-194560] p 1206 N94-15476
CONVECTIVE FLOW
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Convective flow effects on protein crystal growth
[NASA-CR-194560] p 1206 N94-15476
Clouding tracing: Visualization of the mixing of fluid elements in convection-diffusion systems
[NASA-CR-191529] p 1148 N94-15965
Models of thermal/chemical boundary layer convection: Potential application to Venus p 1279 N94-16348
CONVECTIVE HEAT TRANSFER
Dual active surface, miniature, plug-type heat flux gauge
[NASA-CASE-LEW-15643-1] p 1033 N94-15928
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980
On the relationship between tectonic plates and thermal mantle plume morphology p 1104 N94-16349
Fluid flow and heat convection studies for actively cooled airframes
[NASA-CR-194624] p 1024 N94-16491
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
On the a-posteriori estimation of the modelling error for the heat conduction in a plate and its use for adaptive hierarchic modelling
[AD-A267965] p 1029 N94-17384
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543
CONVENTIONS
The early activities of the COPERS and the drafting of the ESRO Convention (1961/62)
[ESA-HSR-4] p 1225 N94-16593
CONVERGENCE
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
Unipolar terminal-attractor based neural associative memory with adaptive threshold
[NASA-CASE-NPO-18790-1-CU] p 1165 N94-15958
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
Asymptotic behavior of firmly non expansive sequences
[DE93-628589] p 1171 N94-17642
Fixed point iterations for strictly hemi-contractive maps in uniformly smooth Banach spaces
[DE93-628591] p 1175 N94-17644
CONVERGENT-DIVERGENT NOZZLES
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
CONVERSATION
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
CONVOLUTION INTEGRALS
A simulation study of the performance of the NASA (2,1,6) convolutional code on RFI/burst channels
p 997 N94-16508
COOL STARS
The formation process of the He I lambda 10830 line in cool giant stars
[NASA-CR-194648] p 1240 N94-17094
COOLERS
Future development in cryogenic techniques for space
p 901 N94-15042
Infrared detectors and coolers for space instrumentation: Summary and concluding remarks p 904 N94-15059
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485
COOLING
Theoretical studies relating to the interaction of radiation with matter
[AD-A266894] p 1179 N94-14949
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176
The cooling rates of pahoehoe flows: The importance of lava porosity p 1103 N94-16282
More on the cooling history of angrite LEW 86010
p 1245 N94-16400
Limited subsolidus diffusion in type B1 CAI: Evidence from Ti distribution in spinel p 954 N94-16401

Zaoyang chondrite cooling history from pyroxene Fe(2+)-Mg intracrystalline ordering and exolutions
p 1246 N94-16417
Techniques for preparation of ingot metallurgical discontinuous composites
[AD-D015748] p 940 N94-16933
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540

COOLING SYSTEMS
Cool suit
[NASA-TM-109639] p 1120 N94-15250
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
Geometrical vapor blocker for parallel condensation tubes requiring cooling
[NASA-CASE-MSC-22090-1] p 1022 N94-15962
Effects of rotation on coolant passage heat transfer. Volume 2: Coolant passages with trips normal and skewed to the flow
[NASA-CR-4396-VOL-2] p 1023 N94-15991
Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers
[DE93-015215] p 1024 N94-16808

COORDINATION
Complex information coordination performance: Differential changes in working memory contributions following training
[AD-A267007] p 1132 N94-15762

COPOLYMERIZATION
Swelling equilibria for temperature-sensitive ampholytic hydrogels
[DE93-015264] p 966 N94-15996

COPOLYMERS
Vectorial electron transfer in spatially ordered arrays
[DE93-018150] p 1185 N94-16971
Responsive copolymers for enhanced petroleum recovery
[DE93-018030] p 971 N94-16999

COPPER
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Continuing research on friction and wear of materials
[AD-A268291] p 1049 N94-17566

COPPER ALLOYS
Dynamical Ising model simulations of nucleation and growth in copper-cobalt alloys
[DE93-015336] p 957 N94-16015
Aluminum-lithium technology
[TABES PAPER 93-601] p 962 N94-16137
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765

COPPER CHLORIDES
High-performance nonlinear optical material developed in Japan
[AD-A266194] p 1191 N94-16126
Investigation of the influence of applied potential on erosion-corrosion of copper in alkaline chloride solutions
[AD-A266448] p 958 N94-16562

COPPER OXIDES
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663

CORE FLOW
Lava crusts and flow dynamics p 1103 N94-16316

CORE SAMPLING
A discontinuous melt sheet in the Manson impact structure p 1103 N94-16269
Manson impact structure, Iowa: First geochemical results for drill core M-1 p 1103 N94-16322
Composition of Apollo 17 core 76001 p 1275 N94-16326
Composition and maturity of the 60013/14 core p 1275 N94-16327

CORES
Atmospheric ionization by solar particles detected by nitrate measurement in antarctic snow
[AD-A267583] p 1299 N94-17208

CORNER FLOW
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834

CORONAL LOOPS
FNAS/solar flare energetics
[NASA-CR-193574] p 1299 N94-17089

CORONAS
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Tectonics of Neyterkob corona on Venus p 1270 N94-16299
Large-scale volcanism associated with coronae on Venus p 1285 N94-16376

CORRECTION
Timebias corrections to predictions p 875 N94-15591

CORRELATION
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by anomalous x ray scattering in Fe-Ni alloys
[DE93-015906] p 1209 N94-16171
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021

CORRELATION COEFFICIENTS
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012

CORRELATORS
Synthetic aperture radar signal processing: Trends and technologies p 992 N94-15908
Wideband acousto-optic correlator for an ESM receiver upgrade
[TABES PAPER 93-661] p 1054 N94-16156
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918

CORROSION
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
Corrosion kinetics and mechanisms for nuclear grade graphites
[DE93-015462] p 947 N94-16105
Environmental effects on iron aluminides
[DE93-015820] p 958 N94-16166
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715
Aircraft carrier exposure tests of cast magnesium alloys
[AD-A268260] p 962 N94-17418

CORROSION PREVENTION
XPS analysis of Al/EPDM bondlines from IUS SRM-1 polar bosses
[AD-A266851] p 1056 N94-14945
The corrosion protection of metals by ion vapor deposited aluminum
[NASA-TM-108425] p 955 N94-15832
Assessment of chromate and non-chromate conversion coatings for Al alloys using electrochemical impedance spectroscopy
[AD-A267205] p 965 N94-15859
Formation of pitting resistant anodized films on aluminum
[AD-D015812] p 958 N94-16486
Vanadium corrosion studies
[AD-A266489] p 959 N94-16781
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473

CORROSION RESISTANCE
Assessment of chromate and non-chromate conversion coatings for Al alloys using electrochemical impedance spectroscopy
[AD-A267205] p 965 N94-15859
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites
[DE93-015688] p 934 N94-16158
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
Wear resistant titanium material development
[AD-A266474] p 959 N94-16780
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473

CORROSION TESTS
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
Potential transients, transmission and electrochemical corrosion detection
[DE93-014055] p 956 N94-15922

COSMIC BACKGROUND EXPLORER SATELLITE
COBE video news
[NASA-TM-109598] p 987 N94-15292

COSMIC DUST
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites p 1244 N94-16343
The chromosphere of VV cephei and the distribution of circumstellar dust around red giants and supergiants
[NASA-CR-193594] p 1297 N94-16866
Cosmic dust and space debris measurements on board the small satellites HITEN and BREM-SAT p 890 N94-17147

COSMIC RAY SHOWERS
Astrophysics with MILAGRO
[DE93-012722] p 1240 N94-17657

COSMIC RAYS
Astronomy and astrophysics p 1239 N94-15970
Al-26-Mg-26 ages of iron meteorites p 1242 N94-16240
Contained (nu) events observed in Soudan 2
[DE93-015548] p 1300 N94-17233
Astrophysics with MILAGRO
[DE93-012722] p 1240 N94-17657

COSMOCHEMISTRY
Geochemistry and cosmochemistry of fullerenes 3: Reaction of C60 and C70 with ozone p 953 N94-16243
Potassium isotope cosmochemistry, volatile depletion and the origin of the Earth p 953 N94-16259
Catalytic crystallization of ices by small silicate smokes at temperatures less than 20K p 1219 N94-16420

COSMOLOGY
Astronomy and astrophysics p 1239 N94-15970
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Particle physics and cosmology, Task C
[DE93-016865] p 1239 N94-16118

COSMONAUTS
ASTP 15th anniversary clip-media release
[NASA-TM-109534] p 1302 N94-15399

COSPAS
Life saving satellites
[NASA-TM-109616] p 862 N94-15426

COST ANALYSIS
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
New York MARKAL: An evaluation of carbon dioxide emission control strategies in New York State
[DE93-013149] p 1095 N94-15999
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
Cost drivers: Why do conventional satellites cost so much? p 897 N94-17190
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515

COST EFFECTIVENESS
Reengineering: An engineering problem
[AD-A267117] p 1146 N94-15653
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
Modeling and simulation: A key to future defense technology
[TABES PAPER 93-654] p 1054 N94-16153

COST ESTIMATES
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
A conceptual design study for a two-dimensional, electronically scanned thinned array radiometer
[NASA-TM-109051] p 1085 N94-17665

COST REDUCTION
Techno-economic requirements for composite aircraft components p 940 N94-16864
A mini satellite called Arsene: The way to make it at a minimum cost p 895 N94-17179
MINISAT programme p 896 N94-17182
Small satellite product assurance p 896 N94-17188
Cost drivers: Why do conventional satellites cost so much? p 897 N94-17190

COSTS
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
Approaching the new reality
[TABES PAPER 93-230] p 1050 N94-16131
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation
[DE93-016435] p 1039 N94-16450
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522
Military satellite communications: Opportunity to save billions of dollars. Report to the Chairman, Legislation, and National Security Subcommittee, Committee on Government Operations, House of Representatives
[AD-A267627] p 1002 N94-17199

COUETTE FLOW
Numerical study of compressible boundary-level transition between two concentric cylinders
[NASA-CR-194622] p 1025 N94-16842
Thermally-sustained structure in convectively unstable systems
[NASA-TM-106375] p 1027 N94-17112

COULOMB COLLISIONS
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
Evolution of hadron beams under intrabeam scattering
[DE93-014330] p 1184 N94-16826
Six dimensional tracking simulator for H(-) injection in AGS Booster
[DE93-015396] p 1184 N94-16885

COUNTERMEASURES
Space countersurveillance: A requisite for theater defense planning
[AD-A266871] p 884 N94-15147
Living well in space: Ensuring crew capability
[NASA-TM-109538] p 1120 N94-15369

COUPLED MODES
Emittance and beam size distortion due to linear coupling
[DE93-015402] p 1184 N94-16886

COUPLERS
Gratings and waveguides p 1226 N94-14987
Optical system storage design with diffractive optical elements p 1198 N94-17360

COUPLINGS
Connector systems for structures
[NASA-CASE-MSC-21998-1] p 1046 N94-15707
Attachment device
[NASA-CASE-MSC-21885-1] p 1047 N94-15925
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210

COVARIANCE
Abundance recovery error analysis using simulated AVIRIS data p 1074 N94-16708
Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718
Processing of resonance parameter covariance files
[DE93-015506] p 1231 N94-16874
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463

COWLINGS
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681

CRACK GEOMETRY
Crack-tip-opening angle measurements and crack tunneling under stable tearing in thin sheet 2024-T3 aluminum alloy
[NASA-CR-191523] p 931 N94-15184
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295

CRACK PROPAGATION
Crack-tip-opening angle measurements and crack tunneling under stable tearing in thin sheet 2024-T3 aluminum alloy
[NASA-CR-191523] p 931 N94-15184
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
Design of a cruciform bend specimen for determination of out-of-plane biaxial tensile stress effects on fracture toughness for shallow cracks
[DE93-015455] p 1059 N94-16104
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites
[DE93-015688] p 934 N94-16158
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638

CRACK TIPS
Crack-tip-opening angle measurements and crack tunneling under stable tearing in thin sheet 2024-T3 aluminum alloy
[NASA-CR-191523] p 931 N94-15184
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587
Transformation toughening of composite ceramics
[AD-A267304] p 971 N94-16980
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638

CRACKING (CHEMICAL ENGINEERING)
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Heating of lubricant with an electric resistance heater
[VTT-TIED-1359] p 974 N94-17547

CRACKING (FRACTURING)
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890
Static and dynamic investigations of brittle elasto-optical material
[IFTR-3/1992] p 1061 N94-17086
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295
Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542

CRACKS
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507

CRASH INJURIES
National Transportation Safety Board annual review of aircraft accident data, US general aviation, calendar year 1989
[PB93-160687] p 863 N94-16464
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263

CRASHES
Basic principles of helicopter crashworthiness
[AD-A267099] p 862 N94-15637
National Transportation Safety Board annual review of aircraft accident data, US general aviation, calendar year 1989
[PB93-160687] p 863 N94-16464
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263

CRASHWORTHINESS
Basic principles of helicopter crashworthiness
[AD-A267099] p 862 N94-15637

CRATERING
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
Cat Mountain: A meteoritic sample of an impact-melted chondritic asteroid p 1244 N94-16328

CREATIVITY
A scientific basis for computational science
[AD-A266697] p 1148 N94-15841

CREEP ANALYSIS
Modelling of creep data for plastics
[NPL-DMM(A)-92] p 1057 N94-15017
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
On the design of structural components using materials with time-dependent properties
[NASA-TM-108428] p 1059 N94-16519
Development of a constitutive model for creep and life prediction of advanced silicon nitride ceramics
[DE93-015894] p 968 N94-16813

CREEP PROPERTIES
A model for non-linear creep and physical ageing in PVC
[NPL-DMM(A)-91] p 1057 N94-15016
Modelling of creep data for plastics
[NPL-DMM(A)-92] p 1057 N94-15017
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
The influence of thermal aging on the microstructure and fatigue properties of modified 9Cr-1Mo steel
[DE93-015489] p 957 N94-16106
Rheology of water and ammonia-water ices p 953 N94-16188
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453

The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
Development of a constitutive model for creep and life prediction of advanced silicon nitride ceramics
[DE93-015894] p 968 N94-16813
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890

CREEP RUPTURE STRENGTH
Modelling of creep data for plastics
[NPL-DMM(A)-92] p 1057 N94-15017
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
Tensile and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires
[NASA-TM-106350] p 962 N94-17652

CREEP STRENGTH
Rheology of water and ammonia-water ices
p 953 N94-16188
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890

CRETACEOUS-TERTIARY BOUNDARY
Cretaceous-tertiary boundary spherules and Cenozoic microtektites: Similarities and differences
p 1241 N94-16186
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness
p 1103 N94-16211
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement
p 1242 N94-16245
Manson impact structure, Iowa: First geochemical results for drill core M-1 p 1103 N94-16322
Preliminary Ar-40/Ar-39 age spectrum and laser probe dating of the M1 core of the Manson Impact Structure, Iowa: A K-T boundary crater candidate
p 1104 N94-16334
Chondritic ratios of Fe/Cr/Ir in Kerguelen Plateau (Hole 738C) K/T carbonate-rich sediments support asteroid-cometary impact at K/T time
p 1244 N94-16357
Geochemical evidences for two chondritic-like cometary or asteroidal impacts before and at the K/T boundary
p 1244 N94-16359

CREW PROCEDURES (INFLIGHT)
STS-30 Post-Flight Press Conference --- Space Shuttle Launch, Magellan/IUS deploy, Crew Activites, and Landing
[NASA-TM-109580] p 879 N94-15264
STS-30 mission tape --- Space Shuttle Launch, Crew Activities, Landing, and Air-to-Ground Transmission
[NASA-TM-109582] p 879 N94-15266
STS-29 pre-launch and post-landing egress
[NASA-TM-109574] p 1135 N94-15305
STS-29 Post-Flight Press Conference --- Shuttle Launch, TDRS-D/IUS Deployment, Crew Activites, and Shuttle Landing
[NASA-TM-109575] p 880 N94-15306
STS-29 onboard 16mm photography quick release
[NASA-TM-109576] p 880 N94-15307
STS-34 McCully and Baker during IFM training
[NASA-TM-109462] p 880 N94-15357
STS-34 Galileo integrated deploy sim
[NASA-TM-109463] p 880 N94-15358
STS-34 Chang-Diaz and E. Baker during Galileo contingency training in WFTF
[NASA-TM-109466] p 1135 N94-15361
STS-30 onboard 16mm photography quick release
[NASA-TM-109579] p 881 N94-15423
STS-31 onboard 16mm photography quick release --- Onboard Activities
[NASA-TM-109478] p 881 N94-15438
STS-31 mission highlights resource tape
[NASA-TM-109479] p 881 N94-15440
STS-31 crew training inflight maintenance and ballout exercises in CCT and WFTF
[NASA-TM-109483] p 876 N94-15450

CREW PROCEDURES (PREFLIGHT)
STS-29 pre-launch and post-landing egress
[NASA-TM-109574] p 1135 N94-15305

CREWS
Carpal tunnel syndrome and other cumulative trauma disorders of the arm and hand and occupation in US Navy enlisted personnel
[AD-A267747] p 1129 N94-17374

CRIME
Criminal acts against civil aviation, fiscal year 1992
[AD-A268014] p 863 N94-17586

CRITERIA
Slidesurfaces with adaptive new definitions (SAND) for transient analysis
[DE93-014909] p 1059 N94-15983

CRITICAL LOADING
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080

CRITICAL MASS
The stability of ions in a storage ring in the presence of small gap insertion devices
[DE93-015387] p 1184 N94-16828

CRITICAL POINT
Density and temperature relaxation near the critical point of carbon dioxide under reduced gravity
p 944 N94-15164
Temperature propagation in near-critical fluids prior to and during separation p 944 N94-15165
Pressures of supercritical salt solutions
p 945 N94-15166

CRITICAL TEMPERATURE
Partitioning of Nb, Mo, Ba, Ce, Pb, Th and U between immiscible carbonate and silicate liquids: Evaluating the effects of P2O5,F, and carbonate composition
p 953 N94-16283

CROP GROWTH
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations
[NASA-CR-194654] p 1118 N94-17279

CROSS CORRELATION
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267

CROSS COUPLING
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273

CROSS POLARIZATION
External calibration of polarimetric radar images using distributed targets p 1079 N94-16753
Comparison of edges detected at different polarisations in MAESTRO data p 1080 N94-16761
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
[AD-A267479] p 1004 N94-17364

CROSSLINKING
Rational design, construction, and processing of high-performance nonlinear optical materials
[AD-A266185] p 1191 N94-16454
The photochemistry of poly(methylphenylphosphazene)
[AD-A267320] p 970 N94-16948

CROSSTALK
A complete study of differential wax-wane focus servo technique p 1199 N94-14996
Unipolar terminal-attractor based neural associative memory with adaptive threshold
[NASA-CASE-NPO-18790-1-CU] p 1165 N94-15958
External calibration of polarimetric radar images using distributed targets p 1079 N94-16753

CRRES (SATELLITE)
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft
[AD-A266404] p 1101 N94-16551
L-shell binning and display of sensor data from the CRRES spacecraft
[AD-A267256] p 888 N94-16990

CRUCIFORM WINGS
The effect of the nose shape and wing location toward the wing vortex breakdown
[AD-A267724] p 855 N94-14942

CRUDE OIL
Responsive copolymers for enhanced petroleum recovery
[DE93-018030] p 971 N94-16999

CRUISING FLIGHT
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571

CRUSTAL FRACTURES
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
High-resolution seismic reflection survey at the Manson crater, Iowa p 1103 N94-16307

CRUSTS
Crustal structure and igneous processes in a chondritic Io p 1243 N94-16292
The thickness of eucritic crust in the HED parent body
p 1104 N94-16416

CRYOGENIC COOLING
Future development in cryogenic techniques for space
p 901 N94-15042
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485

CRYOGENIC EQUIPMENT
X ray microcalorimeters: Principles and performance
p 899 N94-15027
Cryogenic readout electronics for astronomical applications p 910 N94-15099
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875
Aluminum-lithium technology
[TABES PAPER 93-601] p 962 N94-16137
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485

CRYOGENIC FLUID STORAGE
Power Reactant Storage Assembly (PRSA) (Space Shuttle). PRSA hydrogen and oxygen DVT tank refurbishment
[NASA-CR-188262] p 926 N94-16922
Ground testing for the no-vent fill of cryogenic tanks: Results of tests for a 71 cubic foot tank
[NASA-TM-106293] p 1030 N94-17486

CRYOGENIC FLUIDS
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521

CRYOGENIC TEMPERATURE
Cryogenic measurements of aerojet GaAs n-JFETs
[NASA-TM-103972] p 1009 N94-15765

CRYPTOGRAPHY
A security architecture for fault-tolerant systems
[AD-A266178] p 1152 N94-16982

CRYSTAL DEFECTS
Search for far infrared radiation from optically pumped defect modes
[AD-A266744] p 1206 N94-15822
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Research support for cadmium telluride crystal growth
[NASA-CR-193557] p 1210 N94-16646
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

CRYSTAL DISLOCATIONS
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844

CRYSTAL GROWTH
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764

Dynamical Ising model simulations of nucleation and growth in copper-cobalt alloys
[DE93-015336] p 957 N94-16015
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
Evaporation kinetics of Mg2SiO4 crystals and melts from molecular dynamics simulations p 1219 N94-16331
Experimentally reproduced relict enstatite in porphyritic chondrules of enstatite chondrite composition
p 1244 N94-16363
Growth of single crystals of mercuric iodide on the ground and in space
[DE93-015523] p 1209 N94-16442
Research support for cadmium telluride crystal growth
[NASA-CR-193557] p 1210 N94-16646
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676

CRYSTAL LATTICES
Simulation studies for surfaces and materials strength
[NASA-CR-193387] p 1056 N94-15004
Induced thermoluminescence study of experimentally shock-loaded oligoclase p 953 N94-16266
New organic materials for nonlinear optics applications
[AD-A266451] p 1192 N94-16563
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Theoretical studies of the crystal structure of rare earths and actinides at zero temperature
[DE93-016488] p 1214 N94-17301
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing
[NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437

CRYSTAL OSCILLATORS
Double-driven shield capacitive type proximity sensor
[NASA-CASE-GSC-13541-1] p 1165 N94-15946
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480

CRYSTAL STRUCTURE
MeV ion-beam analysis of optical data storage films
p 1226 N94-14984
STS-26 SSIP briefing --- Titanium Grain Formation Experiment and Crystal Membrane Experiment
[NASA-TM-109556] p 976 N94-15280
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176
Zaoyang chondrite cooling history from pyroxene Fe(2+)-Mg intracrystalline ordering and exolutions
p 1246 N94-16417
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS
[DE93-016218] p 1209 N94-16447
Hemoglobin
[AD-A266455] p 1123 N94-16566
JSEP fellowship
[AD-A266568] p 1211 N94-16800
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing
[NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327

CRYSTAL SURFACES
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319

CRYSTALLINITY
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by anomalous x ray scattering in Fe-Ni alloys
[DE93-015906] p 1209 N94-16171

CRYSTALLIZATION
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
Systematic chemical variations in large 3AB iron meteorites: Clues to core crystallization
p 1241 N94-16213
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
Olivines in the Kaba carbonaceous chondrite and constraints on their formation p 1219 N94-16255
Petrologic models of 15388, a unique Apollo 15 mare basalt p 1264 N94-16258
Silica-bearing objects in the Dengli H3.8 and Gorlovka H3-4 chondrites p 1242 N94-16265
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
The dregs of crystallization in Zagami
p 1245 N94-16390
Catalytic crystallization of ices by small silicate smokes at temperatures less than 20K p 1219 N94-16420
Crystalline beam ground state
[DE93-014331] p 1211 N94-16827
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046
The roles of fluid motion and other transport phenomena in the morphology of materials
[NASA-CR-194665] p 1028 N94-17298

CRYSTALLOGRAPHY
Solution behaviour in microgravity: Considerations for protein crystal growth p 982 N94-16102
Exsolved kirschsteinite in angrite LEW86010 olivine
p 1245 N94-16410
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides
[AD-A266246] p 950 N94-16931
Transformation toughening of composite ceramics
[AD-A267304] p 971 N94-16980
Theoretical studies of the crystal structure of rare earths and actinides at zero temperature
[DE93-016488] p 1214 N94-17301
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319

CRYSTALS
Search for far infrared radiation from optically pumped defect modes
[AD-A266744] p 1206 N94-15822
Confinement and stability of a Crystal Beam
[DE93-015400] p 1181 N94-16020

CULTURE TECHNIQUES
Cultured normal mammalian tissue and process
[NASA-CASE-MSC-21984-1] p 1117 N94-15969
Factors determining the release of nitric oxide --- Calcium/cadmium transport by renal cortical collectin duct cells
[AD-A266232] p 1118 N94-17224

CUMULUS CLOUDS
Spatial resolution and cloud optical thickness retrievals p 1066 N94-16671

CURING
Process for shaping articles from electrosetting compositions
[AD-D015787] p 935 N94-16534

CURRENT CONVERTERS (AC TO DC)
Circuits and control processes for combining direct converters and inverter motors
[ETN-93-94399] p 1008 N94-15448

CURRENT DENSITY
High temperature superconductivity
[AD-A267006] p 1008 N94-15635
Resonant frequencies of irregularly shaped microstrip antennas using method of moments
[NASA-TP-3386] p 989 N94-15767
Inductive effects during second harmonic current drive experiments on T-10
[DE93-014411] p 1202 N94-16803
The inverse problem to the evaluation of magnetic fields
[DE93-015239] p 1175 N94-17288
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526
Field emitter arrays for RF vacuum microelectronics
[AD-A268595] p 1015 N94-17608
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621

CURRENT DISTRIBUTION
Determination of the electromagnetic fields radiated from the ARES EMP simulator
[AD-A267069] p 988 N94-15668
The inverse problem to the evaluation of magnetic fields
[DE93-015239] p 1175 N94-17288

CURTAINS
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123

CURVATURE
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line
[NASA-TP-3359] p 859 N94-16574

CURVE FITTING
Formation of on-site normal points
p 917 N94-15592
Moments in statistics: Approximations to densities and goodness-of-fit
[AD-A266600] p 1173 N94-16726

CYCLES
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
A Pluto thermal model p 1256 N94-16216

CYCLIC ACCELERATORS
Evolution of hadron beams under intrabeam scattering
[DE93-014330] p 1184 N94-16826

CYCLIC HYDROCARBONS
Advanced thermally stable jet fuels
[DE93-017711] p 975 N94-16996
Synthesis of potential high-energy fuels
[AD-A267508] p 975 N94-17073
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520

CYCLIC LOADS
Quantitative assessment of the accuracy of constitutive laws for plasticity with an emphasis on cyclic deformation
[AD-A267562] p 961 N94-17109
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269

CYCLONES
Arctic cyclones and Marginal Ice Zone (MIZ) variability
[AD-A268810] p 1108 N94-17465

CYCLOTRON RESONANCE
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992

CYLINDRICAL BODIES
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

CYLINDRICAL SHELLS
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
Sound radiation from infinite laminated composite shell with periodic rib stiffening
[DRA/TM(USGR)92326] p 933 N94-15699

CYSTEINE
The relationship of metallothionein induction to the heat shock response
[AD-A266634] p 1122 N94-15741

CYTOLOGY
Cultured normal mammalian tissue and process
[NASA-CASE-MSC-21984-1] p 1117 N94-15969
Heat shock protein induction in human cells by CO2 laser irradiation
[AD-A266430] p 1117 N94-16545

CYTOMETRY
Quantitative method of measuring cancer cell urokinase and metastatic potential
[NASA-CASE-MSC-21715-1] p 1117 N94-15967

D

D REGION
Effect of powerful oblique HF waves on ionospheric D-layer absorption
[AD-A268443] p 1102 N94-17499

DAMAGE
Slidesurfaces with adaptive new definitions (SAND) for transient analysis
[DE93-014909] p 1059 N94-15983

Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379

DAMAGE ASSESSMENT

Effect of tow alignment on the mechanical performance of 3D woven textile composites p 937 N94-16851
Stochastic damage evolution in textile laminates p 939 N94-16861
Techno-economic requirements for composite aircraft components p 940 N94-16864
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
Overview of the FAA/DCA/NLR programs related to ageing aircraft
[NLR-TR-92119-U] p 854 N94-17614

DAMPING

Soliton-like structures in double stimulated Brillouin scattering p 1200 N94-15207
Mechanical energy absorber
[NASA-CASE-MSC-22111-1] p 1047 N94-15966
Hydraulic pump with integral electric motor
[AD-D015782] p 1011 N94-16549
Interpenetrating polymer network acoustic damping material
[AD-D015889] p 969 N94-16916
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246
Quantum phase fluctuations in the Jaynes-Cummings model: Effects of cavity damping
[DE93-627984] p 1186 N94-17612

DATA ACQUISITION

Preliminary analysis of University of North Dakota aircraft data from the FIRE Cirrus IFO-2
[NASA-CR-193357] p 866 N94-15429
A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
User manual and program description of the data acquisition system of PML-pulse physics
[AD-A266752] p 1147 N94-15776
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819
International collaboration in SAR ground data systems p 993 N94-15917
Index of NASA prefixed forms
[NHB-1420.21] p 1230 N94-15936
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment p 995 N94-16038
Development of the Laser-based R/D Test-bed System (LTS) p 978 N94-16080
KC-135 acceleration monitoring and data acquisition system p 868 N94-16090
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607
AVIRIS ground data processing system p 1071 N94-16692
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Automated strain gauge plethysmograph
[AD-A267323] p 1035 N94-17002
Small imaging satellite for Earth observing system adjunct p 891 N94-17151
OREMUS: Prototype of an orbit determination center dedicated to mini-satellite control p 878 N94-17156
The STRV On Board Data Handling (OBDH) system: An introduction p 895 N94-17178
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
Automated data collection system for the TCM3 transcutaneous pO2/pCO2 monitoring system
[AD-A268400] p 1129 N94-17424
User's manual for the Langley Research Center 14- by 22- foot subsonic tunnel static data acquisition system
[NASA-TM-109027] p 861 N94-17639

DATA BASE MANAGEMENT SYSTEMS

The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
Monotone approximate query processing
[AD-A267153] p 1169 N94-15779
Method for restructuring a database using a relational database scheme derived by selecting subscheme joins to avoid cycles
[AD-D015816] p 1231 N94-16490
Managing information as a corporate asset: Key strategies for information professionals to remain competitive
[DE93-015515] p 1232 N94-16875
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
The IMS software integration platform
[AD-A266285] p 1151 N94-16910
A proposed research program in strategic computing
[AD-A267516] p 1153 N94-17078
An examination of two Ada language object-oriented databases
[AD-A267486] p 1154 N94-17366

DATA BASES

Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Database system studies in fine grain optoelectronic computing
[AD-A267026] p 1145 N94-15627
The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
Toxic substances registry system: Index of material safety data sheets
[NASA-TM-109332] p 1121 N94-15658
TAFVER 2 users manual
[AD-A266850] p 1106 N94-15757
Monotone approximate query processing
[AD-A267153] p 1169 N94-15779
A study of the observed tidal residue vectors B versus oceanic tidal load vectors L p 1100 N94-15813
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Database for propagation models p 996 N94-16049
A study of land mobile satellite service multipath effects using SATLAB software p 997 N94-16051
Materials, processes, and environmental engineering network
[TABES PAPER 93-610] p 1051 N94-16142
Method for restructuring a database using a relational database scheme derived by selecting subscheme joins to avoid cycles
[AD-D015816] p 1231 N94-16490
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568
Managing information as a corporate asset: Key strategies for information professionals to remain competitive
[DE93-015515] p 1232 N94-16875
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036
Critically evaluated/distributed database of IRAS LRS spectra
[NASA-CR-193611] p 1232 N94-17038
Defense RDT&E online system (DROLS) handbook
[AD-A267546] p 1232 N94-17101
Design and implementation of an interface editor for the Amadeus multi-relational database front-end system
[AD-A267403] p 1233 N94-17114
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207
Strategic planning for aircraft noise route impact analysis: A three dimensional approach
[NASA-CR-191484] p 1178 N94-17278
Windshear database for forward-looking systems certification
[NASA-TM-109012] p 1108 N94-17283
An examination of two Ada language object-oriented databases
[AD-A267486] p 1154 N94-17366
Process evolution for the MARVEL environment
[AD-A267813] p 1155 N94-17398
Automatic generation of production rules for integrity maintenance
[REPT-92-054] p 1156 N94-17501
Automatic translation of database integrity constraints into compensating production rules
[REPT-92-055] p 1234 N94-17502

DATA COMPRESSION

Computer networking at SLR stations p 917 N94-15594
HP upgrade operational streamlining p 918 N94-15596
Efficient algorithmic techniques for combinatorial problems
[AD-A267151] p 1172 N94-15777
Spaceborne Imaging Radar-C instrument p 990 N94-15890
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694
Lossless compression of AVIRIS data: Comparison of methods and instrument constraints p 1075 N94-16713

DATA CORRELATION

Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600

DATA FLOW ANALYSIS

Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
The alignment-distribution graph
[NASA-CR-194609] p 1148 N94-15956
Efficient compilation of array statements for private memory multicomputers
[AD-A266595] p 1160 N94-16724
Efficient scheduling of real-time compute-intensive periodic graphs on large grain data flow multiprocessor
[AD-A267444] p 1141 N94-17030
Accurate analysis of array references
[AD-A268069] p 1162 N94-17550

DATA INTEGRATION

Pixel-level fusion using interest images
[AD-A266640] p 1164 N94-15746
Notes on the use of Dempster-Shafer and fuzzy reasoning to fuse identity attribute data
[AD-A267426] p 1004 N94-17309

DATA LINKS

Evaluation of midband analog fiber optic telemetry links
[DE93-015128] p 883 N94-16056
Infra Link: A data transmission system for microgravity research p 980 N94-16091
Performance Information Management System (PIMS) communication
[AD-A267040] p 1231 N94-16458
Category (CAT) 3B level 1 test plan for Global Positioning System (GPS)
[DOT/FAA/RD-93/21] p 864 N94-16835
A study on an experimental communication system using microsatellites p 892 N94-17160
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage p 893 N94-17164
Feasibility study of a personal communications system IRIDIUM-like p 893 N94-17165
A protocol validator for the SCM and CFSM models
[AD-A268523] p 1156 N94-17541

DATA MANAGEMENT

Fast interrupt priority management in operating system kernels
[AD-A266638] p 1140 N94-15744
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
The IMS software integration platform
[AD-A266285] p 1151 N94-16910
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
Experience with disconnected operation in a mobile computing environment
[AD-A267524] p 1141 N94-17115
Accurate analysis of array references
[AD-A268069] p 1162 N94-17550

DATA PROCESSING
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931
Multiple process simulations for correction factor calculations in experiments with neutrons. LUSMK program
[DE93-623957] p 1179 N94-14932
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
Data processing system for flight spectrometer
p 908 N94-15086
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105
SLR data screening; location of peak of data distribution p 912 N94-15560
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797
Recent advances and plans in processing and geocoding of SAR data at the DFD p 992 N94-15909
International collaboration in SAR ground data systems p 993 N94-15917
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Remote diagnosis as used for mechanized parking systems p 984 N94-16004
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
Real-time adaptive neural network data processing
[TABES PAPER 93-660] p 1054 N94-16155
Neural mechanisms of attention
[AD-A266315] p 1132 N94-16456
AVIRIS ground data processing system
p 1071 N94-16692
Processing of resonance parameter covariance files
[DE93-015506] p 1231 N94-16874
The IMS software integration platform
[AD-A266285] p 1151 N94-16910
Sequential functions on indexed domains and full abstraction for a sub-language of PCF
[AD-A267838] p 1152 N94-17009
Data processing system for ARSENE ground station: A tool for small satellite control and development
p 878 N94-17157
LEOCOM-SPES: Low cost message communications
p 892 N94-17161
Data handling strategy for the Spanish small satellite program (MINISAT) p 895 N94-17177
The STRV On Board Data Handling (OBDH) system: An introduction p 895 N94-17178
TUBSAT: Low cost access to space technology
p 895 N94-17180
Automatic suppression of anomalous propagation clutter for noncoherent weather radars
[KNMI-WR-92-06] p 1004 N94-17407
Language-based document processing
[INRIA-RR-1731] p 1234 N94-17529

DATA PROCESSING EQUIPMENT
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819
S 80/T: A micro satellite system combining high performances and limited resources
p 893 N94-17166
Detecting small debris using a ground-based photon counting detector
[DE93-012623] p 898 N94-17669

DATA PROCESSING TERMINALS
Ergonomics in the office environment
p 1124 N94-16612

DATA RECORDERS
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530

DATA RECORDING
Research Studies on Advanced Optical Module/Head Designs for Optical Disk Recording Devices
[NASA-CR-194390] p 1226 N94-14981
Determining the locations of the various CIRC recording format information blocks (user data blocks, C2 and C1 words and EFM frames) on a recorded compact disc
p 1228 N94-14997

DATA REDUCTION
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
EUVE observations of the Moon p 1250 N94-16185
Reductions to sets of low information content
[TR-417] p 1150 N94-16579
Reducing data dimension to lower signal processing computational requirements and maximize performance
[AD-A266606] p 999 N94-16728
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241

DATA RETRIEVAL
NASA Electronic Library System (NELS): The system impact of security
[NASA-CR-194614] p 1231 N94-16499
A proposed research program in strategic computing
[AD-A267516] p 1153 N94-17078

DATA STORAGE
Concurrent garbage collection of persistent heaps
[AD-A266831] p 1141 N94-14915
Monograph of the aviation epidemiology data register for FY 1991
[AD-A266896] p 1119 N94-14952
Research Studies on Advanced Optical Module/Head Designs for Optical Disk Recording Devices
[NASA-CR-194390] p 1226 N94-14981
MeV ion-beam analysis of optical data storage films
p 1226 N94-14984
Dynamic testbed laboratory and micro-optics
p 1199 N94-14986
Gratings and waveguides p 1226 N94-14987
Compact disk error measurements
p 1227 N94-14988
Determination of average refractive index of spin coated DCG films for HOE fabrication p 1036 N94-14992
Effects of a shading band in the data path of an optical drive p 1199 N94-14993
Figures of merit for laser beam quality
p 1043 N94-14994
A near-field scanning optical microscope for analysis of magneto-optic media p 1199 N94-14995
Determining the locations of the various CIRC recording format information blocks (user data blocks, C2 and C1 words and EFM frames) on a recorded compact disc
p 1228 N94-14997
Recent advances and plans in processing and geocoding of SAR data at the DFD p 992 N94-15909
Data distribution p 993 N94-15910
AVIRIS ground data processing system
p 1071 N94-16692
Optical system storage design with diffractive optical elements p 1198 N94-17360
3-D optical memory disk
[AD-A267908] p 1141 N94-17380

DATA STRUCTURES
Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
The alignment-distribution graph
[NASA-CR-194609] p 1148 N94-15956
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659
Research in presistent simulation: Development of the persistent ModSim object-oriented programming language
[AD-A268568] p 1157 N94-17620

DATA SYSTEMS
Fault management for data systems
[NASA-TM-103953] p 1116 N94-15548
International collaboration in SAR ground data systems p 993 N94-15917
The planetary data system educational CD-ROM
p 1234 N94-16209

DATA TRANSFER (COMPUTERS)
Electronic messaging for the 1990's
[AD-A267143] p 1229 N94-15437
A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
A parallel adaptive mesh refinement algorithm
[NASA-CR-191530] p 1168 N94-15724
The alignment-distribution graph
[NASA-CR-194609] p 1148 N94-15956
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
Efficient compilation of array statements for private memory multicomputers
[AD-A266595] p 1160 N94-16724

DATA TRANSMISSION
Electronic messaging for the 1990's
[AD-A267143] p 1229 N94-15437
Computer networking at SLR stations
p 917 N94-15594
HP upgrade operational streamlining
p 918 N94-15596
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
Evaluation of midband analog fiber optic telemetry links
[DE93-015128] p 883 N94-16056
Infra Link: A data transmission system for microgravity research p 980 N94-16091
Performance Information Management System (PIMS) communication
[AD-A267040] p 1231 N94-16458
Using Markov chains to model the error behavior of data communications channels
[AD-A266468] p 999 N94-16777
The ORBCOMM system p 893 N94-17163
STARSYS: A view after WARC-92 --- satellite position and messaging system p 893 N94-17168
TUBSAT: Low cost access to space technology
p 895 N94-17180
CALS test network handbook
[AD-A267587] p 1160 N94-17209
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307

DC 8 AIRCRAFT
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919

DEACTIVATION
Activation and deactivation of high concentration arsenic with some evidence of precipitation
[DE93-016437] p 950 N94-16952

DEATH VALLEY (CA)
Expert system-based mineral mapping using AVIRIS
p 1073 N94-16704

DEBRIS
The physical mechanism of comet outbursts: An experiment p 1242 N94-16221
A discontinuous melt sheet in the Manson impact structure p 1103 N94-16269

DECARBONATION
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383

DECIDUOUS TREES
Radar response of vegetation: An overview
p 991 N94-15898

DECISION MAKING
An information processing classification of beyond-visual-range air intercepts
[AD-A266927] p 1131 N94-15108
HyperVentilate: Decision-support software for soil vapor extraction technology application
[PB93-134880] p 1094 N94-15136
The impact of report of investigation writing style on the assessment times, impressions, perceptions and preferences of adjudicators
[AD-A265748] p 1223 N94-15682
A scientific basis for computational science
[AD-A266697] p 1148 N94-15841
A decision criteria to select an associative-memory organization that minimizes the execution time of a mix of associative-search operations
[AD-A266438] p 1149 N94-16560
The Megascience Forum
[DE93-014445] p 1303 N94-16804
Simulation reduction using the Taguchi method
[NASA-CR-4542] p 1055 N94-17082
Acquisition and production of skilled behavior in dynamic decision-making tasks
[NASA-CR-194658] p 1133 N94-17296
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396

DECODING
A simulation study of the performance of the NASA (2,1,6) convolutional code on RFI/burst channels
p 997 N94-16508

DECOMPOSITION
Decomposition of large sparse symmetric systems for parallel computation. Part 2: Parallelization tool roadmap
[AD-A267072] p 1158 N94-15671
Decomposition of large sparse symmetric systems for parallel computation. Part 1: Theoretical foundations
[AD-A267144] p 1159 N94-15750
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
A task adaptive parallel graphics renderer
[DE93-017123] p 1149 N94-16119
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
Evaluation of hemoglobin-oxygen equilibrium binding by rapid-scanning spectrophotometry and singular-value decomposition
[AD-A266453] p 1123 N94-16564
Direct catalytic decomposition of nitric oxide
[DE93-016689] p 949 N94-16896

Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
DECOMPRESSION SICKNESS
Aircrew/groundcrew life support systems research. Volume 1: CLIN 0001 research requirements
[AD-A268229] p 1139 N94-17563
DECOUPLING
Electrical properties of sol-gel PZT thin films for decoupling capacitor applications
[DE93-016491] p 1015 N94-17648
DEEP SPACE NETWORK
Search for Extraterrestrial Intelligence (SETI)
p 1125 N94-16620
DEEP WATER
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139
DEFECTS
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method
[AD-A267053] p 1008 N94-15665
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596
DEFENSE INDUSTRY
Modeling and simulation: A key to future defense technology
[TABES PAPER 93-654] p 1054 N94-16153
DEFENSE PROGRAM
Expectations for the future of military aviation
p 854 N94-15128
Department of Defense technical architecture framework for information management. Volume 1: Overview, version 2.0
[AD-A267193] p 1228 N94-15152
STS-36 crew presentation clip
[NASA-TM-109497] p 881 N94-15461
Reengineering: An engineering problem
[AD-A267117] p 1146 N94-15653
Department of Defense technical architecture framework for information management. Volume 2: Technical reference model and standards profile, version 2.0
[AD-A267194] p 1229 N94-15788
Department of Defense technical architecture framework for information management. Volume 3: Architecture concepts and design guidance, version 2.0
[AD-A267195] p 1230 N94-15789
The strategic environmental research and development program: A new paradigm for space, the environment, and national security
[AD-A266222] p 1174 N94-16109
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
The Clementine instrument complement
p 1086 N94-16370
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
Defense RDT&E online system (DROLS) handbook
[AD-A267546] p 1232 N94-17101
DEFLAGRATION
Experimental investigations into the deflagration to detonation transition at TNO/PML
[AD-A266753] p 1021 N94-15755
DEFLECTION
Study of high speed interference photography with two-dimensional acousto-optical lattice deflection
[AD-A267823] p 1035 N94-17402
DEFLECTORS
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
DEFORESTATION
Recent advances in radar remote sensing of forest
p 991 N94-15897
DEFORMATION
Characterization of the cyclic plasticity of polycrystalline aluminum in the 90-300K domain: Use of the ultrasonic wave coupling technique - low frequency restraint
[ISAL-92-0083] p 954 N94-14930
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
A rapid computational model for estimating the performance of compliant airfoils in cascades
[AD-A266275] p 857 N94-16471
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052
Elastic waves in discretely continuous mechanical systems
[IFTR-21/1992] p 1061 N94-17091
Influence of grain size on the energy storing ability during uniaxial stretching of austenite steel
[IFTR-22/1992] p 961 N94-17121
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246
High temperature deformation behavior of YBa2Cu3O(6+x) superconducting ceramic materials
[AD-A268164] p 973 N94-17430
The photonical, pure grid method
[NLR-TP-91478-U] p 1062 N94-17600
DEGASSING
The cooling rates of pahoehoe flows: The importance of lava porosity p 1103 N94-16282
DEGRADATION
Non-linear effects in doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15067
A first-order model for impact crater degradation on Venus p 1265 N94-16268
The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207
DEGREES OF FREEDOM
Three axis force override rate control of a PUMA 560 manipulator
[AD-A267313] p 1048 N94-16944
DEIMOS
A simultaneous estimation of the mass of Mars and its natural satellites, Phobos and Deimos, from the orbital perturbations on the Mariner 9, Viking 1, and Viking 2 orbiters p 1279 N94-16347
A mission concept of Phobos/Deimos exploration
p 1287 N94-16387
DELAMINATING
The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484
Research in textile composites at KU, Leuven
p 937 N94-16848
DELAWARE BAY (US)
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
DELAY LINES
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method
[AD-A267053] p 1008 N94-15665
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228
DELTA LAUNCH VEHICLE
Delta launch vehicle: Accommodations for small satellites p 878 N94-17139
DELTA WINGS
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
Aerodynamic control of NASP-type vehicles through vortex manipulation. Volume 3: Wing rock experiments
[NASA-CR-177626] p 857 N94-15780
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
DEMAGNETIZATION
An adiabatic demagnetisation refrigerator with a mechanical pre-cooler for space applications
p 906 N94-15070
In orbit adiabatic demagnetization refrigeration for bolometric and microcalorimetric detectors
p 907 N94-15079
DEMODULATION
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
Nonlinear methods for communications
[AD-A267376] p 1001 N94-17019
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307
DEMODULATORS
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
DEMULTIPLEXING
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
DENDRITIC CRYSTALS
The roles of fluid motion and other transport phenomena in the morphology of materials
[NASA-CR-194665] p 1028 N94-17298
DENSE PLASMAS
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
DENSIFICATION
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
Densifying and stabilizing ingredient
[AD-D015751] p 975 N94-16934
DENSITY (MASS/VOLUME)
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052
DENSITY (NUMBER/VOLUME)
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821
Swelling equilibria for temperature-sensitive ampholytic hydrogels
[DE93-015264] p 966 N94-15996
DENSITY DISTRIBUTION
Densities of 5-15 micron interplanetary dust particles
p 1244 N94-16367
DEOXYGENATION
Preconversion catalytic deoxygenation of phenolic functional groups
[DE93-017034] p 950 N94-16912
DEOXYRIBONUCLEIC ACID
Orientation of DNA during free-solution electrophoresis p 944 N94-15162
Quantitative method of measuring cancer cell urokinase and metastatic potential
[NASA-CASE-MSC-21715-1] p 1117 N94-15967
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659
DEPLETION
Do SiC grains in Orgueil differ from those in Murchison? p 1242 N94-16260
DEPLOYMENT
STS-26 Post-Flight Press Conference
[NASA-TM-109557] p 879 N94-15261
STS-26 onboard 16mm photography quick release
[NASA-TM-109558] p 879 N94-15262
STS-26 through STS-34, deploy activities
[NASA-TM-109566] p 1301 N94-15315
Return to Space Mission: The STS-26 crew report
[NASA-TM-109568] p 880 N94-15317
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432
STS-41 post-flight press presentation
[NASA-TM-109514] p 882 N94-15516
STS-41 onboard 16mm photography quick release
[NASA-TM-109515] p 882 N94-15518
STS-41 mission highlights resource tape
[NASA-TM-109516] p 882 N94-15521
DEPOLARIZATION
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031
DEPOLYMERIZATION
Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490
DEPOSITION
Study of fractal aggregates p 979 N94-16086
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Materials processing and manufacturing technologies for diamond substrate multichip modules (DSMCM)
[AD-A267316] p 969 N94-16946
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040

Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Advanced thin-film deposition and physical properties of high-temperature and other novel superconducting materials
[AD-A268199] p 1216 N94-17561

DEPOSITS
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
A Pluto thermal model p 1256 N94-16216
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
The history of mare volcanism in the Orientale Basin: Mare deposit ages, compositions and morphologies p 1269 N94-16289

DEPTH
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236

DESCENT TRAJECTORIES
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432

DESIGN ANALYSIS
Vertical-tail aerodynamic configuration of space shuttle orbiter
[AD-A267723] p 879 N94-14941
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
Discrete CMT infrared detectors for space application, from ISSR to second generation Meteosat and MIPAS p 905 N94-15065
Development of a quiet supersonic wind tunnel with a cryogenic adaptive nozzle
[NASA-CR-194548] p 871 N94-15117
Space suit design
[NASA-TM-109670] p 1137 N94-15507
Mark 111 suit test evaluation in WETF with Jerry Ross
[NASA-TM-109504] p 1137 N94-15514
Reengineering: An engineering problem
[AD-A267117] p 1146 N94-15653
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
The lift-fan powered-lift aircraft concept: Lessons learned
[NASA-CR-177616] p 866 N94-15718
Efficiency effects of variation in controlled experimental variables
[DE93-014345] p 1169 N94-15979
The Spacelab IPS Star Simulator
[TABES PAPER 93-650] p 877 N94-16150
International testing of a Mars rover prototype p 1273 N94-16312
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
Small satellite constellation system: Optimization criteria p 888 N94-17132
Engineering design of a high-temperature superconductor current lead
[DE93-015156] p 1013 N94-17226
Diffractive optics: Design, fabrication, and applications p 1194 N94-17334
Space Station Freedom electrical performance model
[NASA-TM-106395] p 929 N94-17483

DESIGN TO COST
Cost drivers: Why do conventional satellites cost so much? p 897 N94-17190

DESORPTION
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805
Direct catalytic decomposition of nitric oxide
[DE93-016689] p 949 N94-16896
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520
Trace analysis of chemical warfare agents in air: Sampling in porous polymers followed with thermal desorption analysis
[FOA-C-40302-4.6] p 1097 N94-17625

DETECTION
Proceedings of an ESA Symposium on Photon Detectors for Space Instrumentation
[ESA-SP-356] p 899 N94-15025
A method of detecting and locating electrical current imbalances
[NASA-CASE-LEW-15407-1] p 1009 N94-15706
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Leak detection utilizing analog binaural (VLSI) techniques
[NASA-CASE-NPO-18399-1-CU] p 1014 N94-17323

DETECTORS
Requirements on CCD-detectors for ground-based auroral imaging p 909 N94-15093
Electron reversal ionizer for detection of trace species using a spherical cathode
[NASA-CASE-NPO-18870-1-CU] p 1185 N94-17329

DETONATION
Experimental investigations into the deflagration to detonation transition at TNO/PML
[AD-A266753] p 1021 N94-15755

DEUTERIDES
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567

DEUTERIUM
A hydrogen isotope study of CO3 type carbonaceous chondrites; comparison with type 3 ordinary chondrites p 1246 N94-16425
Atomic processes in hydrogen and deuterium negative ion discharges
[DE93-013432] p 1183 N94-16817
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316

DEUTERONS
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951

DIAGNOSIS
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
Measurements of the operation of the SINUS-6/BWO system
[AD-A266423] p 1011 N94-16556
Summary of follow-up results from potential tuberculosis exposures p 1126 N94-16628
Legionella: An overview p 1126 N94-16629
Screening for prostate cancer p 1126 N94-16630
Mercury Surveillance Program p 1127 N94-16641

DIALS
Flight instrument software for the F/A-18 research simulator
[AD-A267170] p 872 N94-15856

DIAMAGNETISM
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875

DIAMINES
Compounds containing meta-biphenylenedioxy moieties and polymers therefrom
[NASA-CASE-LAR-14517-1] p 965 N94-15879

DIAMOND FILMS
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
A high flux radical beam diamond growth
[AD-A266754] p 1207 N94-15955
Vacuum plasma spraying p 975 N94-16002
Apparatus for and a method of growing thin films of elemental semiconductors
[AD-D015813] p 1210 N94-16487
Properties of thin films for high temperature flow sensors
[NASA-CR-191526] p 967 N94-16541
Atomic layer epitaxy group IV materials: Surface processes, thin films, devices and their characterization
[AD-A267527] p 1213 N94-17116
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Diamond growth on carbide surfaces using a selective etching technique
[AD-A267989] p 973 N94-17413
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553

DIAMONDS
Simulation studies for surfaces and materials strength
[NASA-CR-193387] p 1056 N94-15004
Diamond p-n junction cold cathode
[AD-A266926] p 1206 N94-15107
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
Photoemission study of diamond (100) surface
[DE93-015251] p 1208 N94-16062
Water adsorption on diamond (110) studied by multiple internal reflection infrared spectroscopy
[AD-A266415] p 948 N94-16553
Materials processing and manufacturing technologies for diamond substrate multichip modules (DSMCM)
[AD-A267316] p 969 N94-16946
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359

DIATOMIC MOLECULES
Characterization of UV emissions resulting from electronic energy transfer in atmospheric molecules
[AD-A266244] p 1101 N94-16469
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772

DIBORANE
A proposed mechanism for the pyrolysis of diborane
[DE93-014275] p 947 N94-15977
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676

DICTIONARIES
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11
[NASA-TM-104566-VOL-12] p 1111 N94-15529
Definitions of terms relating to aircraft windscreens, canopies, and transparencies
[AD-A268403] p 868 N94-17425

DIELECTRIC POLARIZATION
Resonant frequencies of irregularly shaped microstrip antennas using method of moments
[NASA-TP-3386] p 989 N94-15767

DIELECTRIC PROPERTIES
Far-infrared spectra of CO2 clathrate hydrate frosts p 954 N94-16340
Radar Analysis and Visualization Environment (RAVEN): Software for polarimetric radar analysis p 1080 N94-16758
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266
Electrical properties of sol-gel PZT thin films for decoupling capacitor applications
[DE93-016491] p 1015 N94-17648

DIELECTRICS
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Antenna gain loss and pattern degradation due to transmission through dielectric radomes
[AD-A267242] p 986 N94-14974
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133
Nanocomposites for electronic applications, volume 1
[AD-A267070] p 1009 N94-15669
Nanocomposites for electronic applications, volume 3
[AD-A267073] p 1009 N94-15672
Nanocomposites for electronic applications, volume 2
[AD-A267074] p 1009 N94-15673
Volume integral equations applied to circular and square cylinders
[AD-A266635] p 1169 N94-15785
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825
Structures from low dielectric polyimides
[NASA-CASE-LAR-14988-1] p 965 N94-15880
Cyanoresin, cyanoresin/cellulose triacetate blends for thin film, dielectric capacitors
[NASA-CASE-NPO-18913-1-CU] p 966 N94-15930
Cellulose triacetate, thin film dielectric capacitor
[NASA-CASE-NPO-18935-1-CU] p 1010 N94-15952
Transparent conductive coatings in the far ultraviolet
[NASA-CR-194632] p 1191 N94-16024
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494
A priori inequalities for an ideal-incompressible liquid in an electromagnetic field
[IFTR-9/1992] p 998 N94-16652
The exact solution of the problem of diffraction of an electromagnetic plane wave by a conductive half-plane situated at an interface
[IFTR-3/91] p 1002 N94-17057
Finite difference time domain analysis of chirped dielectric gratings p 1195 N94-17339
Spectral inverse scattering theory for dielectric media: Application to optical devices
[AD-A268635] p 1199 N94-17427
Low dielectric polyimides
[NASA-CASE-LAR-14987-2] p 974 N94-17559
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605

Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676

DIES
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767

DIFFERENTIAL CALCULUS
Automatic differentiation of limit functions
[DE93-016376] p 1168 N94-14928

DIFFERENTIAL EQUATIONS
Comparison of level-1 and level-2 buckling and postbuckling solutions
[NASA-CR-194611] p 1057 N94-15154
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
Application of group theory to integral-difference equations of plasma physics
[IFTR-23/1992] p 1204 N94-17067
Global solutions to a system of strongly coupled reaction-diffusion equations
[DE93-628587] p 1171 N94-17640

DIFFERENTIAL PULSE CODE MODULATION
Lossless compression of AVIRIS data: Comparison of methods and instrument constraints
p 1075 N94-16713

DIFFRACTION
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331
Diffractive optics: Design, fabrication, and applications
p 1194 N94-17334
Scalar limitations of diffractive optical elements
p 1194 N94-17336
Subwavelength structured surfaces and their applications p 1194 N94-17337
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338
Finite difference time domain analysis of chirped dielectric gratings p 1195 N94-17339
Asymmetric three-beam binary optic grating
p 1195 N94-17340
Scattering from binary optics p 1195 N94-17341
Mathmatical modeling for diffractive optics
p 1195 N94-17342
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
Fabrication techniques for very fast diffractive lenses
p 1196 N94-17345
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Diffractive optics in adverse environments
p 1197 N94-17352
Thermal Weapon Sight (TWS) AN/PAS-13 diffractive optics designed for producibility p 1197 N94-17354
Applications of advanced diffractive optical elements
p 1197 N94-17356
SURPHEX (tm): New dry photopolymers for replication of surface relief diffractive optics p 1198 N94-17358
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
Optical system storage design with diffractive optical elements p 1198 N94-17360
Theory of dispersive microlenses
p 1198 N94-17361
Color separation gratings p 1198 N94-17362

DIFFRACTION PATTERNS
Prelaunch optical characterization of the Laser Geodynamic Satellite (LAGEOS 2)
[NASA-TP-3400] p 884 N94-15193
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
Mathmatical modeling for diffractive optics
p 1195 N94-17342
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343

DIFFRACTION PROPAGATION
Sound exposure level prediction for impulse sound sources above variable terrain
[AD-A267535] p 1178 N94-17119

DIFFRACTOMETERS
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775

DIFFUSE RADIATION
Hazard calculations of diffuse reflected laser radiation for the SELENE program
[NASA-TM-4520] p 1042 N94-17285

DIFFUSION
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
Self-diffusion coefficients of sol-gel intermediates
[AD-A266957] p 963 N94-15179
Diffusible driving and coupling signals of the biological clock
[AD-A267046] p 1121 N94-15660
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
Clouding tracing: Visualization of the mixing of fluid elements in convection-diffusion systems
[NASA-CR-191529] p 1148 N94-15965
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites
p 1241 N94-16175
Rheology of water and ammonia-water ices
p 953 N94-16188
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805
Linear characteristic spatial quadrature for discrete ordinates neutral particle transport on arbitrary triangles
[AD-A267485] p 1185 N94-17365
A domain-partition method for the advection-diffusion equation
[INRIA-RR-1740] p 1030 N94-17534
Oxygen diffusion in YBa2Cu3O(6+delta) ceramics on heating
[DE93-629161] p 974 N94-17633
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

DIFFUSION COEFFICIENT
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727

DIFFUSION FLAMES
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532

DIFFUSIVITY
Self-diffusion coefficients of sol-gel intermediates
[AD-A266957] p 963 N94-15179
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490

DIGITAL COMPUTERS
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919

DIGITAL DATA
Freedom system Text and Graphics Systems (TAGS)
[NASA-TM-109509] p 1140 N94-15455
Global Magellan-image map of Venus at full resolution
p 1274 N94-16319
CALS test network handbook
[AD-A267587] p 1160 N94-17209
An automated approach for classifying generic terrain features using digital elevation data
[AD-A268385] p 1084 N94-17421

DIGITAL ELECTRONICS
Orpheus: A synthesis framework for regular architectures
[REPT-93-016] p 1156 N94-17504

DIGITAL FILTERS
Designing clutter rejection filters with complex coefficients for airborne pulsed Doppler weather radar
[NASA-CR-4550] p 862 N94-15444

DIGITAL SYSTEMS
VLSI for high-speed digital signal processing
[AD-A267709] p 1007 N94-14936
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693
Digital laser range finder emulator
[AD-D015811] p 1040 N94-16540
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919
On-board B-ISDN fast packet switching architectures. Phase 1: Study
[NASA-CR-191143] p 883 N94-17111
Method and apparatus for spur-reduced digital sinusoid synthesis
[NASA-CASE-NPO-18789-1-CU] p 1154 N94-17326
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651

DIGITAL TECHNIQUES
Spaceborne Imaging Radar-C instrument
p 990 N94-15890
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
Method and apparatus for spur-reduced digital sinusoid synthesis
[NASA-CASE-NPO-18789-1-CU] p 1154 N94-17326

DIGITAL TO ANALOG CONVERTERS
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931
Method and apparatus for spur-reduced digital sinusoid synthesis
[NASA-CASE-NPO-18789-1-CU] p 1154 N94-17326

DIISOCYANATES
Interpenetrating polymer network acoustic damping material
[AD-D015889] p 969 N94-16916

DIMENSIONAL MEASUREMENT
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596

DIMERS
The interaction of HCN(DCN) with Si(111)-7x7 studied with HREELS, UPS, and XPS
[AD-A266237] p 1182 N94-16111

DIODES
A new detector concept for energetic auroral x ray imaging p 907 N94-15081
A microsecond-pulsewidth, intense, light-ion beam accelerator
[DE93-016455] p 1202 N94-16451
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode
[AD-A267214] p 1204 N94-16987

DIPOLE ANTENNAS
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998

DIPOLE MOMENTS
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684

DIRAC EQUATION
SUSY in the sky
[NIKHEF-H/93-04] p 1240 N94-17603

DIRECTION FINDING
Interferometric GPS attitude: A stochastic error model, DREO report
[AD-A266411] p 864 N94-16457
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035

DIRECTIONAL CONTROL
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435

DIRECTIONAL SOLIDIFICATION (CRYSTALS)
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Unidirectional solidification of liquid-crystal material
p 945 N94-15167
Automated directional solidification furnace
[NASA-TM-109662] p 1175 N94-15233

DIRECTORIES
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007

DIRICHLET PROBLEM
On a class of singular quasilinear elliptic equations with general structure and distribution data
[DE93-628585] p 1171 N94-17613

DISABILITIES
Americans with Disabilities Act considerations for the practice of occupational medicine p 1124 N94-16611

DISASTERS
IAI topic: El Nino. Southern oscillation and interannual climate variability
[INPE-5410-PRE/1757] p 1111 N94-15186

Primary studies of Chinese spaceborne SAR
p 993 N94-15916
Technical urban search and rescue, System To Locate Survivors (STOLS) units: Operator's manual
[AD-A266317] p 862 N94-16438

DISCONTINUITY
Stress analysis of laminated composites with preformed holes. Part 1: Single plies with embedded material discontinuities
[AD-A266524] p 936 N94-16795

DISCOVERY (ORBITER)
Small spacecraft for planetary exploration
p 874 N94-17145

DISCRETE FUNCTIONS
Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833

DISEASES
Cool suit
[NASA-TM-109639] p 1120 N94-15250
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Legionella: An overview p 1126 N94-16629
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645

DISILICIDES
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100

DISK GALAXIES
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648

DISLOCATIONS (MATERIALS)
Characterization of the cyclic plasticity of polycrystalline aluminum in the 90-300K domain: Use of the ultrasonic wave coupling technique - low frequency restraint
[ISAL-92-0083] p 954 N94-14930

DISORDERS
Cool suit
[NASA-TM-109639] p 1120 N94-15250

DISPLACEMENT
Elastic waves in discretely continuous mechanical systems
[IFTR-21/1992] p 1061 N94-17091
Nonlinear random response prediction using MSC/NASTRAN
[NASA-TM-109029] p 1179 N94-17650

DISPLACEMENT MEASUREMENT
Mechanical and surface force nanoprobe
[AD-D015792] p 1034 N94-16536

DISPLAY DEVICES
Video applications development platform
[AD-A266966] p 1163 N94-14953
Flight simulator-induced sickness and visual displays evaluation
[AD-A267019] p 1122 N94-15845
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933
Ergonomics in the office environment
p 1124 N94-16612
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926
Applications of advanced diffractive optical elements
p 1197 N94-17356
Visual display principles for C3I system tasks
[AD-A267969] p 1005 N94-17498

DISSIPATION
Translating wedge heat sink
[AD-D015814] p 1011 N94-16488

DISSOCIATION
Water adsorption on diamond (110) studied by multiple internal reflection infrared spectroscopy
[AD-A266415] p 948 N94-16553
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
Investigations into the recovery of waste sulfuric acid with concentrated solar radiation
[DLR-FB-93-11] p 952 N94-17594

DISSOLVING
In situ studies of passive film chemistry using x ray absorption spectroscopy
[DE93-014023] p 947 N94-16011

DISTORTION
Closed orbit distortion and the beam-beam interaction
[DE93-015284] p 1190 N94-15854
Emittance and beam size distortion due to linear coupling
[DE93-015402] p 1184 N94-16886

DISTRIBUTED PARAMETER SYSTEMS
Modeling, estimation and control of distributed parameter systems
[AD-A267325] p 1026 N94-17003
Module interconnection frameworks for a real-time spreadsheet
[AD-A267752] p 1153 N94-17231

DISTRIBUTED PROCESSING
The alignment-distribution graph
[NASA-CR-194292] p 1168 N94-15112
Relaxing consistency in recoverable distributed shared memory
[AD-A266931] p 1140 N94-15174
The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
A parallel adaptive mesh refinement algorithm
[NASA-CR-191530] p 1168 N94-15724
Department of Defense technical architecture framework for information management. Volume 2: Technical reference model and standards profile, version 2.0
[AD-A267194] p 1229 N94-15788
Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
Distributed computing feasibility in a non-dedicated homogeneous distributed system
[NASA-CR-191532] p 1149 N94-15989
Consistent failure reporting in reliable communication systems
[AD-A266298] p 997 N94-16477
Disconnected operation in a distributed file system
[AD-A266461] p 1231 N94-16570
A comparison of queueing, cluster and distributed computing systems
[NASA-TM-109025] p 1160 N94-16878
The IMS software integration platform
[AD-A266285] p 1151 N94-16910
A security architecture for fault-tolerant systems
[AD-A266178] p 1152 N94-16982
Intel NX to PVM 3.2 message passing conversion library
[NASA-TM-109038] p 1152 N94-17060
Light-weight process groups in the ISIS system
[NASA-CR-194544] p 1161 N94-17239

DISTRIBUTION (PROPERTY)
Large-scale volcanism associated with coronae on Venus p 1285 N94-16376

DISTRIBUTION FUNCTIONS
The alignment-distribution graph
[NASA-CR-194292] p 1168 N94-15112
Mobile and replicated alignment of arrays in data-parallel programs
[NASA-CR-194294] p 1158 N94-15113
Application of cylindrical distribution functions to anisotropic scattering from amorphous films
[DE93-015256] p 1183 N94-16811
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021

DISTRIBUTION MOMENTS
Moments in statistics: Approximations to densities and goodness-of-fit
[AD-A266600] p 1173 N94-16726

DIURNAL VARIATIONS
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139
Multitemporal diurnal AVIRIS images of a forested ecosystem p 1074 N94-16709
Field investigation of the relationship between battery size and PV system performance
[DE93-016503] p 1016 N94-17671

DIVERTERS
ARIES tokamak reactor study
[DE93-017059] p 1203 N94-16901

DIVING (UNDERWATER)
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916
Scuba-diving, anxiety and task performance
p 1132 N94-15938
Human central nervous system oxygen toxicity data from 1945 to 1986
[AD-A268225] p 1130 N94-17556

DOCUMENTS
Monitoring history
[NASA-TM-109640] p 1229 N94-15251
Language-based document processing
[INRIA-RR-1731] p 1234 N94-17529

DOLOMITE (MINERAL)
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383

DOMAINS
Complexity analysis of real-time reinforcement learning applied to finding shortest paths in deterministic domains
[AD-A266636] p 1131 N94-15742

DONOR MATERIALS
Photodegradation of polyimides. V1: Effect of donor-acceptor groups on the photooxidative stability of polyimides and model compounds
[AD-A267319] p 970 N94-16947

DOPED CRYSTALS
BIB photodetectors based on antimony doped silicon
p 902 N94-15047
The epitaxial Si x ray bolometer an alternative to ion implanted devices p 911 N94-15103
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
Ion doped quantum well lasers
[AD-A267198] p 1038 N94-15853
Transition metals in superheat melts
p 962 N94-16273
Method for doping GaAs with high vapor pressure elements
[AD-D015794] p 1210 N94-16538
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992
Theoretical studies of nonlinear optical properties of conjugated polymers
[AD-A267390] p 1193 N94-17024
Basic optical studies of high T(c) oxide superconductors
[AD-A268148] p 1014 N94-17428
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577

DOPPLER RADAR
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
Windshear radar calibration, 1992 flights: Transmitter power and receiver gain stability
[NASA-TM-108997] p 986 N94-15140
The Next Generation Weather Radar (NEXRAD)/Air Route Surveillance Radar (ARSR) operational comparison
[REPT-93W0000145] p 987 N94-15439
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338

DOSAGE
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453

DOSIMETERS
Real time radiation measurements in space
p 980 N94-16092
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240

DOWNRANGE
Enhanced down-range profiles of complex targets using wideband radar echo returns
[AD-A266508] p 999 N94-16788
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918

DOWNTIME
Fast simulation of steady-state availability in non-Markovian highly dependable systems
[AD-A266747] p 1174 N94-15823

DRAG MEASUREMENT
Suppression of dynamic stall with a leading-edge slat on a VR-7 airfoil
[NASA-TP-3357] p 856 N94-15657

DRAG REDUCTION
Riblets: New speed technology
[NASA-TM-109641] p 1018 N94-15252
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286

DRAINAGE
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028

Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426

DRAINAGE PATTERNS
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369

DRIFT (INSTRUMENTATION)
Nontidal gravity changes observed with a superconducting gravimeter p 1100 N94-15808

DRIFT RATE
A study of high field transport in wide band gap electronic materials using a picosecond transient charge technique
[AD-A267098] p 1008 N94-15636

DRILLING
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
The Megascience Forum
[DE93-014445] p 1303 N94-16804

DROP SIZE
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446

DROP TOWERS
New findings and instrumentation from the NASA Lewis Microgravity Facility p 977 N94-16076
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263

DROPS (LIQUIDS)
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
Acoustic waves in complicated geometries and their interactions with liquid-propellant droplet combustion
[AD-A267260] p 1178 N94-16991
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250

DROUGHT
The standardized precipitation index and its use in the western contiguous United States
[AD-A267547] p 1107 N94-17102

DRUGS
Ongoing Recovery Basic Information Tool (ORBIT) p 1124 N94-16616

DUCTED FANS
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115

DUCTED FLOW
Modal element method for potential flow in non-uniform ducts: Combining closed form analysis with CFD
[NASA-TM-106347] p 1169 N94-15799
Computation of confined coflow jets with three turbulence models
[NASA-TM-106378] p 1025 N94-16879

DUCTILITY
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
A reexamination of grain boundary fracture in Ni3Al: Environmental and alloying effects
[DE93-015431] p 1208 N94-16063
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223

DUNES
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Discrimination among semi-arid landscape endmembers using the Spectral Angle Mapper (SAM) algorithm p 1074 N94-16711

DUST
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
On origin of the olivine inclusions from the Kainsaz CO carbonaceous chondrite p 1244 N94-16345
Possible dust contamination of the early solar system p 1244 N94-16352
Dust-dynamic feedbacks in the Martian atmosphere: Surface dust lifting p 1296 N94-16434

DUST COLLECTORS
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256

DUST STORMS
Global and regional/seasonal color mosaics of Mars p 1288 N94-16393

DYE LASERS
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929
Lasing dye sensor for chemical vapors
[AD-D015786] p 1040 N94-16533

DYES
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455

DYNAMIC CHARACTERISTICS
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194577] p 1082 N94-15646
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
Static and dynamic investigations of brittle elasto-optical material
[IFTR-3/1992] p 1061 N94-17086
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635

DYNAMIC CONTROL
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
Space Station/Orbiter berthing dynamics during an assembly flight
[NASA-TM-109049] p 1062 N94-17451

DYNAMIC MODELS
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
An object-oriented dynamic software process model
[AD-A267726] p 1154 N94-17371

DYNAMIC PRESSURE
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821
Mechanical and surface force nanoprobe
[AD-D015792] p 1034 N94-16536

DYNAMIC PROGRAMMING
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659
Towards dynamic randomized algorithms in computational geometry
[INRIA-RR-1727] p 1156 N94-17528

DYNAMIC RANGE
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
Evaluation of midband analog fiber optic telemetry links
[DE93-015128] p 883 N94-16056

DYNAMIC RESPONSE
Static aeroelastic response of an aircraft with asymmetric wing planforms representative of combat damage
[AD-A266890] p 865 N94-14951
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710
Aerodynamic/dynamic/control interaction
[AD-A266187] p 871 N94-16107
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
The nature of dynamic arteriolar vasoreactivity: A mini-review and A classification scheme
[AD-A266499] p 1128 N94-16783
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
Aerothermoelastic analysis of a NASP demonstrator model
[NASA-TM-109007] p 867 N94-17055
Method and apparatus to characterize ultrasonically reflective contrast agents
[NASA-CASE-LAR-14969-1] p 1129 N94-17085
Integrating reactive and deliberative planning for agents
[AD-A267631] p 1166 N94-17201
Nonlinear random response prediction using MSC/NASTRAN
[NASA-TM-109029] p 1179 N94-17650

DYNAMIC STABILITY
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532

DYNAMIC STRUCTURAL ANALYSIS
Vibro-acoustic analysis of an aircraft maintenance dock
[AD-A266778] p 871 N94-14908
Research in robust control for hypersonic aircraft
[NASA-CR-194106] p 870 N94-15416
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710
Physical properties of the benchmark models program supercritical wing
[NASA-TM-4457] p 866 N94-15722
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
Aerodynamic/dynamic/control interaction
[AD-A266187] p 871 N94-16107
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
A rapid computational model for estimating the performance of compliant airfoils in cascades
[AD-A266275] p 857 N94-16471
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Development and comparison of advanced reduced-basis methods for the transient structural analysis of unconstrained structures
[NASA-TM-109015] p 1061 N94-17259
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

DYNAMIC TESTS
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine-code documentation and listings, volume 2
[AD-A268177] p 873 N94-17508
Structured finite volume modeling of US Navy aircraft engine test cells. Task 2: Turboprop engine. Volume 2: Code documentation and listings
[AD-A268386] p 873 N94-17569

E

EARTH (PLANET)
Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling p 1286 N94-16381

EARTH ATMOSPHERE
ATLAS-2 and UARS correlative measurement opportunities during Space Shuttle mission on April 8-17, 1993 [NASA-TM-109020] p 1105 N94-15480
Investigation of cloud properties and atmospheric stability with MODIS [NASA-CR-193475] p 1107 N94-16717
Boundary layer structure over areas of heterogeneous heat fluxes [DE93-010657] p 1110 N94-17673

EARTH CORE
Lava crusts and flow dynamics p 1103 N94-16316

EARTH CRUST
LFASE report: Crustal study [AD-A266893] p 1111 N94-14947
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments [DE93-013581] p 1112 N94-16009
NORSAR basic seismological research [AD-A266193] p 1101 N94-16125
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness p 1103 N94-16211
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
Constraints on the differentiation of the Earth from the coupled Sm-146,147-Nd-142,143 systematics p 1103 N94-16271
Lava crusts and flow dynamics p 1103 N94-16316
A search for evidence of nonlinear elasticity in the earth [DE93-015279] p 1102 N94-17252

EARTH GRAVITATION
New techniques for the combination of heterogenous data when determining the Earth's gravity field [SER-C-395] p 1098 N94-15153
Papers presented at the Eleventh International Symposium on Earth Tides [COMMUNICATIONS-SER-B-158] p 1098 N94-15800
Report of the International Center for Earth Tides for the period 1985-1989 p 1099 N94-15801
Nontidal gravity changes observed with a superconducting gravimeter p 1100 N94-15808
Earth tides results obtained with gravimeters, clinometers, and strainmeters in Belgium and in Grand Duchy of Luxembourg p 1100 N94-15809
Results of tidal gravity observations with a conical pendulum p 1100 N94-15810
What we can learn about ocean tides from tide gauge and gravity loading measurements? p 1100 N94-15811
Water-levels fluctuations in a borehole at the Royal Observatory of Belgium: Effects on local gravity, Earth tidal, and barometric responses p 1100 N94-15812
A study of the observed tidal residue vectors B versus oceanic tidal load vectors L p 1100 N94-15813
Tidal gravity anomalies and tectonics p 1101 N94-15814
Report of the working group on theoretical tidal model p 1101 N94-15815
BRIDGE: A small scientific satellite for geodesy p 890 N94-17146

EARTH IONOSPHERE
Comparison of RADARC high-frequency radar performance prediction model and ROTHR Amchitka data [AD-A267077] p 987 N94-15540
Optimization of satellite coverage in observing cause and effect changes in the ionosphere, magnetosphere, and solar wind [AD-A267956] p 1102 N94-17493

EARTH MAGNETOSPHERE
The Solar Flare Myth in solar-terrestrial physics [DE93-016487] p 1299 N94-16895
Micro- and meso-scale simulations of magnetospheric processes related to the aurora and substorm morphology [NASA-CR-193437] p 1102 N94-17527

EARTH MANTLE
NORSAR basic seismological research [AD-A266193] p 1101 N94-16125
Siderophile elements in the upper mantle of the Earth: New clues from metal-silicate partition coefficients p 1103 N94-16250
Constraints on the differentiation of the Earth from the coupled Sm-146,147-Nd-142,143 systematics p 1103 N94-16271
Water in Earth's mantle: Hydrogen analysis of mantle olivine, pyroxenes and garnet using the SIMS p 1104 N94-16336
First results from analysis of coordinated AVIRIS, TIMS, and ISM (French) data for the Ronda (Spain) and Beni Bousera (Morocco) peridotites p 1067 N94-16675

EARTH MOVEMENTS
Laser tracking for vertical control p 911 N94-15553

EARTH OBSERVATIONS (FROM SPACE)
A 12.5 micron infrared detector for Earth observation p 903 N94-15052
Views from space [NASA-TM-109634] p 1081 N94-15245
STS-26 Shuttle Earth views, April 1990, part 1 [NASA-TM-109564] p 1082 N94-15334
STS-26 Shuttle Earth views, April 1990, part 2 [NASA-TM-109565] p 1082 N94-15335
Testing the waters from space --- Thermal mapping [NASA-TM-109623] p 1082 N94-15409
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
Data distribution p 993 N94-15910
The Spectral Image Processing System (SIPS): Software for integrated analysis of AVIRIS data p 1067 N94-16674
JPL activities on development of acousto-optic tunable filter imaging spectrometer p 1037 N94-16696
Radar Analysis and Visualization Environment (RAVEN): Software for polarimetric radar analysis p 1080 N94-16758
Small Satellites Systems and Services [ISBN-2-85-428327-9] p 888 N94-17131
Earth observation from small satellites p 891 N94-17150
Small imaging satellite for Earth observing system adjunct p 891 N94-17151
SYDONI: An intensified system for night observation p 891 N94-17153
Standard platforms for small satellites p 895 N94-17181

EARTH OBSERVING SYSTEM (EOS)
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
EOS SAR: A new approach p 992 N94-15904
Surface energy balance modeling at mesoscale: The contribution of the future Earth observing system [BCRS-91-04] p 1085 N94-17616

EARTH ORBITAL ENVIRONMENTS
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts [AD-A267140] p 885 N94-15749
Third LDEF Post-Retrieval Symposium Abstracts [NASA-CP-10120] p 1303 N94-16495
History of on-orbit satellite fragmentations [NASA-CR-191644] p 887 N94-16502
Performance of silvered Teflon thermal control blankets on spacecraft [AD-A266284] p 887 N94-16909
Optical properties of water released in low Earth orbit [AD-A266197] p 1192 N94-16936
Low Earth orbit constellations: Orbit control or not p 875 N94-17134
High voltage conductors in spacecraft [AD-A267268] p 897 N94-17266

EARTH ORBITAL RENDEZVOUS
The effect of an on-orbit near encounter on the number flux density of micron sized particles p 899 N94-16374

EARTH ORBITS
Satellite situation report, volume 33, no. 3 [NASA-TM-109278] p 885 N94-15712
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378
History of on-orbit satellite fragmentations [NASA-CR-191644] p 887 N94-16502
Implementing a 50x50 gravity field model in an orbit determination system [AD-A267548] p 888 N94-17103
BRIDGE: A small scientific satellite for geodesy p 890 N94-17146
SYNMOD: A low-resource, low-cost means of monitoring the near-Earth space debris environment p 891 N94-17148

EARTH ORIENTATION
Laser ranging data analysis [NASA-CR-193547] p 1041 N94-16719

EARTH RADIATION BUDGET EXPERIMENT
Global climate study [NASA-TM-109612] p 1098 N94-15363

EARTH RESOURCES
The 1973 highlights --- Pioneer and Mariner space probes and other advancements [NASA-TM-109624] p 1302 N94-15410

EARTH SCIENCES
Short walk to everywhere --- Space, Earth, Ocean Center [NASA-TM-109541] p 1221 N94-15372
High-resolution seismic reflection survey at the Manson crater, Iowa p 1103 N94-16307
Spaceship Earth: A partnership in curriculum writing p 1222 N94-16356
Earth system dynamics: The interrelation of atmospheric, ocean and solid earth dynamics [NASA-CR-193487] p 1081 N94-17444

EARTH SURFACE
Primary studies of Chinese spaceborne SAR p 993 N94-15916
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694
Lithological and textural controls on radar and diurnal thermal signatures of weathered volcanic deposits, Lunar Crater region, Nevada p 1080 N94-16762
Earth observational research using multistage EOS-like data [NASA-CR-194626] p 1084 N94-16831

EARTH TIDES
Papers presented at the Eleventh International Symposium on Earth Tides [COMMUNICATIONS-SER-B-158] p 1098 N94-15800
Report of the International Center for Earth Tides for the period 1985-1989 p 1099 N94-15801
A new feedback system for instruments equipped with a capacitive transducer p 1037 N94-15802
Long baseline watertubes p 1037 N94-15803
Temperature measurements p 1037 N94-15804
On tidal parameters at Brussels fundamental station p 1100 N94-15807
Earth tides results obtained with gravimeters, clinometers, and strainmeters in Belgium and in Grand Duchy of Luxembourg p 1100 N94-15809
Results of tidal gravity observations with a conical pendulum p 1100 N94-15810
What we can learn about ocean tides from tide gauge and gravity loading measurements? p 1100 N94-15811
Water-levels fluctuations in a borehole at the Royal Observatory of Belgium: Effects on local gravity, Earth tidal, and barometric responses p 1100 N94-15812
A study of the observed tidal residue vectors B versus oceanic tidal load vectors L p 1100 N94-15813
Tidal gravity anomalies and tectonics p 1101 N94-15814
Report of the working group on theoretical tidal model p 1101 N94-15815
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

EARTH-MOON SYSTEM
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

EARTHQUAKES
Broadband teleseismic array recording in the Adirondack Mountains, New York State [AD-A267290] p 1097 N94-14960
The 1970 highlights --- NASA programs and research [NASA-TM-109628] p 1302 N94-15415
Tectonic deformation in southern California [NASA-CR-194621] p 1101 N94-16021
A search for evidence of nonlinear elasticity in the earth [DE93-015279] p 1102 N94-17252

ECCENTRIC ORBITS
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

ECCENTRICITY
Tidal interaction: A possible explanation for geysers and other fluid phenomena in the Neptune-Triton system p 1272 N94-16311
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379
Dust grain resonant capture: A statistical study p 1245 N94-16384

ECHOCARDIOGRAPHY
STS-32 crew training for lower body negative pressure unit and AFE [NASA-TM-109475] p 1120 N94-15381

ECOLOGY
Driving terrestrial ecosystem models from space p 991 N94-15896

ECONOMIC ANALYSIS
Techno-economic requirements for automotive composites p 937 N94-16847
ECONOMIC FACTORS
New York MARKAL: An evaluation of carbon dioxide emission control strategies in New York State
[DE93-013149] p 1095 N94-15999
Approaching the new reality
[TABES PAPER 93-230] p 1050 N94-16131
ECONOMIC IMPACT
Technology transfer. Determining industry needs: A guide for communities
[NASA-CR-194676] p 1235 N94-17293
ECONOMICS
Technology transfer. Determining industry needs: A guide for communities
[NASA-CR-194676] p 1235 N94-17293
ECOSYSTEMS
Development of pattern recognition techniques for the evaluation of toxicant impacts to multispecies systems
[AD-A267197] p 1095 N94-15790
Driving terrestrial ecosystem models from space
p 991 N94-15896
Recent advances in radar remote sensing of forest
p 991 N94-15897
TOPSAT: Global space topographic mission
p 992 N94-15905
Measuring dry plant residues in grasslands: A case study using AVIRIS p 1072 N94-16697
Oregon transect: Comparison of leaf-level reflectance with canopy-level and modelled reflectance
p 1073 N94-16702
AVIRIS data and neural networks applied to an urban ecosystem p 1073 N94-16705
Multitemporal diurnal AVIRIS images of a forested ecosystem p 1074 N94-16709
Discrimination among semi-arid landscape endmembers using the Spectral Angle Mapper (SAM) algorithm
p 1074 N94-16711
EDDY VISCOSITY
A numerical investigation of energy transfer and subgrid-scale eddy-viscosity in homogeneous, isotropic, and shear turbulence
[AD-A267265] p 1029 N94-17363
EDGE DETECTION
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498
Comparison of edges detected at different polarisations in MAESTRO data p 1080 N94-16761
EDUCATION
Symposium on the Future of Aeronautics in the Netherlands
[ETN-93-93780] p 853 N94-15120
Developments in the Higher Technical Aerospace Education p 854 N94-15130
Expectations for the future of the Faculty of Aeronautics and Astronautics of the Technical University of Delft
p 854 N94-15131
NASA Spacelink computer
[NASA-TM-109657] p 1140 N94-15228
SHARP
[NASA-TM-109659] p 1221 N94-15230
Space classroom
[NASA-TM-109661] p 1221 N94-15232
Teacher in space
[NASA-TM-109666] p 1131 N94-15237
Short walk to everywhere --- Space, Earth, Ocean Center
[NASA-TM-109541] p 1221 N94-15372
STS-29 crew IMAX camera training
[NASA-TM-109546] p 1031 N94-15380
CORE/TRC
[NASA-TM-109434] p 1221 N94-15418
NASA report to education, volume 7
[NASA-TM-109435] p 1247 N94-15419
Spacework 16 --- Simulated Space Shuttle Program
[NASA-TM-109436] p 1221 N94-15420
Challenger Center
[NASA-TM-109432] p 1221 N94-15504
Challenger Center: Orientation
[NASA-TM-109433] p 1221 N94-15505
Coast encounters: A space age adventure in science literacy
[NASA-TM-109334] p 1229 N94-15523
NASA Space Engineering Research Center for VLSI System Design
[NASA-CR-194587] p 1008 N94-15547
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
The planetary data system educational CD-ROM
p 1234 N94-16209
Teaching planetary sciences to elementary school teachers: Programs that work p 1222 N94-16346
Spaceship Earth: A partnership in curriculum writing
p 1222 N94-16356
Do it yourself remote sensing: Generating an inexpensive, high tech, real science lake mapping project for the classroom p 1086 N94-16407
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Emergency preparedness and planning
p 1124 N94-16613
Education and training of professional industrial hygienists for 2020 p 1125 N94-16618
Physical fitness and health education program at NASA Headquarters p 1126 N94-16631
Ames Fitness Program p 1126 N94-16632
Johnson Space Center health related fitness program
p 1126 N94-16633
From the Moons of Jupiter to the Milky Way
[NASA-CR-194649] p 1240 N94-17059
Defense RDT&E online system (DROLS) handbook
[AD-A267546] p 1232 N94-17101
Maximizing participation of women in collegiate aviation education
[NIAR-93-14] p 1222 N94-17261
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403
The impact of industry/university consortia programs on space education
[NASA-TM-109340] p 1222 N94-17441
EFFECTORS
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
EFFICIENCY
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line
[NASA-TP-3359] p 859 N94-16574
EGRESS
STS-35 Crew training: Bailout in CCT, firefighting, TAGS class and bailout in WFTF
[NASA-TM-109489] p 1135 N94-15195
STS-29 pre-launch and post-landing egress
[NASA-TM-109574] p 1135 N94-15305
STS-33 emergency egress training
[NASA-TM-109525] p 1136 N94-15388
1990 ASCAN ground egress/parasail
[NASA-TM-109528] p 1136 N94-15391
Crew escape certification test
[NASA-TM-109530] p 1136 N94-15392
EIGENVALUES
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
Eigenfunctions of the transfer matrix in the presence of linear coupling
[DE93-015020] p 1151 N94-16892
Closed form characteristic function for general complex second-order form in correlated complex Gaussian random variables
[AD-A267883] p 1171 N94-17393
EIGENVECTORS
Modal element method for potential flow in non-uniform ducts: Combining closed form analysis with CFD
[NASA-TM-106347] p 1169 N94-15799
The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972
Modal ring method for the scattering of sound
[NASA-TM-106342] p 1177 N94-16497
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
Eigenfunctions of the transfer matrix in the presence of linear coupling
[DE93-015020] p 1151 N94-16892
Closed form characteristic function for general complex second-order form in correlated complex Gaussian random variables
[AD-A267883] p 1171 N94-17393
EJECTA
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness
p 1103 N94-16211
The physical mechanism of comet outbursts: An experiment p 1242 N94-16221
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Corvid meteoroids and a Giordano Bruno ray are genetically related p 1242 N94-16223
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement
p 1242 N94-16245
A first-order model for impact crater degradation on Venus p 1265 N94-16268
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
Geochemical evidences for two chondritic-like cometary or asteroidal impacts before and at the K/T boundary
p 1244 N94-16359
Galileo SSI lunar observations: Copernican craters and soils p 1288 N94-16395
Grain surface features of Apollo 17 orange and black glass p 1289 N94-16397
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607
EL NINO
IAI topic: El Nino. Southern oscillation and interannual climate variability
[INPE-5410-PRE/1757] p 1111 N94-15186
ELASTIC BENDING
Static analysis of beams on an elastic base as stated by generalized functions
[IFTR-27/1991] p 1060 N94-16923
ELASTIC DAMPING
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation
[DE93-015406] p 1212 N94-16887
ELASTIC DEFORMATION
An analysis of ways of determining the material constants for viscoelastic materials
[IFTR-28/91] p 951 N94-17050
ELASTIC PROPERTIES
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle
p 1293 N94-16421
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
Elastooptical brittle materials in experimental studies of the state of stress and deformation
[IFTR-22/1991] p 1059 N94-16651
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246
A search for evidence of nonlinear elasticity in the earth
[DE93-015279] p 1102 N94-17252
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method
[NASA-CR-194267] p 1062 N94-17445
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606
ELASTIC SCATTERING
The pp elastic scattering experiment at RHIC and polarization studies in the Coulomb Nuclear Interference region
[DE93-015391] p 1187 N94-16829
ELASTIC SHELLS
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
ELASTIC WAVES
NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125
Elastic waves in discretely continuous mechanical systems
[IFTR-21/1992] p 1061 N94-17091
ELASTIN
Materials Research Society Symposium Proceedings, Volume 292: Biomolecular Materials
[AD-A265776] p 1116 N94-15138
ELASTODYNAMICS
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587
ELASTOMERS
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507

ELASTOPLASTICITY
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269

ELDO LAUNCH VEHICLE
The launch of ELDO
[ESA-HSR-7] p 886 N94-16501

ELECTRIC ARCS
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635

ELECTRIC BATTERIES
Utility emissions associated with electric and hybrid vehicle (EHV) charging
[DE93-013734] p 1011 N94-16459
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
Thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18694-1-CU] p 1014 N94-17325

ELECTRIC CHARGE
Swelling equilibria for temperature-sensitive ampholytic hydrogels
[DE93-015264] p 966 N94-15996

ELECTRIC CONDUCTORS
Steering capacitlector sensor
[NASA-CASE-GSC-13489-1] p 1164 N94-15704
Capacitlector camera
[NASA-CASE-GSC-13564-1] p 1033 N94-15872
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266
Synthesis and characterization of new low-dimensional metal complex conductors
[AD-A268251] p 952 N94-17416

ELECTRIC CONNECTORS
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1046 N94-15871
Engineering design of a high-temperature superconductor current lead
[DE93-015156] p 1013 N94-17226

ELECTRIC CONTACTS
Integrated fundamental research on current collection
[AD-A266987] p 1008 N94-15494
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553

ELECTRIC CORONA
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537

ELECTRIC CURRENT
Potential transients, transmission and electrochemical corrosion detection
[DE93-014055] p 956 N94-15922
Polar 2 model of the wake shield experiment
[AD-A266243] p 882 N94-16468
Surface flashover of semiconductors: A fundamental study
[AD-A267382] p 1012 N94-17023
FNAS/solar flare energetics
[NASA-CR-193574] p 1299 N94-17089
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311

ELECTRIC DIPOLES
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978

ELECTRIC DISCHARGES
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1046 N94-15873
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464

ELECTRIC FIELD STRENGTH
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635

ELECTRIC FIELDS
Antenna gain loss and pattern degradation due to transmission through dielectric radomes
[AD-A267242] p 986 N94-14974
An optically modulated scatterer for microwave antenna metrology
[NPL-DES-126] p 986 N94-15020
Experimental evaluation of an adaptive focusing algorithm for a microwave planar phased-array hyperthermia system at UCSF
[AD-A267004] p 1121 N94-15634
Resonant frequencies of irregularly shaped microstrip antennas using method of moments
[NASA-TP-3386] p 989 N94-15767
Middle atmospheric electric fields over thunderstorms
[NASA-CR-194619] p 1106 N94-16493
Electro-rheological disk pump
[AD-D015783] p 1047 N94-16531
Electrorheological fluid chemical processing
[AD-D015785] p 948 N94-16532
Process for shaping articles from electrosetting compositions
[AD-D015787] p 935 N94-16534
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893
Surface flashover of semiconductors: A fundamental study
[AD-A267382] p 1012 N94-17023
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621

ELECTRIC GENERATORS
Application of thermal spray and ceramic coatings and reinforced epoxy for cavitation damage repair of hydroelectric turbines and pumps
[AD-A267624] p 971 N94-17198
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250

ELECTRIC HYBRID VEHICLES
Utility emissions associated with electric and hybrid vehicle (EHV) charging
[DE93-013734] p 1011 N94-16459

ELECTRIC MOTORS
Hydraulic pump with integral electric motor
[AD-D015782] p 1011 N94-16549

ELECTRIC NETWORKS
Circuits and control processes for combining direct converters and inverter motors
[ETN-93-94399] p 1008 N94-15448

ELECTRIC POTENTIAL
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
Capacitlector camera
[NASA-CASE-GSC-13564-1] p 1033 N94-15872
Bioorganic models for protein ion channels
[AD-A266365] p 1117 N94-16441
Electro-rheological disk pump
[AD-D015783] p 1047 N94-16531
Inductive effects during second harmonic current drive experiments on T-10
[DE93-014411] p 1202 N94-16803
Fundamental-mode RF design in e(+)e(-) storage ring factories
[DE93-015249] p 1183 N94-16809
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645

ELECTRIC PROPULSION
NASA images 10
[NASA-TM-109419] p 924 N94-15351
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308

ELECTRIC PULSES
User manual and program description of the data acquisition system of PML-pulse physics
[AD-A266752] p 1147 N94-15776

ELECTRIC ROCKET ENGINES
Application of a NEPTUNE propulsion concept to a manned Mars excursion
[AD-A268053] p 929 N94-17587

ELECTRIC SWITCHES
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307

ELECTRIC WIRE
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754

ELECTRICAL FAULTS
Results of an electrical power system fault study (CDDF)
[NASA-TP-3413] p 884 N94-15007
A method of detecting and locating electrical current imbalances
[NASA-CASE-LEW-15407-1] p 1009 N94-15706
Cellulose triacetate, thin film dielectric capacitor
[NASA-CASE-NPO-18935-1-CU] p 1010 N94-15952
Surface flashover of semiconductors: A fundamental study
[AD-A267382] p 1012 N94-17023
Electrical properties of sol-gel PZT thin films for decoupling capacitor applications
[DE93-016491] p 1015 N94-17648

ELECTRICAL IMPEDANCE
Determination of equivalent circuit for PVDF shock-pressure gauges
[DE93-016492] p 1034 N94-16452
Stray insensitive switched capacitor composite operational amplifiers
[AD-A267412] p 1012 N94-16976
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645

ELECTRICAL INSULATION
Structures from low dielectric polyimides
[NASA-CASE-LAR-14988-1] p 965 N94-15880
Low dielectric polyimides
[NASA-CASE-LAR-14987-2] p 974 N94-17559

ELECTRICAL PROPERTIES
Partial melting experiment of Y-Ba-Cu oxide p 945 N94-15168
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567

ELECTRICAL RESISTANCE
Nonstationary behaviour of low background photon detectors p 902 N94-15049
Integrated fundamental research on current collection
[AD-A266987] p 1008 N94-15494

ELECTRICAL RESISTIVITY
Integrated fundamental research on current collection
[AD-A266987] p 1008 N94-15494
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
Synthesis and characterization of new low-dimensional metal complex conductors
[AD-A268251] p 952 N94-17416
Investigations of YBaCuO materials with near-room-temperature resistivity transitions
[AD-A268016] p 1216 N94-17477
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635

ELECTRIFICATION
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
[AD-A267479] p 1004 N94-17364

ELECTRO-OPTICAL PHOTOGRAPHY
An electronic imaging system for the Aeroballistic Research Facility
[AD-A267157] p 1033 N94-15826

ELECTRO-OPTICS
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998
Database system studies in fine grain optoelectronic computing
[AD-A267026] p 1145 N94-15627
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848
TOPSAT: Global space topographic mission
p 992 N94-15905
Method and apparatus for performing scanning tunneling optical absorption spectroscopy
[AD-D015796] p 948 N94-16539
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Micro-optics technology and sensor systems applications p 1197 N94-17350
OSA proceedings on Ultrafast Electronics and Optoelectronics, volume 14
[AD-A267972] p 1014 N94-17410
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577

ELECTROACOUSTIC TRANSDUCERS
An electroacoustic transducer for purposes of photoacoustic spectroscopy
[IFTR-7/1992] p 1013 N94-17071

ELECTROCATALYSTS
Binding of carbon dioxide to metal macrocycles: Toward a mechanistic understanding of electrochemical and photochemical carbon dioxide reduction
[DE93-016244] p 949 N94-16870
Vectorial electron transfer in spatially ordered arrays
[DE93-018150] p 1185 N94-16971

ELECTROCHEMICAL CELLS
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
Investigation of the influence of applied potential on erosion-corrosion of copper in alkaline chloride solutions
[AD-A266448] p 958 N94-16562

ELECTROCHEMICAL CORROSION
Potential transients, transmission and electrochemical corrosion detection
[DE93-014055] p 956 N94-15922

ELECTROCHEMISTRY
Binding of carbon dioxide to metal macrocycles: Toward a mechanistic understanding of electrochemical and photochemical carbon dioxide reduction
[DE93-016244] p 949 N94-16870
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928
Activation and deactivation of high concentration arsenic with some evidence of precipitation
[DE93-016437] p 950 N94-16952

ELECTRODE MATERIALS
Chemical interactions between interconnect and electrode materials during sintering in solid oxide fuel cells
[DE93-015696] p 1092 N94-16160

ELECTRODEPOSITION
Structural and dynamical aspects of electrodeposition
[AD-A266786] p 942 N94-14909
Molten salt electrodeposition of high temperature superconductors
[AD-A266620] p 1009 N94-15726

ELECTRODES
Structural and dynamical aspects of electrodeposition
[AD-A266786] p 942 N94-14909
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Cellulose triacetate, thin film dielectric capacitor
[NASA-CASE-NPO-18935-1-CU] p 1010 N94-15952
In situ studies of passive film chemistry using x ray absorption spectroscopy
[DE93-014023] p 947 N94-16011
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061
Electro-rheological disk pump
[AD-D015783] p 1047 N94-16531
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006

ELECTRODYNAMICS
Middle atmospheric electric fields over thunderstorms
[NASA-CR-194619] p 1106 N94-16493
Electrodynamic forces of the cross-connected figure-eight null-flux coil suspension system
[DE93-015139] p 1048 N94-16969

ELECTROHYDRODYNAMICS
Electrophoresis visualisation p 944 N94-15163

ELECTROLESS DEPOSITION
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664

ELECTROLYTES
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638

ELECTROMAGNETIC ABSORPTION
Spectral studies of solid propellant combustion 4: Absorption and burn rate results for M43, XM39, and M10 propellants
[AD-A267119] p 946 N94-15685
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
Effect of powerful oblique HF waves on ionospheric D-layer absorption
[AD-A268443] p 1102 N94-17499

ELECTROMAGNETIC COMPATIBILITY
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523

ELECTROMAGNETIC COUPLING
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196

ELECTROMAGNETIC FIELDS
Determination of the electromagnetic fields radiated from the ARES EMP simulator
[AD-A267069] p 988 N94-15668
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054
A priori inequalities for an ideal-incompressible liquid in an electromagnetic field
[IFTR-9/1992] p 998 N94-16652
Analysis of an electromagnetic field in the vicinity of a caustic by asymptotic methods
[IFTR-12/1991] p 998 N94-16653
An asymptotic expansion of an electromagnetic field in the velocity of a caustic in the form of simple waves
[IFTR-14/1991] p 1002 N94-17048
Relativistic dynamics of spin in strong external fields
[NIKHEF-H/93-06] p 1240 N94-17604

ELECTROMAGNETIC INTERACTIONS
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
Confinement and stability of a Crystal Beam
[DE93-015400] p 1181 N94-16020
Electroweak physics from D0
[DE93-015041] p 1181 N94-16053
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Electroweak results from D0
[DE93-014926] p 1185 N94-16968
The exact solution of the problem of diffraction of an electromagnetic plane wave by a conductive half-plane situated at an interface
[IFTR-3/91] p 1002 N94-17057
Application of the finite-difference time-domain method to scattering and radiation problems involving wires and plates
[AD-A268396] p 1005 N94-17496
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567

ELECTROMAGNETIC INTERFERENCE
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
An electromagnetic interference study of potential transmitter sites for the HF Active Auroral Research Program (HAARP)
[AD-A267743] p 1004 N94-17373
Forecasting the ducting of electromagnetic waves on the mesoscale
[AD-A268101] p 1109 N94-17571

ELECTROMAGNETIC NOISE
Looking at Fokker-Planck dynamics with a noisy instrument
[AD-A267049] p 1117 N94-15662
What is the radar tracking Glint problem and can it be solved?
[AD-A266509] p 999 N94-16789

ELECTROMAGNETIC PULSES
Determination of the electromagnetic fields radiated from the ARES EMP simulator
[AD-A267069] p 988 N94-15668
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
Ground wave emergency network final operational capability: Environmental assessment for central Wyoming relay node, site number RN 8C928WY
[AD-A267842] p 1001 N94-17011
Ground wave emergency network final operational capability: Environmental assessment for southern Nevada relay node site number RN 8W918NV
[AD-A267647] p 1002 N94-17205
Ground wave emergency network final operational capability: Environmental assessment for northwestern Nebraska relay node, site number RN 8C930NE
[AD-A267629] p 1003 N94-17212
Ground wave emergency network environmental assessment for northwestern Colorado relay node site number RN 8C924CO
[AD-A267654] p 1003 N94-17249
Ground wave emergency network. Final operational capability. Environmental assessment for southeastern Idaho relay node, site no. RN8W927ID
[AD-A267796] p 1003 N94-17304
Ground wave emergency network final operational capability. Environmental assessment for southern Arkansas relay node site no. RN 8C912AR
[AD-A268001] p 1004 N94-17376
Environmental assessment for northwestern Indiana relay node site no. RN 8C902IN
[AD-A267849] p 1004 N94-17406
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621

ELECTROMAGNETIC RADIATION
Future development in cryogenic techniques for space
p 901 N94-15042
Double stimulated Brillouin scattering
p 1200 N94-15205
Plume radiation p 924 N94-15223
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774
Development of a proposed international standard for certification of aircraft to High Intensity Radiated Fields (HIRF)
[NASA-TM-106357] p 863 N94-16520
Ergonomics in the office environment
p 1124 N94-16612
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196

Bioeffects of radiofrequency radiation on cell growth and differentation. Volume 1: Engineering considerations
[AD-A267754] p 1118 N94-17232
Color separation gratings p 1198 N94-17362

ELECTROMAGNETIC SCATTERING
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
Application of the finite-difference time-domain method to scattering and radiation problems involving wires and plates
[AD-A268396] p 1005 N94-17496

ELECTROMAGNETIC WAVE FILTERS
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494

ELECTROMAGNETIC WAVE TRANSMISSION
The three-dimensional ray trajectories of the WKB optical fiber modes
[AD-A267167] p 1189 N94-15739
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825
A ray trace model for propagation loss
[AD-A266314] p 997 N94-16467
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
Forecasting the ducting of electromagnetic waves on the mesoscale
[AD-A268101] p 1109 N94-17571

ELECTROMAGNETISM
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998

ELECTROMECHANICAL DEVICES
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
Stress analysis of laminated composites with preformed holes. Part 1: Single plies with embedded material discontinuities
[AD-A266524] p 936 N94-16795
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210

ELECTROMETERS
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240

ELECTRON ACCELERATION
Multispectral observations of the Jovian aurora
[NASA-CR-193628] p 1297 N94-16884

ELECTRON ACCELERATORS
Measurements of the operation of the SINUS-6/BWO system
[AD-A266423] p 1011 N94-16556
Advanced transport systems for electron beams in high brightness accelerators and FELs
[AD-A267322] p 1041 N94-17001

ELECTRON ATTACHMENT
Negative ion formation in small carbon clusters
[DE93-015436] p 1182 N94-16064

ELECTRON BEAMS
Measurement of the specific heat capacity of the electron-beam graphite calorimeter
[NPL-RSA(EXT)-40] p 1031 N94-15018
A study of high field transport in wide band gap electronic materials using a picosecond transient charge technique
[AD-A267098] p 1008 N94-15636
Thomson backscattered x rays from an intense laser beam
[AD-A267125] p 1038 N94-15686
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Modification of fluoropolymer surfaces with electronically conductive polymers
[AD-A266294] p 967 N94-16475
Measurements of the operation of the SINUS-6/BWO system
[AD-A266423] p 1011 N94-16556
Advanced transport systems for electron beams in high brightness accelerators and FELs
[AD-A267322] p 1041 N94-17001
Electron reversal ionizer for detection of trace species using a spherical cathode
[NASA-CASE-NPO-18870-1-CU] p 1185 N94-17329
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Low cost paths to binary optics p 1197 N94-17353
Low voltage electron beam lithography
[AD-A267865] p 1215 N94-17389

ELECTRON CYCLOTRON HEATING
Inductive effects during second harmonic current drive experiments on T-10
[DE93-014411] p 1202 N94-16803
Recent results from the 60 GHz inside launch ECH system on the D3-D tokamak
[DE93-013027] p 1203 N94-16816

ELECTRON DENSITY (CONCENTRATION)
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
Application of cylindrical distribution functions to anisotropic scattering from amorphous films
[DE93-015256] p 1183 N94-16811

ELECTRON DENSITY PROFILES
A physical model for one-dimension and time-dependent ionosphere. Part 2: Results and discussions
[DE93-627959] p 1103 N94-17631

ELECTRON DIFFRACTION
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

ELECTRON DISTRIBUTION
X ray laser program
[AD-A267075] p 1038 N94-15628

ELECTRON EMISSION
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586

ELECTRON ENERGY
Characterization of InTISb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials
[DE93-015333] p 947 N94-16014
The interaction of HCN(DCN) with Si(111)-7x7 studied with HREELS, UPS, and XPS
[AD-A266237] p 1182 N94-16111
ARIES tokamak reactor study
[DE93-017059] p 1203 N94-16901
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560

ELECTRON IMPACT
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436

ELECTRON MICROSCOPES
Mechanical and surface force nanoprobe
[AD-D015792] p 1034 N94-16536

ELECTRON MICROSCOPY
Electron-microscopy study of antiphase boundaries in Cu3Pd and Fe3Al alloys near the order-disorder transition
[ONERA-NT-1993-1] p 1206 N94-15295

ELECTRON MOBILITY
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674

ELECTRON ORBITALS
Water adsorption on diamond (110) studied by multiple internal reflection infrared spectroscopy
[AD-A266415] p 948 N94-16553

ELECTRON PARAMAGNETIC RESONANCE
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
Factors determining the release of nitric oxide --- Calcium/cadmium transport by renal cortical collectin duct cells
[AD-A266232] p 1118 N94-17224
Synthesis and characterization of new low-dimensional metal complex conductors
[AD-A268251] p 952 N94-17416

ELECTRON PHONON INTERACTIONS
Basic optical studies of high T(c) oxide superconductors
[AD-A268148] p 1014 N94-17428
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437

ELECTRON PLASMA
High frequency Raman current drive
p 1201 N94-15208

ELECTRON PROBES
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle
[DE93-015936] p 1101 N94-16840

ELECTRON SCATTERING
On the 17-keV neutrino
[DE93-012638] p 1181 N94-15974

ELECTRON SPECTROSCOPY
Electron spectroscopy analysis
[NASA-CR-193591] p 951 N94-17039
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560

ELECTRON STATES
Photodegradation of polyimides. V1: Effect of donor-acceptor groups on the photooxidative stability of polyimides and model compounds
[AD-A267319] p 970 N94-16947
Bibliography of short wavelength chemical laser research
[AD-A267619] p 1041 N94-17195
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377

ELECTRON TRANSFER
Structural effects in electron transfer reactions: Comparative interfacial electrochemical kinetics for cis- versus trans-dioxorhenium (V) (bi)pyridine oxidation
[AD-A266307] p 1182 N94-16466
Characterization of UV emissions resulting from electronic energy transfer in atmospheric molecules
[AD-A266244] p 1101 N94-16469
Scintillation mechanism in stoichiometric cerium compounds
[DE93-015499] p 948 N94-16771
High-valent oxo, methoxorhenium complexes: Models for intermediates and transition states in proton-coupled multi-electron transfer reactions
[AD-A266492] p 1211 N94-16782
Binding of carbon dioxide to metal macrocycles: Toward a mechanistic understanding of electrochemical and photochemical carbon dioxide reduction
[DE93-016244] p 949 N94-16870
Photodegradation of polyimides. V1: Effect of donor-acceptor groups on the photooxidative stability of polyimides and model compounds
[AD-A267319] p 970 N94-16947
Vectorial electron transfer in spatially ordered arrays
[DE93-018150] p 1185 N94-16971
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006

ELECTRON TRANSITIONS
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586

ELECTRON TUBES
RF vacuum microelectronics
[AD-A268399] p 1014 N94-17423

ELECTRON TUNNELING
Mechanical and surface force nanoprobe
[AD-D015792] p 1034 N94-16536
Method and apparatus for performing scanning tunneling optical absorption spectroscopy
[AD-D015796] p 948 N94-16539
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
Density of states and tunneling characteristics of layered superconductors
[DE93-015898] p 1211 N94-16839

ELECTRONIC CONTROL
Transputer based control system for MTLRS
p 877 N94-15613
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

ELECTRONIC EQUIPMENT
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100

ELECTRONIC EQUIPMENT TESTS
Multichip module high speed testing
[AD-A266968] p 986 N94-14955
ELECTRONIC FILTERS
Poisson filtering of laser ranging data
p 917 N94-15593
ELECTRONIC MAIL
Electronic messaging for the 1990's
[AD-A267143] p 1229 N94-15437
Computer networking at SLR stations
p 917 N94-15594
Performance Information Management System (PIMS) communication
[AD-A267040] p 1231 N94-16458
The ESA Tele-Invoicing System (ETIS)
[ESA-INT-6] p 1150 N94-16591
ELECTRONIC MODULES
Multichip module high speed testing
[AD-A266968] p 986 N94-14955
Module interconnection frameworks for a real-time spreadsheet
[AD-A267752] p 1153 N94-17231
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605
ELECTRONIC PACKAGING
Stress analysis of laminated composites with preformed holes. Part 1: Single plies with embedded material discontinuities
[AD-A266524] p 936 N94-16795
ELECTRONIC WARFARE
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035
ELECTRONICS
Cryogenic readout electronics for astronomical applications p 910 N94-15099
Translating wedge heat sink
[AD-D015814] p 1011 N94-16488
ELECTRONS
Iteration scheme for the multiparameter nonlinear boundary value problem with the additional conditions and its application to some field models
[DE93-626638] p 1168 N94-14933
Thinned, backside illuminated, area CCD imager for electron detection p 901 N94-15036
Electroweak physics from D0
[DE93-015041] p 1181 N94-16053
The 3D-Flow processor for a programmable level-1 trigger (feasibility study)
[DE93-016045] p 1159 N94-16172
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
Multispectral observations of the Jovian aurora
[NASA-CR-193628] p 1297 N94-16884
Electron reversal ionizer for detection of trace species using a spherical cathode
[NASA-CASE-NPO-18870-1-CU] p 1185 N94-17329
ELECTROPHORESIS
Orientation of DNA during free-solution electrophoresis p 944 N94-15162
Electrophoresis visualisation p 944 N94-15163
Investigation of the effects of polyelectrolyte coatings on colloid transport in porous media
[DE93-018300] p 970 N94-16973
ELECTRORHEOLOGICAL FLUIDS
Electrorheological fluid chemical processing
[AD-D015785] p 948 N94-16532
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
High pressure pump for electro-rheological fluids
[AD-D015888] p 1048 N94-16915
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210
ELECTROSTATIC BONDING
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
ELECTROSTATIC CHARGE
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1046 N94-15873
Process for shaping articles from electrosetting compositions
[AD-D015787] p 935 N94-16534
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
ELECTROSTATIC PROBES
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240
ELECTROSTATICS
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319
ELECTROSTRICTION
Nanocomposites for electronic applications, volume 1
[AD-A267070] p 1009 N94-15669
Nanocomposites for electronic applications, volume 3
[AD-A267073] p 1009 N94-15672
Nanocomposites for electronic applications, volume 2
[AD-A267074] p 1009 N94-15673
ELEMENT 104
On-line gas chromatographic studies of Rutherfordium (element 104), hahnium (element 105), and homologs
[DE93-013890] p 948 N94-16821
ELEMENT 105
On-line gas chromatographic studies of Rutherfordium (element 104), hahnium (element 105), and homologs
[DE93-013890] p 948 N94-16821
ELEMENTARY EXCITATIONS
Quasiparticle trapping in distributed superconducting three-terminal tunnel junction devices
p 910 N94-15101
ELEMENTARY PARTICLE INTERACTIONS
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662
ELEMENTARY PARTICLES
Particle physics and cosmology, Task C
[DE93-016865] p 1239 N94-16118
ELEVATION ANGLE
Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137
Propagation measurements in Alaska using ACTS beacons p 995 N94-16040
Propagation-related AMT design aspects and supporting experiments p 995 N94-16042
ELEVONS
Subsonic aerodynamic characteristics of the HL-20 lifting-body configuration
[NASA-TM-4515] p 861 N94-17284
ELLIPSES
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line
[NASA-TP-3359] p 859 N94-16574
ELLIPSOMETERS
Investigation of the influence of applied potential on erosion-corrosion of copper in alkaline chloride solutions
[AD-A266448] p 958 N94-16562
ELLIPSOMETRY
Investigation of the influence of applied potential on erosion-corrosion of copper in alkaline chloride solutions
[AD-A266448] p 958 N94-16562
ELLIPTIC DIFFERENTIAL EQUATIONS
On a class of singular quasilinear elliptic equations with general structure and distribution data
[DE93-628585] p 1171 N94-17613
ELLIPTIC FUNCTIONS
Statistics of the half-integer stopband
[DE93-016101] p 1173 N94-17236
ELLIPTICAL ORBITS
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167
EMBEDDED COMPUTER SYSTEMS
A formal protocol test procedure for the Survivable Adaptable Fiber Optic Embedded Network (SAFENET)
[AD-A267410] p 1192 N94-16975
Embedded computer systems: Status of C-17 software
[AD-A267307] p 1160 N94-16993
EMBOSSING
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
EMBRITTLEMENT
A reexamination of grain boundary fracture in Ni3Al: Environmental and alloying effects
[DE93-015431] p 1208 N94-16063
The effect of long-term aging on the impact properties of modified 9Cr-1Mo steel
[DE93-015453] p 957 N94-16068
EMBRYOLOGY
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636
EMBRYOS
STS-29 crew with student experiment
[NASA-TM-109545] p 1116 N94-15378
EMERGENCIES
Emergency preparedness and planning
p 1124 N94-16613
Illness/injury pattern complex 40 (Titan)
p 1125 N94-16625
Regulated emergency oxygen system
[AD-A266228] p 1138 N94-16983
Ground wave emergency network final operational capability: Environmental assessment for central Wyoming relay node, site number RN 8C928WY
[AD-A267842] p 1001 N94-17011
Ground wave emergency network environmental assessment for northwestern Colorado relay node site number RN 8C924CO
[AD-A267654] p 1003 N94-17249
Ground wave emergency network final operational capability. Environmental assessment for southern Arkansas relay node site no. RN 8C912AR
[AD-A268001] p 1004 N94-17376
EMISSION
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006
EMISSION SPECTRA
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions
p 954 N94-16372
Lasing dye sensor for chemical vapors
[AD-D015786] p 1040 N94-16533
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607
Soft x ray emission from Alexandrite laser-matter-interaction
[AD-A267905] p 1042 N94-17378
EMISSIVITY
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605
EMITTANCE
Emittance and beam size distortion due to linear coupling
[DE93-015402] p 1184 N94-16886
Emittance growth in displaced, space-charge-dominated beams with energy spread
[DE93-016514] p 1188 N94-17672
EMITTERS
Acousto-optical classifier
[AD-D015894] p 1000 N94-16921
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526
Field emitter arrays for RF vacuum microelectronics
[AD-A268595] p 1015 N94-17608
EMPLOYEE RELATIONS
Industrial labor relations manual
[NHB-5200.1B] p 1224 N94-15939
EMPLOYMENT
The NASA competitive placement plan for positions GS-15 and below (including trades and labor positions)
[NHB-3335.1C] p 1224 N94-15944
EMULSIONS
Determination of average refractive index of spin coated DCG films for HOE fabrication p 1036 N94-14992
ENCAPSULATING
Contained liquids in microgravity, part 2
p 979 N94-16085
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785
END EFFECTORS
Tactile sensing and control in humans and robotic/teleoperated systems
[AD-A267710] p 1163 N94-14937
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1046 N94-15871
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088

Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392
ENDOCRINOLOGY
New insulin pump
[NASA-TM-109642] p 1120 N94-15253
Melatonin, the pineal gland, and circadian rhythms
[AD-A268200] p 1129 N94-17478
ENDURANCE
Force-endurance capabilities of extravehicular activity (EVA) gloves at different pressure levels
[NASA-TP-3420] p 1139 N94-17653
ENERGETIC PARTICLES
The Solar Flare Myth in solar-terrestrial physics
[DE93-016487] p 1299 N94-16895
ENERGY ABSORPTION
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
Resist performance in soft x ray projection lithography
[DE93-016490] p 1036 N94-17647
ENERGY BUDGETS
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030
Effects of spatial variability and scale on areal -average evapotranspiration p 1084 N94-16033
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610
ENERGY CONSERVATION
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
ENERGY CONSUMPTION
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
Assessment of trends in the development of residential buildings from the standpoint of the fuel and energy requirements
[IFTR-6/1991] p 1093 N94-17092
ENERGY CONVERSION
New York MARKAL: An evaluation of carbon dioxide emission control strategies in New York State
[DE93-013149] p 1095 N94-15999
Emittance growth in displaced, space-charge-dominated beams with energy spread
[DE93-016514] p 1188 N94-17672
ENERGY CONVERSION EFFICIENCY
Progress in the concentrator initiative program
[DE93-015006] p 1091 N94-15984
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
ENERGY DISSIPATION
The interaction of HCN(DCN) with Si(111)-7x7 studied with HREELS, UPS, and XPS
[AD-A266237] p 1182 N94-16111
Six dimensional tracking simulator for H(-) injection in AGS Booster
[DE93-015396] p 1184 N94-16885
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560
ENERGY GAPS (SOLID STATE)
A study of high field transport in wide band gap electronic materials using a picosecond transient charge technique
[AD-A267098] p 1008 N94-15636
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Density of states and tunneling characteristics of layered superconductors
[DE93-015898] p 1211 N94-16839
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
ENERGY LEVELS
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774
ENERGY REQUIREMENTS
Assessment of trends in the development of residential buildings from the standpoint of the fuel and energy requirements
[IFTR-6/1991] p 1093 N94-17092
ENERGY SPECTRA
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR p 1248 N94-16177
On possible Mn-53 heterogeneity in the early solar system p 1244 N94-16344
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316
ENERGY STORAGE
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
Influence of grain size on the energy storing ability during uniaxial stretching of austenite steel
[IFTR-22/1992] p 961 N94-17121
ENERGY TECHNOLOGY
Space Station thermal storage/refrigeration system research and development
[NASA-CR-193841] p 879 N94-15191
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342
The 1978 highlights
[NASA-TM-109625] p 1302 N94-15411
The 1977 highlights
[NASA-TM-109626] p 1302 N94-15412
Requirements for supercomputing in energy research: The transition to massively parallel computing
[DE93-012376] p 1160 N94-16774
Publications of the Oak Ridge National Laboratory Fossil Energy Program, 1 October 1991 - 31 March 1993
[DE93-014643] p 1232 N94-16967
Energy from the sun: Evolution of federal support for solar energy
[AD-A267944] p 1093 N94-17382
DOE/NREL Advanced Wind Turbine Development Program
[DE93-010028] p 1093 N94-17668
ENERGY TRANSFER
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
Studies on the parametric decay of waves in fusion plasmas
[VTT-PUBS-110] p 1200 N94-15204
Ocean wave study
[NASA-TM-109620] p 1111 N94-15349
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
Study of multi-dimensional radiative energy transfer in molecular gases
[NASA-CR-194613] p 1181 N94-15752
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774
Single-collision studies of energy transfer and chemical reaction
[DE93-017603] p 1182 N94-16121
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT)
[DE93-015799] p 1202 N94-16162
Gas-grain energy transfer in solar nebula shock waves: Implications for the origin of chondrules p 1262 N94-16251
Characterization of UV emissions resulting from electronic energy transfer in atmospheric molecules
[AD-A266244] p 1101 N94-16469
Spectroscopic investigations of nonambient systems with millimeter and submillimeter probes
[AD-A268537] p 968 N94-16796
Bibliography of short wavelength chemical laser research
[AD-A267619] p 1041 N94-17195
Plasma flow switch and foil implosion experiments on Pegasus 2
[DE93-016464] p 1013 N94-17318
A numerical investigation of energy transfer and subgrid-scale eddy-viscosity in homogeneous, isotropic, and shear turbulence
[AD-A267265] p 1029 N94-17363
Energy deposition fluctuations induced by ions in microvolumes and nanovolumes: An analytic approach. 1: Theory
[AD-A267959] p 1173 N94-17495
ENGINE CONTROL
ALS engine controller system
[NASA-CR-194647] p 926 N94-16654
Development and analysis of startup strategies for particle bed nuclear rocket engine
[AD-A267949] p 927 N94-17053
ENGINE DESIGN
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
SPDE/SPRE final summary report
[NASA-CR-187086] p 924 N94-15482
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 2
[NASA-CR-193863] p 927 N94-17096
Some single-piston closed-cycle machines and Peter Tailer's thermal lag engine
[DE93-015983] p 1049 N94-17675
ENGINE INLETS
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681
ENGINE NOISE
Technical evaluation report on the AGARD-PEP Specialists Meeting on Combat Aircraft Noise
[NLR-TP-91445-U] p 1177 N94-15506
ENGINE PARTS
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
ENGINE TESTING LABORATORIES
Structured finite volume modeling of US Navy aircraft engine test cells task 2: Turboprop engine, volume 1
[AD-A267833] p 872 N94-17405
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine, volume 1
[AD-A268176] p 873 N94-17432
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine-code documentation and listings, volume 2
[AD-A268177] p 873 N94-17508
ENGINE TESTS
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516
Structured finite volume modeling of US Navy aircraft engine test cells task 2: Turboprop engine, volume 1
[AD-A267833] p 872 N94-17405
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine, volume 1
[AD-A268176] p 873 N94-17432
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine-code documentation and listings, volume 2
[AD-A268177] p 873 N94-17508
Structured finite volume modeling of US Navy aircraft engine test cells. Task 2: Turboprop engine. Volume 2: Code documentation and listings
[AD-A268386] p 873 N94-17569
ENGINEERING DRAWINGS
Using interactive sketch interpretation to design solid objects
[AD-A266637] p 1147 N94-15743
ENGINEERING MANAGEMENT
An analysis of SEI software process assessment results: 1987-1991
[AD-A266996] p 1145 N94-15629
Prioritization methodology for chemical replacement
[NASA-TP-3421] p 976 N94-15723
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Impact of TQM concepts on inspection of aerospace systems
[TABES PAPER 93-350] p 1050 N94-16130
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
ENGINEERS
Fifty years of the Netherlands Association of Aeronautical Engineers p 853 N94-15121
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17291

ENGINES
NASA images 10
[NASA-TM-109419] p 924 N94-15351
ENRICHMENT
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material
p 1244 N94-16377
ENSTATITE
I-Xe structure of ILAFEGH 009 and shallowater: Evidence for early formation and rapid cooling of impact-derived enstatite meteorites
p 1243 N94-16305
Comparative magnetic and thermoanalytical study of two enstatite chondrites: Adhi Kot and Atlanta
p 1244 N94-16329
Experimentally reproduced relict enstatite in porphyritic chondrules of enstatite chondrite composition
p 1244 N94-16363
Nitrogen and light noble gases in Parsa enstatite chondrite p 1246 N94-16435
ENTHALPY
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
On-line gas chromatographic studies of Rutherfordium (element 104), hahnium (element 105), and homologs
[DE93-013890] p 948 N94-16821
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021
ENTRAPMENT
Characterization of voids formed during liquid impregnation of nonwoven multifilament glass networks as related to composite processing p 939 N94-16858
Particle Engulfment and Pushing by Solidifying Interfaces (PEPSI)
[NASA-CR-193856] p 960 N94-17079
ENTROPY
Set-based Bayesianism
[TR-407] p 1170 N94-16582
ENVIRONMENT EFFECTS
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
The future of Schiphol: Growth within boundaries
p 853 N94-15123
Aviation inspection prospects p 853 N94-15125
Forest fire study
[NASA-TM-109615] p 1095 N94-15425
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites
[DE93-015688] p 934 N94-16158
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
Environmental effects on iron aluminides
[DE93-015820] p 958 N94-16166
Utility emissions associated with electric and hybrid vehicle (EHV) charging
[DE93-013734] p 1011 N94-16459
Ground wave emergency network final operational capability: Environmental assessment for central Nevada relay node, site number RN 8W917NV
[AD-A267630] p 1002 N94-17200
Ground wave emergency network final operational capability: Environmental assessment for southern Nevada relay node site number RN 8W918NV
[AD-A267647] p 1002 N94-17205
Ground wave emergency network final operational capability: Environmental assessment for central Utah relay node, site number RN 8C920UT
[AD-A267628] p 1003 N94-17211
Ground wave emergency network final operational capability: Environmental assessment for northwestern Nebraska relay node, site number RN 8C930NE
[AD-A267629] p 1003 N94-17212
Incorporating global warming risks in power sector planning. Volume 1: A case study of the New England region
[DE93-015241] p 1096 N94-17289
Ground wave emergency network. Final operational capability. Environmental assessment for southeastern Idaho relay node, site no. RN8W927ID
[AD-A267796] p 1003 N94-17304
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638
ENVIRONMENT MANAGEMENT
The future of Schiphol: Growth within boundaries
p 853 N94-15123
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Total quality environmental management leadership through quality
[TABES PAPER 93-540] p 1050 N94-16135
Environmental management lessons to be learned from the upcoming CFC phase out or how to insure that we survive the next environmentally mandated process change
[TABES PAPER 93-570] p 1050 N94-16136
Global change research: Science and policy
[DE93-015675] p 1096 N94-16445
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
ENVIRONMENT MODELS
Driving terrestrial ecosystem models from space
p 991 N94-15896
A Pluto thermal model p 1256 N94-16216
Modeling the reflectance of CO2 frost with new optical constants: Application to Martian south polar cap spectra p 1256 N94-16217
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226
ENVIRONMENT PROTECTION
The future of Schiphol: Growth within boundaries
p 853 N94-15123
Aviation inspection prospects p 853 N94-15125
Prioritization methodology for chemical replacement
[NASA-TP-3421] p 976 N94-15723
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
ENVIRONMENT SIMULATORS
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions
p 954 N94-16372
ENVIRONMENTAL ENGINEERING
Materials, processes, and environmental engineering network
[TABES PAPER 93-610] p 1051 N94-16142
ENVIRONMENTAL LABORATORIES
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
ENVIRONMENTAL MONITORING
Views from space
[NASA-TM-109634] p 1081 N94-15245
Living well in space: Monitoring environment
[NASA-TM-109537] p 1120 N94-15368
Laser tracking for vertical control p 911 N94-15553
Toxic substances registry system: Index of material safety data sheets
[NASA-TM-109332] p 1121 N94-15658
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements
[AD-A267192] p 1106 N94-15851
A summary of microwave remote sensing investigations planned for BOREAS p 993 N94-15914
The strategic environmental research and development program: A new paradigm for space, the environment, and national security
[AD-A266222] p 1174 N94-16109
Global change research: Science and policy
[DE93-015675] p 1096 N94-16445
Monitoring environmental state of Alaskan forests with AIRSAR p 1075 N94-16734
Soil conservation applications with C-band SAR
p 1080 N94-16760
ENVIRONMENTAL QUALITY
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
ENVIRONMENTAL SURVEYS
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
Mars Analog Site Study (MASS) p 1252 N94-16200
ENVIRONMENTAL TESTS
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
Materials, processes, and environmental engineering network
[TABES PAPER 93-610] p 1051 N94-16142
Environment tests for mini satellites
p 896 N94-17189
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194
Aircraft carrier exposure tests of cast magnesium alloys
[AD-A268260] p 962 N94-17418
ENZYME ACTIVITY
An advanced bioprocessing concept for the conversion of wastepaper to ethanol
[DE93-015209] p 975 N94-16807
ENZYMES
Isolation of thermostable enzyme mutants by cloning and selection in thermophilic bacteria
[AD-A266378] p 1117 N94-16514
An advanced bioprocessing concept for the conversion of wastepaper to ethanol
[DE93-015209] p 975 N94-16807
EPHEMERIDES
Laser ranging data analysis
[NASA-CR-193547] p 1041 N94-16719
EPIDEMIOLOGY
Monograph of the aviation epidemiology data register for FY 1991
[AD-A266896] p 1119 N94-14952
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Tuberculosis: A case for increased screening
p 1126 N94-16627
Legionella: An overview p 1126 N94-16629
Screening for prostate cancer p 1126 N94-16630
Quantifying lifetime exposure to ultraviolet radiation in the epidemiology of cutaneous malignant melanoma: A pilot study
[DE93-015274] p 1128 N94-16812
Global solutions to a system of strongly coupled reaction-diffusion equations
[DE93-628587] p 1171 N94-17640
EPITAXY
The epitaxial Si x ray bolometer an alternative to ion implanted devices p 911 N94-15103
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
The growth of InAs(1-x)Sb(x)/InAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE93-015028] p 1208 N94-16012
Apparatus for and a method of growing thin films of elemental semiconductors
[AD-D015813] p 1210 N94-16487
Method for doping GaAs with high vapor pressure elements
[AD-D015794] p 1210 N94-16538
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Sputtered ferroelectric thin films of KTN for electro-optic devices
[AD-A266573] p 968 N94-16723
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
An alternative approach to the growth of single crystal gallium nitride
[AD-A267876] p 1213 N94-17037
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Atomic layer epitaxy group IV materials: Surface processes, thin films, devices and their characterization
[AD-A267527] p 1213 N94-17116
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing
[NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577
Epitaxial iron films
[AD-A268286] p 1217 N94-17579
EPOXY MATRIX COMPOSITES
The effect of plasma treatment on interfacial bond characteristics of Kevlar/epoxy laminates as measured by T-peel tests
[AD-A266920] p 930 N94-14999
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408

EPOXY RESINS
Processing, properties and applications of composites using powder-coated epoxy towpreg technology
p 933 N94-15277
Elastooptical brittle materials in experimental studies of the state of stress and deformation
[IFTR-22/1991] p 1059 N94-16651
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
Application of thermal spray and ceramic coatings and reinforced epoxy for cavitation damage repair of hydroelectric turbines and pumps
[AD-A267624] p 971 N94-17198
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408
EQUATIONS OF MOTION
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
Trajectory optimization for the National Aerospace Plane
[NASA-CR-194618] p 867 N94-16498
Elastic waves in discretely continuous mechanical systems
[IFTR-21/1992] p 1061 N94-17091
A review of some dynamics models in six-dimensional phase space and their suitable conditions of motion equation
[DE93-623741] p 1175 N94-17317
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435
Flutter analysis using transversality theory
[NASA-TM-106382] p 1062 N94-17481
EQUATIONS OF STATE
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
EQUATORIAL REGIONS
Equatorial ground ice on Mars: Steady-state stability
p 1290 N94-16403
Deucalionis Regio, Mars: Evidence for a unique mineralogic endmember and a crusted surface
p 1291 N94-16406
EQUILIBRIUM METHODS
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
EQUIPMENT
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799
EQUIPMENT SPECIFICATIONS
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
MINISAT programme p 896 N94-17182
EQUIPOTENTIALS
Numerical solution of a second order boundary problem for two dimensions using galerkin approximations
[AD-A268128] p 1171 N94-17521
EQUIVALENT CIRCUITS
Circle diagram approach for self excited induction generators
[DE93-010031] p 1010 N94-15971
Determination of equivalent circuit for PVDF shock-pressure gauges
[DE93-016492] p 1034 N94-16452
ERBIUM
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577
ERBIUM COMPOUNDS
Ion doped quantum well lasers
[AD-A267198] p 1038 N94-15853
EROSION
Louisiana delta study
[NASA-TM-109622] p 1095 N94-15408
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
ASRM nozzle thermal analysis
[NASA-CR-194672] p 928 N94-17277
ERROR ANALYSIS
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Compact disk error measurements
p 1227 N94-14988
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105
Fault management for data systems
[NASA-TM-103953] p 1116 N94-15548
Generation of artificial helioseismic time-series
[NASA-CR-194612] p 1299 N94-15968
Interferometric GPS attitude: A stochastic error model, DREO report
[AD-A266411] p 864 N94-16457
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568
Set-based Bayesianism
[TR-407] p 1170 N94-16582
TIMS performance evaluation summary
p 1063 N94-16596
Abundance recovery error analysis using simulated AVIRIS data p 1074 N94-16708
Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718
Processing of resonance parameter covariance files
[DE93-015506] p 1231 N94-16874
On the a-posteriori estimation of the modelling error for the heat conduction in a plate and its use for adaptive hierarchic modelling
[AD-A267965] p 1029 N94-17384
ERROR CORRECTING CODES
Adaptive beamforming with imperfect arrays: Pattern effects and their partial correction
[AD-A267079] p 987 N94-15541
ERROR CORRECTING DEVICES
Ring lens focusing and push-pull tracking scheme for optical disk systems p 1227 N94-14990
ERRORS
Efficiency effects of variation in controlled experimental variables
[DE93-014345] p 1169 N94-15979
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797
Ensemble forecasting techniques in medium-range forecasting
[AD-A267443] p 1107 N94-17029
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075
Hypervelocity orbital intercept guidance using certainty control
[AD-A267297] p 1174 N94-17219
On the a-posteriori estimation of the modelling error for the heat conduction in a plate and its use for adaptive hierarchic modelling
[AD-A267965] p 1029 N94-17384
ERS-1 (ESA SATELLITE)
The laboratory performance of the short wavelength instrument for the Along Track Scanning Radiometer ATSR-2 (initial results) p 908 N94-15088
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
On the accuracy of ERS-1 orbit predictions
p 874 N94-15589
ERS-1: 18 months in orbit p 990 N94-15888
Calibration: Practical experience with ERS-1
p 992 N94-15907
ERYTHROCYTES
Hemoglobin
[AD-A266455] p 1123 N94-16566
ESCAPE SYSTEMS
Crew escape certification test
[NASA-TM-109530] p 1136 N94-15392
ESTIMATES
Estimates of lithospheric thickness on Venus
p 1267 N94-16277
ESTIMATING
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
ESTIMATORS
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
ETA-MESONS
Past, present and future ((pi),(eta)) experiments
[DE93-016631] p 1182 N94-16115
ETCHANTS
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
ETCHING
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Scattering from binary optics p 1195 N94-17341
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Fabrication of micro-optical devices
p 1197 N94-17351
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
Low voltage electron beam lithography
[AD-A267865] p 1215 N94-17389
Diamond growth on carbide surfaces using a selective etching technique
[AD-A267989] p 973 N94-17413
ETHERS
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785
High octane ethers from synthesis gas-derived alcohols
[DE93-016861] p 975 N94-16898
ETHYL ALCOHOL
An advanced bioprocessing concept for the conversion of wastepaper to ethanol
[DE93-015209] p 975 N94-16807
ETHYLENE
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
ETHYLENE COMPOUNDS
Contained liquids in microgravity, part 2
p 979 N94-16085
EUCLIDEAN GEOMETRY
Multi-resolution processing for fractal analysis of airborne remotely sensed data p 1065 N94-16604
EULER EQUATIONS OF MOTION
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571
Accurate upwind methods for the Euler equations
[NASA-TM-106388] p 1170 N94-16882
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
EURECA (ESA)
Third LDEF Post-Retrieval Symposium Abstracts
[NASA-CP-10120] p 1303 N94-16495
Looking at science on board Eureca
[ESA-BR-80] p 874 N94-16584
EUROPE
Developments in the European air traffic control
p 853 N94-15124
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036
EUROPEAN COMMUNICATIONS SATELLITE
ECS: Ninth year in orbit
[ESA-BR-91] p 987 N94-15644
EUROPEAN SPACE AGENCY
The definition of a scientific policy: ESRO's satellite programme in 1969-1973
[ESA-HSR-6] p 1303 N94-16500
Choosing ESRO's first scientific satellites
[ESA-HSR-3] p 887 N94-16523
The early development of the Telecommunications Satellite Programme in ESRO (1965-1971)
[ESA-HSR-9] p 887 N94-16525
Europe in space: Edoardo Amaldi and the inception of ESRO
[ESA-HSR-5] p 1303 N94-16526
The ESA Tele-Invoicing System (ETIS)
[ESA-INT-6] p 1150 N94-16591
Europe into space: The Auger years (1959-1967)
[ESA-HSR-8] p 1303 N94-16592
The early activities of the COPERS and the drafting of the ESRO Convention (1961/62)
[ESA-HSR-4] p 1225 N94-16593

Resources and activities of the European Space Agency p 1303 N94-16792
Small missions for space science p 874 N94-17142

EUROPEAN SPACE PROGRAMS
Absolute Radiometric Measurements in Space: ARMS p 908 N94-15085
The ESA telescience program p 977 N94-16073
Europe into space: The Auger years (1959-1967) [ESA-HSR-8] p 1303 N94-16592
The early activities of the COPERS and the drafting of the ESRO Convention (1961/62) [ESA-HSR-4] p 1225 N94-16593
Strategy for a small satellite program and a proposal for a first mission p 874 N94-17143

EUTECTICS
Phase equilibria of the magnesium sulfate-water system to 4 kbars p 953 N94-16247
Hydride-containing molten salts and their technology implications [AD-A266458] p 1092 N94-16567

EVALUATION
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring [AD-A267115] p 866 N94-15651
Software Capability Evaluation (SCE) version 1.5 method description. Software capability evaluation project [AD-A267895] p 1154 N94-17395

EVAPORATION
Evaporation from a meniscus within a capillary tube in microgravity [NASA-CR-194593] p 976 N94-15654
The group A3 chondrules of Krymka: Further evidence for major evaporative loss during the formation of chondrules p 1242 N94-16257
Evaporation kinetics of Mg2SiO4 crystals and melts from molecular dynamics simulations p 1219 N94-16331
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material p 1244 N94-16377

EVAPORATORS
Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers [DE93-015215] p 1024 N94-16808

EVAPOTRANSPIRATION
Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029
A detailed model for simulation of catchment scale subsurface hydrologic processes [PAPER-92WR02333] p 1084 N94-16032
Effects of spatial variability and scale on areal -average evapotranspiration p 1084 N94-16033
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034
Empirical relationships among atmospheric variables from rawinsonde and field data as surrogates for AVIRIS measurements: Estimation of regional land surface evapotranspiration p 1074 N94-16712

EXCAVATION
Petrologic constraints on the surface processes on asteroid 4 Vesta and on excavation depths of diogenite fragments p 1241 N94-16208
A measurement station for study of Earth moving tools and ground cutting processes [IFTR-10/1991] p 985 N94-17068

EXCIMER LASERS
Laser artery repair [NASA-TM-109604] p 1120 N94-15312
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation [DE93-015808] p 1040 N94-16664
Sodium-mercury excimer laser, phase 1 [AD-A267728] p 1042 N94-17230

EXCITATION
Preparation and investigation of improved low voltage electron excitable phosphors [AD-A266852] p 963 N94-14948
Field observations of infragravity, sea and swell directional spectra [AD-A266439] p 1113 N94-16561

EXCITONS
Scintillation mechanism in stoichiometric cerium compounds [DE93-015499] p 948 N94-16771
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems [DE93-624947] p 1215 N94-17437

EXERCISE PHYSIOLOGY
Validation of respiratory inductive plethysmography for measuring exercise tidal volumes [AD-A266883] p 1119 N94-14923
Living well in space: Ensuring crew capability [NASA-TM-109538] p 1120 N94-15369
Metabolic monitoring of hypobaric subjects [AD-A268221] p 1130 N94-17554
Methods to obtain blood samples periodically during exercise research studies while subjects are immersed in water or otherwise inaccessible [AD-A268227] p 1130 N94-17562

EXHAUST CLOUDS
Plume primary smoke p 923 N94-15218

EXHAUST EMISSION
Rocket Motor Plume Technology [AGARD-LS-188] p 923 N94-15217
Microwave properties and systems overview p 924 N94-15222
New York MARKAL: An evaluation of carbon dioxide emission control strategies in New York State [DE93-013149] p 1095 N94-15999
Utility emissions associated with electric and hybrid vehicle (EHV) charging [DE93-013734] p 1011 N94-16459
Emissions of volatile organic compounds from stationary combustion sources: Numerical modeling capabilities [DE93-014123] p 1096 N94-16825

EXHAUST GASES
Scholarly research program in fuel analysis and combustion research [AD-A266789] p 942 N94-14911
Flight-determined engine exhaust characteristics of an F404 engine in an F-18 airplane [NASA-TM-4538] p 869 N94-15141
Propulsion p 924 N94-15219
Secondary smoke p 924 N94-15220
Microwave properties and systems overview p 924 N94-15222
Plume radiation p 924 N94-15223
Application of non-thermal plasmas to pollution control [DE93-016432] p 1096 N94-16449
Emissions of volatile organic compounds from stationary combustion sources: Numerical modeling capabilities [DE93-014123] p 1096 N94-16825

EXHAUST NOZZLES
Flight-determined engine exhaust characteristics of an F404 engine in an F-18 airplane [NASA-TM-4538] p 869 N94-15141
Equations of motion of a hinged body over a spherical earth [AD-A268408] p 868 N94-17435

EXISTENCE THEOREMS
Bandwidth efficient coding: Theoretical limits and real achievements. Error control techniques for satellite and space communications p 997 N94-16507

EXOBIOLOGY
Living well in space: Ensuring crew capability [NASA-TM-109538] p 1120 N94-15369
STS-40 crew during spacelab Sim [NASA-TM-109493] p 876 N94-15452
Mars exobiology landing sites for future exploration p 1278 N94-16339
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 378) [NASA-SP-7011(378)] p 1122 N94-16478
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 380) [NASA-SP-7011(380)] p 1122 N94-16479
Publications of the Exobiology Program for 1991: A special bibliography [NASA-TM-4483] p 1139 N94-17017
The 1990-1991 NASA space biology accomplishments [NASA-TM-4501] p 1118 N94-17257
Design of an experiment hardware for the ESA space facility BIOPAN [DLR-FB-93-06] p 876 N94-17548

EXPERIMENT DESIGN
STS-29 crew with student experiment [NASA-TM-109545] p 1116 N94-15378
Science operation in space: Lessons [NASA-TM-109502] p 881 N94-15466
Autogenic-Feedback Training (AFT) as a preventive method for space motion sickness: Background and experimental design [NASA-TM-108780] p 1120 N94-15537
PHENIX Conceptual Design Report [DE93-015759] p 1182 N94-16161
Fluid flow and heat convection studies for actively cooled airframes [NASA-CR-194624] p 1024 N94-16491
Lithium D-cell study [NASA-CR-192705] p 1011 N94-16505
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus [NASA-CR-194663] p 923 N94-17126
Design of an experiment hardware for the ESA space facility BIOPAN [DLR-FB-93-06] p 876 N94-17548

EXPERIMENTATION
On the 17-keV neutrino [DE93-012638] p 1181 N94-15974

EXPERT SYSTEMS
Development of a computer supported instrumentation for economic planning and evaluation of production facilities for fiber reinforced composites elements p 932 N94-15260
An expert system shell for inferring vegetation characteristics: Atmospheric techniques (Task G) [NASA-CR-194570] p 1082 N94-15531
Krupp technical reports no. 2, English edition, October 1992 [ETN-93-94631] p 984 N94-16000
Expert system for welding engineering p 984 N94-16003
KBSA concept demo [AD-A267054] p 1166 N94-16770
Intelligent use of CFAR algorithms [AD-A267755] p 1003 N94-17206

EXPLOSIONS
Explosive boiling at very low heat fluxes: A microgravity phenomenon [NASA-TM-106325] p 1046 N94-15817
Laser weld repair of tantalum sheet [DE93-016417] p 1041 N94-16871

EXPLOSIVES
Experimental investigations into the deflagration to detonation transition at TNO/PML [AD-A266753] p 1021 N94-15755
Simulation of collisional fragmentation with explosives p 1063 N94-16254
Densifying and stabilizing ingredient [AD-D015751] p 975 N94-16934

EXPOSURE
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam [NASA-CR-193851] p 946 N94-15766
Environmental effects on iron aluminides [DE93-015820] p 958 N94-16166
Al-26-Mg-26 ages of iron meteorites p 1242 N94-16240
Composition of weakly altered Martian crust p 1296 N94-16436
Arsenic surveillance program p 1127 N94-16637
Asbestos Surveillance Program p 1127 N94-16638
Lead Surveillance Program p 1127 N94-16640
Mercury Surveillance Program p 1127 N94-16641
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645
Quantifying lifetime exposure to ultraviolet radiation in the epidemiology of cutaneous malignant melanoma: A pilot study [DE93-015274] p 1128 N94-16812
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents [DE93-015143] p 1117 N94-16893
Performance of silvered Teflon thermal control blankets on spacecraft [AD-A266284] p 887 N94-16909
Aircraft carrier exposure tests of cast magnesium alloys [AD-A268260] p 962 N94-17418
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses [AD-A268570] p 1130 N94-17621

EXTERNAL TANKS
Ground integrated ET-derived space platforms for onorbit applications [TABES PAPER 93-652] p 899 N94-16152

EXTINCTION
Atmospheric transmittance between 1.0 and 2.0 micrometers [AD-A267076] p 1098 N94-15539

EXTRACTION
HyperVentilate: Decision-support software for soil vapor extraction technology application [PB93-134880] p 1094 N94-15136
Extraction and isotopic analysis of medium molecular weight hydrocarbons from Murchison using supercritical carbon dioxide p 1241 N94-16184
Extraction of quantitative surface characteristics from AIRSAR data for Death Valley, California p 1078 N94-16748
Surface reactivity of combustion generated soot particles [AD-A268017] p 952 N94-17532

EXTRAPOLATION
Nowcasting methods for satellite imagery [AD-A267294] p 1108 N94-17267

EXTRATERRESTRIAL ENVIRONMENTS
Publications of the Exobiology Program for 1991: A special bibliography
[NASA-TM-4483] p 1139 N94-17017
EXTRATERRESTRIAL INTELLIGENCE
Search for Extraterrestrial Intelligence (SETI)
p 1125 N94-16620
EXTRATERRESTRIAL LIFE
Pioneer-Venus press clip --- Solar System formation and extraterrestrial life
[NASA-TM-109425] p 1239 N94-15495
Publications of the Exobiology Program for 1991: A special bibliography
[NASA-TM-4483] p 1139 N94-17017
EXTRATERRESTRIAL RADIATION
Fault handling schemes in electronic systems with specific application to radiation tolerance and VLSI design
[NASA-CR-194559] p 1008 N94-15640
Shielding from space radiations
[NASA-CR-194578] p 1180 N94-15715
Real time radiation measurements in space
p 980 N94-16092
Preliminary results from bubble detector measurements aboard Biocosmos-2044 p 981 N94-16097
Shielding from space radiations
[NASA-CR-194664] p 1301 N94-17255
EXTRAVEHICULAR ACTIVITY
STS-35 crew training: EMU walk through and EVA prep and post
[NASA-TM-109488] p 1134 N94-15194
Future of robotics
[NASA-TM-109592] p 1045 N94-15284
STS-37 CETA evaluation with Ross
[NASA-TM-109495] p 1135 N94-15330
STS-26 EVA rescue training
[NASA-TM-109563] p 875 N94-15333
STS-29 EVA prep in FFT
[NASA-TM-109544] p 1135 N94-15375
STS-32 LDEF EVA training in WETF with Low and Dunbar
[NASA-TM-109473] p 1135 N94-15377
STS-28 Adamson and Brown EMU walk through
[NASA-TM-109549] p 1136 N94-15387
STS-33 EVA prep and post with Gregory, Blaha, Carter, Thorton, and Musgrave in FFT
[NASA-TM-109469] p 881 N94-15398
STS-38 crew training: Habitation equipment procedures, bailout in CCT, 70mm photo class, EVA prep and post, and firefighting
[NASA-TM-109494] p 1136 N94-15453
EVA retriever demonstration
[NASA-TM-109510] p 1046 N94-15456
STS-37 astronauts Ross and Apt during CETA hardware checkout
[NASA-TM-109496] p 1137 N94-15460
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
Investigation of the effects of extravehicular activity (EVA) gloves on performance
[NASA-TP-3401] p 1137 N94-15717
Ground integrated ET-derived space platforms for onorbit applications
[TABES PAPER 93-652] p 899 N94-16152
Force-endurance capabilities of extravehicular activity (EVA) gloves at different pressure levels
[NASA-TP-3420] p 1139 N94-17653
EXTRAVEHICULAR MOBILITY UNITS
STS-35 crew training: EMU walk through and EVA prep and post
[NASA-TM-109488] p 1134 N94-15194
STS-28 Adamson and Brown EMU walk through
[NASA-TM-109549] p 1136 N94-15387
STS-27 EMU and RMS contingency training
[NASA-TM-109550] p 1136 N94-15401
EXTREME ULTRAVIOLET RADIATION
Microchannel plate detectors for space astronomy
p 901 N94-15038
Developments in extreme ultraviolet and x ray instrumentation p 904 N94-15058
A test facility to calibrate EUV detectors
p 873 N94-15062
Absolute, Extreme-Ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A267045] p 1299 N94-15836
EUVE observations of the Moon p 1250 N94-16185
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17126
EXTREMELY HIGH FREQUENCIES
The ACTS propagation program p 995 N94-16039
EXTRUDING
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764
EYE MOVEMENTS
Human ocular torsion during parabolic flight: An investigation using electromagnetic scleral search coil
p 981 N94-16096
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
Reference frames in vision
[AD-A266174] p 1132 N94-16925
EYE PROTECTION
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 1004 N94-17322
EYEPIECES
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926

F

F REGION
A physical model for one-dimension and time-dependent ionosphere. Part 2: Results and discussions
[DE93-627959] p 1103 N94-17631
F-16 AIRCRAFT
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
Flight simulator-induced sickness and visual displays evaluation
[AD-A267019] p 1122 N94-15845
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
F-18 AIRCRAFT
Flight-determined engine exhaust characteristics of an F404 engine in an F-18 airplane
[NASA-TM-4538] p 869 N94-15141
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
FABRICATION
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Machine development p 932 N94-15258
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
Fabrication and phase tuning of an optical waveguide device
[AD-D015815] p 1191 N94-16489
Continuous fabrication of SiC fiber tows by chemical vapor deposition
[AD-A266460] p 936 N94-16569
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331
Binary optics: Trends and limitations
p 1194 N94-17333
Diffractive optics: Design, fabrication, and applications
p 1194 N94-17334
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
Binary optics at Hughes Danbury Optical Systems
p 1195 N94-17344
Fabrication techniques for very fast diffractive lenses
p 1196 N94-17345
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Fabrication of micro-optical devices
p 1197 N94-17351
Low cost paths to binary optics p 1197 N94-17353
Measurements of microlens performance
p 1197 N94-17355
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
Color separation gratings p 1198 N94-17362
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577
FABRICS
Production process p 931 N94-15257
FIBER-TEX 1992: The Sixth Conference on Advanced Engineering Fibers and Textile Structures for Composites
[NASA-CP-3211] p 936 N94-16845
Weaving multi-layer fabrics for reinforcement of engineering components p 937 N94-16850
New textile composite materials development, production, application p 938 N94-16853
FABRY-PEROT INTERFEROMETERS
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214
FACE CENTERED CUBIC LATTICES
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
Evolution of microstructure in face centered cubic metals during irradiation: A review
[DE93-015682] p 958 N94-16662
FACILITIES
Short walk to everywhere --- Space, Earth, Ocean Center
[NASA-TM-109541] p 1221 N94-15372
Building 46 grand opening
[NASA-TM-109524] p 875 N94-15386
CORE/TRC
[NASA-TM-109434] p 1221 N94-15418
Challenger Center
[NASA-TM-109432] p 1221 N94-15504
Challenger Center: Orientation
[NASA-TM-109433] p 1221 N94-15505
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
Illness/injury pattern complex 40 (Titan)
p 1125 N94-16625
Summary of follow-up results from potential tuberculosis exposures p 1126 N94-16628
Johnson Space Center health related fitness program
p 1126 N94-16633
Kennedy Space Center exercise program
p 1126 N94-16634
The Langley Fitness Center p 1126 N94-16635
Physical Exercise Program p 1127 N94-16636
Arsenic surveillance program p 1127 N94-16637
Asbestos Surveillance Program p 1127 N94-16638
Hearing Conservation Medical Program
p 1127 N94-16639
Lead Surveillance Program p 1127 N94-16640
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
General Medical Surveillance Program
p 1127 N94-16643
FACTORIAL DESIGN
An analysis of tactical airlifter characteristics and their impact on theater airlift system performance
[AD-A266719] p 866 N94-15731
FACTORIZATION
Decomposition of large sparse symmetric systems for parallel computation. Part 2: Parallelization tool roadmap
[AD-A267072] p 1158 N94-15671
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
FAILURE
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
A ten year review of performance of photovoltaic systems
[DE93-015649] p 1093 N94-17217
FAILURE ANALYSIS
Software reliability through fault-avoidance and fault-tolerance
[NASA-CR-194353] p 1143 N94-15114
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Remote diagnosis as used for mechanized parking systems p 984 N94-16004
Materials, processes, and environmental engineering network
[TABES PAPER 93-610] p 1051 N94-16142
Elastooptical brittle materials in experimental studies of the state of stress and deformation
[IFTR-22/1991] p 1059 N94-16651

A fuzzy method for preliminary design random access memory failure rate prediction
[AD-A267948] p 1055 N94-17044
Static and dynamic investigations of brittle elasto-optical material
[IFTR-3/1992] p 1061 N94-17086
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515

FAILURE MODES
Slidesurfaces with adaptive new definitions (SAND) for transient analysis
[DE93-014909] p 1059 N94-15983
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
Quantification of processing artifacts in textile composites p 939 N94-16860
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194

FAINT OBJECTS
A typical pointed observation in IRAS designed to fit into a 15 minute window
[NASA-CR-194653] p 1199 N94-17443

FALSE ALARMS
Intelligent use of CFAR algorithms
[AD-A267755] p 1003 N94-17206

FAR FIELDS
Mathmatical modeling for diffractive optics p 1195 N94-17342
How to deduce the far field of an antenna from planar near-field measurements
[NPL-DES-123] p 1006 N94-17545

FAR INFRARED RADIATION
Photoconductors and arrays for the far-infrared p 902 N94-15045
BIB photodetectors based on antimony doped silicon p 902 N94-15047
Optimisation of FIR photoconductors for atmospheric spectroscopy p 902 N94-15048
Submm/FIR bolometers p 904 N94-15056
Performance testing of doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15066
Non-linear effects in doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15067
Ionising radiation-induced effects in doped germanium FIR photoconductors p 907 N94-15077
Search for far infrared radiation from optically pumped defect modes
[AD-A266744] p 1206 N94-15822

FAR ULTRAVIOLET RADIATION
Filters for the International Solar Terrestrial Physics (ISTP) mission far ultraviolet imager
[NASA-CR-194633] p 1190 N94-15868
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
Transparent conductive coatings in the far ultraviolet
[NASA-CR-194632] p 1191 N94-16024
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494

FARADAY EFFECT
A method of detecting and locating electrical current imbalances
[NASA-CASE-LEW-15407-1] p 1009 N94-15706

FARM CROPS
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations
[NASA-CR-194654] p 1118 N94-17279

FAST FOURIER TRANSFORMATIONS
Fast algorithms for polynomial interpolation, integration and differentiation
[AD-A267505] p 1154 N94-17370
Fast Fourier Transforms for nonequispaced data 2
[AD-A268383] p 1171 N94-17420

FASTENERS
Connector systems for structures
[NASA-CASE-MSC-21998-1] p 1046 N94-15707
Attachment device
[NASA-CASE-MSC-21885-1] p 1047 N94-15925

FATIGUE (MATERIALS)
The influence of thermal aging on the microstructure and fatigue properties of modified 9Cr-1Mo steel
[DE93-015489] p 957 N94-16106
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638

FATIGUE LIFE
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
The influence of secondary bending on fatigue life improvement in bolted joints
[ARL-RR-14] p 1058 N94-15963
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453
Fatigue life program using strain-life methods
[AD-A267310] p 1060 N94-16943
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122
Overview of the FAA/DCA/NLR programs related to ageing aircraft
[NLR-TR-92119-U] p 854 N94-17614

FATIGUE TESTS
Systematic study of effects of load misalignment in uniaxial low cycle fatigue testing at high temperatures
[NPL-DMM(A)-27] p 1057 N94-15015
Fracture toughness tests for particulate MMC UK COSI (IACFA) task group. Meeting report, October 1992
[NPL-DMM(A)-81] p 1057 N94-15021
Crack-tip-opening angle measurements and crack tunneling under stable tearing in thin sheet 2024-T3 aluminum alloy
[NASA-CR-191523] p 931 N94-15184
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080
A review of Australian and New Zealand investigations on aeronautical fatigue during the period April 1991 to March 1993
[AD-A267532] p 868 N94-17117
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122

FAULT DETECTION
Understanding partitions and the no partition assumption
[AD-A266296] p 1000 N94-16911
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075

FAULT TOLERANCE
Software reliability through fault-avoidance and fault-tolerance
[NASA-CR-194353] p 1143 N94-15114
A formal language for the specification and verification of synchronous and asynchronous circuits
[NASA-CR-191509] p 1144 N94-15443
Reactive system verification case study: Fault-tolerant transputer communication
[NASA-TM-108784] p 1145 N94-15538
Altitude deviations: Breakdowns of an error-tolerant system
[NASA-TM-108788] p 862 N94-15550
The design of self-checking reduced instruction set computers
[AD-A267012] p 1140 N94-15763
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
A security architecture for fault-tolerant systems
[AD-A266178] p 1152 N94-16982
Fault-tolerant architectures for multiprocessor and VLSI-based systems
[AD-A267370] p 1140 N94-17005
Estimating task execution delay in a real-time system via static source code analysis
[AD-A267496] p 1161 N94-17367
Tutorial: Advanced fault tree applications using HARP
[NASA-TM-102747] p 1155 N94-17447
Verification of fault-tolerant clock synchronization systems
[NASA-TP-3349] p 1161 N94-17449
NASA Lewis Meshed VSAT Workshop meeting summary
[NASA-TM-106332] p 883 N94-17487
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551

FAULT TREES
Fault management for data systems
[NASA-TM-103953] p 1116 N94-15548
Tutorial: Advanced fault tree applications using HARP
[NASA-TM-102747] p 1155 N94-17447

FAYALITE
Olivines in the Kaba carbonaceous chondrite and constraints on their formation p 1219 N94-16255

FEASIBILITY
Distributed computing feasibility in a non-dedicated homogeneous distributed system
[NASA-CR-191532] p 1149 N94-15989
Center of Excellence in Laser Medicine
[DE93-016541] p 1122 N94-16113
The 3D-Flow processor for a programmable level-1 trigger (feasibility study)
[DE93-016045] p 1159 N94-16172

FEASIBILITY ANALYSIS
A feasibility study of a microgravity enhancement system for Space Station Freedom
[NASA-CR-191550] p 886 N94-15864
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Category (CAT) 3B level 1 test plan for Global Positioning System (GPS)
[DOT/FAA/RD-93/21] p 864 N94-16835

FEDERAL BUDGETS
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834

FEED SYSTEMS
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145

FEEDBACK
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT)
[DE93-015799] p 1202 N94-16162
Controlling chaotic behavior in CO2 and other lasers
[AD-A266431] p 1040 N94-16546

FEEDBACK CONTROL
YARF: An open-ended framework for robot road following
[AD-A266788] p 1163 N94-14910
Development of an air-to-air refueling automatic flight control system using quantitative feedback theory
[AD-A266718] p 870 N94-15730
The design and analysis of robust feedback systems
[AD-A267152] p 1165 N94-15778
A new feedback system for instruments equipped with a capacitive transducer p 1037 N94-15802
Adaptive weld control for high-integrity welding applications
[TABES PAPER 93-604] p 1049 N94-16140
Pulse response based control for minimum time maneuver of flexible spacecraft
[AD-A266186] p 886 N94-16455
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417

FELDSPARS
Induced thermoluminescence study of experimentally shock-loaded oligoclase p 953 N94-16266
Heterogeneous plagioclase compositions in the Maralinga CK4 chondrite p 1243 N94-16308
Mixing model analysis of telescopic lunar spectra p 1284 N94-16371

FEMALES
Maximizing participation of women in collegiate aviation education
[NIAR-93-14] p 1222 N94-17261
FERMENTATION
Contribution to the elaboration of some adaptive control algorithms for fermentation processes monitoring
[LAAS-92513] p 1116 N94-15643
An advanced bioprocessing concept for the conversion of wastepaper to ethanol
[DE93-015209] p 975 N94-16807
FERROCENES
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273
FERROELECTRICITY
Nanocomposites for electronic applications, volume 1
[AD-A267070] p 1009 N94-15669
Nanocomposites for electronic applications, volume 3
[AD-A267073] p 1009 N94-15672
Nanocomposites for electronic applications, volume 2
[AD-A267074] p 1009 N94-15673
Sputtered ferroelectric thin films of KTN for electro-optic devices
[AD-A266573] p 968 N94-16723
FERROFLUIDS
Benard convection of magnetic colloids under microgravity p 943 N94-15159
FERROMAGNETIC MATERIALS
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133
FIBER COMPOSITES
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
Production Technology for Components from Nonmetallic Fiber Reinforced Materials
[ETN-93-94607] p 931 N94-15254
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Construction and calculation p 931 N94-15256
High temperature advanced structural composites. Volume 2: Ceramic matrix composites, fiber processiing and properties, and interfaces
[AD-A267023] p 933 N94-15528
High temperature advanced structural composites. Volume 1: Executive summary and intermetallic compounds
[AD-A267022] p 933 N94-15835
Carbon-carbon grid for ion engines
[NASA-CASE-NPO-19174-1-CU] p 925 N94-15876
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite
[NASA-CASE-LEW-15263-2] p 934 N94-15929
NEXTEL(trademark)/SiC composites using forced chemical vapor infiltration
[DE93-013532] p 934 N94-16008
Modeling the thermal conductivity of fiber-reinforced ceramic composites
[DE93-015340] p 934 N94-16017
Overview of chemical vapor infiltration
[DE93-015440] p 934 N94-16065
Evaluation of the interfacial mechanical properties in fiber-reinforced ceramic composites
[DE93-015494] p 935 N94-16461
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483
The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Continuous fabrication of SiC fiber tows by chemical vapor deposition
[AD-A266460] p 936 N94-16569
FIBER-TEX 1992: The Sixth Conference on Advanced Engineering Fibers and Textile Structures for Composites
[NASA-CP-3211] p 936 N94-16845
Production and application of chemical fibers with special properties for manufacturing composite materials and goods of different usage p 938 N94-16854
Influence of fiber packing structure on permeability p 938 N94-16857
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Evaluation of interfacial properties of fiber-reinforced ceramic composites using fiber push-in tests
[DE93-015427] p 972 N94-17253
Fiber strength utilization in carbon/carbon composites
[AD-A267713] p 940 N94-17271
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
Micromechanics modeling and analysis of Haversian compact bone tissues as a fiber reinforced composite material
[AD-A268250] p 1129 N94-17456
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597
FIBER OPTICS
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998
Congestion control of high-speed networks
[AD-A267013] p 989 N94-15748
Evaluation of midband analog fiber optic telemetry links
[DE93-015128] p 883 N94-16056
A formal protocol test procedure for the Survivable Adaptable Fiber Optic Embedded Network (SAFENET)
[AD-A267410] p 1192 N94-16975
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307
Applications of advanced diffractive optical elements p 1197 N94-17356
FIBER ORIENTATION
Design and cost drivers in 2-D braiding p 937 N94-16849
Influence of fiber packing structure on permeability p 938 N94-16857
FIBER STRENGTH
Production and application of chemical fibers with special properties for manufacturing composite materials and goods of different usage p 938 N94-16854
Fiber strength utilization in carbon/carbon composites
[AD-A267713] p 940 N94-17271
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466
FIBER VOLUME FRACTION
Influence of fiber packing structure on permeability p 938 N94-16857
FIBERS
Production process p 931 N94-15257
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
FIBROBLASTS
Heat shock protein induction in human cells by CO2 laser irradiation
[AD-A266430] p 1117 N94-16545
FIELD ALIGNED CURRENTS
Formation of the stable auroral arc that intensifies at substorm onset
[NASA-CR-193637] p 1098 N94-15433
Linear and non-linear studies of Alfven waves in space. Stationary and dynamic processes in magnetospheric plasmas
[NASA-CR-193585] p 1239 N94-16647
FIELD COILS
ITER-HARD Toroidal Field coil structural analysis
[DE93-014834] p 1201 N94-15981
FIELD EFFECT TRANSISTORS
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243
RF vacuum microelectronics
[AD-A268399] p 1014 N94-17423
FIELD EMISSION
Preparation and investigation of improved low voltage electron excitable phosphors
[AD-A266852] p 963 N94-14948
RF vacuum microelectronics
[AD-A268399] p 1014 N94-17423
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526
FIELD STRENGTH
A study of high field transport in wide band gap electronic materials using a picosecond transient charge technique
[AD-A267098] p 1008 N94-15636
FIELD THEORY (PHYSICS)
Relativistic mean-field caiculations of lambda and sigma hypernuclei
[DE93-015269] p 1181 N94-16013
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117
The universality of the shift of the Chern-Simons parameter for a general class of BRS invariant regularizations
[NIKHEF-H/93-03] p 1220 N94-17602
SUSY in the sky
[NIKHEF-H/93-04] p 1240 N94-17603
Derivation of the Verlinde formula from Chern-Simons theory and the G/G model
[DE93-628620] p 1221 N94-17632
FIGHTER AIRCRAFT
Technical evaluation report on the AGARD-PEP Specialists Meeting on Combat Aircraft Noise
[NLR-TP-91445-U] p 1177 N94-15506
FIGURE OF MERIT
Figures of merit for laser beam quality p 1043 N94-14994
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031
FILE MAINTENANCE (COMPUTERS)
Experience with disconnected operation in a mobile computing environment
[AD-A267524] p 1141 N94-17115
FILLING
Ground testing for the no-vent fill of cryogenic tanks: Results of tests for a 71 cubic foot tank
[NASA-TM-106293] p 1030 N94-17486
FILM CONDENSATION
Theoretical study of laminar film condensation on horizontal ellipitical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737
FILM COOLING
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
FILM THICKNESS
MeV ion-beam analysis of optical data storage films p 1226 N94-14984
Determination of average refractive index of spin coated DCG films for HOE fabrication p 1036 N94-14992
FILTERS
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
FINANCIAL MANAGEMENT
NASA directives master list and index
[NHB-1410.13L] p 1229 N94-15414
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
FINE STRUCTURE
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS
[DE93-016218] p 1209 N94-16447
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy
[DE93-015683] p 940 N94-17235
FINGERS
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725
FINITE DIFFERENCE THEORY
Construction and calculation p 931 N94-15256
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054
Finite difference time domain analysis of chirped dielectric gratings p 1195 N94-17339
Application of the finite-difference time-domain method to scattering and radiation problems involving wires and plates
[AD-A268396] p 1005 N94-17496
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621
FINITE ELEMENT METHOD
Static aeroelastic response of an aircraft with asymmetric wing planforms representative of combat damage
[AD-A266890] p 865 N94-14951

Parametric study of a finite element model of the Sidewinder missile
[AD-A267245] p 865 N94-14976
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
Construction and calculation p 931 N94-15256
An assessment of finite-element modeling techniques for thick-solid/thin-shell joints analysis
[NASA-TM-108426] p 1058 N94-15534
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
Modal element method for potential flow in non-uniform ducts: Combining closed form analysis with CFD
[NASA-TM-106347] p 1169 N94-15799
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
ITER-HARD Toroidal Field coil structural analysis
[DE93-014834] p 1201 N94-15981
Finite element analytical techniques for ceramic production in microgravity: A hypoelastic model
p 981 N94-16099
The design and analysis of a modular microgravity test platform for use aboard the NASA KC-135 aircraft
p 899 N94-16101
Design of a cruciform bend specimen for determination of out-of-plane biaxial tensile stress effects on fracture toughness for shallow cracks
[DE93-015455] p 1059 N94-16104
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 1104 N94-16396
Modal ring method for the scattering of sound
[NASA-TM-106342] p 1177 N94-16497
ASTROS enhancements. Volume 1: ASTRO user's manual
[AD-A266818] p 1151 N94-16768
ASTROS enhancements. Volume 2: ASTRO programmer's manual
[AD-A266819] p 1151 N94-16769
Finite element analysis of structural engineering problems using a viscoplastic model incorporating two back stresses
[NASA-TM-106046] p 1060 N94-16881
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196
Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222
Mathmatical modeling for diffractive optics
p 1195 N94-17342
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method
[NASA-CR-194267] p 1062 N94-17445
Nonlinear random response prediction using MSC/NASTRAN
[NASA-TM-109029] p 1179 N94-17650

FINS
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221

FIRE (CLIMATOLOGY)
Preliminary analysis of University of North Dakota aircraft data from the FIRE Cirrus IFO-2
[NASA-CR-193357] p 866 N94-15429

FIRE CONTROL
Thermal Weapon Sight (TWS) AN/PAS-13 diffractive optics designed for producibility p 1197 N94-17354

FIRE FIGHTING
STS-27 crew fire training and glove molding
[NASA-TM-109554] p 1136 N94-15406
STS-31 crew training: firefighting, food tasting, EVA prep and post
[NASA-TM-109484] p 876 N94-15451
STS-38 crew training: Habitation equipment procedures, bailout in CCT, 70mm photo class, EVA prep and post, and firefighting
[NASA-TM-109494] p 1136 N94-15453

FIRE PREVENTION
Basic principles of helicopter crashworthiness
[AD-A267099] p 862 N94-15637

FIRES
STS-27 crew fire training and glove molding
[NASA-TM-109554] p 1136 N94-15406

FIRST AID
Illness/injury pattern complex 40 (Titan)
p 1125 N94-16625

FISHES
Finding fish from above --- remote sensing
[NASA-TM-109602] p 1081 N94-15310

FISHING
Finding fish from above --- remote sensing
[NASA-TM-109602] p 1081 N94-15310

FISSION PRODUCTS
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980

FLAME PROPAGATION
Studies of premixed laminar and turbulent flames at microgravity
[NASA-CR-194656] p 951 N94-17125

FLAME STABILITY
Studies of premixed laminar and turbulent flames at microgravity
[NASA-CR-194656] p 951 N94-17125
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381

FLAME TEMPERATURE
Mechanisms of combustion limits in premixed gas flames at microgravity
[NASA-CR-194557] p 946 N94-15713

FLAMES
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930

FLAMMABLE GASES
Mechanisms of combustion limits in premixed gas flames at microgravity
[NASA-CR-194557] p 946 N94-15713

FLAPS (CONTROL SURFACES)
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572

FLASHING (VAPORIZING)
Explosive boiling at very low heat fluxes: A microgravity phenomenon
[NASA-TM-106325] p 1046 N94-15817

FLASHOVER
Surface flashover of semiconductors: A fundamental study
[AD-A267382] p 1012 N94-17023

FLAT PLATES
Tollmien-Schlichting/vortex interactions in compressible boundary layer flows
[NASA-CR-191515] p 1017 N94-15183
Boundary layer flow of air over water on a flat plate
[NASA-CR-191517] p 1019 N94-15479
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540

FLAVOR (PARTICLE PHYSICS)
Production of D-mesons in pp-collisions and quark-gluon string model
[DE93-626721] p 1185 N94-17312

FLEXIBILITY
Compounds containing meta-biphenylenedioxy moieties and polymers therefrom
[NASA-CASE-LAR-14517-1] p 965 N94-15879
NEXTEL(trademark)/SiC composites using forced chemical vapor infiltration
[DE93-013532] p 934 N94-16008

FLEXIBLE BODIES
Improved composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 934 N94-15926

FLEXIBLE SPACECRAFT
Pulse response based control for minimum time maneuver of flexible spacecraft
[AD-A266186] p 886 N94-16455

FLIGHT CHARACTERISTICS
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793
Looking at science on board Eureca
[ESA-BR-80] p 874 N94-16584
NEXT launch system p 878 N94-17141

FLIGHT CONTROL
Better way to fly
[NASA-TM-109447] p 866 N94-15396
Research in robust control for hypersonic aircraft
[NASA-CR-194106] p 870 N94-15416
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
Aerodynamic control of NASP-type vehicles through vortex manipulation, volume 4
[NASA-CR-177626-VOL-4] p 857 N94-15720
Flight instrument software for the F/A-18 research simulator
[AD-A267170] p 872 N94-15856
Embedded computer systems: Status of C-17 software
[AD-A267307] p 1160 N94-16993
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551

FLIGHT CREWS
Human factor studies
[NASA-TM-109665] p 875 N94-15236
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659
Mission management aircraft operations manual
[NHB-7900.3] p 1225 N94-16729
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403
An introduction to structural models
[AD-A268151] p 1155 N94-17429
Aircrew/groundcrew life support systems research. Volume 1: CLIN 0001 research requirements
[AD-A268229] p 1139 N94-17563
Aircrew/groundcrew life support systems research. Volume 2: CLIN 0002 task order requirements
[AD-A268230] p 1139 N94-17564

FLIGHT INSTRUMENTS
Testing and management of flight instruments and their data
[NASA-CR-194332] p 868 N94-15187
Better way to fly
[NASA-TM-109447] p 866 N94-15396
Flight instrument software for the F/A-18 research simulator
[AD-A267170] p 872 N94-15856
A virtual acoustic orientation instrument
[AD-A268181] p 1134 N94-17510

FLIGHT MECHANICS
Trajectory optimization for the National Aerospace Plane
[NASA-CR-194618] p 867 N94-16498

FLIGHT OPERATIONS
STS-26 crew participation in meetings
[NASA-TM-109519] p 873 N94-15469
Mission management aircraft operations manual
[NHB-7900.3] p 1225 N94-16729
Aircraft operations management manual
[NHB-7900.3(V1)] p 1225 N94-16730

FLIGHT PATHS
Non-lethal Unmanned Aerial Vehicles (UAVs)
[AD-A267139] p 866 N94-15692
Trajectory optimization for the National Aerospace Plane
[NASA-CR-194618] p 867 N94-16498
Strategic planning for aircraft noise route impact analysis: A three dimensional approach
[NASA-CR-191484] p 1178 N94-17278
Windshear database for forward-looking systems certification
[NASA-TM-109012] p 1108 N94-17283

FLIGHT PLANS
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919

FLIGHT RULES
Aviation inspection prospects p 853 N94-15125
STS-26 crew participation in meetings
[NASA-TM-109519] p 873 N94-15469

FLIGHT SAFETY
Aviation inspection prospects p 853 N94-15125
The 1968 highlights --- NASA programs and research
[NASA-TM-109627] p 1302 N94-15413
Non-lethal Unmanned Aerial Vehicles (UAVs)
[AD-A267139] p 866 N94-15692
An analysis of tactical airlifter characteristics and their impact on theater airlift system performance
[AD-A266719] p 866 N94-15731
Aircraft operations management manual
[NHB-7900.3(V1)] p 1225 N94-16730

FLIGHT SIMULATION
Manned vehicle systems research facility
[NASA-TM-109650] p 875 N94-15318
Spacework 16 --- Simulated Space Shuttle Program
[NASA-TM-109436] p 1221 N94-15420

Aerodynamic control of NASP-type vehicles through vortex manipulation, volume 4
[NASA-CR-177626-VOL-4] p 857 N94-15720
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793
Flight simulator-induced sickness and visual displays evaluation
[AD-A267019] p 1122 N94-15845
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403

FLIGHT SIMULATORS
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659
Flight simulator-induced sickness and visual displays evaluation
[AD-A267019] p 1122 N94-15845
Flight instrument software for the F/A-18 research simulator
[AD-A267170] p 872 N94-15856
An introduction to structural models
[AD-A268151] p 1155 N94-17429

FLIGHT TESTS
Flight-determined engine exhaust characteristics of an F404 engine in an F-18 airplane
[NASA-TM-4538] p 869 N94-15141
X-29: Experiment in flight
[NASA-TM-109454] p 865 N94-15327
Non-lethal Unmanned Aerial Vehicles (UAVs)
[AD-A267139] p 866 N94-15692
Flight testing of airbreathing hypersonic vehicles
[NASA-TM-4524] p 886 N94-15753
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
Lift-fan aircraft: Lessons learned-the pilot's perspective
[NASA-CR-177620] p 867 N94-15950
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078
Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600
Noise measurement flight test of five light helicopters
[AD-A268566] p 1179 N94-17599
Postflight hardware evaluation 360T026 (RSRM-26, STS-47)
[NASA-CR-192559] p 882 N94-17656

FLIGHT TRAINING
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403
An introduction to structural models
[AD-A268151] p 1155 N94-17429

FLIR DETECTORS
Thermal Weapon Sight (TWS) AN/PAS-13 diffractive optics designed for producibility p 1197 N94-17354
Atmospheric propagation analysis program
[AD-A268231] p 1006 N94-17565

FLOCCULATING
Efficacy of flocculating and other emergency water purification tablets
[AD-A266695] p 1148 N94-15840

FLOOD PLAINS
Strategies for detection of floodplain inundation with multi-frequency polarimetric SAR p 1076 N94-16739

FLOOD PREDICTIONS
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028

FLOODS
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226

FLOW CHARACTERISTICS
Fractal geometry of some Martian lava flow margins: Alba Patera p 1270 N94-16298
Fundamental studies of rocket combustion chemistry and combustion instability
[AD-A266248] p 925 N94-16482

FLOW DISTORTION
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551

FLOW DISTRIBUTION
The effect of the nose shape and wing location toward the wing vortex breakdown
[AD-A267724] p 855 N94-14942
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
Benard convection of magnetic colloids under microgravity p 943 N94-15159
Swept shock/boundary-layer interactions: Scaling laws, flowfield structure, and experimental methods p 1017 N94-15197
Swept shock wave/laminar boundary layer interactions, experimental, and numerical results p 1017 N94-15198
Numerical simulation of 3-D shock wave turbulent boundary layer interactions p 1017 N94-15199
Unsteady phenomena in shock wave/boundary layer interaction p 1017 N94-15200
Rocket motor plume flowfields: Phenomenology and simulation p 924 N94-15221
DSMC simulations of Mach 20 nitrogen flows about a 70 degree blunted cone and its wake
[NASA-TM-107762] p 1018 N94-15291
Development of the seeding system used for laser velocimeter surveys of the NASA Low-Speed Centrifugal Compressor flow field
[NASA-TM-4485] p 1032 N94-15445
On the interaction between the shock wave attached to a wedge and freestream disturbances
[NASA-CR-191528] p 1019 N94-15478
An experimental study of ASTOVL related jet flows to produce CFD code validation data. Phase 3: Results of experiments
[TT-9203] p 1020 N94-15645
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 2: Static wind tunnel tests
[NASA-CR-177626-VOL-2] p 856 N94-15677
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Aerodynamic/dynamic/control interaction
[AD-A266187] p 871 N94-16107
Lava flow-field morphological classification and interpretation: Examples from Venus p 1259 N94-16230
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus p 1260 N94-16235
Sheet flow fields on Venus p 1278 N94-16338
Martian lavas: Three complementary remote sensing techniques to derive flow properties p 1283 N94-16366
Computation of a controlled store separation from a cavity p 858 N94-16513
Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
The use of TIMS for mapping different pahoehoe surfaces: Mauna Iki, Kilauea p 1065 N94-16606
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-194645] p 1027 N94-17095
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215
ASRM nozzle thermal analysis
[NASA-CR-194672] p 928 N94-17277
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609

FLOW EQUATIONS
A domain-partition method for the advection-diffusion equation
[INRIA-RR-1740] p 1030 N94-17534

FLOW GEOMETRY
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847

FLOW MEASUREMENT
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling p 1018 N94-15201
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819

FLOW NETS
Numerical solution of a second order boundary problem for two dimensions using galerkin approximations
[AD-A268128] p 1171 N94-17521

FLOW REGULATORS
Geometrical vapor blocker for parallel condensation tubes requiring cooling
[NASA-CASE-MSC-22090-1] p 1022 N94-15962
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246

FLOW RESISTANCE
Development of braided fiber seals for engine applications p 939 N94-16859

FLOW STABILITY
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555
Stability of flows in fluidized beds
[DE93-000245] p 1024 N94-16763
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474

FLOW VELOCITY
The turbulent wall jet
[AD-A267675] p 855 N94-14963
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Martian lavas: Three complementary remote sensing techniques to derive flow properties p 1283 N94-16366
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655

FLOW VISUALIZATION
Laser Doppler velocimetry measurements across a normal shock in transonic flow
[AD-A267240] p 855 N94-14973
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Swept shock/boundary-layer interactions: Scaling laws, flowfield structure, and experimental methods p 1017 N94-15197
A microprocessor controller for a towing tank drive and flow visualisation system
[AD-A267087] p 872 N94-15543
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 1: Static water tunnel tests
[NASA-CR-177626-VOL-1] p 855 N94-15655
Suppression of dynamic stall with a leading-edge slat on a VR-7 airfoil
[NASA-TP-3357] p 856 N94-15657
Aerodynamic control of NASP-type vehicles through vortex manipulation. Volume 3: Wing rock experiments
[NASA-CR-177626] p 857 N94-15780
Clouding tracing: Visualization of the mixing of fluid elements in convection-diffusion systems
[NASA-CR-191529] p 1148 N94-15965
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
Textile composite processing science p 938 N94-16856
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099

Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655

FLUE GASES
Direct catalytic decomposition of nitric oxide
[DE93-016689] p 949 N94-16896

FLUID BOUNDARIES
Physical and chemical properties of some new perfluoropolyalkylether lubricants prepared by direct fluorination
[NASA-TM-106299] p 967 N94-16543
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414

FLUID DYNAMICS
Special course on Shock-Wave/Boundary-Layer Interactions in Supersonic and Hypersonic Flows
[AGARD-R-792] p 1017 N94-15196
New findings and instrumentation from the NASA Lewis Microgravity Facility p 977 N94-16076
Lava crusts and flow dynamics p 1103 N94-16316
Looking at science on board Eureca
[ESA-BR-80] p 874 N94-16584
Nonlinear problems in fluid dynamics and inverse scattering
[AD-A266234] p 1026 N94-16927
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929

FLUID FLOW
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
The 1988 computational fluid dynamics highlights
[NASA-TM-109645] p 1019 N94-15431
Lava flow-field morphological classification and interpretation: Examples from Venus
p 1259 N94-16230
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus
p 1260 N94-16235
Martian lavas: Three complementary remote sensing techniques to derive flow properties
p 1283 N94-16366
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
High pressure pump for electro-rheological fluids
[AD-D015888] p 1048 N94-16915
Modeling, estimation and control of distributed parameter systems
[AD-A267325] p 1026 N94-17003
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414

FLUID JETS
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
Computation of confined coflow jets with three turbulence models
[NASA-TM-106378] p 1025 N94-16879
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511

FLUID MANAGEMENT
Ground testing for the no-vent fill of cryogenic tanks: Results of tests for a 71 cubic foot tank
[NASA-TM-106293] p 1030 N94-17486

FLUID MECHANICS
The turbulent wall jet
[AD-A267675] p 855 N94-14963

FLUID POWER
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210

FLUID PRESSURE
High pressure pump for electro-rheological fluids
[AD-D015888] p 1048 N94-16915

FLUID-SOLID INTERACTIONS
Modeling, estimation and control of distributed parameter systems
[AD-A267325] p 1026 N94-17003

FLUIDICS
Sounding Rocket Experiments in Fluid Science and Materials Sciences: TEXUS 25 to 27 and MASER 4, volume 3
[ESA-SP-1132-VOL-3] p 943 N94-15157

FLUORESCENCE
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111

FLUORINATION
Physical and chemical properties of some new perfluoropolyalkylether lubricants prepared by direct fluorination
[NASA-TM-106299] p 967 N94-16543

FLUORINE COMPOUNDS
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273

FLUOROCARBONS
Synthesis and chemistry of novel cyclic fluorocarbons
[AD-A267148] p 929 N94-15734
Wide angle, single screen, gridded square-loop frequency selective surface for diplexing two closely separated frequency bands
[NASA-CASE-NPO-18664-1-CU] p 1237 N94-17438

FLUOROHYDROCARBONS
Synthesis and chemistry of novel cyclic fluorocarbons
[AD-A267148] p 929 N94-15734
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727
Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers
[DE93-015215] p 1024 N94-16808

FLUOROPOLYMERS
Modification of fluoropolymer surfaces with electronically conductive polymers
[AD-A266294] p 967 N94-16475
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408

FLUTTER
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414
Flutter analysis using transversality theory
[NASA-TM-106382] p 1062 N94-17481

FLUTTER ANALYSIS
Physical properties of the benchmark models program supercritical wing
[NASA-TM-4457] p 866 N94-15722
Flutter analysis using transversality theory
[NASA-TM-106382] p 1062 N94-17481

FLUX (RATE)
Effects of bulk composition on production rates of cosmogenic nuclides in meteorites p 1245 N94-16385
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417

FLUX DENSITY
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
A decade's overview of Io's volcanic activity
p 1245 N94-16386

FLUX QUANTIZATION
Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137

FLYBY MISSIONS
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units
p 1252 N94-16199
Earth imaging results from Galileo's second encounter
p 1252 N94-16201
Galileo photometry of Apollo landing sites
p 1259 N94-16234
Earth-based and Galileo SSI multispectral observations of eastern mare serenitatis and the Apollo 17 landing site p 1261 N94-16244
Mass of Saturn's A ring p 1263 N94-16252
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
Lunar multispectral mosaics from Galileo's second Earth-Moon flyby p 1288 N94-16394
Chairmanship of the Neptune/Pluto outer planets science working group
[NASA-CR-194625] p 1297 N94-16832

FLYING PERSONNEL
Preliminary validation of the task analysis/workload methodology
[AD-A267514] p 1138 N94-17077

FOCAL PLANE DEVICES
Large scientific 2-D arrays for the 1-5 micron region
p 902 N94-15044
BIB photodetectors based on antimony doped silicon
p 902 N94-15047
Schottky barrier focal plane arrays for SWIR and MWIR p 903 N94-15050
Advanced high performance CdHgTe multiplexed arrays p 903 N94-15051
Characterization of detectors and calibration of the ISOPHOT experiment p 907 N94-15082
Cryogenic readout electronics for astronomical applications p 910 N94-15099
A monolithic PbTeCCD focal plane array for MWIR imaging p 910 N94-15100
Sensor modelling for the Cyclops focal plane detector array based technology demonstrator
[AD-A267172] p 1190 N94-15846
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272

FOCI
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338

FOCUSING
Ring lens focusing and push-pull tracking scheme for optical disk systems p 1227 N94-14990
A complete study of differential wax-wane focus servo technique p 1199 N94-14996
Outlook for hard x ray and gamma ray astronomy
p 904 N94-15057
Experimental evaluation of an adaptive focusing algorithm for a microwave planar phased-array hyperthermia system at UCSF
[AD-A267004] p 1121 N94-15634
Advanced transport systems for electron beams in high brightness accelerators and FELs
[AD-A267322] p 1041 N94-17001
Study of brightness and current limitations in intense charged particle beams
[AD-A268283] p 1186 N94-17578

FOG
An assessment of acid fog
[DE93-009347] p 1095 N94-15940

FOKKER AIRCRAFT
Expectations for the future of Fokker
p 854 N94-15127

FOKKER-PLANCK EQUATION
Looking at Fokker-Planck dynamics with a noisy instrument
[AD-A267049] p 1117 N94-15662
Stochastic chaos: An analog of quantum chaos
[DE93-016619] p 1220 N94-16956

FOLIAGE
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610

FOOD
International food research project
[NASA-TM-109540] p 1135 N94-15371
STS-29 crew food tasting in building 45
[NASA-TM-109547] p 1136 N94-15382
Food for space
[NASA-TM-109668] p 1136 N94-15435

FOOD PRODUCTION (IN SPACE)
Supporting life in space
[NASA-TM-109593] p 1135 N94-15285

FOOTPRINTS
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278

FORCED CONVECTION
Theoretical study of laminar film condensation on horizontal elliptical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737

FORCED VIBRATION
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150

FOREBODIES
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
FORECASTING
Forecasting the ducting of electromagnetic waves on the mesoscale
[AD-A268101] p 1109 N94-17571
FOREST FIRES
Saving Yellowstone
[NASA-TM-109596] p 1094 N94-15289
TOMS computer graphics
[NASA-TM-109597] p 1094 N94-15290
Forest fire study
[NASA-TM-109615] p 1095 N94-15425
FOREST MANAGEMENT
What's killing the trees? --- causes for forest decline
[NASA-TM-109621] p 1094 N94-15350
FORESTS
What's killing the trees? --- causes for forest decline
[NASA-TM-109621] p 1094 N94-15350
Recent advances in radar remote sensing of forest p 991 N94-15897
Radar response of vegetation: An overview p 991 N94-15898
A summary of microwave remote sensing investigations planned for BOREAS p 993 N94-15914
Exploring the remote sensing of foliar biochemical concentrations with AVIRIS data p 1069 N94-16683
Oregon transect: Comparison of leaf-level reflectance with canopy-level and modelled reflectance p 1073 N94-16702
Multitemporal diurnal AVIRIS images of a forested ecosystem p 1074 N94-16709
Comparison of modeled backscatter with SAR data at P-band p 1076 N94-16735
SAR backscatter from coniferous forest gaps p 1076 N94-16736
Retrieval of pine forest biomass using JPL AIRSAR data p 1076 N94-16737
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR) p 1076 N94-16738
Supervised fully polarimetric classification of the Black Forest test site: From MAESTRO! to MAC Europe p 1076 N94-16740
Relating multifrequency radar backscattering to forest biomass: Modeling and AIRSAR measurement p 1077 N94-16741
FORGING
Production and evaluation of dense ceramic compounds by combustion synthesis and dynamic compaction
[AD-A266742] p 965 N94-15773
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764
FORMALDEHYDE
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation
[DE93-016435] p 1039 N94-16450
Transient studies of low temperature catalysts for methane conversion
[DE93-017710] p 950 N94-16962
FORMALISM
VDM specification of the MD4 message digest algorithm
[NPL-DITC-204/92] p 1142 N94-14944
The use of formal methods in data security standards
[NPL-DITC-205/92] p 1142 N94-15008
RAISE specification of the MD4 message digest algorithm
[NPL-DITC-206/92] p 1142 N94-15010
The value of reference implementations and prototyping in a formal design and testing methodology
[NPL-DITC-208/92] p 1142 N94-15011
The application of programming languages to the production of reference implementations
[NPL-DITC-209/92] p 1143 N94-15012
Standards and conformance testing in data security: Results of initial programme of investigation
[NPL-DITC-218/92] p 1143 N94-15014
A formal language for the specification and verification of synchronous and asynchronous circuits
[NASA-CR-191509] p 1144 N94-15443
FORMING TECHNIQUES
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
FORMS (PAPER)
Index of NASA prefixed forms
[NHB-1420.21] p 1230 N94-15936
FORSTERITE
Olivines in the Kaba carbonaceous chondrite and constraints on their formation p 1219 N94-16255
Evaporation kinetics of Mg2SiO4 crystals and melts from molecular dynamics simulations p 1219 N94-16331
FORTRAN
User manual and program description of the data acquisition system of PML-pulse physics
[AD-A266752] p 1147 N94-15776
Efficient compilation of array statements for private memory multicomputers
[AD-A266595] p 1160 N94-16724
FORWARD SCATTERING
Simulations of wave-particle interactions in stimulated Raman forward scattering in a magnetized plasma
[TKK-F-A704] p 1201 N94-15210
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978
FOSSIL FUELS
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
Publications of the Oak Ridge National Laboratory Fossil Energy Program, 1 October 1991 - 31 March 1993
[DE93-014643] p 1232 N94-16967
FOULING
Regulation of attached bacterial growth by adsorbed proteins
[AD-A267756] p 1118 N94-17275
Heating of lubricant with an electric resistance heater
[VTT-TIED-1359] p 974 N94-17547
FOUNDRIES
NASA Space Engineering Research Center for VLSI System Design
[NASA-CR-194587] p 1008 N94-15547
FOUR-WAVE MIXING
Theoretical studies relating to the interaction of radiation with matter
[AD-A266894] p 1179 N94-14949
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
FOURIER ANALYSIS
Construction and calculation p 931 N94-15256
Effects of window size and shape on accuracy of subpixel centroid estimation of target images
[NASA-TP-3331] p 1034 N94-15990
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Scattering from binary optics p 1195 N94-17341
FOURIER SERIES
Comparison of level-1 and level-2 buckling and postbuckling solutions
[NASA-CR-194611] p 1057 N94-15154
FOURIER TRANSFORMATION
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Acousto-optical classifier
[AD-D015894] p 1000 N94-16921
FOVEA
The effects of luminance boundaries on color perception
[AD-A268398] p 1133 N94-17397
FRACTALS
Study of fractal aggregates p 979 N94-16086
Fractal geometry of some Martian lava flow margins: Alba Patera p 1270 N94-16298
Multi-resolution processing for fractal analysis of airborne remotely sensed data p 1065 N94-16604
FRACTIONATION
Petrologic models of 15388, a unique Apollo 15 mare basalt p 1264 N94-16258
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth p 1242 N94-16272
Searching for neuKREEP: An EMP study of Apollo 11 Group A basalts p 1266 N94-16275
On the composition of neuKREEP: QMD contamination at Apollo 11? p 1266 N94-16276
The monzonorite-anorthosite connection: The petrogenesis of terrestrial KREEP p 1104 N94-16365
Igneous fractionation and subsolidus equilibration of diogenite meteorites p 1245 N94-16413
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
FRACTURE MECHANICS
Fracture toughness tests for particulate MMC UK COSI (IACFA) task group. Meeting report, October 1992
[NPL-DMM(A)-81] p 1057 N94-15021
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Development of a constitutive model for creep and life prediction of advanced silicon nitride ceramics
[DE93-015894] p 968 N94-16813
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638
FRACTURE STRENGTH
Fracture toughness tests for particulate MMC UK COSI (IACFA) task group. Meeting report, October 1992
[NPL-DMM(A)-81] p 1057 N94-15021
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites
[DE93-015155] p 934 N94-16057
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
FRACTURES (MATERIALS)
A Monazite-bearing clast in Apollo 17 melt breccia p 1267 N94-16279
FRACTURING
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830

Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
Weibull analysis applied to the pull adhesion test and fracture of a metal-ceramic interface
[DE93-012913] p 1059 N94-15997
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464

FRAGMENTATION
The fragmentation of Kosmos 2163
[NASA-CR-191643] p 887 N94-16503
The fragmentation of the Nimbus 6 rocket body
[NASA-CR-191645] p 926 N94-16504
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238

FRAGMENTS
Simulation of collisional fragmentation with explosives p 1063 N94-16254
A Monazite-bearing clast in Apollo 17 melt breccia p 1267 N94-16279
Identification of new meteorite, Mihonoseki (L), from broken fragments in Japan p 1246 N94-16415

FRAMES
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709

FRAMING CAMERAS
Multi-frame x ray imaging with a large area 40ps camera
[DE93-017179] p 1035 N94-16960

FREE CONVECTION
Benard convection of magnetic colloids under microgravity p 943 N94-15159
Theoretical study of laminar film condensation on horizontal elliptical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
The roles of fluid motion and other transport phenomena in the morphology of materials
[NASA-CR-194665] p 1028 N94-17298

FREE ELECTRON LASERS
High frequency Raman current drive p 1201 N94-15208
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
Thomson backscattered x rays from an intense laser beam
[AD-A267125] p 1038 N94-15686

FREE ENERGY
Structural effects in electron transfer reactions: Comparative interfacial electrochemical kinetics for cis- versus trans-dioxorhenium (V) (bi)pyridine oxidation
[AD-A266307] p 1182 N94-16466

FREE FLOW
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
Computation of a controlled store separation from a cavity p 858 N94-16513
Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276

FREE VIBRATION
Development and comparison of advanced reduced-basis methods for the transient structural analysis of unconstrained structures
[NASA-TM-109015] p 1061 N94-17259

FREE-PISTON ENGINES
SPDE/SPRE final summary report
[NASA-CR-187086] p 924 N94-15482

FREEZE DRYING
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A266958] p 1120 N94-15180

FREEZING
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676

FRENCH SPACE PROGRAM
ARIANE 5 light derivatives p 878 N94-17140

FREON
Explosive boiling at very low heat fluxes: A microgravity phenomenon
[NASA-TM-106325] p 1046 N94-15817

FREQUENCIES
Regulation of low Earth orbit satellites p 892 N94-17159
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
Wide angle, single screen, gridded square-loop frequency selective surface for diplexing two closely separated frequency bands
[NASA-CASE-NPO-18664-1-CU] p 1237 N94-17438
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523

FREQUENCY ANALYZERS
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884

FREQUENCY CONTROL
Regulation of low Earth orbit satellites p 892 N94-17159
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480

FREQUENCY DISTRIBUTION
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
Cortical adaptive filtering in bioacoustic signal classification
[AD-A266229] p 1177 N94-16939

FREQUENCY DIVIDERS
Synchronous sampling phase and amplitude detection method and apparatus
[NASA-CASE-LAR-14725-1] p 1050 N94-15870

FREQUENCY DIVISION MULTIPLE ACCESS
Regulation of low Earth orbit satellites p 892 N94-17159
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167

FREQUENCY HOPPING
Spaceborne Imaging Radar-C instrument p 990 N94-15890
Design of broadband wire antennas for frequency hopping applications
[AD-A267405] p 1001 N94-17025
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228

FREQUENCY MEASUREMENT
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884

FREQUENCY RANGES
Method and apparatus for non-destructive evaluation of composite materials with cloth surface impressions
[NASA-CASE-LAR-14535-1] p 933 N94-15878

FREQUENCY SHIFT
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028

FREQUENCY SHIFT KEYING
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028

FREQUENCY STANDARDS
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480

FRESNEL INTEGRALS
Diffraction of microwaves at rectangular facades of buildings with and without ground reflections (Fresnel-Kirchhoff-Approximation)
[DLR-FB-92-35] p 987 N94-15155

FRESNEL LENSES
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348

FRESNEL REGION
Analysis of an electromagnetic field in the vicinity of a caustic by asymptotic methods
[IFTR-12/1991] p 998 N94-16853

FRICTION
Bibliography on snow and ice friction
[AD-A266868] p 1045 N94-14920
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767
Evaluation of interfacial properties of fiber-reinforced ceramic composites using fiber push-in tests
[DE93-015427] p 972 N94-17253
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533

FRICTION FACTOR
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555

FRICTION MEASUREMENT
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533

FRICTION REDUCTION
The turbulent wall jet
[AD-A267675] p 855 N94-14963

FRIENDSHIP 7
Astronauts number 3 --- Friendship 7
[NASA-TM-109430] p 874 N94-15501

FRONTS (METEOROLOGY)
Mesoscale frontogenesis: An analysis of two cold front case studies
[AD-A267950] p 1107 N94-17054

FROST
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676
Far-infrared spectra of CO2 clathrate hydrate frosts p 954 N94-16340

FUEL CELL POWER PLANTS
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715

FUEL CELLS
Chemical interactions between interconnect and electrode materials during sintering in solid oxide fuel cells
[DE93-015696] p 1092 N94-16160
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452

FUEL COMBUSTION
Scholarly research program in fuel analysis and combustion research
[AD-A266789] p 942 N94-14911
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
Rotary engine performance computer program (RCEMAP and RCEMAPPC): User's guide
[NASA-CR-191192] p 869 N94-15192
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930

FUEL CONSUMPTION
Assessment of trends in the development of residential buildings from the standpoint of the fuel and energy requirements
[IFTR-6/1991] p 1093 N94-17092

FUEL INJECTION
Coaxial airblast atomizers
[NASA-CR-193845] p 1016 N94-15109

FUEL PRODUCTION
Helium-3 inventory of lunar samples: A potential future energy resource for mankind? p 1295 N94-16428

FUEL PUMPS
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834
FUEL SPRAYS
Coaxial airblast atomizers
[NASA-CR-193845] p 1016 N94-15109
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446
FUEL TESTS
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516
FUELS
Scholarly research program in fuel analysis and combustion research
[AD-A266789] p 942 N94-14911
FULL SCALE TESTS
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
FULLERENES
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061
FUNCTION SPACE
Sequential functions on indexed domains and full abstraction for a sub-language of PCF
[AD-A267838] p 1152 N94-17009
FUNCTIONAL DESIGN SPECIFICATIONS
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
Feasibility study of a personal communications system IRIDIUM-like p 893 N94-17165
Diffractive optics in adverse environments p 1197 N94-17352
FUNCTIONS (MATHEMATICS)
Automatic differentiation of limit functions
[DE93-016376] p 1168 N94-14928
FURANS
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857
FURNACES
Automated directional solidification furnace
[NASA-TM-109662] p 1175 N94-15233
QUESTS: A microgravity research facility for materials science experiments p 978 N94-16082
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
FUSION REACTORS
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
High beta and confinement studies of TFTR
[DE93-016204] p 1202 N94-16446
FUZZY SETS
A fuzzy method for preliminary design random access memory failure rate prediction
[AD-A267948] p 1055 N94-17044
FUZZY SYSTEMS
Fuzzy control and fuzzy kinematic mapping for a redundant space robot
[AD-A266866] p 1163 N94-14950
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
Notes on the use of Dempster-Shafer and fuzzy reasoning to fuse identity attribute data
[AD-A267426] p 1004 N94-17309

G

GABBRO
Potassium isotope cosmochemistry, volatile depletion and the origin of the Earth p 953 N94-16259
The monzonorite-anorthosite connection: The petrogenesis of terrestrial KREEP p 1104 N94-16365
The thickness of eucritic crust in the HED parent body p 1104 N94-16416
GALACTIC CLUSTERS
Participation in the north ecliptic pole sky survey
[NASA-CR-191933] p 1059 N94-16815
Complex QSO absorbers: High-redshift clusters of galaxies?
[NASA-CR-194617] p 1237 N94-16833
GALACTIC COSMIC RAYS
Calculations of cosmic-ray helium transport in shielding materials
[NASA-TP-3354] p 1301 N94-17666
GALACTIC HALOS
The theory of QSO absorption line systems and their relationship to the galaxies
[NASA-CR-194596] p 1236 N94-15679
GALACTIC STRUCTURE
The theory of QSO absorption line systems and their relationship to the galaxies
[NASA-CR-194596] p 1236 N94-15679
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648
GALAXIES
The theory of QSO absorption line systems and their relationship to the galaxies
[NASA-CR-194596] p 1236 N94-15679
A typical pointed observation in IRAS designed to fit into a 15 minute window
[NASA-CR-194653] p 1199 N94-17443
GALERKIN METHOD
Numerical solution of a second order boundary problem for two dimensions using galerkin approximations
[AD-A268128] p 1171 N94-17521
GALILEO PROBE
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432
Galileo probe spacecraft mission to Jupiter
[NASA-TM-109646] p 1247 N94-16070
GALILEO PROJECT
Galileo probe spacecraft mission to Jupiter
[NASA-TM-109646] p 1247 N94-16070
Earth imaging results from Galileo's second encounter p 1252 N94-16201
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229
Galileo photometry of Apollo landing sites p 1259 N94-16234
GALILEO SPACECRAFT
STS-26 through STS-34, deploy activities
[NASA-TM-109566] p 1301 N94-15315
STS-34 Galileo integrated deploy sim
[NASA-TM-109463] p 880 N94-15358
The 1970 highlights --- NASA programs and research
[NASA-TM-109628] p 1302 N94-15415
Earth-based and Galileo SSI multispectral observations of eastern mare serenitatis and the Apollo 17 landing site p 1261 N94-16244
GALLIUM
Silicon gallium doped photoconductor development for the AROME balloon borne instrument p 908 N94-15087
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
GALLIUM ARSENIDE LASERS
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
GALLIUM ARSENIDES
Cryogenic measurements of aerojet GaAs n-JFETs
[NASA-TM-103972] p 1009 N94-15765
Method for doping GaAs with high vapor pressure elements
[AD-D015794] p 1210 N94-16538
Large signal characterization and modeling of heterojunction bipolar transistors
[AD-A266184] p 1012 N94-16935
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577
GALLIUM COMPOUNDS
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
GALLIUM NITRIDES
Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764
An alternative approach to the growth of single crystal gallium nitride
[AD-A267876] p 1213 N94-17037
GAME THEORY
Congestion control of high-speed networks
[AD-A267013] p 989 N94-15748
GAMMA RAY ASTRONOMY
Background suppression techniques in germanium detectors p 899 N94-15026
Prospects for high pressure imaging gas scintillation drift chambers p 901 N94-15040
Outlook for hard x ray and gamma ray astronomy p 904 N94-15057
Gamma ray spectrometer for Lunar Scout 2 p 1037 N94-16426
GAMMA RAY BURSTS
ALEXIS and HETE: Two small, low cost, scientific satellite systems p 896 N94-17185
GAMMA RAY SPECTROMETERS
Background suppression techniques in germanium detectors p 899 N94-15026
Applications for large area silicon drift detectors on x ray and gamma ray astronomy p 909 N94-15090
Gamma ray spectrometer for Lunar Scout 2 p 1037 N94-16426
GAMMA RAY TELESCOPES
Gamma large area silicon telescope: Applying Si strip detector technology to the detection of gamma rays in space p 904 N94-15061
GAMMA RAYS
Silicon radiation sensor systems for gamma and x ray detection at SI p 909 N94-15095
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980
Induced thermoluminescence study of experimentally shock-loaded oligoclase p 953 N94-16266
Astrophysics with MILAGRO
[DE93-012722] p 1240 N94-17657
GARNETS
Water in Earth's mantle: Hydrogen analysis of mantle olivine, pyroxenes and garnet using the SIMS p 1104 N94-16336
GAS ANALYSIS
Gas Analysis System
[DE93-014617] p 949 N94-16891
Electron reversal ionizer for detection of trace species using a spherical cathode
[NASA-CASE-NPO-18870-1-CU] p 1185 N94-17329
GAS ATOMIZATION
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767
GAS BEARINGS
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462
GAS CHROMATOGRAPHY
Scholarly research program in fuel analysis and combustion research
[AD-A266789] p 942 N94-14911
Space Shuttle solid rocket motor exposure monitoring p 976 N94-16624
On-line gas chromatographic studies of Rutherfordium (element 104), hahnium (element 105), and homologs
[DE93-013890] p 948 N94-16821
Gas Analysis System
[DE93-014617] p 949 N94-16891
Trace analysis of chemical warfare agents in air: Sampling in porous polymers followed with thermal desorption analysis
[FOA-C-40302-4.6] p 1097 N94-17625
GAS COMPOSITION
Evolution of Triton's volatile budget p 1284 N94-16373
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material p 1244 N94-16377
Solar noble gases revealed by closed system stepped etching of a metal separate from Fayetteville p 954 N94-16432
Gas Analysis System
[DE93-014617] p 949 N94-16891
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
GAS DENSITY
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
GAS DETECTORS
Gas Analysis System
[DE93-014617] p 949 N94-16891
GAS DISCHARGES
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
GAS DISSOCIATION
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586

GAS DYNAMICS
Accurate upwind methods for the Euler equations
[NASA-TM-106388] p 1170 N94-16882
GAS EXCHANGE
Driving terrestrial ecosystem models from space
p 991 N94-15896
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations
[NASA-CR-194654] p 1118 N94-17279
Oxygen diffusion in YBa2Cu3O(6+delta) ceramics on heating
[DE93-629161] p 974 N94-17633
Influence of the granular surface on the oxygen uptake in YBa2Cu3O(6+delta) ceramics
[DE93-629162] p 974 N94-17634
GAS FLOW
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
Coaxial airblast atomizers
[NASA-CR-193845] p 1016 N94-15109
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655
GAS GIANT PLANETS
Chairmanship of the Neptune/Pluto outer planets science working group
[NASA-CR-194625] p 1297 N94-16832
GAS HEATING
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
Some single-piston closed-cycle machines and Peter Tailer's thermal lag engine
[DE93-015983] p 1049 N94-17675
GAS IONIZATION
Absolute, Extreme-Ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A267045] p 1299 N94-15836
Observation of nonsequential ionization of helium and its impact on intensity monitoring
[DE93-017174] p 949 N94-16904
GAS JETS
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
GAS LASERS
Spectroscopic and computer modeling investigations of a laser-sustained plasma
[IFTR-30/1991] p 1204 N94-17066
GAS MIXTURES
Mechanisms of combustion limits in premixed gas flames at microgravity
[NASA-CR-194557] p 946 N94-15713
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
GAS PATH ANALYSIS
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
GAS PRESSURE
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884
GAS TEMPERATURE
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655
GAS TUNGSTEN ARC WELDING
Determination of GTA welding efficiencies
[AD-A267163] p 1046 N94-15738
GAS TURBINE ENGINES
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
GAS TURBINES
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532
GAS VISCOSITY
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
GAS-LIQUID INTERACTIONS
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
GAS-SOLID INTERACTIONS
Olivines in the Kaba carbonaceous chondrite and constraints on their formation p 1219 N94-16255
GAS-SOLID INTERFACES
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
GASDYNAMIC LASERS
Experimental studies on a gas dynamic laser with narrow throat and high area-ratio grid nozzles
[AD-A267818] p 1042 N94-17400
Three short articles from Japanese laser journal
[AD-A268249] p 1042 N94-17415
GASEOUS DIFFUSION
Electronic and atomic structure of semiconductors and of high-temperature superconductors
[AD-A266805] p 1205 N94-14913
GASEOUS FUELS
Publications of the Oak Ridge National Laboratory Fossil Energy Program, 1 October 1991 - 31 March 1993
[DE93-014643] p 1232 N94-16967
GASOHOL (FUEL)
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516
GASOLINE
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516
GATES (CIRCUITS)
Improvements to pulsed phase locked loop strain monitor
[NASA-CASE-LAR-14887-1] p 1033 N94-15877
Computer-aided design package for designers of digital optical computers
[AD-A267866] p 1154 N94-17390
GAUGE INVARIANCE
Supersymmetry of gauge equations and geometric nonadiabatic phases
[DE93-626671] p 1219 N94-14935
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
A high sensitivity search for CP violating rare K(sub L) decays and precision measurement of the direct CP violation parameter (epsilon)(prime)/(epsilon) via the four K (yields) 2(pi) decay modes
[DE93-016866] p 1184 N94-16899
Multipolar-like form of nonabelian gauge theories
[DE93-626690] p 1171 N94-17314
Derivation of the Verlinde formula from Chern-Simons theory and the G/G model
[DE93-628620] p 1221 N94-17632
GAUGE THEORY
Supersymmetry of gauge equations and geometric nonadiabatic phases
[DE93-626671] p 1219 N94-14935
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Multipolar-like form of nonabelian gauge theories
[DE93-626690] p 1171 N94-17314
The universality of the shift of the Chern-Simons parameter for a general class of BRS invariant regularizations
[NIKHEF-H/93-03] p 1220 N94-17602
Derivation of the Verlinde formula from Chern-Simons theory and the G/G model
[DE93-628620] p 1221 N94-17632
GEARS
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767
Mechanical Systems Technology Branch research summary, 1985 - 1992
[NASA-TM-106329] p 1049 N94-17583
GELATINS
Determination of average refractive index of spin coated DCG films for HOE fabrication p 1036 N94-14992
GELATION
Preparation of homogeneous aluminosilicate gels by sol/gel techniques
[AD-A266823] p 962 N94-14914
Multinuclear NMR study of aluminosilicate sol-gel synthesis reasons for the homogeneous gelation using the prehydrolysis method
[AD-A266877] p 962 N94-14921
Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
GELS
Multinuclear NMR study of aluminosilicate sol-gel synthesis reasons for the homogeneous gelation using the prehydrolysis method
[AD-A266877] p 962 N94-14921
Effects of aging time on V2O5 sol-gel coatings
[AD-A266824] p 965 N94-15843
Swelling equilibria for temperature-sensitive ampholytic hydrogels
[DE93-015264] p 966 N94-15996
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
The photochemistry of poly(methylphenylphosphazene)
[AD-A267320] p 970 N94-16948
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
GENES
Isolation of thermostable enzyme mutants by cloning and selection in thermophilic bacteria
[AD-A266378] p 1117 N94-16514
GENETIC ALGORITHMS
Multiobjective functions optimization for task allocation mapping to multicomputer nodes
[AD-A267071] p 1146 N94-15670
GEOCHEMISTRY
Directory of research projects: Planetary materials and geochemistry
[NASA-TM-4484] p 1095 N94-15781
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
Geochemistry and cosmochemistry of fullerenes 3: Reaction of C60 and C70 with ozone
p 953 N94-16243
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth
p 1242 N94-16272
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
Manson impact structure, Iowa: First geochemical results for drill core M-1 p 1103 N94-16322
Geochemical evidences for two chondritic-like cometary or asteroidal impacts before and at the K/T boundary
p 1244 N94-16359
GEOCHRONOLOGY
Age determinations and Earth-based multispectral observations of lunar light plains p 1275 N94-16323
Preliminary Ar-40/Ar-39 age spectrum and laser probe dating of the M1 core of the Manson Impact Structure, Iowa: A K-T boundary crater candidate
p 1104 N94-16334
GEODESY
New techniques for the combination of heterogenous data when determining the Earth's gravity field
[SER-C-395] p 1098 N94-15153
Applications of SLR p 911 N94-15556
Millimeter accuracy satellites for two color ranging
p 916 N94-15583
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications
p 916 N94-15586
LLR: Activities in Wettzell p 876 N94-15600
Airborne 2 color ranging experiment
p 920 N94-15614
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
BRIDGE: A small scientific satellite for geodesy
p 890 N94-17146
GEODETIC ACCURACY
Analysis of the accuracy of strapdown inertial surveying systems
[SER-C-391] p 1081 N94-15156
Improved mapping system
[NASA-TM-109643] p 1082 N94-15428
GEODETIC SATELLITES
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs
p 911 N94-15555
The precision of today's satellite laser ranging systems p 912 N94-15559
Millimeter accuracy satellites for two color ranging
p 916 N94-15583
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
GEODETIC SURVEYS
Applications of SLR p 911 N94-15556
GEODYNAMICS
Laser tracking for vertical control p 911 N94-15553
Nd:YLF laser for airborne/spaceborne laser ranging
p 913 N94-15563
Experience and results of the 1991 MTLRS-1 USSR campaign p 914 N94-15575
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Historical MOBLAS system characterization
p 915 N94-15579
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599

Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Report of the International Center for Earth Tides for the period 1985-1989 p 1099 N94-15801
Cooperative projects in geodynamical instrumentation between the State Seismological Bureau (China) and the Royal Observatory of Belgium p 1037 N94-15806
Tectonic deformation in southern California [NASA-CR-194621] p 1101 N94-16021
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Constraints on the differentiation of the Earth from the coupled Sm-146,147-Nd-142,143 systematics p 1103 N94-16271
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382

GEOGRAPHIC INFORMATION SYSTEMS
Application of modified VICAR/IBIS GIS to analysis of July 1991 Flevoland AIRSAR data p 1080 N94-16757
Soil conservation applications with C-band SAR p 1080 N94-16760
A Geographic Information System approach to modeling nutrient and sediment transport [DE93-013747] p 1097 N94-17426

GEOIDS
Megaplumes on Venus p 1271 N94-16301
An inversion of geoid and topography for mantle and crustal structure on Mars p 1273 N94-16315
Spectral study of Venus global topography and geoid from Magellan and PVO data p 1276 N94-16332

GEOLOGICAL FAULTS
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments [DE93-013581] p 1112 N94-16009
Importance of expansion and contraction in the formation of tectonic features on the Moon p 1250 N94-16189
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5 p 1258 N94-16227
Estimates of lithospheric thickness on Venus p 1267 N94-16277
Structural mapping of Maxwell Montes p 1271 N94-16304
Tectonic resurfacing of Venus p 1285 N94-16380

GEOLOGICAL SURVEYS
Geologic remote sensing with radar p 991 N94-15900
Pargo Chasma and its relationship to global tectonics p 1249 N94-16181
A discontinuous melt sheet in the Manson impact structure p 1103 N94-16269
Global Magellan-image map of Venus at full resolution p 1274 N94-16319
Tectonic resurfacing of Venus p 1285 N94-16380
Integrating remote sensing techniques at Cuprite, Nevada: AVIRIS, Thematic Mapper, and field spectroscopy p 1072 N94-16701
Expert system-based mineral mapping using AVIRIS p 1073 N94-16704
A comparison of LOWTRAN-7 corrected Airborne Visible/Infrared Imaging Spectrometer (AVIRIS) data with ground spectral measurements p 1074 N94-16710
Lithological and textural controls on radar and diurnal thermal signatures of weathered volcanic deposits, Lunar Crater region, Nevada p 1080 N94-16762
A geological and geophysical information system for Eurasia [AD-A267841] p 1232 N94-17036

GEOLOGY
LFASE report: Crustal study [AD-A266893] p 1111 N94-14947
Spaceborne radar for geoscientific applications in North China p 993 N94-15915
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229
High-resolution seismic reflection survey at the Manson crater, Iowa p 1103 N94-16307
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 2: TIMS Workshop [NASA-CR-194541] p 1063 N94-16595
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 1: AVIRIS Workshop [NASA-CR-194540] p 1066 N94-16666

GEOMETRICAL OPTICS
Laboratory for x ray optics [AD-A267149] p 1189 N94-15735
Analysis of an electromagnetic field in the vicinity of a caustic by asymptotic methods [IFTR-12/1991] p 998 N94-16653
Optical system storage design with diffractive optical elements p 1198 N94-17360

GEOMETRICAL THEORY OF DIFFRACTION
Sound exposure level prediction for impulse sound sources above variable terrain [AD-A267535] p 1178 N94-17119

GEOMORPHOLOGY
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices p 1248 N94-16178
Pargo Chasma and its relationship to global tectonics p 1249 N94-16181
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194
Collisional and dynamical history of Gaspra p 1241 N94-16202
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness p 1103 N94-16211
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Lava flow-field morphological classification and interpretation: Examples from Venus p 1259 N94-16230
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
Estimates of lithospheric thickness on Venus p 1267 N94-16277
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
Tectonic resurfacing of Venus p 1285 N94-16380
Guide to Magellan image interpretation [NASA-CR-194340] p 1298 N94-17654

GEOPHYSICAL OBSERVATORIES
TLRS-3 system upgrades p 877 N94-15609

GEOPHYSICAL SATELLITES
On-board spatial scientific experiment project on small satellites p 896 N94-17184

GEOPHYSICS
Papers presented at the Eleventh International Symposium on Earth Tides [COMMUNICATIONS-SER-B-158] p 1098 N94-15800
Proceedings of the Third Spaceborne Imaging Radar Symposium [NASA-CR-194104] p 989 N94-15886
SIR-C/X-SAR free flyer concept p 898 N94-15903
EOS SAR: A new approach p 992 N94-15904
Calibration: Practical experience with ERS-1 p 992 N94-15907
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 2: TIMS Workshop [NASA-CR-194541] p 1063 N94-16595
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 1: AVIRIS Workshop [NASA-CR-194540] p 1066 N94-16666
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 3: AIRSAR Workshop [NASA-CR-194542] p 1075 N94-16731
A geological and geophysical information system for Eurasia [AD-A267841] p 1232 N94-17036
Workshop on early Mars: How warm and how wet, part 2? [NASA-CR-193503] p 1297 N94-17637

GEOPOTENTIAL
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586
Implementing a 50x50 gravity field model in an orbit determination system [AD-A267548] p 888 N94-17103

GEOSTROPHIC WIND
A two-layer quasi-geotrophic spherical model: Formulation and climatology [DM-63] p 1110 N94-17593

GEOSYNCHRONOUS ORBITS
TITUS: A micro-satellite for technology demonstration p 896 N94-17186

GEOTEMPERATURE
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224

GEOTHERMAL ANOMALIES
Megaplumes on Venus p 1271 N94-16301

GERMANIUM
Background suppression techniques in germanium detectors p 899 N94-15026
Performance testing of doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15066
Non-linear effects in doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15067
Extrinsic photoconductor detectors for the wavelength range 2 microns to 240 microns p 906 N94-15073
Ionising radiation-induced effects in doped germanium FIR photoconductors p 907 N94-15077
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method [NASA-CR-194571] p 1038 N94-15530
Structural characterization of epitaxial layers for infrared detectors [AD-A267875] p 940 N94-17013
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing [NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327

GERMANIUM ALLOYS
Metastable phases in mechanically alloyed aluminum germanium powders [DE93-008727] p 958 N94-16463

GET AWAY SPECIALS (STS)
GAS highlights, 1988 --- Get Away Specials [NASA-TM-109600] p 873 N94-15308

GEYSERS
Tidal interaction: A possible explanation for geysers and other fluid phenomena in the Neptune-Triton system p 1272 N94-16311

GIANT STARS
The formation process of the He I lambda 10830 line in cool giant stars [NASA-CR-194648] p 1240 N94-17094

GIOTTO MISSION
Comet Halley returns [NASA-TM-109608] p 885 N94-15296
Giotto's second encounter: The mission to Comet Grigg-Skjellerup [ESA-BR-93] p 1239 N94-16524
Small satellite missions to long-period comets p 874 N94-17144

GLACIAL DRIFT
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293

GLACIERS
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
Preliminary results of polarization signatures for glacial moraines in the Mono Basin, Eastern Sierra Nevada p 1078 N94-16746

GLACIOLOGY
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194

GLASS
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques [AD-A267055] p 885 N94-15666
Search for far infrared radiation from optically pumped defect modes [AD-A266744] p 1206 N94-15822
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses [DE93-015304] p 965 N94-15828
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite [NASA-CASE-LEW-15263-2] p 934 N94-15929
Contained liquids in microgravity, part 2 p 979 N94-16085
High-performance nonlinear optical material developed in Japan [AD-A266194] p 1191 N94-16126
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187
Why is the Moon dark? p 1256 N94-16219
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement p 1242 N94-16245
Siderophile elements in the upper mantle of the Earth: New clues from metal-silicate partition coefficients p 1103 N94-16250
Grain surface features of Apollo 17 orange and black glass p 1289 N94-16397
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
An investigation of the hydrolytic resistance of sodium-calcium plate glass with a layer of silica deposited on its surface [IFTR-34/1991] p 971 N94-17120
Optical studies of glasses embedded with inorganic ions and organic dyes [AD-A268146] p 1199 N94-17455
Interface chemistry in ceramic matrix composites [AD-A268629] p 973 N94-17466

Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

GLASS FIBER REINFORCED PLASTICS
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836

GLASS FIBERS
Production process p 931 N94-15257
Characterization of voids formed during liquid impregnation of nonwoven multifilament glass networks as related to composite processing p 939 N94-16858
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204

GLINT
What is the radar tracking Glint problem and can it be solved?
[AD-A266509] p 999 N94-16789

GLOBAL AIR POLLUTION
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006

GLOBAL POSITIONING SYSTEM
Applications of SLR p 911 N94-15556
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
Interferometric GPS attitude: A stochastic error model, DREO report
[AD-A266411] p 864 N94-16457
Category (CAT) 3B level 1 test plan for Global Positioning System (GPS)
[DOT/FAA/RD-93/21] p 864 N94-16835
Wide-area Differential Global Positioning System (WDGPS)/Wide-area Integrity Broadcast (WIB) alternatives analysis
[DOT/FAA/SE-93/3] p 864 N94-16906

GLOBAL TRACKING NETWORK
Laser tracking for vertical control p 911 N94-15553

GLOBAL WARMING
Global Greenhouse Expedition
[NASA-TM-109613] p 1095 N94-15364
EOS SAR: A new approach p 992 N94-15904
A summary of microwave remote sensing investigations planned for BOREAS p 993 N94-15914
Discrimination among semi-arid landscape endmembers using the Spectral Angle Mapper (SAM) algorithm p 1074 N94-16711
Incorporating global warming risks in power sector planning. Volume 1: A case study of the New England region
[DE93-015241] p 1096 N94-17289

GLOVES
STS-27 crew fire training and glove molding
[NASA-TM-109554] p 1136 N94-15406
Investigation of the effects of extravehicular activity (EVA) gloves on performance
[NASA-TM-3401] p 1137 N94-15717
Force-endurance capabilities of extravehicular activity (EVA) gloves at different pressure levels
[NASA-TP-3420] p 1139 N94-17653

GLOW DISCHARGES
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316

GLUONS
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
Mesons at finite temperature in the NJL model with gluon condensate
[DE93-626697] p 1185 N94-17310
Quark-loop effects in high energy spin-flip processes
[DE93-626692] p 1188 N94-17313
The three-loop QCD beta-function and anomalous dimensions
[NIKHEF-H/92-17] p 1186 N94-17617

GLUTAMATES
Synaptic plasticity and memory formation
[AD-A267988] p 1133 N94-17453

GLYCEROLS
Contained liquids in microgravity, part 2 p 979 N94-16085

GLYCOLS
Contained liquids in microgravity, part 2 p 979 N94-16085

GODDARD TRAJECTORY DETERMINATION SYSTEM
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103

GOERTLER INSTABILITY
On the receptivity problem for 0(1) wavelength Goertler vortices
[NASA-CR-191519] p 1016 N94-15005

GOES SATELLITES
The Central American cold surge: An observational analysis of the deep southward penetration of North American cold fronts
[AD-A268592] p 1110 N94-17607

GOES 4
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509

GOGGLES
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
[AD-A266493] p 1138 N94-16793

GOLD
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605

GOLD ALLOYS
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282

GOODNESS OF FIT
Moments in statistics: Approximations to densities and goodness-of-fit
[AD-A266600] p 1173 N94-16726

GOVERNMENT PROCUREMENT
Equipment management user's handbook for property custodians
[NHB-4200.2A] p 1224 N94-15957
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799

GOVERNMENT/INDUSTRY RELATIONS
Industrial labor relations manual
[NHB-5200.1B] p 1224 N94-15939
Government/contractor development teams
[TABES PAPER 93-460] p 1050 N94-16134
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
Technology transfer. Determining industry needs: A guide for communities
[NASA-CR-194676] p 1235 N94-17293
Technology in action
[NASA-TM-109345] p 1235 N94-17294
Satellite communications systems and technology. Executive summary
[NASA-TM-109346] p 1006 N94-17661

GRAIN BOUNDARIES
STS-26 SSIP briefing --- Titanium Grain Formation Experiment and Crystal Membrane Experiment
[NASA-TM-109556] p 976 N94-15280
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
A reexamination of grain boundary fracture in Ni3Al: Environmental and alloying effects
[DE93-015431] p 1208 N94-16063
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
Influence of grain size on the energy storing ability during uniaxial stretching of austenite steel
[IFTR-22/1992] p 961 N94-17121
Advanced thin-film deposition and physical properties of high-temperature and other novel superconducting materials
[AD-A268199] p 1216 N94-17561

GRAIN SIZE
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
Rheology of water and ammonia-water ices p 953 N94-16188
Densities of 5-15 micron interplanetary dust particles p 1244 N94-16367
Exsolved kirschsteinite in angrite LEW86010 olivine p 1245 N94-16410
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764
Influence of grain size on the energy storing ability during uniaxial stretching of austenite steel
[IFTR-22/1992] p 961 N94-17121

GRAMMARS
Using multiple adaptively-weighted strategies for the resolution of demonstratives
[AD-A266463] p 1150 N94-16585
Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool
[AD-A267560] p 1153 N94-17107

GRANITE
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212

GRANTS
Research grant handbook
[NHB-5800.1C] p 1225 N94-16907

GRANULAR MATERIALS
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555
Stability analysis for the flow of granular materials down an inclined plane using kinetic model
[DE93-016852] p 1026 N94-16958
Influence of the granular surface on the oxygen uptake in YBa2Cu3O(6+delta) ceramics
[DE93-629162] p 974 N94-17634

GRAPH THEORY
Homogeneously traceable results in claw-free graphs
[AD-A266196] p 1169 N94-16127
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659

GRAPHICAL USER INTERFACE
HP upgrade operational streamlining p 918 N94-15596
User's manual for the HYPGEN hyperbolic grid generator and the HGUI graphical user interface
[NASA-TM-108791] p 1148 N94-15784
Computing science and statistics. Volume 24: Graphics and visualization
[AD-A266571] p 1150 N94-16721
Design and implementation of an interface editor for the Amadeus multi-relational database front-end system
[AD-A267403] p 1233 N94-17114

GRAPHITE
Measurement of the specific heat capacity of the electron-beam graphite calorimeter
[NPL-RSA(EXT)-40] p 1031 N94-15018
Negative ion formation in small carbon clusters
[DE93-015436] p 1182 N94-16064
Corrosion kinetics and mechanisms for nuclear grade graphites
[DE93-015462] p 947 N94-16105

GRAPHITE-EPOXY COMPOSITES
Aeroelastic airfoil smart spar p 868 N94-16865

GRASSES
Radar response of vegetation: An overview p 991 N94-15898

GRASSLANDS
Evaluation of spatial productivity patterns in an annual grassland during an AVIRIS overflight
[CIW-PUBL-1134] p 1067 N94-16672
Measuring dry plant residues in grasslands: A case study using AVIRIS p 1072 N94-16697

GRATINGS (SPECTRA)
Gratings and waveguides p 1226 N94-14987
The development of back-illuminated CCD's for XMM p 900 N94-15035
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331
Diffractive optics: Design, fabrication, and applications p 1194 N94-17334
Scalar limitations of diffractive optical elements p 1194 N94-17336
Subwavelength structured surfaces and their applications p 1194 N94-17337
Finite difference time domain analysis of chirped dielectric gratings p 1195 N94-17339
Asymmetric three-beam binary optic grating p 1195 N94-17340
Scattering from binary optics p 1195 N94-17341
Mathmatical modeling for diffractive optics p 1195 N94-17342
Binary optics at Hughes Danbury Optical Systems p 1195 N94-17344
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Optical system storage design with diffractive optical elements p 1198 N94-17360
Color separation gratings p 1198 N94-17362

GRAVIMETERS
A new feedback system for instruments equipped with a capacitive transducer p 1037 N94-15802
Calibration platforms for gravimeters p 1037 N94-15805
On tidal parameters at Brussels fundamental station p 1100 N94-15807
Nontidal gravity changes observed with a superconducting gravimeter p 1100 N94-15808
Earth tides results obtained with gravimeters, clinometers, and strainmeters in Belgium and in Grand Duchy of Luxembourg p 1100 N94-15809

GRAVITATION
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218

GRAVITATIONAL COLLAPSE
Numerical simulation of three-dimensional self-gravitating flow
[NASA-TM-109021] p 1021 N94-15768

GRAVITATIONAL CONSTANT
A simultaneous estimation of the mass of Mars and its natural satellites, Phobos and Deimos, from the orbital perturbations on the Mariner 9, Viking 1, and Viking 2 orbiters p 1279 N94-16347

GRAVITATIONAL EFFECTS
Measurements of Interfacial Tension: MITE p 943 N94-15158
Pool boiling: Single bubble experiment p 944 N94-15160
Pressures of supercritical salt solutions p 945 N94-15166
Finding stable orientations of assemblies with linear programming
[AD-A266990] p 1143 N94-15212
Proceedings of the Second Workshop on Microgravity Experimentation
[DSS-NR15-43-1990] p 977 N94-16071
Canadian microgravity experiments flown in 1989-1990 p 977 N94-16075
Development of the Laser-based R/D Test-bed System (LTS) p 978 N94-16080
Optical systems for the visualization of fluid and solid transparent media under microgravity conditions p 978 N94-16081
The size of complex craters p 1262 N94-16249
Growth of single crystals of mercuric iodide on the ground and in space
[DE93-015523] p 1209 N94-16442
The 1990-1991 NASA space biology accomplishments
[NASA-TM-4501] p 1118 N94-17257
Gravity dependent condensation pressure drop and heat transfer in ammonia two-phase heat transport systems
[NLR-TP-92121-U] p 1031 N94-17615
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636

GRAVITATIONAL FIELDS
New techniques for the combination of heterogenous data when determining the Earth's gravity field
[SER-C-395] p 1098 N94-15153
Impending motion direction of contacting rigid bodies
[AD-A266814] p 1164 N94-15756
Apparatus and method for producing an artificial gravitational field
[NASA-CASE-MSC-22021-1] p 886 N94-15935
Energy potential analysis of zero velocity curves in the restricted three-body problem
[AD-A267512] p 1170 N94-17076
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103
Relativistic dynamics of spin in strong external fields
[NIKHEF-H/93-06] p 1240 N94-17604

GRAVITATIONAL PHYSIOLOGY
Living well in space: Ensuring crew capability
[NASA-TM-109538] p 1120 N94-15369
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636

GRAVITATIONAL WAVE ANTENNAS
Lunar LIGO: A new concept in gravitational wave astronomy p 1277 N94-16337

GRAVITATIONAL WAVES
Particle physics and cosmology, Task C
[DE93-016865] p 1239 N94-16118
Lunar LIGO: A new concept in gravitational wave astronomy p 1277 N94-16337

GRAVITY ANOMALIES
An inversion of geoid and topography for mantle and crustal structure on Mars p 1273 N94-16315

GRAVITY WAVES
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle p 1293 N94-16421
Field observations of infragravity, sea and swell directional spectra
[AD-A266439] p 1113 N94-16561

GRAZING INCIDENCE
The grazing incidence detectors for the SOHO coronal diagnostic spectrometer p 905 N94-15063
Data processing system for flight spectrometer p 908 N94-15086

GREEN'S FUNCTIONS
Shielding from space radiations
[NASA-CR-194578] p 1180 N94-15715
Volume integral equations applied to circular and square cylinders
[AD-A266635] p 1169 N94-15785
Approximate Green's function methods for HZE transport in multilayered materials
[NASA-TM-4519] p 1300 N94-17084
Shielding from space radiations
[NASA-CR-194664] p 1301 N94-17255
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
The universality of the shift of the Chern-Simons parameter for a general class of BRS invariant regularizations
[NIKHEF-H/93-03] p 1220 N94-17602

GREENHOUSE EFFECT
Global Greenhouse Expedition
[NASA-TM-109613] p 1095 N94-15364
Forest fire study
[NASA-TM-109615] p 1095 N94-15425
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006
The use of General Circulation Models in detecting climate change induced by greenhouse gases
[DE93-014369] p 1096 N94-16802
Incorporating global warming risks in power sector planning. Volume 1: A case study of the New England region
[DE93-015241] p 1096 N94-17289

GRID GENERATION (MATHEMATICS)
A parallel adaptive mesh refinement algorithm
[NASA-CR-191530] p 1168 N94-15724
User's manual for the HYPGEN hyperbolic grid generator and the HGUI graphical user interface
[NASA-TM-108791] p 1148 N94-15784
Modal element method for potential flow in non-uniform ducts: Combining closed form analysis with CFD
[NASA-TM-106347] p 1169 N94-15799
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
Modal ring method for the scattering of sound
[NASA-TM-106342] p 1177 N94-16497
Adaptive Cartesian grid methods for representing geometry in inviscid compressible flow
[DE93-016430] p 1025 N94-16894
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903
Single block three-dimensional volume grids about complex aerodynamic vehicles
[NASA-TM-108986] p 1030 N94-17476
Numerical solution of a second order boundary problem for two dimensions using galerkin approximations
[AD-A268128] p 1171 N94-17521
Compressible flow solvers using unstructured grids
[INRIA-RR-1732] p 1030 N94-17531
Multigrid direct numerical simulation of the whole process of flow transition in 3-D boundary layers
[NASA-TM-106369] p 1030 N94-17557

GRIGG-SKJELLERUP COMET
Giotto's second encounter: The mission to Comet Grigg-Skjellerup
[ESA-BR-93] p 1239 N94-16524

GROOVES
Fabrication techniques for very fast diffractive lenses p 1196 N94-17345

GROUND BASED CONTROL
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167

GROUND CREWS
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
Aircrew/groundcrew life support systems research. Volume 2: CLIN 0002 task order requirements
[AD-A268230] p 1139 N94-17564

GROUND EFFECT (AERODYNAMICS)
An experimental study of ASTOVL related jet flows to produce CFD code validation data. Phase 3: Results of experiments
[TT-9203] p 1020 N94-15645

GROUND EFFECT (COMMUNICATIONS)
Diffraction of microwaves at rectangular facades of buildings with and without ground reflections (Fresnel-Kirchhoff-Approximation)
[DLR-FB-92-35] p 987 N94-15155
Designing clutter rejection filters with complex coefficients for airborne pulsed Doppler weather radar
[NASA-CR-4550] p 862 N94-15444

GROUND HANDLING
Mission management aircraft operations manual
[NHB-7900.3] p 1225 N94-16729

GROUND STATE
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111
Synthesis and chemistry of novel cyclic fluorocarbons
[AD-A267148] p 929 N94-15734
The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586
Crystalline beam ground state
[DE93-014331] p 1211 N94-16827

GROUND STATIONS
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
LLR: Activities in Wettzell p 876 N94-15600
Upgrading of the Borowiec laser station p 877 N94-15604
Ground based laser ranging for satellite location p 919 N94-15607
New progress of ranging technology at Wuhan Satellite Laser Ranging Station p 877 N94-15608
Satellite laser station Helwan status 1992 p 877 N94-15621
The third generation SLR station Potsdam no. 7836 p 877 N94-15623
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft
[AD-A266404] p 1101 N94-16551
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
A proposed ground segment design for small satellites p 878 N94-17154
Ground segment definition for the Spanish small satellite program (MINISAT) p 878 N94-17155
OREMUS: Prototype of an orbit determination center dedicated to mini-satellite control p 878 N94-17156
Data processing system for ARSENE ground station: A tool for small satellite control and development p 878 N94-17157
Satellite control: A comprehensive approach p 878 N94-17158
S 80/T: A micro satellite system combining high performances and limited resources p 893 N94-17166
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167
ALEXIS and HETE: Two small, low cost, scientific satellite systems p 896 N94-17185

GROUND SUPPORT EQUIPMENT
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546

GROUND SUPPORT SYSTEMS
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905

GROUND TESTS
Flight testing of airbreathing hypersonic vehicles
[NASA-TM-4524] p 886 N94-15753
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263
Ground testing for the no-vent fill of cryogenic tanks: Results of tests for a 71 cubic foot tank
[NASA-TM-106293] p 1030 N94-17486

GROUND TRUTH
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181

An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603
Ground-truthing AVIRIS mineral mapping at Cuprite, Nevada p 1069 N94-16682
Evaluation of the TOPSAR performance by using passive and active calibrators p 1078 N94-16750
GROUND WATER
Equatorial ground ice on Mars: Steady-state stability p 1290 N94-16403
AVIRIS study of Death Valley evaporite deposits using least-squares band-fitting methods p 1067 N94-16676
GROUND WAVE PROPAGATION
Environmental assessment for northwestern Indiana relay node site no. RN 8C902IN
[AD-A267849] p 1004 N94-17406
GROUND-AIR-GROUND COMMUNICATION
STS-35 mission highlights resource tape
[NASA-TM-109501] p 881 N94-15465
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 1: Theory and numerical results
[AD-A267105] p 986 N94-15649
GROUP THEORY
Application of group theory to integral-difference equations of plasma physics
[IFTR-23/1992] p 1204 N94-17067
Distributively generated matrix near rings
[DE93-626588] p 1175 N94-17641
Quantum Heisenberg groups and Sklyanin algebras
[DE93-626590] p 1175 N94-17643
GUIDE VANES
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock isentropic light piston facility
[RAE-TM-AERO/PROP-19] p 856 N94-15696
GULF OF MEXICO
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
SAR observations in the Gulf of Mexico p 1077 N94-16742
GULF STREAM
Investigation of AIRSAR signatures of the Gulf Stream p 1077 N94-16743
GULFS
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
GUSTS
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465
GYRES
Meridional circulation in the tropical north atlantic
[AD-A268222] p 1114 N94-17555
GYROSCOPIC PENDULUMS
Analysis of the accuracy of strapdown inertial surveying systems
[SER-C-391] p 1081 N94-15156

H

H WAVES
The exact solution of the problem of diffraction of an electromagnetic plane wave by a conductive half-plane situated at an interface
[IFTR-3/91] p 1002 N94-17057
H-INFINITY CONTROL
The design and analysis of robust feedback systems
[AD-A267152] p 1165 N94-15778
H-60 HELICOPTER
Basic principles of helicopter crashworthiness
[AD-A267099] p 862 N94-15637
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
[AD-A266493] p 1138 N94-16793
HADRONS
Astronomy and astrophysics p 1239 N94-15970
Evolution of hadron beams under intrabeam scattering
[DE93-014330] p 1184 N94-16826
Calorimeter based detectors for high energy hadron colliders
[DE93-017055] p 1188 N94-16900
Heavy ion physics research at Creighton University
[DE93-016809] p 1185 N94-16957
HAFNIUM CARBIDES
Tensile and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires
[NASA-TM-106350] p 962 N94-17652
HAILSTORMS
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465
HALL EFFECT
The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
HALLEY'S COMET
Comet Halley returns
[NASA-TM-109608] p 885 N94-15296
HALOGENS
Basic optical studies of high T(c) oxide superconductors
[AD-A268148] p 1014 N94-17428
HAMILTONIAN FUNCTIONS
Supersymmetry of gauge equations and geometric nonadiabatic phases
[DE93-626671] p 1219 N94-14935
The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972
Homogeneously traceable results in claw-free graphs
[AD-A266196] p 1169 N94-16127
Stochastic chaos: An analog of quantum chaos
[DE93-016619] p 1220 N94-16956
Multipolar-like form of nonabelian gauge theories
[DE93-626690] p 1171 N94-17314
HAND (ANATOMY)
Carpal tunnel syndrome and other cumulative trauma disorders of the arm and hand and occupation in US Navy enlisted personnel
[AD-A267747] p 1129 N94-17374
HANDBOOKS
NASA directives master list and index
[NHB-1410.13L] p 1229 N94-15414
An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048
Research grant handbook
[NHB-5800.1C] p 1225 N94-16907
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
CALS test network handbook
[AD-A267587] p 1160 N94-17209
HARDNESS TESTS
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Mechanical properties and crystal growth studies of semiconductor alloys
[AD-A268144] p 1216 N94-17454
HARDWARE
Design of an experiment hardware for the ESA space facility BIOPAN
[DLR-FB-93-06] p 876 N94-17548
HARMONIC ANALYSIS
What we can learn about ocean tides from tide gauge and gravity loading measurements?
p 1100 N94-15811
HARMONIC CONTROL
Tilt mechanism
[AD-D015780] p 1047 N94-16548
HARMONIC EXCITATION
Nonlinear analysis of mechanical systems under combined harmonic and stochastic excitation
[AD-A266217] p 1173 N94-16937
HARMONIC GENERATIONS
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Rational design, construction, and processing of high-performance nonlinear optical materials
[AD-A266185] p 1191 N94-16454
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560
HARMONIC OSCILLATION
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
HARMONIC OSCILLATORS
Breakdown of adiabatic invariance
[AD-A267246] p 1219 N94-14977
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Theoretical studies of nonlinear optical properties of conjugated polymers
[AD-A267390] p 1193 N94-17024
HARMONIC RADIATION
On the decay of a dipole pump wave to half-harmonics p 1201 N94-15211
HARMONICS
Emittance and beam size distortion due to linear coupling
[DE93-015402] p 1184 N94-16886
A search for evidence of nonlinear elasticity in the earth
[DE93-015279] p 1102 N94-17252
HARTMANN NUMBER
Clusterization of quantum states in the Hartmann model
[DE93-626624] p 1220 N94-17315
HATCHES
Crew escape certification test
[NASA-TM-109530] p 1136 N94-15392
HAZARDS
Emergency preparedness and planning p 1124 N94-16613
Education and training of professional industrial hygienists for 2020 p 1125 N94-16618
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
HEAD (ANATOMY)
Reference frames in vision
[AD-A266174] p 1132 N94-16925
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263
HEAD MOVEMENT
Reference frames in vision
[AD-A266174] p 1132 N94-16925
HEAD-UP DISPLAYS
STS-26 STA training (Hauck)
[NASA-TM-109555] p 870 N94-15279
HEALTH
Living well in space: Monitoring environment
[NASA-TM-109537] p 1120 N94-15368
Living well in space: Clinical care challenge
[NASA-TM-109539] p 1120 N94-15370
Answering the space medicine challenge
[NASA-TM-109511] p 1120 N94-15457
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
Americans with Disabilities Act considerations for the practice of occupational medicine p 1124 N94-16611
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
The Goddard Space Flight Center ergonomics program p 1125 N94-16621
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623
Illness/injury pattern complex 40 (Titan) p 1125 N94-16625
Physical fitness and health education program at NASA Headquarters p 1126 N94-16631
Johnson Space Center health related fitness program p 1126 N94-16633
Kennedy Space Center exercise program p 1126 N94-16634
The Langley Fitness Center p 1126 N94-16635
Physical Exercise Program p 1127 N94-16636
Bloodborne Pathogens Program p 1127 N94-16644
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645
HEALTH PHYSICS
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
HEAO
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342
The 1978 highlights
[NASA-TM-109625] p 1302 N94-15411
HEAO 1
The 1977 highlights
[NASA-TM-109626] p 1302 N94-15412
HEARING
Hearing Conservation Medical Program p 1127 N94-16639
Studies of aural acoustic emmissions with the use of an original apparatus and investigative methodology
[IFTR-20/1992] p 1177 N94-16650
HEART DISEASES
Laser artery repair
[NASA-TM-109604] p 1120 N94-15312

HEART RATE
Heart rate response to parabolic flight manoeuvres p 981 N94-16098
HEAT ENGINES
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
HEAT EXCHANGERS
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Optimization of two-stage hot water exchange points p 1029 N94-17440
HEAT FLUX
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
Imaging radar studies of polar ice p 991 N94-15899
Dual active surface, miniature, plug-type heat flux gauge
[NASA-CASE-LEW-15643-1] p 1033 N94-15928
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060
Implementation of an anisotropic turbulence model in the COMMIX-1C/ATM computer code
[DE93-015541] p 1023 N94-16444
An analysis of the radiation field beneath a bank of tubular quartz lamps
[NASA-CR-191551] p 1024 N94-16542
High heat flux engineering in solar energy applications
[DE93-016500] p 1093 N94-16954
Validation and analysis of microwave-derived rainfall over the tropics
[AD-A267785] p 1108 N94-17303
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610
Boundary layer structure over areas of heterogeneous heat fluxes
[DE93-010657] p 1110 N94-17673
HEAT MEASUREMENT
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
Description of cooling water calorimetry and wall thermometry diagnostic at tokamak ASDEX-Upgrade
[IPP-5/46] p 1200 N94-14966
Dual active surface, miniature, plug-type heat flux gauge
[NASA-CASE-LEW-15643-1] p 1033 N94-15928
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100
HEAT OF FORMATION
Coefficients for calculating thermodynamic and transport properties of individual species
[NASA-TM-4513] p 1220 N94-17624
HEAT PIPES
Heat storage module p 946 N94-15172
SPDE/SPRE final summary report
[NASA-CR-187086] p 924 N94-15482
HEAT PUMPS
Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers
[DE93-015215] p 1024 N94-16808
HEAT RESISTANT ALLOYS
A sulfur segregation study of PWA 1480, NiCrAl, and NiAl alloys
[NASA-TM-106289] p 956 N94-15992
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
HEAT SINKS
Translating wedge heat sink
[AD-D015814] p 1011 N94-16488
HEAT SOURCES
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Variational principles of heat exchange and their applications in construction physics, part 2
[IFTR-19/1991] p 1061 N94-17069
HEAT STORAGE
Heat storage module p 946 N94-15172
Space Station thermal storage/refrigeration system research and development
[NASA-CR-193841] p 879 N94-15191
HEAT TOLERANCE
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
Heat shock protein induction in human cells by CO2 laser irradiation
[AD-A266430] p 1117 N94-16545
HEAT TRANSFER
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
Pool boiling: Single bubble experiment p 944 N94-15160
Density and temperature relaxation near the critical point of carbon dioxide under reduced gravity p 944 N94-15164
Hypersonic shock wave boundary layer interactions over simplified deflected control surface configurations p 1018 N94-15203
Incorporation of boundary layer heating predictive methodology into NSWCDD aeroprediction code
[AD-A267000] p 1020 N94-15632
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock isentropic light piston facility
[RAE-TM-AERO/PROP-19] p 856 N94-15696
Determination of GTA welding efficiencies
[AD-A267163] p 1046 N94-15738
Effects of rotation on coolant passage heat transfer. Volume 2: Coolant passages with trips normal and skewed to the flow
[NASA-CR-4396-VOL-2] p 1023 N94-15991
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077
Investigation of two-phase flow and boiling heat transfer during quenching of a tube under microgravity p 979 N94-16087
Translating wedge heat sink
[AD-D015814] p 1011 N94-16488
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers
[DE93-015215] p 1024 N94-16808
Numerical study of compressible boundary-level transition between two concentric cylinders
[NASA-CR-194622] p 1025 N94-16842
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Variational principles of heat exchange and their applications in construction physics, part 2
[IFTR-19/1991] p 1061 N94-17069
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
Gravity dependent condensation pressure drop and heat transfer in ammonia two-phase heat transport systems
[NLR-TP-92121-U] p 1031 N94-17615
Some single-piston closed-cycle machines and Peter Tailer's thermal lag engine
[DE93-015983] p 1049 N94-17675
HEAT TRANSMISSION
Tidal gravity anomalies and tectonics p 1101 N94-15814
A decade's overview of Io's volcanic activity p 1245 N94-16386
The effects of orbital and climatic variations on Martian surface heat flow p 1290 N94-16402
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610
HEAT TREATMENT
NEXTEL(trademark)/SiC composites using forced chemical vapor infiltration
[DE93-013532] p 934 N94-16008
High-performance nonlinear optical material developed in Japan
[AD-A266194] p 1191 N94-16126
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
Wear resistant titanium material development
[AD-A266474] p 959 N94-16780
Fiber strength utilization in carbon/carbon composites
[AD-A267713] p 940 N94-17271
HEATERS
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
HEATING
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335
Processing of complex sintered reaction bonded silicon nitride parts by microwave heating
[DE93-015811] p 969 N94-16877
Oxygen diffusion in YBa2Cu3O(6+delta) ceramics on heating
[DE93-629161] p 974 N94-17633
HEATING EQUIPMENT
Hollow cathode heater development for the Space Station plasma contactor
[NASA-CR-191131] p 926 N94-16880
HEAVING
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676
HEAVY IONS
Shielding from space radiations
[NASA-CR-194578] p 1180 N94-15715
Astronomy and astrophysics p 1239 N94-15970
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Multispectral observations of the Jovian aurora
[NASA-CR-193628] p 1297 N94-16884
Heavy ion physics research at Creighton University
[DE93-016809] p 1185 N94-16957
Shielding from space radiations
[NASA-CR-194664] p 1301 N94-17255
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670
HEAVY LIFT LAUNCH VEHICLES
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
HEAVY WATER
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951
HEIGHT
The distribution of large volcanoes on Venus as a function of height and altitude p 1271 N94-16303
HEISENBERG THEORY
Quantum Heisenberg groups and Sklyanin algebras
[DE93-628590] p 1175 N94-17643
HELICOPTER CONTROL
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793
HELICOPTER DESIGN
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
Mechanical Systems Technology Branch research summary, 1985 - 1992
[NASA-TM-106329] p 1049 N94-17583
HELICOPTER PERFORMANCE
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793
Noise measurement flight test of five light helicopters
[AD-A268566] p 1179 N94-17599
HELICOPTERS
On the use of the noncentral chi-square density function for the distribution of helicopter spectral estimates
[NASA-CR-191546] p 1176 N94-15487
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
HELIOSPHERE
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821
Strategy for a small satellite program and a proposal for a first mission p 874 N94-17143
HELIOSTATS
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
HELIUM
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
Observation of nonsequential ionization of helium and its impact on intensity monitoring
[DE93-017174] p 949 N94-16904
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316
HELIUM ISOTOPES
Helium-3 inventory of lunar samples: A potential future energy resource for mankind? p 1295 N94-16428
Solar noble gases revealed by closed system stepped etching of a metal separate from Fayetteville p 954 N94-16432

The formation process of the He I lambda 10830 line in cool giant stars
[NASA-CR-194648] p 1240 N94-17094
Calculations of cosmic-ray helium transport in shielding materials
[NASA-TP-3354] p 1301 N94-17666

HELIUM-NEON LASERS
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264
Three short articles from Japanese laser journal
[AD-A268249] p 1042 N94-17415

HELMET MOUNTED DISPLAYS
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926

HEMATITE
Terrestrial impact melts as analogues for the hematization of Martian surface materials
p 1104 N94-16424

HEMODYNAMIC RESPONSES
A review of the efficacy of 7.5 percent NaCl/6 percent Dextran-70 (HSD) in experimental animals and humans
[AD-A266633] p 1122 N94-15740

HEMODYNAMICS
Increased vascular resistance with hemoglobin-based oxygen carriers
[AD-A266454] p 1123 N94-16565

HEMOGLOBIN
Evaluation of hemoglobin-oxygen equilibrium binding by rapid-scanning spectrophotometry and singular-value decomposition
[AD-A266453] p 1123 N94-16564
Increased vascular resistance with hemoglobin-based oxygen carriers
[AD-A266454] p 1123 N94-16565
Hemoglobin
[AD-A266455] p 1123 N94-16566
Release of iron from hemoglobin
[AD-A266503] p 1128 N94-16784
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785
Neurotoxicity of hemoglobin in cortical cell culture
[AD-A266506] p 1128 N94-16786

HEMORRHAGES
A review of the efficacy of 7.5 percent NaCl/6 percent Dextran-70 (HSD) in experimental animals and humans
[AD-A266633] p 1122 N94-15740
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Transcapillary exchange
[AD-A266427] p 1123 N94-16544
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Exchange of fluid and solutes between vascular, interstitial, and tissue cell compartments
[AD-A266426] p 1123 N94-16558

HEMOSTATICS
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A266958] p 1120 N94-15180

HEPATITIS
Bloodborne Pathogens Program p 1127 N94-16644
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645

HERMITIAN POLYNOMIAL
Quantum phase fluctuations in the Jaynes-Cummings model: Effects of cavity damping
[DE93-627984] p 1186 N94-17612

HETEROCYCLIC COMPOUNDS
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520

HETERODYNING
Heterodyne efficiency for a coherent laser radar with diffuse or aerosol targets
[NASA-CR-194563] p 1038 N94-15477

HETEROGENEITY
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030

HETEROJUNCTION DEVICES
Large signal characterization and modeling of heterojunction bipolar transistors
[AD-A266184] p 1012 N94-16935

HETEROJUNCTIONS
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Large signal characterization and modeling of heterojunction bipolar transistors
[AD-A266184] p 1012 N94-16935
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013

HEURISTIC METHODS
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
HSTS: Integrating planning and scheduling
[AD-A266991] p 1222 N94-15213
Using multiple adaptively-weighted strategies for the resolution of demonstratives
[AD-A266463] p 1150 N94-16585
Analysis of an electromagnetic field in the vicinity of a caustic by asymptotic methods
[IFTR-12/1991] p 998 N94-16653

HEWLETT-PACKARD COMPUTERS
HP upgrade operational streamlining
p 918 N94-15596

HEXADIENE
Synthetic and mechanistic investigation of olefin polymerization catalyzed by early transition metal compounds
[DE93-018301] p 970 N94-16963

HF LASERS
Pulsed hydrogen fluoride overtone chemical laser studies
[AD-A267597] p 1041 N94-17193

HIERARCHIES
Models for reactivity
[AD-A266419] p 1149 N94-16554

HIGH ALTITUDE
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft
[AD-A266404] p 1101 N94-16551
Ground wave emergency network final operational capability: Environmental assessment for southern Nevada relay node site number RN 8W918NV
[AD-A267647] p 1002 N94-17205
Ground wave emergency network final operational capability: Environmental assessment for northwestern Nebraska relay node, site number RN 8C930NE
[AD-A267629] p 1003 N94-17212
Ground wave emergency network. Final operational capability. Environmental assessment for southeastern Idaho relay node, site no. RN8W927ID
[AD-A267796] p 1003 N94-17304

HIGH ASPECT RATIO
ITER-HARD Toroidal Field coil structural analysis
[DE93-014834] p 1201 N94-15981

HIGH DEFINITION TELEVISION
Video applications development platform
[AD-A266966] p 1163 N94-14953

HIGH ENERGY ELECTRONS
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

HIGH ENERGY FUELS
Synthesis of potential high-energy fuels
[AD-A267508] p 975 N94-17073

HIGH ENERGY INTERACTIONS
The TAUVEX experiment p 905 N94-15064
Study of the rare decays K(sub L)(sup 0) yields (mu)e, K(sub L)(sup 0) yields ee, and K(sub L)(sup 0) yields (mu)(mu) at KEK
[DE93-753247] p 1180 N94-15135
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Heavy ion physics research at Creighton University
[DE93-016809] p 1185 N94-16957

HIGH FLUX ISOTOPE REACTORS
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168

HIGH FREQUENCIES
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035
Effect of powerful oblique HF waves on ionospheric D-layer absorption
[AD-A268443] p 1102 N94-17499

HIGH LEVEL LANGUAGES
Integration ToolKit and Methods (ITKM) manufacturing methods and prototype toolkit. A combined modeling method using IDEFO, IDEF1x and XSpec
[AD-A266176] p 984 N94-16981

HIGH PASS FILTERS
Designing clutter rejection filters with complex coefficients for airborne pulsed Doppler weather radar
[NASA-CR-4550] p 862 N94-15444

HIGH POWER LASERS
Matera Laser Ranging Observatory (MLRO): An overview p 877 N94-15601
A new method of designing multilayer optical thin film coatings
[DE93-624683] p 974 N94-17611
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630

HIGH PRESSURE
Liquidus equilibria of lunar analogs at high pressure
p 1283 N94-16364
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
High pressure pump for electro-rheological fluids
[AD-D015888] p 1048 N94-16915
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
Human central nervous system oxygen toxicity data from 1945 to 1986
[AD-A268225] p 1130 N94-17556

HIGH RESOLUTION
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
High resolution SAR applications and instrument design p 993 N94-15913
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368
Gamma ray spectrometer for Lunar Scout 2
p 1037 N94-16426
JPL activities on development of acousto-optic tunable filter imaging spectrometer p 1037 N94-16696
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
Moving target indicator using higher order statistics
[AD-D015890] p 1000 N94-16917
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503

HIGH REYNOLDS NUMBER
Tollmien-Schlichting/vortex interactions in compressible boundary layer flows
[NASA-CR-191515] p 1017 N94-15183
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099

HIGH SPEED
VLSI for high-speed digital signal processing
[AD-A267709] p 1007 N94-14936
Performance comparison of high speed microchannel plate photomultiplier tubes p 922 N94-15624

HIGH SPEED PHOTOGRAPHY
Study of high speed interference photography with two-dimensional acousto-optical lattice deflection
[AD-A267823] p 1035 N94-17402

HIGH TEMPERATURE
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
High temperature advanced structural composites. Volume 3: Mechanics
[AD-A267024] p 933 N94-15626
Structures from low dielectric polyimides
[NASA-CASE-LAR-14988-1] p 965 N94-15880
Payloads for the processing of high temperature materials p 979 N94-16083
Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883

Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Stress corrosion cracking of 316 SS and Incoloy-800 in high temperature aqueous containing sulfate and chloride
[DE93-623325] p 952 N94-17302
High temperature deformation behavior of YBa2Cu3O(6+x) superconducting ceramic materials
[AD-A268164] p 973 N94-17430
High temperature hydraulic seals
[AD-A268257] p 1048 N94-17433

HIGH TEMPERATURE ENVIRONMENTS
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655

HIGH TEMPERATURE GASES
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861
Plasma arc welding repair of space flight hardware
[TABES PAPER 93-603] p 1049 N94-16139

HIGH TEMPERATURE LUBRICANTS
Physical and chemical properties of some new perfluoropolyalkylether lubricants prepared by direct fluorination
[NASA-TM-106299] p 967 N94-16543

HIGH TEMPERATURE PLASMAS
High frequency Raman current drive
p 1201 N94-15208

HIGH TEMPERATURE SUPERCONDUCTORS
Electronic and atomic structure of semiconductors and of high-temperature superconductors
[AD-A266805] p 1205 N94-14913
Partial melting experiment of Y-Ba-Cu oxide
p 945 N94-15168
High temperature superconductivity
[AD-A267006] p 1008 N94-15635
Molten salt electrodeposition of high temperature superconductors
[AD-A266620] p 1009 N94-15726
Nonaqueous slip casting of high temperature ceramic superconductors using an investment casting technique
[NASA-CASE-LAR-14918-1] p 983 N94-15881
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
Engineering design of a high-temperature superconductor current lead
[DE93-015156] p 1013 N94-17226

HIGH TEMPERATURE TESTS
Systematic study of effects of load misalignment in uniaxial low cycle fatigue testing at high temperatures
[NPL-DMM(A)-27] p 1057 N94-15015

HIGH VACUUM
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode
[AD-A267214] p 1204 N94-16987

HIGH VOLTAGES
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode
[AD-A267214] p 1204 N94-16987

HIGHLANDS
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia
p 1103 N94-16214
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components
p 1267 N94-16280
Preliminary analysis of Dione Regio, Venus: The final Magellan regional imaging gap p 1271 N94-16302

HIGHLY MANEUVERABLE AIRCRAFT
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342

HIGHWAYS
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676

HIPPOCAMPUS
Cortical adaptive filtering in bioacoustic signal classification
[AD-A266229] p 1177 N94-16939

HISTORIES
Symposium on the Future of Aeronautics in the Netherlands
[ETN-93-93780] p 853 N94-15120
Fifty years of the Netherlands Association of Aeronautical Engineers p 853 N94-15121
Aviation and the KLM: Past and future
p 853 N94-15126
NACA-NASA: 75 years of flight
[NASA-TM-109449] p 1302 N94-15322
Aircraft accident investigation at ARL: The first 50 years
[AD-A267086] p 862 N94-15542
Annual historical report, calendar year 1992
[AD-A267050] p 1121 N94-15663
On the 17-keV neutrino
[DE93-012638] p 1181 N94-15974
History of the manned space flight program
[NASA-TM-109529] p 1303 N94-16069
The definition of a scientific policy: ESRO's satellite programme in 1969-1973
[ESA-HSR-6] p 1303 N94-16500
History of on-orbit satellite fragmentations
[NASA-CR-191644] p 887 N94-16502
Choosing ESRO's first scientific satellites
[ESA-HSR-3] p 887 N94-16523
The early development of the Telecommunications Satellite Programme in ESRO (1965-1971)
[ESA-HSR-9] p 887 N94-16525
Europe in space: Edoardo Amaldi and the inception of ESRO
[ESA-HSR-5] p 1303 N94-16526
Europe into space: The Auger years (1959-1967)
[ESA-HSR-8] p 1303 N94-16592
Maximizing participation of women in collegiate aviation education
[NIAR-93-14] p 1222 N94-17261

HOLE BURNING
Search for far infrared radiation from optically pumped defect modes
[AD-A266744] p 1206 N94-15822

HOLE GEOMETRY (MECHANICS)
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836

HOLE MOBILITY
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848

HOLES (ELECTRON DEFICIENCIES)
A study of high field transport in wide band gap electronic materials using a picosecond transient charge technique
[AD-A267098] p 1008 N94-15636
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810

HOLLOW CATHODES
Hollow cathode heater development for the Space Station plasma contactor
[NASA-CR-191131] p 926 N94-16880
Three short articles from Japanese laser journal
[AD-A268249] p 1042 N94-17415

HOLMIUM
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530

HOLOGRAPHIC INTERFEROMETRY
Optical systems for the visualization of fluid and solid transparent media under microgravity conditions
p 978 N94-16081

HOLOGRAPHY
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Application of holographic optical elements to magneto-optic read/write heads p 1226 N94-14985
Determination of average refractive index of spin coated DCG films for HOE fabrication p 1036 N94-14992
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Optical computing
[AD-A267881] p 1141 N94-17015
Display of dynamic, volume graphic images by holographic voxel projection: Initial investigation
[AD-A267622] p 1035 N94-17197
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1194 N94-17321
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331
Manufacturing the key to binary optics
p 1194 N94-17332
Subwavelength structured surfaces and their applications p 1194 N94-17337
Fabrication techniques for very fast diffractive lenses
p 1196 N94-17345
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Applications of advanced diffractive optical elements
p 1197 N94-17356
SURPHEX (tm): New dry photopolymers for replication of surface relief diffractive optics p 1198 N94-17358
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
3-D optical memory disk
[AD-A267908] p 1141 N94-17380

HOMOGENEITY
Multinuclear NMR study of aluminosilicate sol-gel synthesis reasons for the homogeneous gelation using the prehydrolysis method
[AD-A266877] p 962 N94-14921
Homogeneously traceable results in claw-free graphs
[AD-A266196] p 1169 N94-16127

HOMOGENEOUS TURBULENCE
A numerical investigation of energy transfer and subgrid-scale eddy-viscosity in homogeneous, isotropic, and shear turbulence
[AD-A267265] p 1029 N94-17363

HONEYCOMB STRUCTURES
Improved composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 934 N94-15926
Slidesurfaces with adaptive new definitions (SAND) for transient analysis
[DE93-014909] p 1059 N94-15983

HOOKS
Attachment device
[NASA-CASE-MSC-21885-1] p 1047 N94-15925

HOT CORROSION
Vanadium corrosion studies
[AD-A266489] p 959 N94-16781
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889

HOT ELECTRONS
Hot electron mixers, the potential competition
p 903 N94-15055

HOT ISOSTATIC PRESSING
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767

HOT PRESSING
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite
[NASA-CASE-LEW-15263-2] p 934 N94-15929
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767

HOUSTON (TX)
Johnson Space Center and downtown Houston, Texas aerials
[NASA-TM-109522] p 1032 N94-15472

HUBBLE SPACE TELESCOPE
The STIS MAMA status: Current detector performance
p 905 N94-15069
HSTS: Integrating planning and scheduling
[AD-A266991] p 1222 N94-15213
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342
STS-31 Post-Flight Conference
[NASA-TM-109477] p 881 N94-15384
NASA's Hubble Space Telescope: The challenge and complexity of operations
[NASA-TM-109577] p 1236 N94-15422
STS-31 mission highlights resource tape
[NASA-TM-109479] p 881 N94-15440
STS-31 Hubble space telescope deploy: Training at MDF with Hawley
[NASA-TM-109481] p 876 N94-15442
STS-31 HST deploy sim in SMS and MOCR
[NASA-TM-109482] p 876 N94-15449
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508

HUGONIOT EQUATION OF STATE
The shock Hugoniot of 316 SS and sound velocity measurements
[DE93-016525] p 1178 N94-16955

HUMAN BEHAVIOR
Astro smile
[NASA-TM-109506] p 879 N94-15225

HUMAN BEINGS
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
Screening for prostate cancer p 1126 N94-16630

HUMAN BODY
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621

HUMAN FACTORS ENGINEERING
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Human factor studies
[NASA-TM-109665] p 875 N94-15236
Investigation of the effects of extravehicular activity (EVA) gloves on performance
[NASA-TP-3401] p 1137 N94-15717
Ergonomics in the office environment
p 1124 N94-16612
The Goddard Space Flight Center ergonomics program p 1125 N94-16621
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
[AD-A266493] p 1138 N94-16793
Acquisition and production of skilled behavior in dynamic decision-making tasks
[NASA-CR-194658] p 1133 N94-17296
Human Transportation System (HTS) study, volume 2
[NASA-TM-104779-VOL-2] p 882 N94-17320
Computer-human interface issues: Theory and application
[AD-A268013] p 1138 N94-17475
Visual display principles for C3I system tasks
[AD-A267969] p 1005 N94-17498
Aircrew/groundcrew life support systems research. Volume 1: CLIN 0001 research requirements
[AD-A268229] p 1139 N94-17563
Force-endurance capabilities of extravehicular activity (EVA) gloves at different pressure levels
[NASA-TP-3420] p 1139 N94-17653

HUMAN IMMUNODEFICIENCY VIRUS
Tuberculosis: A case for increased screening
p 1126 N94-16627
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645

HUMAN PERFORMANCE
Human factor studies
[NASA-TM-109665] p 875 N94-15236
Complex information coordination performance: Differential changes in working memory contributions following training
[AD-A267007] p 1132 N94-15762
Scuba-diving, anxiety and task performance
p 1132 N94-15938
Infrared spot tracker
[AD-D015778] p 1191 N94-16547
States of awareness 1: Subliminal perception relationship to situational awareness
[AD-A267249] p 1132 N94-16942
Acquisition and production of skilled behavior in dynamic decision-making tasks
[NASA-CR-194658] p 1133 N94-17296
Processes involved in the integration of pictures and discourse
[AD-A268150] p 1134 N94-17468

HUMAN TOLERANCES
Cumulative effect of repeated brief cerebral ischemia
[AD-A267155] p 1121 N94-15736

HUMIDITY
A comparison of cloud attenuation models using measured cloud data p 996 N94-16044
Empirical relationships among atmospheric variables from rawinsonde and field data as surrogates for AVIRIS measurements: Estimation of regional land surface evapotranspiration p 1074 N94-16712

HURRICANES
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465

HYBRID COMPOSITES
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836
Low and high velocity impact response of thick hybrid composites p 936 N94-16837

HYBRID COMPUTERS
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105

HYDRATION
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785

HYDRAULIC CONTROL
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392

HYDRAULIC EQUIPMENT
Hydraulic pump with integral electric motor
[AD-D015782] p 1011 N94-16549
A measurement station for study of Earth moving tools and ground cutting processes
[IFTR-10/1991] p 985 N94-17068
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392
The IOSDL SeaSoar hydraulic unit
[IOS-300-1992] p 1114 N94-17516

HYDRAULIC FLUIDS
High temperature hydraulic seals
[AD-A268257] p 1048 N94-17433

HYDRIDES
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567

HYDROCARBON FUELS
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516
Synthesis of potential high-energy fuels
[AD-A267508] p 975 N94-17073

HYDROCARBONS
Extraction and isotopic analysis of medium molecular weight hydrocarbons from Murchison using supercritical carbon dioxide p 1241 N94-16184

HYDROCYANIC ACID
The interaction of HCN(DCN) with Si(111)-7x7 studied with HREELS, UPS, and XPS
[AD-A266237] p 1182 N94-16111

HYDRODYNAMIC EQUATIONS
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903

HYDRODYNAMICS
Riblets: New speed technology
[NASA-TM-109641] p 1018 N94-15252
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903
Phillips Laboratory global spectral numerical weather prediction model
[AD-A267293] p 1107 N94-17244

HYDROGEN
Electronic and atomic structure of semiconductors and of high-temperature superconductors
[AD-A266805] p 1205 N94-14913
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
Boundary conditions for the paleoenvironment: Chemical and physical processes in the pre-solar nebula
[NASA-CR-194418] p 1298 N94-15421
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
Water in Earth's mantle: Hydrogen analysis of mantle olivine, pyroxenes and garnet using the SIMS
p 1104 N94-16336
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material
p 1244 N94-16377
Clusterization of quantum states in the Hartmann model
[DE93-626624] p 1220 N94-17315
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316

HYDROGEN ATOMS
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145

HYDROGEN BONDS
Electronic spectroscopy of the gas-phase OH-Kr van der Waals complex
[AD-A266891] p 942 N94-14946
Self-diffusion coefficients of sol-gel intermediates
[AD-A266957] p 963 N94-15179
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760

HYDROGEN CHLORIDES
Second flight of the Spacelab grille spectrometer during the Atlas-1 mission
[AERONAUTICA-ACTA-A-367-199] p 923 N94-17592

HYDROGEN EMBRITTLEMENT
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165

HYDROGEN IONS
Atomic processes in hydrogen and deuterium negative ion discharges
[DE93-013432] p 1183 N94-16817
Six dimensional tracking simulator for H(-) injection in AGS Booster
[DE93-015396] p 1184 N94-16885

HYDROGEN ISOTOPES
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
A hydrogen isotope study of CO3 type carbonaceous chondrites; comparison with type 3 ordinary chondrites
p 1246 N94-16425

HYDROGEN METABOLISM
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916

HYDROGEN OXYGEN ENGINES
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145

HYDROGEN PLASMA
Modification of fluoropolymer surfaces with electronically conductive polymers
[AD-A266294] p 967 N94-16475

HYDROGEN PRODUCTION
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452

HYDROGEN SULFIDE
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449

HYDROGEN-BASED ENERGY
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567

HYDROGENATION
Boundary conditions for the paleoenvironment: Chemical and physical processes in the pre-solar nebula
[NASA-CR-194418] p 1298 N94-15421
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377

HYDROGEOLOGY
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography
p 1283 N94-16369

HYDROLOGICAL CYCLE
Recent scientific advances in the use of radar in scientific hydrology p 991 N94-15895
Some thoughts on future rain mapping missions (TRMM follow-on) p 992 N94-15906
Global Energy and Water Cycle Experiment (GEWEX) and the Continental-scale International Project (GCIP)
p 994 N94-15918
Research into the influence of spatial variability and scale on the parameterization of hydrological processes
[NASA-CR-194610] p 1082 N94-16026
Effects of spatial variability and scale on areal -average evapotranspiration p 1084 N94-16033

HYDROLOGY
Recent scientific advances in the use of radar in scientific hydrology p 991 N94-15895
Martian carbon dioxide: Clues from isotopes in SNC meteorites p 1270 N94-16295

HYDROLOGY MODELS
Global Energy and Water Cycle Experiment (GEWEX) and the Continental-scale International Project (GCIP)
p 994 N94-15918
Research into the influence of spatial variability and scale on the parameterization of hydrological processes
[NASA-CR-194610] p 1082 N94-16026
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034
A snow wetness retrieval algorithm for SAR
p 1075 N94-16732
Strategies for detection of floodplain inundation with multi-frequency polarimetric SAR p 1076 N94-16739

HYDROLYSIS
Multinuclear NMR study of aluminosilicate sol-gel synthesis reasons for the homogeneous gelation using the prehydrolysis method
[AD-A266877] p 962 N94-14921
Efficacy of flocculating and other emergency water purification tablets
[AD-A266695] p 1148 N94-15840
An advanced bioprocessing concept for the conversion of wastepaper to ethanol
[DE93-015209] p 975 N94-16807
HYDROPONICS
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations
[NASA-CR-194654] p 1118 N94-17279
HYDROSTATIC PRESSURE
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Exchange of fluid and solutes between vascular, interstitial, and tissue cell compartments
[AD-A266426] p 1123 N94-16558
HYDROTHERMAL SYSTEMS
Terrestrial impact melts as analogues for the hematization of Martian surface materials
p 1104 N94-16424
HYDROXIDES
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy
[DE93-015683] p 940 N94-17235
HYGIENE
Education and training of professional industrial hygienists for 2020 p 1125 N94-16618
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623
Space Shuttle solid rocket motor exposure monitoring
p 976 N94-16624
HYGROSCOPICITY
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455
HYPERCUBE MULTIPROCESSORS
Parallel spatial direct numerical simulations on the Intel iPSC/860 hypercube
[NASA-CR-191513] p 1144 N94-15483
Multiphase complete exchange: A theoretical analysis
[NASA-CR-191531] p 1145 N94-15489
Applications and development of communication models for the touchstone GAMMA and DELTA prototypes
[NASA-CR-193617] p 999 N94-16867
Construction of d-dimensional hyperoctrees on a hypercube multiprocessor
[INRIA-RR-1752] p 1162 N94-17539
HYPERNUCLEI
Relativistic mean-field calculations of lambda and sigma hypernuclei
[DE93-015269] p 1181 N94-16013
HYPERONS
Relativistic mean-field calculations of lambda and sigma hypernuclei
[DE93-015269] p 1181 N94-16013
HYPEROXIA
Human central nervous system oxygen toxicity data from 1945 to 1986
[AD-A268225] p 1130 N94-17556
HYPERSONIC AIRCRAFT
Research in robust control for hypersonic aircraft
[NASA-CR-194106] p 870 N94-15416
HYPERSONIC FLIGHT
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
Flight testing of airbreathing hypersonic vehicles
[NASA-TM-4524] p 886 N94-15753
Trajectory optimization for the National Aerospace Plane
[NASA-CR-194618] p 867 N94-16498
An experimental study of fluctuating wall pressures in a highly swept, sharp fin-induced, Mach 5 shock wave/turbulent boundary layer interaction
[AD-A268394] p 861 N94-17461
HYPERSONIC FLOW
Special course on Shock-Wave/Boundary-Layer Interactions in Supersonic and Hypersonic Flows
[AGARD-R-792] p 1017 N94-15196
Swept shock wave/laminar boundary layer interactions, experimental, and numerical results
p 1017 N94-15198
Unsteady phenomena in shock wave/boundary layer interaction p 1017 N94-15200
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021
Single block three-dimensional volume grids about complex aerodynamic vehicles
[NASA-TM-108986] p 1030 N94-17476
HYPERSONIC REENTRY
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
HYPERSONIC SHOCK
Hypersonic shock wave boundary layer interactions over simplified deflected control surface configurations
p 1018 N94-15203
HYPERSONIC VEHICLES
Flight testing of airbreathing hypersonic vehicles
[NASA-TM-4524] p 886 N94-15753
Aerothermoelastic analysis of a NASP demonstrator model
[NASA-TM-109007] p 867 N94-17055
HYPERSONIC WAKES
DSMC simulations of Mach 20 nitrogen flows about a 70 degree blunted cone and its wake
[NASA-TM-107762] p 1018 N94-15291
HYPERSONIC WIND TUNNELS
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655
HYPERSONICS
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
HYPERTHERMIA
Experimental evaluation of an adaptive focusing algorithm for a microwave planar phased-array hyperthermia system at UCSF
[AD-A267004] p 1121 N94-15634
HYPERVELOCITY IMPACT
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
HYPERVELOCITY PROJECTILES
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
Simulation of collisional fragmentation with explosives
p 1063 N94-16254
HYPOBARIC ATMOSPHERES
Metabolic monitoring of hypobaric subjects
[AD-A268221] p 1130 N94-17554
HYPOTENSION
A review of the efficacy of 7.5 percent NaCl/6 percent Dextran-70 (HSD) in experimental animals and humans
[AD-A266633] p 1122 N94-15740
HYPOTHALAMUS
Diffusible driving and coupling signals of the biological clock
[AD-A267046] p 1121 N94-15660
Melatonin, the pineal gland, and circadian rhythms
[AD-A268200] p 1129 N94-17478
HYPOTHESES
The three ages of Venus: A hypothesis based on the cratering record p 1261 N94-16239
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
HYPOXIA
Aircrew/groundcrew life support systems research. Volume 1: CLIN 0001 research requirements
[AD-A268229] p 1139 N94-17563
HYSTERESIS
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966

I

ICE
Bibliography on snow and ice friction
[AD-A266868] p 1045 N94-14920
Rheology of water and ammonia-water ices
p 953 N94-16188
Equatorial ground ice on Mars: Steady-state stability
p 1290 N94-16403
Catalytic crystallization of ices by small silicate smokes at temperatures less than 20K p 1219 N94-16420
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936
Atmospheric ionization by solar particles detected by nitrate measurement in antarctic snow
[AD-A267583] p 1299 N94-17208
ICE ENVIRONMENTS
Arctic cyclones and Marginal Ice Zone (MIZ) variability
[AD-A268610] p 1108 N94-17465
ICE FORMATION
Arctic cyclones and Marginal Ice Zone (MIZ) variability
[AD-A268610] p 1108 N94-17465
An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595
ICE MAPPING
Sea ice motions in the central arctic ice central arctic pack ice as inferred from AVHRR imagery
[NASA-CR-194572] p 1112 N94-15701
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439
ICELAND
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices
p 1248 N94-16178
ICY SATELLITES
Phase equilibria of the magnesium sulfate-water system to 4 kbars p 953 N94-16247
The rheology and composition of cryovolcanic flows on icy satellites p 1243 N94-16294
IDEAL FLUIDS
A priori inequalities for an ideal-incompressible liquid in an electromagnetic field
[IFTR-9/1992] p 998 N94-16652
IDENTIFYING
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267
IGNEOUS ROCKS
Explosive mafic volcanism on Earth and Mars
p 1253 N94-16204
Crustal structure and igneous processes in a chondritic Io p 1243 N94-16292
Liquidus equilibria of lunar analogs at high pressure
p 1283 N94-16364
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605
ILLUMINATING
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820
ILMENITE
First oxygen from lunar basalt p 1249 N94-16182
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242
Solar noble gases revealed by closed system stepped etching of a metal separate from Fayetteville
p 954 N94-16432
IMAGE ANALYSIS
Optical residue processing module
[AD-A267721] p 1188 N94-14940
RACCOON: A Real-Time Autonomous Car Chaser Operating Optimally at Night
[AD-A266963] p 863 N94-14971
Evaluation of the TOPSAR performance by using passive and active calibrators p 1078 N94-16750
Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542
A high-speed object recognition chip based on a biologically-realistic hybrid temporal processing
[AD-A268270] p 1134 N94-17576
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654
IMAGE CLASSIFICATION
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
Supervised fully polarimetric classification of the Black Forest test site: From MAESTRO! to MAC Europe
p 1076 N94-16740
Application of modified VICAR/IBIS GIS to analysis of July 1991 Flevoland AIRSAR data p 1080 N94-16757
IMAGE CONTRAST
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
Method and apparatus to characterize ultrasonically reflective contrast agents
[NASA-CASE-LAR-14969-1] p 1129 N94-17085
IMAGE CORRELATORS
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791
IMAGE ENHANCEMENT
Image accuracy and representational enhancement through low-level, multi-sensor integration techniques
[DE93-014888] p 1167 N94-17287
IMAGE INTENSIFIERS
Thinned, backside illuminated, area CCD imager for electron detection p 901 N94-15036

The MIC photon counting detector
p 901 N94-15039
Development of an ultra violet auroral imager for the Freja project p 904 N94-15060
The Rutherford Appleton Laboratory photon counting detector p 910 N94-15096
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820
SYDONI: An intensified system for night observation
p 891 N94-17153

IMAGE PROCESSING
Video applications development platform
[AD-A266966] p 1163 N94-14953
Assessment of TDI operation of a frame transfer CCD for high resolution imaging from a fast spinning spacecraft p 910 N94-15097
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
Cooperativity and 3-D representation
[AD-A267180] p 1131 N94-15694
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791
An electronic imaging system for the Aeroballistic Research Facility
[AD-A267157] p 1033 N94-15826
A multilevel-multiresolution method for image processing. A Bayesian framework for reconstructing and representing shapes
[AD-A266772] p 1082 N94-15842
Primary studies of Chinese spaceborne SAR
p 993 N94-15916
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
A task adaptive parallel graphics renderer
[DE93-017123] p 1149 N94-16119
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units
p 1252 N94-16199
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
The Spectral Image Processing System (SIPS): Software for integrated analysis of AVIRIS data
p 1067 N94-16674
Comparison of JPL-AIRSAR and DLR E-SAR images from the MAC Europe 1991 campaign over testsite Oberpfaffenhofen: Frequency and polarization dependent backscatter variations from agricultural fields
p 1075 N94-16733
Application of modified VICAR/IBIS GIS to analysis of July 1991 Flevoland AIRSAR data p 1080 N94-16757
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926
Applications of the phi-transform
[AD-A266247] p 1170 N94-16940
Optical computing
[AD-A267881] p 1141 N94-17015
Neural basis of motion perception
[AD-A267267] p 1133 N94-17265
Image accuracy and representational enhancement through low-level, multi-sensor integration techniques
[DE93-014888] p 1167 N94-17287
Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542
Three dimensional visualization of GOES cloud data using OCTRESS
[AD-A268102] p 1109 N94-17572
A high-speed object recognition chip based on a biologically-realistic hybrid temporal processing
[AD-A268270] p 1134 N94-17576
Detecting small debris using a ground-based photon counting detector
[DE93-012623] p 898 N94-17669

IMAGE RECONSTRUCTION
Lossless compression of AVIRIS data: Comparison of methods and instrument constraints
p 1075 N94-16713

IMAGE RESOLUTION
Programmable Remapper project
[NASA-TM-109508] p 1164 N94-15515
Measurements of the radar cross section and Inverse Synthetic Aperture Radar (ISAR) images of a Piper Navajo at 9.5 GHz and 49 GHz
[AD-A267570] p 1002 N94-17110

IMAGERY
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687
SYDONI: An intensified system for night observation
p 891 N94-17153

IMAGES
NASA images 12 --- Voyager encounters
[NASA-TM-109417] p 1247 N94-15511
NASA images 13
[NASA-TM-109418] p 1247 N94-15512
Display of dynamic, volume graphic images by holographic voxel projection: Initial investigation
[AD-A267622] p 1035 N94-17197

IMAGING RADAR
Fine scale measurements of microwave backscatter from the ocean surface
[AD-A264516] p 1111 N94-15134
Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
Almaz p 898 N94-15889
Spaceborne Imaging Radar-C instrument
p 990 N94-15890
Imaging radar studies of polar ice p 991 N94-15899
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
SIR-C/X-SAR free flyer concept p 898 N94-15903
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR)
p 1076 N94-16738
Sea bottom topography imaging with SAR
p 1077 N94-16745

IMAGING SPECTROMETERS
Advanced high performance CdHgTe multiplexed arrays p 903 N94-15051
CCD's on high resistivity bulk silicon for x ray spectroscopy on XMM p 907 N94-15080
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
In-flight calibration of the spectral and radiometric characteristics of AVIRIS in 1991 p 1037 N94-16667
Using AVIRIS images to measure temporal trends in abundance of photosynthetic and nonphotosynthetic canopy components p 1066 N94-16668
Unmixing AVIRIS data to provide a method for vegetation fraction subtraction p 1066 N94-16669
The Spectral Image Processing System (SIPS): Software for integrated analysis of AVIRIS data
p 1067 N94-16674
AVIRIS study of Death Valley evaporite deposits using least-squares band-fitting methods p 1067 N94-16676
A field measure of the shade fraction
p 1068 N94-16677
Volcanic thermal features observed by AVIRIS
p 1068 N94-16680
Retrieval of biophysical parameters with AVIRIS and ISM: The Landes Forest, south west France
p 1068 N94-16681
Ground-truthing AVIRIS mineral mapping at Cuprite, Nevada p 1069 N94-16682
AVIRIS calibration and application in coastal oceanic environments p 1069 N94-16685
Mapping vegetation types with the multiple spectral feature mapping algorithm in both emission and absorption p 1069 N94-16686
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
Using endmembers in AVIRIS images to estimate changes in vegetative biomass p 1070 N94-16689
The 1991 AVIRIS/POLDER experiment in Camargue, France p 1070 N94-16691
AVIRIS ground data processing system
p 1071 N94-16692
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694
Primary studies of trace quantities of green vegetation in Mono Lake area using 1990 AVIRIS data
p 1071 N94-16695
JPL activities on development of acousto-optic tunable filter imaging spectrometer p 1037 N94-16696
Measuring dry plant residues in grasslands: A case study using AVIRIS p 1072 N94-16697
Tracking photosynthetic efficiency with narrow-band spectroradiometry
[CIW-PUBL-1133] p 1072 N94-16698
Software for the derivation of scaled surface reflectances from AVIRIS data p 1072 N94-16700
Integrating remote sensing techniques at Cuprite, Nevada: AVIRIS, Thematic Mapper, and field spectroscopy p 1072 N94-16701
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods
p 1073 N94-16703
Expert system-based mineral mapping using AVIRIS
p 1073 N94-16704
AVIRIS data and neural networks applied to an urban ecosystem p 1073 N94-16705
Temporal variation in spectral detection thresholds of substrate and vegetation in AVIRIS images
p 1073 N94-16706
Discussion of band selection and methodologies for the estimation of precipitable water vapour from AVIRIS data p 1074 N94-16707
Abundance recovery error analysis using simulated AVIRIS data p 1074 N94-16708
A comparison of LOWTRAN-7 corrected Airborne Visible/Infrared Imaging Spectrometer (AVIRIS) data with ground spectral measurements p 1074 N94-16710
Simulation of AVHRR-K band ratios with AVIRIS
p 1075 N94-16714
Investigation of cloud properties and atmospheric stability with MODIS
[NASA-CR-193475] p 1107 N94-16717
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831

IMAGING TECHNIQUES
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Microchannel plate imaging detectors for the ultraviolet p 901 N94-15037
Requirements on CCD-detectors for ground-based auroral imaging p 909 N94-15093
Assessment of TDI operation of a frame transfer CCD for high resolution imaging from a fast spinning spacecraft p 910 N94-15097
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
An electronic imaging system for the Aeroballistic Research Facility
[AD-A267157] p 1033 N94-15826
Sensor modelling for the Cyclops focal plane detector array based technology demonstrator
[AD-A267172] p 1190 N94-15846
Spaceborne Imaging Radar-C instrument
p 990 N94-15890
Spaceborne radar for geoscientific applications in North China p 993 N94-15915
Plasma arc welding weld imaging
[NASA-CASE-MFS-28797-1] p 1047 N94-15949
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials
[DE93-015333] p 947 N94-16014
Earth imaging results from Galileo's second encounter
p 1252 N94-16201
Global Magellan-image map of Venus at full resolution
p 1274 N94-16319
Vertical structure models of the 1990 equatorial disturbance on Saturn p 1277 N94-16333
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368
From minerals to rocks: Toward modeling lithologies with remote sensing p 1086 N94-16437
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
Separation of cirrus cloud from clear surface from AVIRIS data using the 1.38 micron water vapor band
p 1072 N94-16699
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Multi-frame x ray imaging with a large area 40ps camera
[DE93-017179] p 1035 N94-16960
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
Method and apparatus to characterize ultrasonically reflective contrast agents
[NASA-CASE-LAR-14969-1] p 1129 N94-17085
Small imaging satellite for Earth observing system adjunct p 891 N94-17151

Applications of advanced diffractive optical elements
p 1197 N94-17356
Test methods for acceptance testing of telescopes
[AD-A268316] p 1237 N94-17568
Three dimensional visualization of GOES cloud data using OCTRESS
[AD-A268102] p 1109 N94-17572
X ray computed tomography for geometry acquisition
[AD-A268085] p 1157 N94-17590
Resist performance in soft x ray projection lithography
[DE93-016490] p 1036 N94-17647

IMIDES
Photodegradation of polyimides. V1: Effect of donor-acceptor groups on the photooxidative stability of polyimides and model compounds
[AD-A267319] p 970 N94-16947

IMP
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417

IMPACT DAMAGE
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
Collisional and dynamical history of Gaspra
p 1241 N94-16202
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness
p 1103 N94-16211
The physical mechanism of comet outbursts: An experiment p 1242 N94-16221
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
Simulation of collisional fragmentation with explosives
p 1063 N94-16254
A first-order model for impact crater degradation on Venus p 1265 N94-16268
National Transportation Safety Board annual review of aircraft accident data, US general aviation, calendar year 1989
[PB93-160687] p 863 N94-16464
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836
Low and high velocity impact response of thick hybrid composites p 936 N94-16837

IMPACT MELTS
A discontinuous melt sheet in the Manson impact structure p 1103 N94-16269
A Monazite-bearing clast in Apollo 17 melt breccia
p 1267 N94-16279
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components
p 1267 N94-16280
I-Xe structure of ILAFEGH 009 and shallowater: Evidence for early formation and rapid cooling of impact-derived enstatite meteorites
p 1243 N94-16305
Cat Mountain: A meteoritic sample of an impact-melted chondritic asteroid p 1244 N94-16328
Chromite-rich mafic silicate chondrules in ordinary chondrites: Formation by impact melting
p 1244 N94-16330
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
Terrestrial impact melts as analogues for the hematization of Martian surface materials
p 1104 N94-16424

IMPACT RESISTANCE
An engineering approach for the application of textile composites to a structural component
p 938 N94-16852

IMPACT STRENGTH
The effect of long-term aging on the impact properties of modified 9Cr-1Mo steel
[DE93-015453] p 957 N94-16068

IMPACT TESTING MACHINES
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263

IMPACT TOLERANCES
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836
Low and high velocity impact response of thick hybrid composites p 936 N94-16837

IMPEDANCE
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693
Assessment of chromate and non-chromate conversion coatings for Al alloys using electrochemical impedance spectroscopy
[AD-A267205] p 965 N94-15859
Design of broadband wire antennas for frequency hopping applications
[AD-A267405] p 1001 N94-17025

IMPEDANCE MEASUREMENT
Determination of equivalent circuit for PVDF shock-pressure gauges
[DE93-016492] p 1034 N94-16452

IMPEDANCE PROBES
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511

IMPELLERS
ALS liquid hydrogen turbopump
[NASA-CR-194646] p 927 N94-17016
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386

IMPLOSIONS
Direct drive foil implosion experiments on Pegasus 2
[DE93-012666] p 1202 N94-16776
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903
Plasma flow switch and foil implosion experiments on Pegasus 2
[DE93-016464] p 1013 N94-17318

IMPREGNATING
A new NASA LaRC Multi-Purpose Prepregging Unit
p 932 N94-15276
Processing, properties and applications of composites using powder-coated epoxy towpreg technology
p 933 N94-15277
Characterization of voids formed during liquid impregnation of nonwoven multifilament glass networks as related to composite processing p 939 N94-16858

IMPULSES
Optical effects of regolith processes on S asteroids as simulated by laser impulse alteration of ordinary chondrite p 1246 N94-16422

IMPURITIES
BIB photodetectors based on antimony doped silicon
p 902 N94-15047
Optimisation of FIR photoconductors for atmospheric spectroscopy p 902 N94-15048
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133

IN SITU MEASUREMENT
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797

IN-FLIGHT MONITORING
SYNMOD: A low-resource, low-cost means of monitoring the near-Earth space debris environment
p 891 N94-17148

INCIDENCE
Measurements of the radar cross section and Inverse Synthetic Aperture Radar (ISAR) images of a Piper Navajo at 9.5 GHz and 49 GHz
[AD-A267570] p 1002 N94-17110
Review of rigorous coupled-wave analysis and of homogeneous effective medium approximations for high spatial-frequency surface-relief gratings
p 1194 N94-17335

INCLUSIONS
Grosnaja ABCs: Magnesium isotope compositions
p 1241 N94-16191
Petrography, mineralogy, and Mg isotope composition of VICTA: A vigarano CaAl4O7-bearing type A inclusion
p 1103 N94-16203
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
An experimental study of trace element partitioning between perovskite, hibonite and melt: Equilibrium values p 954 N94-16313
On origin of the olivine inclusions from the Kainsaz CO carbonaceous chondrite p 1244 N94-16345
Limited subsolidus diffusion in type B1 CAI: Evidence from Ti distribution in spinel p 954 N94-16401
Refractory precursor components in an Allende ferromagnesian chondrule p 1245 N94-16412

INCOHERENT SCATTERING
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012

INCOMPRESSIBILITY
A priori inequalities for an ideal-incompressible liquid in an electromagnetic field
[IFTR-9/1992] p 998 N94-16652

INCOMPRESSIBLE FLOW
Large-Eddy Simulations (LES) of flows and turbulence distribution
[AD-A267182] p 1016 N94-15151
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
A rapid computational model for estimating the performance of compliant airfoils in cascades
[AD-A266275] p 857 N94-16471
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798

INCOMPRESSIBLE FLUIDS
Broken symmetry in ideal magnetohydrodynamic turbulence
[NASA-TM-109017] p 1023 N94-15964

INDENTATION
Laser weld repair of tantalum sheet
[DE93-016417] p 1041 N94-16871

INDEXES (DOCUMENTATION)
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11
[NASA-TM-104566-VOL-12] p 1111 N94-15529
Aeronautical engineering: A continuing bibliography with indexes (supplement 295)
[NASA-SP-7037(295)] p 854 N94-16480
Commonwealth of Independent States aerospace science and technology, 1992: A bibliography with indexes
[NASA-SP-7106] p 854 N94-16481

INDIANA
Environmental assessment for northwestern Indiana relay node site no. RN 8C902IN
[AD-A267849] p 1004 N94-17406

INDIUM
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042

INDIUM ANTIMONIDES
The growth of InAs(1-x)Sb(x)/InAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE93-015028] p 1208 N94-16012

INDIUM ARSENIDES
The growth of InAs(1-x)Sb(x)/InAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE93-015028] p 1208 N94-16012
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Proceedings of the 6th International Conference on Narrow Gap Semiconductors
[AD-A268097] p 1015 N94-17570

INDIUM COMPOUNDS
Characterization of InTlSb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922

INDIUM GALLIUM ARSENIDES
Monolithic, two-terminal InP/Ga(0.47)In(0.53)As tandem solar cells
[DE93-014037] p 1093 N94-16824

INDIUM PHOSPHIDES
Monolithic, two-terminal InP/Ga(0.47)In(0.53)As tandem solar cells
[DE93-014037] p 1093 N94-16824
Lattice-mismatched In(0.40)Al(0.60)As window layers for indium phosphide solar cells
[NASA-TM-106255] p 1013 N94-17113

INDOLES
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893

INDOOR AIR POLLUTION
Space Shuttle solid rocket motor exposure monitoring
p 976 N94-16624

INDUCTANCE
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 1010 N94-15874

INDUCTORS
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 1010 N94-15874

INDUSTRIAL MANAGEMENT
Environmental management lessons to be learned from the upcoming CFC phase out or how to insure that we survive the next environmentally mandated process change
[TABES PAPER 93-570] p 1050 N94-16136

Emergency preparedness and planning
p 1124 N94-16613
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
INDUSTRIAL PLANTS
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715
INDUSTRIAL SAFETY
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
Ergonomics in the office environment
p 1124 N94-16612
Emergency preparedness and planning
p 1124 N94-16613
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
Education and training of professional industrial hygienists for 2020 p 1125 N94-16618
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623
Space Shuttle solid rocket motor exposure monitoring
p 976 N94-16624
Illness/injury pattern complex 40 (Titan)
p 1125 N94-16625
INDUSTRIAL WASTES
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
INDUSTRIES
From space to Earth
[NASA-TM-109638] p 1235 N94-15249
Finding fish from above --- remote sensing
[NASA-TM-109602] p 1081 N94-15310
Space commerce in a global economy: Comparison of US and Australian approaches
[NASA-TM-109341] p 1235 N94-17290
Technology transfer. Determining industry needs: A guide for communities
[NASA-CR-194676] p 1235 N94-17293
Technology in action
[NASA-TM-109345] p 1235 N94-17294
The impact of industry/university consortia programs on space education
[NASA-TM-109340] p 1222 N94-17441
INEQUALITIES
A priori inequalities for an ideal-incompressible liquid in an electromagnetic field
[IFTR-9/1992] p 998 N94-16652
INERTIAL CONFINEMENT FUSION
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663
INERTIAL NAVIGATION
Analysis of the accuracy of strapdown inertial surveying systems
[SER-C-391] p 1081 N94-15156
INERTIAL UPPER STAGE
Inertial Upper Stage
[NASA-TM-109654] p 885 N94-15278
STS-26 generic integrated IUS deploy simulation
[NASA-TM-109562] p 875 N94-15332
INFECTIOUS DISEASES
Bloodborne Pathogens Program p 1127 N94-16644
INFERENCE
Combinatorial semantics
[TR-444] p 1149 N94-16575
INFILTRATION
Polymer Infiltration Studies
[NASA-CR-194494] p 932 N94-15275
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
Textile composite processing science
p 938 N94-16856
INFLATABLE STRUCTURES
Inflatable rescue device
[NASA-CASE-MSC-22244-1] p 1137 N94-15883
INFLUENCE COEFFICIENT
Effect of wind tunnel acoustic modes on linear oscillating cascade aerodynamics
[NASA-TM-106367] p 869 N94-15866
INFORMATION DISSEMINATION
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 32: A new era in international technical communication: American-Russian collaboration
[NASA-TM-109336] p 1230 N94-15838
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 34: Technical communications practices and the use of information technologies as reported by Dutch and US aerospace engineers
[NASA-TM-109337] p 1230 N94-15839
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17291
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17300
INFORMATION FLOW
Electronic messaging for the 1990's
[AD-A267143] p 1229 N94-15437
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 32: A new era in international technical communication: American-Russian collaboration
[NASA-TM-109336] p 1230 N94-15838
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 34: Technical communications practices and the use of information technologies as reported by Dutch and US aerospace engineers

Materials, processes, and environmental engineering network
[TABES PAPER 93-610] p 1051 N94-16142
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
Computer Science and Telecommunications Board activities
[DE93-018141] p 1000 N94-17000
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036
Defense Logistics Information System (DLIS). Procedures manual: Logistics On-Line Access (LOLA) procedures manual
[AD-A267685] p 1233 N94-17229
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17300
Model designation of military aerospace vehicles
[AD-A267852] p 898 N94-17388
Integration of several computer systems within a heterogeneous environment
[AD-A267978] p 1155 N94-17500
INFORMATION THEORY
Low-Complexity, High-Performance Bandwidth Efficient Coding and Coded Modulation Techniques for Satellite and Space Communications
[NASA-CR-194623] p 997 N94-16506
Bandwidth efficient coding: Theoretical limits and real achievements. Error control techniques for satellite and space communications p 997 N94-16507
INFORMATION TRANSFER
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 32: A new era in international technical communication: American-Russian collaboration
[NASA-TM-109336] p 1230 N94-15838

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17291
Technology transfer. Determining industry needs: A guide for communities
[NASA-CR-194676] p 1235 N94-17293
Technology in action
[NASA-TM-109345] p 1235 N94-17294
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306

INFRARED ASTRONOMY
Photoconductors and arrays for the far-infrared p 902 N94-15045
Infrared detectors and coolers for space instrumentation: Summary and concluding remarks p 904 N94-15059
Ionising radiation-induced effects in doped germanium FIR photoconductors p 907 N94-15077
Cryogenic readout electronics for astronomical applications p 910 N94-15099
New K type asteroids p 1241 N94-16195
A decade's overview of Io's volcanic activity p 1245 N94-16386
Critically evaluated/distributed database of IRAS LRS spectra
[NASA-CR-193611] p 1232 N94-17038

INFRARED ASTRONOMY SATELLITE
The chromosphere of VV cephei and the distribution of circumstellar dust around red giants and supergiants
[NASA-CR-193594] p 1297 N94-16866
Critically evaluated/distributed database of IRAS LRS spectra
[NASA-CR-193611] p 1232 N94-17038
A typical pointed observation in IRAS designed to fit into a 15 minute window
[NASA-CR-194653] p 1199 N94-17443

INFRARED DETECTORS
Large scientific 2-D arrays for the 1-5 micron region p 902 N94-15044
Impurity conduction photoconductor detectors p 902 N94-15046
Schottky barrier focal plane arrays for SWIR and MWIR p 903 N94-15050
Advanced high performance CdHgTe multiplexed arrays p 903 N94-15051
A 12.5 micron infrared detector for Earth observation p 903 N94-15052
Lead chalcogenides based IR photosensitive array detectors with coordinate addressing p 903 N94-15053
Infrared detectors and coolers for space instrumentation: Summary and concluding remarks p 904 N94-15059
Discrete CMT infrared detectors for space application, from ISSR to second generation Meteosat and MIPAS p 905 N94-15065
Extrinsic photoconductor detectors for the wavelength range 2 microns to 240 microns p 906 N94-15073
Characterization of detectors and calibration of the ISOPHOT experiment p 907 N94-15082
Characteristics of the ISO short wavelength spectrometer detectors p 908 N94-15084
IR detectors and subsystems for space applications p 909 N94-15091
Infrared detector annealing and calibration with IR-laser diodes p 909 N94-15092
A linear monolithic 4-6 on silicon IR detector array p 910 N94-15098
Cryogenic readout electronics for astronomical applications p 910 N94-15099
Sensor modelling for the Cyclops focal plane detector array based technology demonstrator
[AD-A267172] p 1190 N94-15846
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272

INFRARED IMAGERY
Schottky barrier focal plane arrays for SWIR and MWIR p 903 N94-15050
A linear monolithic 4-6 on silicon IR detector array p 910 N94-15098
A monolithic PbTeCCD focal plane array for MWIR imaging p 910 N94-15100
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements
[AD-A267192] p 1106 N94-15851
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Earth imaging results from Galileo's second encounter p 1252 N94-16201
Thermogeologic mapping of the Moon from lunar orbit p 1290 N94-16405
Deucalionis Regio, Mars: Evidence for a unique mineralogic endmember and a crusted surface p 1291 N94-16406
Spatial resolution and cloud optical thickness retrievals p 1066 N94-16671
Seasonal and spatial variations in phytoplanktonic chlorophyll in eutrophic Mono Lake, California, measured with the Airborne Visible and Infrared Imaging Spectrometer (AVIRIS) p 1069 N94-16684
AVIRIS calibration and application in coastal oceanic environments p 1069 N94-16685
Atmospheric correction of AVIRIS data in ocean waters p 1070 N94-16690
Separation of cirrus cloud from clear surface from AVIRIS data using the 1.38 micron water vapor band p 1072 N94-16699
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267
Three dimensional visualization of GOES cloud data using OCTRESS
[AD-A268102] p 1109 N94-17572
An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595

INFRARED LASERS
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042

INFRARED RADAR
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392

INFRARED RADIATION
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
A global traveling wave on Venus
[NASA-CR-194356] p 1246 N94-15182
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements
[AD-A267192] p 1106 N94-15851
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
Infrared spot tracker
[AD-D015778] p 1191 N94-16547
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359

INFRARED RADIOMETERS
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
Testing the waters from space --- Thermal mapping
[NASA-TM-109623] p 1082 N94-15409
A conceptual design study for a two-dimensional, electronically scanned thinned array radiometer
[NASA-TM-109051] p 1085 N94-17665

INFRARED SCANNERS
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 2: TIMS Workshop
[NASA-CR-194541] p 1063 N94-16595
TIMS performance evaluation summary p 1063 N94-16596
A quantitative analysis of TIMS data obtained on the Learjet 23 at various altitudes p 1063 N94-16597
Analysis of TIMS performance subjected to simulated wind blast p 1063 N94-16598
Sensitivity of blackbody reference panels to wind blast p 1063 N94-16599
Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600
Application of split window technique to TIMS data p 1064 N94-16601
Atmospheric corrections for TIMS estimated emittance p 1064 N94-16602
An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605

INFRARED SPACE OBSERVATORY (ISO)
Photoconductors and arrays for the far-infrared p 902 N94-15045
The detector assemblies of ISOPHOT and the spectrometers ISO-SWS and ISO-LWS p 906 N94-15074
Characterization of detectors and calibration of the ISOPHOT experiment p 907 N94-15082
Characteristics of the ISO short wavelength spectrometer detectors p 908 N94-15084

INFRARED SPECTRA
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses
[DE93-015304] p 965 N94-15828
New K type asteroids p 1241 N94-16195
Critically evaluated/distributed database of IRAS LRS spectra
[NASA-CR-193611] p 1232 N94-17038

INFRARED SPECTROMETERS
Performance testing of doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15066
Non-linear effects in doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15067
IR detectors and subsystems for space applications p 909 N94-15091
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 1: AVIRIS Workshop
[NASA-CR-194540] p 1066 N94-16666
In-flight calibration of the spectral and radiometric characteristics of AVIRIS in 1991 p 1037 N94-16667
Using AVIRIS images to measure temporal trends in abundance of photosynthetic and nonphotosynthetic canopy components p 1066 N94-16668
Unmixing AVIRIS data to provide a method for vegetation fraction subtraction p 1066 N94-16669
The Spectral Image Processing System (SIPS): Software for integrated analysis of AVIRIS data p 1067 N94-16674
AVIRIS study of Death Valley evaporite deposits using least-squares band-fitting methods p 1067 N94-16676
Retrieval of biophysical parameters with AVIRIS and ISM: The Landes Forest, south west France p 1068 N94-16681
Ground-truthing AVIRIS mineral mapping at Cuprite, Nevada p 1069 N94-16682
AVIRIS calibration and application in coastal oceanic environments p 1069 N94-16685
Mapping vegetation types with the multiple spectral feature mapping algorithm in both emission and absorption p 1069 N94-16686
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
Using endmembers in AVIRIS images to estimate changes in vegetative biomass p 1070 N94-16689
The 1991 AVIRIS/POLDER experiment in Camargue, France p 1070 N94-16691
AVIRIS ground data processing system p 1071 N94-16692
Simulation of ASTER data using AVIRIS images p 1071 N94-16693
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694
Primary studies of trace quantities of green vegetation in Mono Lake area using 1990 AVIRIS data p 1071 N94-16695
Measuring dry plant residues in grasslands: A case study using AVIRIS p 1072 N94-16697
Tracking photosynthetic efficiency with narrow-band spectroradiometry
[CIW-PUBL-1133] p 1072 N94-16698
Software for the derivation of scaled surface reflectances from AVIRIS data p 1072 N94-16700
Integrating remote sensing techniques at Cuprite, Nevada: AVIRIS, Thematic Mapper, and field spectroscopy p 1072 N94-16701
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods p 1073 N94-16703
Expert system-based mineral mapping using AVIRIS p 1073 N94-16704
AVIRIS data and neural networks applied to an urban ecosystem p 1073 N94-16705

Temporal variation in spectral detection thresholds of substrate and vegetation in AVIRIS images p 1073 N94-16706
Discussion of band selection and methodologies for the estimation of precipitable water vapour from AVIRIS data p 1074 N94-16707
Abundance recovery error analysis using simulated AVIRIS data p 1074 N94-16708
A comparison of LOWTRAN-7 corrected Airborne Visible/Infrared Imaging Spectrometer (AVIRIS) data with ground spectral measurements p 1074 N94-16710
Simulation of AVHRR-K band ratios with AVIRIS p 1075 N94-16714
Investigation of cloud properties and atmospheric stability with MODIS
[NASA-CR-193475] p 1107 N94-16717
Second flight of the Spacelab grille spectrometer during the Atlas-1 mission
[AERONAUTICA-ACTA-A-367-199] p 923 N94-17592

INFRARED SPECTROPHOTOMETERS
The detector assemblies of ISOPHOT and the spectrometers ISO-SWS and ISO-LWS p 906 N94-15074

INFRARED SPECTROSCOPY
Characteristics of the ISO short wavelength spectrometer detectors p 908 N94-15084
New K type asteroids p 1241 N94-16195
Water adsorption on diamond (110) studied by multiple internal reflection infrared spectroscopy
[AD-A266415] p 948 N94-16553
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides
[AD-A266246] p 950 N94-16931
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994

INFRARED TELESCOPES
Silicon gallium doped photoconductor development for the AROME balloon borne instrument p 908 N94-15087
New K type asteroids p 1241 N94-16195
A typical pointed observation in IRAS designed to fit into a 15 minute window
[NASA-CR-194653] p 1199 N94-17443

INGOTS
Aluminum-lithium technology
[TABES PAPER 93-601] p 962 N94-16137
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767
Techniques for preparation of ingot metallurgical discontinuous composites
[AD-D015748] p 940 N94-16933

INHIBITORS
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597

INJECTION MOLDING
Army P/M research and development overview
[AD-A266921] p 954 N94-15104
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765
Fabrication of piezoelectric ceramic/polymer composites by injection molding
[AD-A267302] p 972 N94-17227

INJECTORS
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670

INJURIES
A review of the efficacy of 7.5 percent NaCl/6 percent Dextran-70 (HSD) in experimental animals and humans
[AD-A266633] p 1122 N94-15740
The relationship of metallothionein induction to the heat shock response
[AD-A266634] p 1122 N94-15741
General Medical Surveillance Program p 1127 N94-16643

INLET AIRFRAME CONFIGURATIONS
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115

INLET FLOW
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551

INLET NOZZLES
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551

INLET PRESSURE
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770

INORGANIC COATINGS
Restoring Miss Liberty — inorganic coatings
[NASA-TM-109605] p 963 N94-15313

INORGANIC COMPOUNDS
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455

INPUT
Determination of GTA welding efficiencies
[AD-A267163] p 1046 N94-15738

INPUT/OUTPUT ROUTINES
A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
FSM test: A functional test generation system for sequential circuits
[REPT-93-017] p 1014 N94-17505

INSECTS
Combating malaria
[NASA-TM-109609] p 1081 N94-15297

INSPECTION
Geometric tolerance assessment
[NPL-DITC-210/92] p 1049 N94-15013
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075
Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542

INSTALLING
Satellite communications installation plan
[AD-A266303] p 1000 N94-16965

INSTANTONS
Existence of a new instanton in constrained Yang-Mills-Higgs theory
[NIKHEF-H/93-02] p 1186 N94-17601

INSTRUCTORS
Teacher in space
[NASA-TM-109666] p 1131 N94-15237

INSTRUMENT COMPENSATION
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521

INSTRUMENT ERRORS
Ring lens focusing and push-pull tracking scheme for optical disk systems p 1227 N94-14990
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521
Sensitivity of blackbody reference panels to wind blast p 1063 N94-16599

INSTRUMENT ORIENTATION
Neural-network-directed alignment of optical systems using the laser-beam spatial filter as an example
[NASA-TP-3372] p 1034 N94-15961
Tilt mechanism
[AD-D015780] p 1047 N94-16548

INSULATION
XPS analysis of Al/EPDM bondlines from IUS SRM-1 polar bosses
[AD-A266851] p 1056 N94-14945
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Postflight hardware evaluation 360T026 (RSRM-26, STS-47)
[NASA-CR-192559] p 882 N94-17656

INSULATORS
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605

INSULIN
New insulin pump
[NASA-TM-109642] p 1120 N94-15253

INTEGRAL EQUATIONS
Volume integral equations applied to circular and square cylinders
[AD-A266635] p 1169 N94-15785
Application of group theory to integral-difference equations of plasma physics
[IFTR-23/1992] p 1204 N94-17067

INTEGRATED CIRCUITS
VLSI for high-speed digital signal processing
[AD-A267709] p 1007 N94-14936
Multichip module high speed testing
[AD-A266968] p 986 N94-14955
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method
[AD-A267053] p 1008 N94-15665
OETC optical backplane bus testbed. IBM tasks: Receiver OEIC and link simulation tools and analysis
[AD-A266198] p 1191 N94-16128
Measurements of the operation of the SINUS-6/BWO system
[AD-A266423] p 1011 N94-16556
Large signal characterization and modeling of heterojunction bipolar transistors
[AD-A266184] p 1012 N94-16935
Stray insensitive switched capacitor composite operational amplifiers
[AD-A267412] p 1012 N94-16976
Optically-switched submillimeter-wave oscillator and radiator
[NASA-CASE-NPO-18547-1-CU] p 1014 N94-17324
Isochronets: A high-speed network switching architecture
[AD-A267811] p 1161 N94-17409
Smart Power: New power integrated circuit technologies and their applications
[VTT-TIED-1358] p 1015 N94-17546

INTEGRATED LIBRARY SYSTEMS
NASA Electronic Library System (NELS): The system impact of security
[NASA-CR-194614] p 1231 N94-16499

INTEGRATED MISSION CONTROL CENTER
A proposed ground segment design for small satellites p 878 N94-17154

INTELLIGENCE
Classified information: Volume could be reduced by changing retention policy
[AD-A266938] p 1228 N94-15176

INTELSAT SATELLITES
The 1970 highlights --- NASA programs and research
[NASA-TM-109628] p 1302 N94-15415

INTERACTIONAL AERODYNAMICS
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751

INTERATOMIC FORCES
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722

INTERCALATION
Diamond p-n junction cold cathode
[AD-A266926] p 1206 N94-15107

INTERCONTINENTAL BALLISTIC MISSILES
Hypervelocity orbital intercept guidance using certainty control
[AD-A267297] p 1174 N94-17219

INTERFACES
Overview of chemical vapor infiltration
[DE93-015440] p 934 N94-16065
Soyuz/ACRV accommodation study
[NASA-TM-107733] p 888 N94-17072

INTERFACIAL TENSION
Measurements of Interfacial Tension: MITE p 943 N94-15158
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 945 N94-15171
Theoretical study of laminar film condensation on horizontal ellipitical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
Physical and chemical properties of some new perfluoropolyalkylether lubricants prepared by direct fluorination
[NASA-TM-106299] p 967 N94-16543

INTERFERENCE GRATING
Application of holographic optical elements to magneto-optic read/write heads p 1226 N94-14985

INTERFEROMETERS
Simultaneous compression of the passively mode-locked pulsewidth and pulse train p 913 N94-15566
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503

INTERFEROMETRY
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Spaceborne Imaging Radar-C instrument p 990 N94-15890

TOPSAT: Global space topographic mission
p 992 N94-15905
Interferometric GPS attitude: A stochastic error model, DREO report
[AD-A266411] p 864 N94-16457
The TOPSAR interferometric radar topographic mapping instrument p 1078 N94-16749
Measuring ocean coherence time with dual-baseline interferometry p 1080 N94-16759
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Fabrication techniques for very fast diffractive lenses
p 1196 N94-17345
SURPHEX (tm): New dry photopolymers for replication of surface relief diffractive optics p 1198 N94-17358
Study of high speed interference photography with two-dimensional acousto-optical lattice deflection
[AD-A267823] p 1035 N94-17402
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503

INTERGALACTIC MEDIA
The theory of QSO absorption line systems and their relationship to the galaxies
[NASA-CR-194596] p 1236 N94-15679

INTERIOR BALLISTICS
TDNOVA interactive graphics
[AD-A268000] p 1156 N94-17530

INTERLAMINAR STRESS
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143

INTERMETALLICS
Army P/M research and development overview
[AD-A266921] p 954 N94-15104
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
High temperature advanced structural composites. Volume 1: Executive summary and intermetallic compounds
[AD-A267022] p 933 N94-15835
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
A reexamination of grain boundary fracture in Ni3Al: Environmental and alloying effects
[DE93-015431] p 1208 N94-16063
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223

INTERNAL COMBUSTION ENGINES
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770

INTERNAL ENERGY
Some thoughts on future rain mapping missions (TRMM follow-on) p 992 N94-15906

INTERNAL PRESSURE
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246

INTERNAL WAVES
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139

INTERNATIONAL COOPERATION
International food research project
[NASA-TM-109540] p 1135 N94-15371
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 32: A new era in international technical communication: American-Russian collaboration
[NASA-TM-109336] p 1230 N94-15838
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 34: Technical communications practices and the use of information technologies as reported by Dutch and US aerospace engineers
[NASA-TM-109337] p 1230 N94-15839
International collaboration in SAR ground data systems p 993 N94-15917
Global Energy and Water Cycle Experiment (GEWEX) and the Continental-scale International Project (GCIP)
p 994 N94-15918
The Japanese Space Station utilization plan
p 977 N94-16074
The Canadian Space Station user development program. Where do we go from here? p 898 N94-16084
The definition of a scientific policy: ESRO's satellite programme in 1969-1973
[ESA-HSR-6] p 1303 N94-16500
The launch of ELDO
[ESA-HSR-7] p 886 N94-16501
Europe in space: Edoardo Amaldi and the inception of ESRO
[ESA-HSR-5] p 1303 N94-16526
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523
Surface energy balance modeling at mesoscale: The contribution of the future Earth observing system
[BCRS-91-04] p 1085 N94-17616
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636

INTERNATIONAL LAW
Aviation inspection prospects p 853 N94-15125
Environmental management lessons to be learned from the upcoming CFC phase out or how to insure that we survive the next environmentally mandated process change
[TABES PAPER 93-570] p 1050 N94-16136
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143

INTERNATIONAL RELATIONS
The strategic environmental research and development program: A new paradigm for space, the environment, and national security
[AD-A266222] p 1174 N94-16109

INTERPLANETARY DUST
Orbital evolution of dust from comet Schwassmann-Wachmann 1: A case of one-to-one resonance trapping p 1242 N94-16270
Carbon abundances, major element chemistry, and mineralogy of hydrated interplanetary dust particles
p 1243 N94-16309
Densities of 5-15 micron interplanetary dust particles
p 1244 N94-16367
The effect of an on-orbit near encounter on the number flux density of micron sized particles
p 899 N94-16374
Dust grain resonant capture: A statistical study
p 1245 N94-16384
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388
SYNMOD: A low-resource, low-cost means of monitoring the near-Earth space debris environment
p 891 N94-17148

INTERPLANETARY FLIGHT
Small spacecraft for planetary exploration
p 874 N94-17145

INTERPLANETARY SPACECRAFT
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831

INTERPLANETARY TRANSFER ORBITS
A mission concept of Phobos/Deimos exploration
p 1287 N94-16387

INTERPOLATION
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568
Fast algorithms for polynomial interpolation, integration and differentiation
[AD-A267505] p 1154 N94-17370

INTERPROCESSOR COMMUNICATION
The alignment-distribution graph
[NASA-CR-194292] p 1168 N94-15112
Mobile and replicated alignment of arrays in data-parallel programs
[NASA-CR-194294] p 1158 N94-15113
Overview of Enhanced Data Stream Array Processor (EDSAP)
[AD-A266986] p 1158 N94-15492
Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
Asynchronous design for parallel processing architectures
[AD-A266523] p 1160 N94-16791
Applications and development of communication models for the touchstone GAMMA and DELTA prototypes
[NASA-CR-193617] p 999 N94-16867
The IMS software integration platform
[AD-A266285] p 1151 N94-16910

INTERSTELLAR CHEMISTRY
Nd-142/Nd-144 in bulk planetary reservoirs, the problem of incomplete mixing of interstellar components and significance of very high precision Nd-145/Nd-144 measurements p 1256 N94-16220
Carbon abundances, major element chemistry, and mineralogy of hydrated interplanetary dust particles
p 1243 N94-16309

INTERSTELLAR MATTER
Boundary conditions for the paleoenvironment: Chemical and physical processes in the pre-solar nebula
[NASA-CR-194418] p 1298 N94-15421
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites
p 1244 N94-16343
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648

INTERSTITIALS
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814

INTRAVEHICULAR ACTIVITY
STS-35 onboard photography quick release
[NASA-TM-109500] p 881 N94-15464
STS-35 mission highlights resource tape
[NASA-TM-109501] p 881 N94-15465
Science operation in space: Lessons
[NASA-TM-109502] p 881 N94-15466

INTRAVENOUS PROCEDURES
Methods to obtain blood samples periodically during exercise research studies while subjects are immersed in water or otherwise inaccessible
[AD-A268227] p 1130 N94-17562

INTRUSION
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods
p 1073 N94-16703

INVARIANCE
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
Breakdown of adiabatic invariance
[AD-A267246] p 1219 N94-14977
Invariance of slip movements with respect to the control matrix
[IFTR-43/1991] p 1170 N94-17045

INVENTORIES
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799
Materials inventory management manual
[NHB-4100.1C] p 1225 N94-16830

INVENTORY CONTROLS
Equipment management user's handbook for property custodians
[NHB-4200.2A] p 1224 N94-15957

INVENTORY MANAGEMENT
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
Equipment management user's handbook for property custodians
[NHB-4200.2A] p 1224 N94-15957
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799
Materials inventory management manual
[NHB-4100.1C] p 1225 N94-16830
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027

INVERSE KINEMATICS
Fuzzy control and fuzzy kinematic mapping for a redundant space robot
[AD-A266866] p 1163 N94-14950
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905

INVERSE SCATTERING
Nonlinear problems in fluid dynamics and inverse scattering
[AD-A266234] p 1026 N94-16927
Spectral inverse scattering theory for dielectric media: Application to optical devices
[AD-A268635] p 1199 N94-17427

INVERTED CONVERTERS (DC TO AC)
Circuits and control processes for combining direct converters and inverter motors
[ETN-93-94399] p 1008 N94-15448

INVERTERS
Circuits and control processes for combining direct converters and inverter motors
[ETN-93-94399] p 1008 N94-15448
INVESTMENT CASTING
Nonaqueous slip casting of high temperature ceramic superconductors using an investment casting technique
[NASA-CASE-LAR-14918-1] p 983 N94-15881
INVISCID FLOW
Incorporation of boundary layer heating predictive methodology into NSWCDD aeroprediction code
[AD-A267000] p 1020 N94-15632
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Broken symmetry in ideal magnetohydrodynamic turbulence
[NASA-TM-109017] p 1023 N94-15964
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
Adaptive Cartesian grid methods for representing geometry in inviscid compressible flow
[DE93-016430] p 1025 N94-16894
IO
Crustal structure and igneous processes in a chondritic Io p 1243 N94-16292
A decade's overview of Io's volcanic activity p 1245 N94-16386
IODIDES
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973
Elemental impurity analysis of mercuric iodide by ICP/MS
[DE93-015531] p 949 N94-16876
IODINE LASERS
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
ION ACCELERATORS
A microsecond-pulsewidth, intense, light-ion beam accelerator
[DE93-016455] p 1202 N94-16451
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670
ION BEAMS
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
MeV ion-beam analysis of optical data storage films p 1226 N94-14984
Testing and management of flight instruments and their data
[NASA-CR-194332] p 868 N94-15187
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam
[NASA-CR-193851] p 946 N94-15766
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
A microsecond-pulsewidth, intense, light-ion beam accelerator
[DE93-016455] p 1202 N94-16451
Crystalline beam ground state
[DE93-014331] p 1211 N94-16827
The stability of ions in a storage ring in the presence of small gap insertion devices
[DE93-015387] p 1184 N94-16828
Approximate Green's function methods for HZE transport in multilayered materials
[NASA-TM-4519] p 1300 N94-17084
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436
Study of brightness and current limitations in intense charged particle beams
[AD-A268283] p 1186 N94-17578
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670
Emittance growth in displaced, space-charge-dominated beams with energy spread
[DE93-016514] p 1188 N94-17672
ION CURRENTS
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode
[AD-A267214] p 1204 N94-16987
ION DENSITY (CONCENTRATION)
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663
ION DISTRIBUTION
Kinetic plasma processes occurring in the outer plasmasphere
[NASA-CR-193452] p 1300 N94-17524
ION ENGINES
Carbon-carbon grid for ion engines
[NASA-CASE-NPO-19174-1-CU] p 925 N94-15876
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 925 N94-15927
ION EXCHANGE MEMBRANE ELECTROLYTES
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
ION EXCHANGING
Direct catalytic decomposition of nitric oxide
[DE93-016689] p 949 N94-16896
ION IMPLANTATION
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses
[DE93-015304] p 965 N94-15828
Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon
[DE93-015449] p 1209 N94-16066
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Continuing research on friction and wear of materials
[AD-A268291] p 1049 N94-17566
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645
ION INJECTION
Six dimensional tracking simulator for H(-) injection in AGS Booster
[DE93-015396] p 1184 N94-16885
ION IRRADIATION
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode
[AD-A267214] p 1204 N94-16987
ION PROPULSION
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 925 N94-15927
ION RECOMBINATION
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145
ION SOURCES
A microsecond-pulsewidth, intense, light-ion beam accelerator
[DE93-016455] p 1202 N94-16451
ION TEMPERATURE
ARIES tokamak reactor study
[DE93-017059] p 1203 N94-16901
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663
ION TRAPS (INSTRUMENTATION)
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
IONIC COLLISIONS
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
IONIC REACTIONS
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
IONIC WAVES
Double stimulated Brillouin scattering p 1200 N94-15205
Soliton-like structures in double stimulated Brillouin scattering p 1200 N94-15207
IONIZATION
Thermochemistry of silicate speciation in aqueous sodium silicate solutions: Ionization and polymerization of small silicate ion
[AD-A266825] p 964 N94-15683
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting
[DE93-013582] p 1183 N94-16818
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422
Properties of nuclei in astrophysical environments: Binding energies, weak-interaction rates
[MPA-706] p 1240 N94-17628
IONIZATION CHAMBERS
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 925 N94-15927
IONIZATION CROSS SECTIONS
Studies of combustion reactions at the state-resolved differential cross section level
[DE93-017605] p 948 N94-16462
IONIZATION POTENTIALS
Monte Carlo simulation of the microstrip gas counter
[NIKHEF-H/93-07] p 1035 N94-17619
IONIZED GASES
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting
[DE93-013582] p 1183 N94-16818
IONIZERS
Electron reversal ionizer for detection of trace species using a spherical cathode
[NASA-CASE-NPO-18870-1-CU] p 1185 N94-17329
IONIZING RADIATION
Radiation hardening of a CCD technology through process and design modifications p 906 N94-15071
Fault handling schemes in electronic systems with specific application to radiation tolerance and VLSI design
[NASA-CR-194559] p 1008 N94-15640
Third LDEF Post-Retrieval Symposium Abstracts
[NASA-CP-10120] p 1303 N94-16495
AFRRI reports, first quarter 1993
[AD-A266380] p 1123 N94-16515
IONOGRAMS
Comparison of RADARC high-frequency radar performance prediction model and ROTHR Amchitka data
[AD-A267077] p 987 N94-15540
IONOSPHERIC CURRENTS
Formation of the stable auroral arc that intensifies at substorm onset
[NASA-CR-193637] p 1098 N94-15433
IONOSPHERIC DISTURBANCES
Optimization of satellite coverage in observing cause and effect changes in the ionosphere, magnetosphere, and solar wind
[AD-A267956] p 1102 N94-17493
IONOSPHERIC ELECTRON DENSITY
A physical model for one-dimension and time-dependent ionosphere. Part 2: Results and discussions
[DE93-627959] p 1103 N94-17631
IONOSPHERIC HEATING
An electromagnetic interference study of potential transmitter sites for the HF Active Auroral Research Program (HAARP)
[AD-A267743] p 1004 N94-17373
Effect of powerful oblique HF waves on ionospheric D-layer absorption
[AD-A268443] p 1102 N94-17499
IONOSPHERIC PROPAGATION
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035
On-board spatial scientific experiment project on small satellites p 896 N94-17184
Effect of powerful oblique HF waves on ionospheric D-layer absorption
[AD-A268443] p 1102 N94-17499
IONS
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
Bioorganic models for protein ion channels
[AD-A266365] p 1117 N94-16441
Thermal disorder in adsorbed Cl on Si(100)
[AD-A266295] p 1210 N94-16476
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316
IRIDIUM
Cretaceous-tertiary boundary spherules and Cenozoic microtektites: Similarities and differences p 1241 N94-16186

The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness p 1103 N94-16211
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Geochemical evidences for two chondritic-like cometary or asteroidal impacts before and at the K/T boundary p 1244 N94-16359

IRON
Why is the Moon dark? p 1256 N94-16219
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
Release of iron from hemoglobin [AD-A266503] p 1128 N94-16784
Neurotoxicity of hemoglobin in cortical cell culture [AD-A266506] p 1128 N94-16786
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers [DE93-015809] p 1184 N94-16838
Creep ductility of iron at very low strain rates: The effects of sulfur [DE93-015490] p 959 N94-16890
Continuing research on friction and wear of materials [AD-A268291] p 1049 N94-17566
Epitaxial iron films [AD-A268286] p 1217 N94-17579
Comparison of computer predictions and magnetic field measurements for an iron spectrometer magnet [DE93-016164] p 1176 N94-17658

IRON ALLOYS
Remelting of Fe-C-Si-alloy in a ceramic mold skin p 945 N94-15169
In situ studies of passive film chemistry using x ray absorption spectroscopy [DE93-014023] p 947 N94-16011
Environmental effects on iron aluminides [DE93-015820] p 958 N94-16166
Robotic weld overlay coatings for erosion control [DE93-016938] p 970 N94-16959

IRON METEORITES
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites p 1241 N94-16175
Systematic chemical variations in large 3AB iron meteorites: Clues to core crystallization p 1241 N94-16213
Al-26-Mg-26 ages of iron meteorites p 1242 N94-16240
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388

IRON OXIDES
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Iron oxide bands in the visible and near-infrared reflectance spectra of primitive asteroids p 1242 N94-16274
Complex zoning behavior in pyroxene in FeO-rich chondrules in the Semarkona ordinary chondrite p 1243 N94-16284
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy [DE93-015683] p 940 N94-17235

IRRADIATION
Induced thermoluminescence study of experimentally shock-loaded oligoclase p 953 N94-16266
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBC [DE93-015491] p 1210 N94-16460
Heat shock protein induction in human cells by CO2 laser irradiation [AD-A266430] p 1117 N94-16545
Evolution of microstructure in face centered cubic metals during irradiation: A review [DE93-015682] p 958 N94-16662
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation [DE93-015808] p 1040 N94-16664
Bioeffects of radiofrequency radiation on cell growth and differentation. Volume 1: Engineering considerations [AD-A267754] p 1118 N94-17232
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation [AD-A268392] p 1134 N94-17535
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation [DE93-016161] p 974 N94-17676

ISCHEMIA
Cumulative effect of repeated brief cerebral ischemia [AD-A267155] p 1121 N94-15736
Neurotoxicity of hemoglobin in cortical cell culture [AD-A266506] p 1128 N94-16786

ISING MODEL
Dynamical Ising model simulations of nucleation and growth in copper-cobalt alloys [DE93-015336] p 957 N94-16015

ISOMERIZATION
Mechanistic models of soot formation [AD-A267806] p 950 N94-17008

ISOSTATIC PRESSURE
Fabrication of advanced design (grooved) cermet anodes [DE93-014590] p 1012 N94-16765

ISOTHERMS
Structural and dynamical aspects of electrodeposition [AD-A266786] p 942 N94-14909
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224

ISOTOPE SEPARATION
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation [DE93-016435] p 1039 N94-16450

ISOTOPES
Extraction and isotopic analysis of medium molecular weight hydrocarbons from Murchison using supercritical carbon dioxide p 1241 N94-16184
A search for noble-gas evidence for presolar oxide grains p 954 N94-16353
Shielding from space radiations [NASA-CR-194664] p 1301 N94-17255

ISOTOPIC ENRICHMENT
Effects of bulk composition on production rates of cosmogenic nuclides in meteorites p 1245 N94-16385
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation [DE93-016435] p 1039 N94-16450

ISOTOPIC LABELING
Chemical and isotopic compositions in acid residues from various meteorites p 1243 N94-16291
Isotopic signatures and distribution of nitrogen and trapped and radiogenic xenon in the Acapulco and FRO90011 meteorites p 1243 N94-16317
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites p 1244 N94-16343

ISOTROPIC MEDIA
Surface waves in an inhomogeneous, isotropic, elastic half-space [IFTR-18/1991] p 1060 N94-17047

ISOTROPIC TURBULENCE
A numerical investigation of energy transfer and subgrid-scale eddy-viscosity in homogeneous, isotropic, and shear turbulence [AD-A267265] p 1029 N94-17363

ITERATION
Fixed point iterations for strictly hemi-contractive maps in uniformly smooth Banach spaces [DE93-628591] p 1175 N94-17644

ITERATIVE SOLUTION
Iteration scheme for the multiparameter nonlinear boundary value problem with the additional conditions and its application to some field models [DE93-626638] p 1168 N94-14933
A sequential quadratic programming algorithm using an incomplete solution of the subproblem [DE93-017439] p 1149 N94-16120
Development of iterative techniques for the solution of unsteady compressible viscous flows [NASA-CR-194657] p 1027 N94-17129
Steepest descent approximations for accretive operator equations [DE93-628586] p 1171 N94-17667

IUE
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations [NASA-CR-194616] p 1236 N94-16492
The chromosphere of VV cephei and the distribution of circumstellar dust around red giants and supergiants [NASA-CR-193594] p 1297 N94-16866

J

J INTEGRAL
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach [NASA-TM-109023] p 955 N94-15708
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen [AD-A267879] p 960 N94-17041

JAMMING
Alternative optical architectures for multichannel adaptive optical processing [AD-A267052] p 1189 N94-15664
Signal processing in impulsive electromagnetic interference [AD-A266425] p 998 N94-16557

JAPANESE SPACE PROGRAM
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs p 911 N94-15555
The Japanese Space Station utilization plan p 977 N94-16074

JAPANESE SPACECRAFT
Pre-phase a study report of lunar polar orbiter [NASDA-TK-SS0440] p 873 N94-15000
TRMM radar p 990 N94-15894

JET AIRCRAFT NOISE
The 1968 highlights --- NASA programs and research [NASA-TM-109627] p 1302 N94-15413
The 1971 highlights --- NASA programs and research [NASA-TM-109629] p 1302 N94-15417
Technical evaluation report on the AGARD-PEP Specialists Meeting on Combat Aircraft Noise [NLR-TP-91445-U] p 1177 N94-15506

JET BOUNDARIES
The turbulent wall jet [AD-A267675] p 855 N94-14963

JET CONTROL
Heat transfer parametric system identification [AD-A268525] p 929 N94-17543

JET ENGINE FUELS
Advanced thermally stable jet fuels [DE93-017711] p 975 N94-16996
Lifted turbulent jet flames [AD-A267911] p 952 N94-17381

JET ENGINES
Jet engine performance enhancement through use of a wave-rotor topping cycle [NASA-TM-4486] p 870 N94-17470

JET FLOW
The turbulent wall jet [AD-A267675] p 855 N94-14963
An experimental study of ASTOVL related jet flows to produce CFD code validation data. Phase 3: Results of experiments [TT-9203] p 1020 N94-15645
Mechanistic models of soot formation [AD-A267806] p 950 N94-17008
Two-dimensional, high flow, precisely controlled monodisperse drop source [AD-A267660] p 1028 N94-17250
Lifted turbulent jet flames [AD-A267911] p 952 N94-17381

JET IMPINGEMENT
Fluid flow and heat convection studies for actively cooled airframes [NASA-CR-194624] p 1024 N94-16491

JET VANES
Heat transfer parametric system identification [AD-A268525] p 929 N94-17543

JETTISONING
Crew escape certification test [NASA-TM-109530] p 1136 N94-15392

JFET
Cryogenic measurements of aerojet GaAs n-JFETs [NASA-TM-103972] p 1009 N94-15765

JOINTS (JUNCTIONS)
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts [NASA-CR-193576] p 1048 N94-17088

JOSEPHSON JUNCTIONS
Nb-based SJTJ for nuclear detection: Preliminary results with alpha radiation p 905 N94-15068

JP-8 JET FUEL
Advanced thermally stable jet fuels [DE93-017711] p 975 N94-16996

JUNCTION DIODES
Submillimeterwave SIS mixer developments p 903 N94-15054
Substrate effects in superconducting tunnel junction detectors p 908 N94-15083
A multilayered approach to superconducting tunnel junction x ray detectors p 908 N94-15089
Quasiparticle trapping in distributed superconducting three-terminal tunnel junction devices p 910 N94-15101
Design of broadband wire antennas for frequency hopping applications [AD-A267405] p 1001 N94-17025

JUPITER (PLANET)
Voyager encounter highlights [NASA-TM-109420] p 1246 N94-15239
Orbital evolution of dust from comet Schwassmann-Wachmann 1: A case of one-to-one resonance trapping p 1242 N94-16270

JUPITER ATMOSPHERE
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432
Multispectral observations of the Jovian aurora
[NASA-CR-193628] p 1297 N94-16884
JUPITER RED SPOT
Voyager encounter highlights
[NASA-TM-109420] p 1246 N94-15239
JUPITER SATELLITES
Voyager encounter highlights
[NASA-TM-109420] p 1246 N94-15239

K

K-EPSILON TURBULENCE MODEL
Implementation of an anisotropic turbulence model in the COMMIX-1C/ATM computer code
[DE93-015541] p 1023 N94-16444
Computation of confined coflow jets with three turbulence models
[NASA-TM-106378] p 1025 N94-16879
KALMAN FILTERS
Target detection by way of Kalman filtering
[AD-A267314] p 1000 N94-16945
Hypervelocity orbital intercept guidance using certainty control
[AD-A267297] p 1174 N94-17219
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
KAONS
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117
A high sensitivity search for CP violating rare K(sub L) decays and precision measurement of the direct CP violation parameter (epsilon)(prime)/(epsilon) via the four K (yields) 2(pi) decay modes
[DE93-016866] p 1184 N94-16899
KAPOETA ACHONDRITE
Shock-thermal history of Kapoeta howardite matter on data of thermoluminescence analysis of individual mineral grains p 953 N94-16267
KARHUNEN-LOEVE EXPANSION
A novel approach for structural mechanics problems with stochasticity
[AD-A266189] p 1059 N94-16123
KETONES
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494
KEVLAR (TRADEMARK)
The effect of plasma treatment on interfacial bond characteristics of Kevlar/epoxy laminates as measured by T-peel tests
[AD-A266920] p 930 N94-14999
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124
KINEMATICS
An experimental comparison of CLOS and C(++) implementations of an object-oriented graphical simulation of walking robot kinematics
[AD-A267168] p 1165 N94-15855
A measurement station for study of Earth moving tools and ground cutting processes
[IFTR-10/1991] p 985 N94-17068
KINETIC THEORY
Stability analysis for the flow of granular materials down an inclined plane using kinetic model
[DE93-016852] p 1026 N94-16958
Discrete models of the Boltzmann equation: Structure of the collision operator of sound propagation
[IFTR-2/1992] p 1178 N94-17051
A basic principles description of liquid vapor phase transitions
[AD-A268331] p 1176 N94-17581
KINETICS
A measurement station for study of Earth moving tools and ground cutting processes
[IFTR-10/1991] p 985 N94-17068
KINOFORM
Fabrication techniques for very fast diffractive lenses p 1196 N94-17345
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
KNOWLEDGE BASED SYSTEMS
KBSA concept demo
[AD-A267054] p 1166 N94-16770
Design and diagnosis problem solving with multifunctional technical knowledge bases
[AD-A268375] p 1234 N94-17419
Incremental rederivation of software artifacts: FY 1992
[AD-A267968] p 1155 N94-17491
KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Development of a computer supported instrumentation for economic planning and evaluation of production facilities for fiber reinforced composites elements p 932 N94-15260
Design and diagnosis problem solving with multifunctional technical knowledge bases
[AD-A268375] p 1234 N94-17419
KNOWLEDGE REPRESENTATION
An automated approach for classifying generic terrain features using digital elevation data
[AD-A268385] p 1084 N94-17421
KNUDSEN FLOW
DSMC simulations of Mach 20 nitrogen flows about a 70 degree blunted cone and its wake
[NASA-TM-107762] p 1018 N94-15291
KOHOUTEK COMET
The 1973 highlights --- Pioneer and Mariner space probes and other advancements
[NASA-TM-109624] p 1302 N94-15410
KOLMOGOROV THEORY
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
KOLMOGOROV-SMIRNOV TEST
The distribution of a sum of binomial random variables
[AD-A266969] p 1172 N94-15002
KREEP
On the composition of neuKREEP: QMD contamination at Apollo 11? p 1266 N94-16276
The monzonorite-anorthosite connection: The petrogenesis of terrestrial KREEP p 1104 N94-16365
KUIPER AIRBORNE OBSERVATORY
C 141 KAO solar eclipse mission
[NASA-TM-109676] p 1298 N94-15522

L

LABOR
Industrial labor relations manual
[NHB-5200.1B] p 1224 N94-15939
The NASA competitive placement plan for positions GS-15 and below (including trades and labor positions)
[NHB-3335.1C] p 1224 N94-15944
LABORATORIES
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623
A ten year review of performance of photovoltaic systems
[DE93-015649] p 1093 N94-17217
LACTATES
Increased vascular resistance with hemoglobin-based oxygen carriers
[AD-A266454] p 1123 N94-16565
LAGEOS (SATELLITE)
Prelaunch optical characterization of the Laser Geodynamic Satellite (LAGEOS 2)
[NASA-TP-3400] p 884 N94-15193
Laser tracking for vertical control p 911 N94-15553
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Historical MOBLAS system characterization p 915 N94-15579
LAGRANGE MULTIPLIERS
A sequential quadratic programming algorithm using an incomplete solution of the subproblem
[DE93-017439] p 1149 N94-16120
LAGRANGIAN EQUILIBRIUM POINTS
Energy potential analysis of zero velocity curves in the restricted three-body problem
[AD-A267512] p 1170 N94-17076
LAGRANGIAN FUNCTION
A sequential quadratic programming algorithm using an incomplete solution of the subproblem
[DE93-017439] p 1149 N94-16120
Variational principles of heat exchange and their applications in construction physics, part 2
[IFTR-19/1991] p 1061 N94-17069
LAGUERRE FUNCTIONS
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372
LAKES
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369
Do it yourself remote sensing: Generating an inexpensive, high tech, real science lake mapping project for the classroom p 1086 N94-16407
Seasonal and spatial variations in phytoplanktonic chlorophyll in eutrophic Mono Lake, California, measured with the Airborne Visible and Infrared Imaging Spectrometer (AVIRIS) p 1069 N94-16684
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426
LAMINAR BOUNDARY LAYER
Swept shock wave/laminar boundary layer interactions, experimental, and numerical results p 1017 N94-15198
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
LAMINAR FLOW
Electrophoresis visualisation p 944 N94-15163
Theoretical study of laminar film condensation on horizontal ellipitical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737
Investigation of radiative interaction in laminar flows using Monte Carlo simulation
[NASA-CR-194604] p 1021 N94-15795
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532
LAMINATES
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
The effect of plasma treatment on interfacial bond characteristics of Kevlar/epoxy laminates as measured by T-peel tests
[AD-A266920] p 930 N94-14999
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
Sound radiation from infinite laminated composite shell with periodic rib stiffening
[DRA/TM(USGR)92326] p 933 N94-15699
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484
Stress analysis of laminated composites with preformed holes. Part 1: Single plies with embedded material discontinuities
[AD-A266524] p 936 N94-16795
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836
Stochastic damage evolution in textile laminates p 939 N94-16861
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457
LAND MANAGEMENT
Louisiana delta study
[NASA-TM-109622] p 1095 N94-15408
Measuring dry plant residues in grasslands: A case study using AVIRIS p 1072 N94-16697
LAND MOBILE SATELLITE SERVICE
Planned LMSS propagation experiment using ACTS: Preliminary antenna pointing results during mobile operations p 995 N94-16041
An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048
A study of land mobile satellite service multipath effects using SATLAB software p 997 N94-16051

Regulation of low Earth orbit satellites
p 892 N94-17159

LANDAU DAMPING
Structure and damping of toroidal drift waves (and their implications for anomalous transport)
[DE93-014005] p 1203 N94-16822
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869

LANDAU FACTOR
The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972

LANDAU-GINZBURG EQUATIONS
Thermally-sustained structure in convectively unstable systems
[NASA-TM-106375] p 1027 N94-17112

LANDFORMS
Magellan: Principal Venus science findings
p 989 N94-15887
Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush
p 1086 N94-16318
Relief of some small landforms on Venus
p 1293 N94-16418
An automated approach for classifying generic terrain features using digital elevation data
[AD-A268385] p 1084 N94-17421

LANDING AIDS
Wide-area Differential Global Positioning System (WDGPS)/Wide-area Integrity Broadcast (WIB) alternatives analysis
[DOT/FAA/SE-93/3] p 864 N94-16906

LANDING GEAR
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 886 N94-15951

LANDING LOADS
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 886 N94-15951

LANDING MODULES
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831

LANDING SITES
Mars Analog Site Study (MASS) p 1252 N94-16200
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
Galileo photometry of Apollo landing sites
p 1259 N94-16234
Earth-based and Galileo SSI multispectral observations of eastern mare serenitatis and the Apollo 17 landing site p 1261 N94-16244
Searching for neuKREEP: An EMP study of Apollo 11 Group A basalts p 1266 N94-16275
Mars exobiology landing sites for future exploration
p 1278 N94-16339

LANDMARKS
Unitary plan wind tunnel landmark dedication and revitalization
[NASA-TM-109649] p 1302 N94-15434

LANDSAT SATELLITES
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342
The 1977 highlights
[NASA-TM-109626] p 1302 N94-15412
EOS Laser Atmosphere Wind Sounder (LAWS) investigation
[NASA-CR-193445] p 1109 N94-17525

LANDSAT 4
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508

LANGMUIR-BLODGETT FILMS
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Synthesis of novel electrically conducting polymers: Potential conducting Langmuir-Blodgett films and conducting polymers on defined surfaces
[NASA-CR-194651] p 972 N94-17297

LANGUAGE PROGRAMMING
A CENTAUR tutorial
[INRIA-RT-140] p 1142 N94-14978
Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool
[AD-A267560] p 1153 N94-17107

LANGUAGES
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977

LANTHANUM OXIDES
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868
Low-temperature sintering and phase changes in chromite interconnect materials
[DE93-015676] p 961 N94-17234

LAP JOINTS
Overview of the FAA/DCA/NLR programs related to ageing aircraft
[NLR-TR-92119-U] p 854 N94-17614

LAPLACE EQUATION
An upwind multigrid method for solving viscous flows on unstructured triangular meshes
[NASA-TM-109343] p 1027 N94-17061

LAPLACE TRANSFORMATION
Numerical solution of a second order boundary problem for two dimensions using galerkin approximations
[AD-A268128] p 1171 N94-17521

LARGE SCALE INTEGRATION
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054

LARGE SPACE STRUCTURES
Results of an electrical power system fault study (CDDF)
[NASA-TP-3413] p 884 N94-15007
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462
Structural mechanics division research and technology accomplishments for CY 1992 and plans for CY 1993
[NASA-TM-107752] p 1062 N94-17479

LASER ABLATION
Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
Negative ion formation in small carbon clusters
[DE93-015436] p 1182 N94-16064
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBC
[DE93-015491] p 1210 N94-16460

LASER ALTIMETERS
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
Mars laser altimeter based on a single photon ranging technique p 921 N94-15619
Multi-beam laser altimeter p 921 N94-15620

LASER ANEMOMETERS
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386

LASER ANNEALING
Activation and deactivation of high concentration arsenic with some evidence of precipitation
[DE93-016437] p 950 N94-16952

LASER APPLICATIONS
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145
Lunar ranging
[NASA-TM-109603] p 1236 N94-15311
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs
p 911 N94-15555
Applications of SLR p 911 N94-15556
SLR data screening; location of peak of data distribution p 912 N94-15560
Preliminary results from the portable standard satellite laser ranging intercomparison with MOBLAS-7
p 913 N94-15568
Tracking capabilities of SPADs for laser ranging
p 914 N94-15570
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578
Optimum wavelengths for two color ranging
p 915 N94-15580
Two wavelength satellite laser ranging using SPAD
p 916 N94-15584
Geometric analysis of satellite laser ranging data
p 917 N94-15587
Compensation for the distortion in satellite laser range predictions due to varying pulse travel times
p 917 N94-15590
Timebias corrections to predictions
p 875 N94-15591
Poisson filtering of laser ranging data
p 917 N94-15593
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
Determination of GTA welding efficiencies
[AD-A267163] p 1046 N94-15738
RELMA: On-line quality control in the rubber mixing room using laser analysis p 984 N94-16005
Development of the Laser-based R/D Test-bed System (LTS) p 978 N94-16080
Center of Excellence in Laser Medicine
[DE93-016541] p 1122 N94-16113
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Laser weld repair of tantalum sheet
[DE93-016417] p 1041 N94-16871
Tip-tilt compensation: Resolution limits for ground-based telescopes using laser guide star adaptive optics
[DE93-016426] p 1237 N94-16872
Acousto-optical classifier
[AD-D015894] p 1000 N94-16921
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028
The determination of the Young moduli of a material after exposure to laser light and delineation of the zone of laser alterations
[IFTR-37/1991] p 1061 N94-17058
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Low cost paths to binary optics p 1197 N94-17353
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436
EOS Laser Atmosphere Wind Sounder (LAWS) investigation
[NASA-CR-193445] p 1109 N94-17525
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532
A new method of designing multilayer optical thin film coatings
[DE93-624683] p 974 N94-17611

LASER ARRAYS
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578

LASER BEAMS
Figures of merit for laser beam quality
p 1043 N94-14994
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145
Multi-beam laser altimeter p 921 N94-15620
Thomson backscattered x rays from an intense laser beam
[AD-A267125] p 1038 N94-15686
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054
Development of the Laser-based R/D Test-bed System (LTS) p 978 N94-16080
Center of Excellence in Laser Medicine
[DE93-016541] p 1122 N94-16113
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting
[DE93-013582] p 1183 N94-16818
Proposal of a simple mathematical model for the action of a laser on a metal plate
[IFTR-36/1991] p 1041 N94-17065
Hazard calculations of diffuse reflected laser radiation for the SELENE program
[NASA-TM-4520] p 1042 N94-17285
Laser beam steering device p 1045 N94-17357
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567

LASER CAVITIES
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436

LASER DAMAGE
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852

Wound healing after laser injury to skin: The effect of occlusion and vitamin E
[AD-A266473] p 1128 N94-16779
Hazard calculations of diffuse reflected laser radiation for the SELENE program
[NASA-TM-4520] p 1042 N94-17285

LASER DOPPLER VELOCIMETERS
Laser Doppler velocimetry measurements across a normal shock in transonic flow
[AD-A267240] p 855 N94-14973
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling
p 1018 N94-15201
Development of the seeding system used for laser velocimeter surveys of the NASA Low-Speed Centrifugal Compressor flow field
[NASA-TM-4485] p 1032 N94-15445
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276

LASER GUIDANCE
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929

LASER INDUCED FLUORESCENCE
Electronic spectroscopy of the gas-phase OH-Kr van der Waals complex
[AD-A266891] p 942 N94-14946
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422

LASER MATERIALS
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
An improved light source for laser ranging
p 913 N94-15567

LASER MODE LOCKING
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Simultaneous compression of the passively mode-locked pulsewidth and pulse train
p 913 N94-15566
An improved light source for laser ranging
p 913 N94-15567

LASER MODES
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054
Pulsed hydrogen fluoride overtone chemical laser studies
[AD-A267597] p 1041 N94-17193

LASER OUTPUTS
Ion doped quantum well lasers
[AD-A267198] p 1038 N94-15853
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Optical effects of regolith processes on S asteroids as simulated by laser impulse alteration of ordinary chondrite p 1246 N94-16422
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Controlling chaotic behavior in CO2 and other lasers
[AD-A266431] p 1040 N94-16546
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028
The determination of the Young moduli of a material after exposure to laser light and delineation of the zone of laser alterations
[IFTR-37/1991] p 1061 N94-17058
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230

LASER PLASMA INTERACTIONS
High frequency Raman current drive
p 1201 N94-15208
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
X ray laser program
[AD-A267075] p 1038 N94-15628
Multi-frame x ray imaging with a large area 40ps camera
[DE93-017179] p 1035 N94-16960
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663

LASER PLASMAS
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
Spectroscopic and computer modeling investigations of a laser-sustained plasma
[IFTR-30/1991] p 1204 N94-17066
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630
Resist performance in soft x ray projection lithography
[DE93-016490] p 1036 N94-17647

LASER POWER BEAMING
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522

LASER PROPULSION
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522

LASER PUMPING
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630

LASER RANGE FINDERS
Prelaunch optical characterization of the Laser Geodynamic Satellite (LAGEOS 2)
[NASA-TP-3400] p 884 N94-15193
Lunar ranging
[NASA-TM-109603] p 1236 N94-15311
Eighth International Workshop on Laser Ranging Instrumentation
[NASA-CP-3214] p 911 N94-15552
Laser tracking for vertical control p 911 N94-15553
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs
p 911 N94-15555
Applications of SLR p 911 N94-15556
Satellite signatures in SLR observations
p 912 N94-15557
Work at Graz on satellite signatures
p 898 N94-15558
The precision of today's satellite laser ranging systems p 912 N94-15559
SLR data screening; location of peak of data distribution p 912 N94-15560
Adaptive median filtering for preprocessing of time series measurements p 912 N94-15561
SATCOP mission planning software package
p 912 N94-15562
Nd:YLF laser for airborne/spaceborne laser ranging
p 913 N94-15563
Alternative wavelengths for laser ranging
p 913 N94-15564
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Simultaneous compression of the passively mode-locked pulsewidth and pulse train
p 913 N94-15566
An improved light source for laser ranging
p 913 N94-15567
Preliminary results from the portable standard satellite laser ranging intercomparison with MOBLAS-7
p 913 N94-15568
Performance optimization of detector electronics for millimeter laser ranging p 913 N94-15569
Tracking capabilities of SPADs for laser ranging
p 914 N94-15570
How to squeeze high quantum efficiency and high time resolution out of a SPAD p 914 N94-15571
The solid state detector technology for picosecond laser ranging p 914 N94-15572
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
The first satellite laser echoes recorded on the streak camera p 914 N94-15574
Experience and results of the 1991 MTLRS-1 USSR campaign p 914 N94-15575
ETALON-1,-2 center of mass correction and array reflectivity p 915 N94-15576
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578
Historical MOBLAS system characterization
p 915 N94-15579
Optimum wavelengths for two color ranging
p 915 N94-15580
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Measuring atmospheric dispersion with WLRS in multiple wavelength mode p 916 N94-15582
Millimeter accuracy satellites for two color ranging
p 916 N94-15583
Two wavelength satellite laser ranging using SPAD
p 916 N94-15584
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications
p 916 N94-15586
Geometric analysis of satellite laser ranging data
p 917 N94-15587
Improvement of SLR accuracy, a possible new step
p 917 N94-15588
On the accuracy of ERS-1 orbit predictions
p 874 N94-15589
Compensation for the distortion in satellite laser range predictions due to varying pulse travel times
p 917 N94-15590
Timebias corrections to predictions
p 875 N94-15591
Formation of on-site normal points
p 917 N94-15592
Poisson filtering of laser ranging data
p 917 N94-15593
Computer networking at SLR stations
p 917 N94-15594
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
HP upgrade operational streamlining
p 918 N94-15596
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
LLR: Activities in Wettzell p 876 N94-15600
Matera Laser Ranging Observatory (MLRO): An overview p 877 N94-15601
Performance of the upgraded Orroral laser ranging system p 877 N94-15602
Sub-cm ranging and other improvements in Graz
p 919 N94-15603
Upgrading of the Borowiec laser station
p 877 N94-15604
Development of Shanghai satellite laser ranging station p 877 N94-15605
WLRS --- Wettzell Laser Ranging System (WLRS)
p 877 N94-15606
Ground based laser ranging for satellite location
p 919 N94-15607
New progress of ranging technology at Wuhan Satellite Laser Ranging Station p 877 N94-15608
TLRS-3 system upgrades p 877 N94-15609
Results of the MTLRS-1 upgrade p 877 N94-15610
The new MTLRS-1 receiving system
p 877 N94-15611
The new MTLRS transmitting system
p 877 N94-15612
Transputer based control system for MTLRS
p 877 N94-15613
Airborne 2 color ranging experiment
p 920 N94-15614
GLRS-R 2-colour retroreflector target design and predicted performance p 921 N94-15615
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Satellite laser station Helwan status 1992
p 877 N94-15621
Optical attenuation mechanism upgrades, MOBLAS, and TLRS systems p 922 N94-15622
The third generation SLR station Potsdam no. 7836
p 877 N94-15623
Performance comparison of high speed microchannel plate photomultiplier tubes p 922 N94-15624
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
Digital laser range finder emulator
[AD-D015811] p 1040 N94-16540
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677

LASER SPECTROSCOPY
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520

LASER STABILITY
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414
LASER TARGET INTERACTIONS
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077
Development of the Laser-based R/D Test-bed System (LTS) p 978 N94-16080
Soft x ray emission from Alexandrite laser-matter-interaction
[AD-A267905] p 1042 N94-17378
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663
LASER TARGETS
Airborne 2 color ranging experiment p 920 N94-15614
GLRS-R 2-colour retroreflector target design and predicted performance p 921 N94-15615
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663
LASER WELDING
Determination of GTA welding efficiencies
[AD-A267163] p 1046 N94-15738
Laser weld repair of tantalum sheet
[DE93-016417] p 1041 N94-16871
LASERS
Reduction of parasitic lasing
[NASA-CASE-LAR-14645-1-SB] p 1039 N94-15942
LASING
Reduction of parasitic lasing
[NASA-CASE-LAR-14645-1-SB] p 1039 N94-15942
Lasing dye sensor for chemical vapors
[AD-D015786] p 1040 N94-16533
LATCHES
Attachment device
[NASA-CASE-MSC-21885-1] p 1047 N94-15925
LATENT HEAT
Some thoughts on future rain mapping missions (TRMM follow-on) p 992 N94-15906
Validation and analysis of microwave-derived rainfall over the tropics
[AD-A267785] p 1108 N94-17303
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610
Boundary layer structure over areas of heterogeneous heat fluxes
[DE93-010657] p 1110 N94-17673
LATTICE VIBRATIONS
Search for far infrared radiation from optically pumped defect modes
[AD-A266744] p 1206 N94-15822
LAUGHING
Astro smile
[NASA-TM-109506] p 879 N94-15225
LAUNCH DATES
RADARSAT program p 898 N94-15893
LAUNCH VEHICLE CONFIGURATIONS
Role and development of small satellite missions in space plasma physics p 891 N94-17149
LAUNCH VEHICLES
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
Aluminum-lithium technology
[TABES PAPER 93-601] p 962 N94-16137
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
The closing window of opportunity: Addressing the US space launch vehicle crisis
[TABES PAPER 93-640] p 878 N94-16148
Small launchers (current and future projects in the world) p 878 N94-17137
Small satellite constellation deployment strategies p 878 N94-17138
NEXT launch system p 878 N94-17141
LAUNCHING
Small satellite missions to long-period comets p 874 N94-17144
LAUNCHING SITES
Small launchers (current and future projects in the world) p 878 N94-17137
Small satellite constellation deployment strategies p 878 N94-17138
Delta launch vehicle: Accommodations for small satellites p 878 N94-17139
LAVA
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices p 1248 N94-16178
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5 p 1258 N94-16227
Lava flow-field morphological classification and interpretation: Examples from Venus p 1259 N94-16230
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus p 1260 N94-16235
The cooling rates of pahoehoe flows: The importance of lava porosity p 1103 N94-16282
The rheology and composition of cryovolcanic flows on icy satellites p 1243 N94-16294
Fractal geometry of some Martian lava flow margins: Alba Patera p 1270 N94-16298
The distribution of large volcanoes on Venus as a function of height and altitude p 1271 N94-16303
Lava crusts and flow dynamics p 1103 N94-16316
Meander properties of Venusian channels p 1275 N94-16324
Sheet flow fields on Venus p 1278 N94-16338
Martian lavas: Three complementary remote sensing techniques to derive flow properties p 1283 N94-16366
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling p 1286 N94-16381
Relief of some small landforms on Venus p 1293 N94-16418
The use of TIMS for mapping different pahoehoe surfaces: Mauna Iki, Kilauea p 1065 N94-16606
Volcanic thermal features observed by AVIRIS p 1068 N94-16680
LAW (JURISPRUDENCE)
Emerging technologies for the changing global market [TABES PAPER 93-612] p 930 N94-16144
Americans with Disabilities Act considerations for the practice of occupational medicine p 1124 N94-16611
LAWS
Quantitative assessment of the accuracy of constitutive laws for plasticity with an emphasis on cyclic deformation
[AD-A267562] p 961 N94-17109
LAY-UP
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
LEACHING
Stalking the LREE-enriched component in ureilites p 1241 N94-16190
LEAD (METAL)
Lead Surveillance Program p 1127 N94-16640
LEAD COMPOUNDS
Lead chalcogenides based IR photosensitive array detectors with coordinate addressing p 903 N94-15053
Densifying and stabilizing ingredient
[AD-D015751] p 975 N94-16934
LEAD POISONING
Lead poisoning: An overview p 1124 N94-16614
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
Lead Surveillance Program p 1127 N94-16640
LEAD TELLURIDES
A monolithic PbTeCCD focal plane array for MWIR imaging p 910 N94-15100
LEADING EDGE SWEEP
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
LEADING EDGES
Suppression of dynamic stall with a leading-edge slat on a VR-7 airfoil
[NASA-TP-3357] p 856 N94-15657
Fluid flow and heat convection studies for actively cooled airframes
[NASA-CR-194624] p 1024 N94-16491
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
LEAKAGE
Development of braided fiber seals for engine applications p 939 N94-16859
Leak detection utilizing analog binaural (VLSI) techniques
[NASA-CASE-NPO-18399-1-CU] p 1014 N94-17323
Electrical properties of sol-gel PZT thin films for decoupling capacitor applications
[DE93-016491] p 1015 N94-17648
LEAR JET AIRCRAFT
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078
LEARNING
Complex information coordination performance: Differential changes in working memory contributions following training
[AD-A267007] p 1132 N94-15762
Theoretical and experimental research into biological mechanisms underlying learning and memory
[AD-A267441] p 1133 N94-17022
Processes involved in the integration of pictures and discourse
[AD-A268150] p 1134 N94-17468
LEARNING CURVES
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
LEAST SQUARES METHOD
Ground-truthing AVIRIS mineral mapping at Cuprite, Nevada p 1069 N94-16682
LEAVES
Oregon transect: Comparison of leaf-level reflectance with canopy-level and modelled reflectance p 1073 N94-16702
LECTURES
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953
LEE WAVES
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247
LENGTH
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681
LENSES
Ring lens focusing and push-pull tracking scheme for optical disk systems p 1227 N94-14990
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
Binary optics at Hughes Danbury Optical Systems p 1195 N94-17344
Fabrication techniques for very fast diffractive lenses p 1196 N94-17345
Fabrication of micro-optical devices p 1197 N94-17351
Diffractive optics in adverse environments p 1197 N94-17352
Measurements of microlens performance p 1197 N94-17355
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
Theory of dispersive microlenses p 1198 N94-17361
LEPTONS
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
LEVITATION
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433
LIBRARIES
A TRALINET guide to the Internet
[AD-A266946] p 1229 N94-15178
Managing information as a corporate asset: Key strategies for information professionals to remain competitive
[DE93-015515] p 1232 N94-16875
LICENSING
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623
LIE GROUPS
Quantum Heisenberg groups and Sklyanin algebras
[DE93-628590] p 1175 N94-17643
LIFE (DURABILITY)
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656
Development of a constitutive model for creep and life prediction of advanced silicon nitride ceramics
[DE93-015894] p 968 N94-16813
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843

Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638

LIFE SCIENCES
STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452
Canadian microgravity experiments flown in 1989-1990 p 977 N94-16075
Statistical techniques for study design of microgravity life sciences experiments p 980 N94-16094
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 378)
[NASA-SP-7011(378)] p 1122 N94-16478
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 380)
[NASA-SP-7011(380)] p 1122 N94-16479
Looking at science on board Eureca
[ESA-BR-80] p 874 N94-16584
Design of an experiment hardware for the ESA space facility BIOPAN
[DLR-FB-93-06] p 876 N94-17548

LIFE SUPPORT SYSTEMS
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 378)
[NASA-SP-7011(378)] p 1122 N94-16478
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 380)
[NASA-SP-7011(380)] p 1122 N94-16479
Illness/injury pattern complex 40 (Titan) p 1125 N94-16625
Aircrew/groundcrew life support systems research. Volume 1: CLIN 0001 research requirements
[AD-A268229] p 1139 N94-17563
Aircrew/groundcrew life support systems research. Volume 2: CLIN 0002 task order requirements
[AD-A268230] p 1139 N94-17564

LIFT FANS
The lift-fan powered-lift aircraft concept: Lessons learned
[NASA-CR-177616] p 866 N94-15718
Lift-fan aircraft: Lessons learned-the pilot's perspective
[NASA-CR-177620] p 867 N94-15950

LIFTING BODIES
The 1966 highlights — NASA research programs
[NASA-TM-109444] p 1302 N94-15343
The 1968 highlights — NASA programs and research
[NASA-TM-109627] p 1302 N94-15413
Subsonic aerodynamic characteristics of the HL-20 lifting-body configuration
[NASA-TM-4515] p 861 N94-17284

LIGAMENTS
Carpal tunnel syndrome and other cumulative trauma disorders of the arm and hand and occupation in US Navy enlisted personnel
[AD-A267747] p 1129 N94-17374
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457

LIGANDS
Binding of carbon dioxide to metal macrocycles: Toward a mechanistic understanding of electrochemical and photochemical carbon dioxide reduction
[DE93-016244] p 949 N94-16870
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192

LIGHT (VISIBLE RADIATION)
Visible light photon counters for astronomy p 902 N94-15043
Method and apparatus for performing scanning tunneling optical absorption spectroscopy
[AD-D015796] p 948 N94-16539

LIGHT AMPLIFIERS
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630

LIGHT BEAMS
Plume primary smoke p 923 N94-15218
Linear encoding device
[NASA-CASE-GSC-13562-1] p 1147 N94-15703
Rotary encoding device
[NASA-CASE-GSC-13543-1] p 1189 N94-15705
Rotary encoding device
[NASA-CASE-GSC-13556-1] p 1148 N94-15943
Controlling chaotic behavior in CO2 and other lasers
[AD-A266431] p 1040 N94-16546
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
Study of high speed interference photography with two-dimensional acousto-optical lattice deflection
[AD-A267823] p 1035 N94-17402

LIGHT CURVE
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
Variability of the Seyfert galaxy MKN 766 in the Rosat all sky survey
[MPE-PREPRINT-221] p 1240 N94-17591

LIGHT EMITTING DIODES
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
JSEP fellowship
[AD-A266568] p 1211 N94-16800

LIGHT HELICOPTERS
Noise measurement flight test of five light helicopters
[AD-A268566] p 1179 N94-17599

LIGHT IONS
Calculations of cosmic-ray helium transport in shielding materials
[NASA-TP-3354] p 1301 N94-17666

LIGHT MODULATION
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
An optically modulated scatterer for microwave antenna metrology
[NPL-DES-126] p 986 N94-15020
Two-dimensional acousto-optical interaction theory and experimental analysis
[AD-A267761] p 1193 N94-17254
Measurements of microlens performance p 1197 N94-17355

LIGHT SCATTERING
Secondary smoke p 924 N94-15220
Convective flow effects on protein crystal growth
[NASA-CR-194560] p 1206 N94-15476
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433
Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
Scattering from binary optics p 1195 N94-17341

LIGHT SOURCES
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
An improved light source for laser ranging p 913 N94-15567
Linear encoding device
[NASA-CASE-GSC-13562-1] p 1147 N94-15703
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Acousto-optical classifier
[AD-D015894] p 1000 N94-16921

LIGHT TRANSMISSION
A method of detecting and locating electrical current imbalances
[NASA-CASE-LEW-15407-1] p 1009 N94-15706
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973
Method and apparatus for performing scanning tunneling optical absorption spectroscopy
[AD-D015796] p 948 N94-16539
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264

LIGHTNING
Mesoscale lightning
[NASA-TM-109655] p 1105 N94-15226
Venus lightning
[NASA-TM-109644] p 1105 N94-15430
Middle atmospheric electric fields over thunderstorms
[NASA-CR-194619] p 1106 N94-16493
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
[AD-A267479] p 1004 N94-17364

LIGNIN
A linear spectral matching technique for retrieving equivalent water thickness and biochemical constituents of green vegetation p 1068 N94-16678

LIMB DARKENING
Atmospheric corrections for TIMS estimated emittance p 1064 N94-16602

LIMESTONE
Earth's partial pressure of CO2 over the past 100-500 Ma; evidence from Ce anomalies in mostly shallow seas (less than 200 m) as recorded in carbonate sediments, 2 p 1104 N94-16360
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383

LIMITS (MATHEMATICS)
Automatic differentiation of limit functions
[DE93-016376] p 1168 N94-14928

LINE OF SIGHT
Hypervelocity orbital intercept guidance using certainty control
[AD-A267297] p 1174 N94-17219

LINE SPECTRA
Background suppression techniques in germanium detectors p 899 N94-15026
CdTe array detectors for high energy astronomy p 899 N94-15029
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684
Spectroscopic and computer modeling investigations of a laser-sustained plasma
[IFTR-30/1991] p 1204 N94-17066
The formation process of the He I lambda 10830 line in cool giant stars
[NASA-CR-194648] p 1240 N94-17094

LINEAR ALTERNATORS
SPDE/SPRE final summary report
[NASA-CR-187086] p 924 N94-15482

LINEAR ARRAYS
A 12.5 micron infrared detector for Earth observation p 903 N94-15052
A linear monolithic 4-6 on silicon IR detector array p 910 N94-15098
Rotary encoding device
[NASA-CASE-GSC-13543-1] p 1189 N94-15705
Sensor modelling for the Cyclops focal plane detector array based technology demonstrator
[AD-A267172] p 1190 N94-15846

LINEAR ENERGY TRANSFER (LET)
Approximate Green's function methods for HZE transport in multilayered materials
[NASA-TM-4519] p 1300 N94-17084
Energy deposition fluctuations induced by ions in microvolumes and nanovolumes: An analytic approach. 1: Theory
[AD-A267959] p 1173 N94-17495

LINEAR POLARIZATION
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187

LINEAR PROGRAMMING
Finding stable orientations of assemblies with linear programming
[AD-A266990] p 1143 N94-15212

LINEAR SYSTEMS
Efficiency effects of variation in controlled experimental variables
[DE93-014345] p 1169 N94-15979
Invariance of slip movements with respect to the control matrix
[IFTR-43/1991] p 1170 N94-17045

LINEAR TRANSFORMATIONS
The alignment-distribution graph
[NASA-CR-194292] p 1168 N94-15112
Reducing data dimension to lower signal processing computational requirements and maximize performance
[AD-A266606] p 999 N94-16728
Robust control of uncertain nonlinear systems
[AD-A268056] p 1167 N94-17506

LINEARIZATION
Nonlinear random response prediction using MSC/NASTRAN
[NASA-TM-109029] p 1179 N94-17650

LINGUISTICS
Using multiple adaptively-weighted strategies for the resolution of demonstratives
[AD-A266463] p 1150 N94-16585
Monads and comonads in intensional semantics
[AD-A266522] p 1151 N94-16790
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651

LIPIDS
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785

LIQUID ATOMIZATION
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770

LIQUID COOLING
Description of cooling water calorimetry and wall thermometry diagnostic at tokamak ASDEX-Upgrade
[IPP-5/46] p 1200 N94-14966
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
LIQUID CRYSTALS
Unidirectional solidification of liquid-crystal material
p 945 N94-15167
LIQUID FLOW
Coaxial airblast atomizers
[NASA-CR-193845] p 1016 N94-15109
LIQUID FUELS
Publications of the Oak Ridge National Laboratory Fossil Energy Program, 1 October 1991 - 31 March 1993
[DE93-014643] p 1232 N94-16967
LIQUID HELIUM
Cryogenic measurements of aerojet GaAs n-JFETs
[NASA-TM-103972] p 1009 N94-15765
LIQUID HYDROGEN
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Power Reactant Storage Assembly (PRSA) (Space Shuttle). PRSA hydrogen and oxygen DVT tank refurbishment
[NASA-CR-188262] p 926 N94-16922
ALS liquid hydrogen turbopump
[NASA-CR-194646] p 927 N94-17016
LIQUID INJECTION
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
LIQUID LEVELS
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521
LIQUID NITROGEN
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446
LIQUID OXYGEN
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Power Reactant Storage Assembly (PRSA) (Space Shuttle). PRSA hydrogen and oxygen DVT tank refurbishment
[NASA-CR-188262] p 926 N94-16922
LIQUID PHASE SINTERING
Army P/M research and development overview
[AD-A266921] p 954 N94-15104
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition
p 945 N94-15171
LIQUID PHASES
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
Ceramic fiber coatings development and demonstration
[AD-A267286] p 972 N94-17242
A basic principles description of liquid vapor phase transitions
[AD-A268331] p 1176 N94-17581
LIQUID PROPELLANT ROCKET ENGINES
Computational analysis of Variable Thrust Engine (VTE) performance
[NASA-CR-193852] p 928 N94-17442
CPIA/M5 liquid propellant engine manual
[AD-A268062] p 929 N94-17589
LIQUID ROCKET PROPELLANTS
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
LIQUID-SOLID INTERFACES
Unidirectional solidification of liquid-crystal material
p 945 N94-15167
Liquidus equilibria of lunar analogs at high pressure
p 1283 N94-16364
Particle Engulfment and Pushing by Solidifying Interfaces (PEPSI)
[NASA-CR-193856] p 960 N94-17079
LIQUID-VAPOR EQUILIBRIUM
Explosive boiling at very low heat fluxes: A microgravity phenomenon
[NASA-TM-106325] p 1046 N94-15817
LIQUID-VAPOR INTERFACES
Space Station thermal storage/refrigeration system research and development
[NASA-CR-193841] p 879 N94-15191
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
LIQUIDS
Contained liquids in microgravity, part 2
p 979 N94-16085
Partitioning of Nb, Mo, Ba, Ce, Pb, Th and U between immiscible carbonate and silicate liquids: Evaluating the effects of P2O5,F, and carbonate composition
p 953 N94-16283
A priori inequalities for an ideal-incompressible liquid in an electromagnetic field
[IFTR-9/1992] p 998 N94-16652
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
An automated system for ultrasound measurements of liquids by the resonance (Eggers) method
[IFTR-17/1992] p 1178 N94-17087
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567
LIQUIDUS
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
Transition metals in superheat melts
p 962 N94-16273
The rheology and composition of cryovolcanic flows on icy satellites p 1243 N94-16294
Liquidus equilibria of lunar analogs at high pressure
p 1283 N94-16364
LISP (PROGRAMMING LANGUAGE)
An experimental comparison of CLOS and C(++) implementations of an object-oriented graphical simulation of walking robot kinematics
[AD-A267168] p 1165 N94-15855
LITHIUM
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061
Lithium D-cell study
[NASA-CR-192705] p 1011 N94-16505
Thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18694-1-CU] p 1014 N94-17325
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
LITHIUM CHLORIDES
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567
LITHIUM COMPOUNDS
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805
LITHIUM FLUORIDES
Heat storage module p 946 N94-15172
An improved light source for laser ranging
p 913 N94-15567
LITHIUM NIOBATES
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
LITHIUM SULFUR BATTERIES
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
LITHOGRAPHY
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Subwavelength structured surfaces and their applications p 1194 N94-17337
Soft x ray emission from Alexandrite laser-matter-interaction
[AD-A267905] p 1042 N94-17378
Low voltage electron beam lithography
[AD-A267865] p 1215 N94-17389
Resist performance in soft x ray projection lithography
[DE93-016490] p 1036 N94-17647
LITHOLOGY
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement
p 1242 N94-16245
A Monazite-bearing clast in Apollo 17 melt breccia
p 1267 N94-16279
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components
p 1267 N94-16280
The dregs of crystallization in Zagami
p 1245 N94-16390
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
From minerals to rocks: Toward modeling lithologies with remote sensing p 1086 N94-16437
Mapping the mineralogy and lithology of Canyonlands, Utah with imaging spectrometer data and the multiple spectral feature mapping algorithm
p 1066 N94-16670
First results from analysis of coordinated AVIRIS, TIMS, and ISM (French) data for the Ronda (Spain) and Beni Bousera (Morocco) peridotites p 1067 N94-16675
LITHOSPHERE
LFASE report: Crustal study
[AD-A266893] p 1111 N94-14947
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Estimates of lithospheric thickness on Venus
p 1267 N94-16277
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle
p 1293 N94-16421
LOAD CARRYING CAPACITY
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052
LOAD DISTRIBUTION (FORCES)
Systematic study of effects of load misalignment in uniaxial low cycle fatigue testing at high temperatures
[NPL-DMM(A)-27] p 1057 N94-15015
Static analysis of beams on an elastic base as stated by generalized functions
[IFTR-27/1991] p 1060 N94-16923
LOAD TESTS
Systematic study of effects of load misalignment in uniaxial low cycle fatigue testing at high temperatures
[NPL-DMM(A)-27] p 1057 N94-15015
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
The IOSDL SeaSoar hydraulic unit
[IOS-300-1992] p 1114 N94-17516
LOADING RATE
An analysis of ways of determining the material constants for viscoelastic materials
[IFTR-28/91] p 951 N94-17050
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052
LOADS (FORCES)
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
LOCAL AREA NETWORKS
Applying paperless technology to achieve excellence in manufacturing operations
[TABES PAPER 93-630] p 1052 N94-16147
LOCKING
Connector systems for structures
[NASA-CASE-MSC-21998-1] p 1046 N94-15707
LOGIC CIRCUITS
A formal language for the specification and verification of synchronous and asynchronous circuits
[NASA-CR-191509] p 1144 N94-15443
Digital laser range finder emulator
[AD-D015811] p 1040 N94-16540
Computer-aided design package for designers of digital optical computers
[AD-A267866] p 1154 N94-17390
Orpheus: A synthesis framework for regular architectures
[REPT-93-016] p 1156 N94-17504
LOGIC DESIGN
Models for reactivity
[AD-A266419] p 1149 N94-16554
LOGIC PROGRAMMING
Automatic translation of database integrity constraints into compensating production rules
[REPT-92-055] p 1234 N94-17502
LOGISTICS
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943

Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
CALS test network handbook
[AD-A267587] p 1160 N94-17209

LOGISTICS MANAGEMENT
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
Defense Logistics Information System (DLIS). Procedures manual: Logistics On-Line Access (LOLA) procedures manual
[AD-A267685] p 1233 N94-17229

LONG DURATION EXPOSURE FACILITY
Long Duration Exposure Facility is coming home
[NASA-TM-109656] p 884 N94-15227
STS-32 onboard 16mm photography quick release
[NASA-TM-109472] p 880 N94-15376
STS-32 LDEF EVA training in WETF with Low and Dunbar
[NASA-TM-109473] p 1135 N94-15377
STS-32 LDEF approach in SES
[NASA-TM-109474] p 880 N94-15379
Long Duration Exposure Facility retrieval animation
[NASA-TM-109426] p 885 N94-15496
Long Duration Exposure Facility
[NASA-TM-109427] p 885 N94-15497
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques
[AD-A267055] p 885 N94-15666
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
Resolving LDEF's flux distribution: Orbital (debris?) and natural meteoroid populations p 1245 N94-16391
Third LDEF Post-Retrieval Symposium Abstracts
[NASA-CP-10120] p 1303 N94-16495
Performance of silvered Teflon thermal control blankets on spacecraft
[AD-A266284] p 887 N94-16909
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207

LONG DURATION SPACE FLIGHT
Supporting life in space
[NASA-TM-109593] p 1135 N94-15285
STS-26 long duration simulation: Crew entering SMS
[NASA-TM-109560] p 876 N94-15474

LONGITUDINAL CONTROL
Computation of a controlled store separation from a cavity p 858 N94-16513

LOOPS
The renormalization of the axial anomaly in dimensional regularization
[NIKHEF-H/92-18] p 1220 N94-17618

LOSS OF COOLANT
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980

LOUDNESS
A virtual acoustic orientation instrument
[AD-A268181] p 1134 N94-17510

LOW ALTITUDE
Radiocommunication problems of a position reporting and bidirectional messagery system using VHF/UHF with low-Earth orbit satellites p 889 N94-17136
Delta launch vehicle: Accommodations for small satellites p 878 N94-17139
Small imaging satellite for Earth observing system adjunct p 891 N94-17151
Regulation of low Earth orbit satellites p 892 N94-17159
LEOCOM-SPES: Low cost message communications p 892 N94-17161
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
Feasibility study of a personal communications system IRIDIUM-like p 893 N94-17165

LOW CARBON STEELS
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852

LOW COST
A proposed ground segment design for small satellites p 878 N94-17154
LEOCOM-SPES: Low cost message communications p 892 N94-17161
The ORBCOMM system p 893 N94-17163
S-80: A satellite for less than 50 MF p 894 N94-17172
A mini satellite called Arsene: The way to make it at a minimum cost p 895 N94-17179
TUBSAT: Low cost access to space technology p 895 N94-17180

LOW DENSITY MATERIALS
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256

LOW GRAVITY MANUFACTURING
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006

LOW NOISE
The (delta)f algorithm for beam dynamics
[DE93-015632] p 1187 N94-16660

LOW REYNOLDS NUMBER
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798

LOW SPEED
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386

LOW SPEED WIND TUNNELS
A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819

LOW TEMPERATURE
Spectroscopic investigations of nonambient systems with millimeter and submillimeter probes
[AD-A266537] p 968 N94-16796
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides
[AD-A266246] p 950 N94-16931
Transient studies of low temperature catalysts for methane conversion
[DE93-017710] p 950 N94-16962

LOW VOLTAGE
Preparation and investigation of improved low voltage electron excitable phosphors
[AD-A266852] p 963 N94-14948
Low voltage electron beam lithography
[AD-A267865] p 1215 N94-17389

LOWER ATMOSPHERE
A ray trace model for propagation loss
[AD-A266314] p 997 N94-16467

LOWER BODY NEGATIVE PRESSURE
STS-32 crew training for lower body negative pressure unit and AFE
[NASA-TM-109475] p 1120 N94-15381

LUBRICANTS
Scholarly research program in fuel analysis and combustion research
[AD-A266789] p 942 N94-14911
Heating of lubricant with an electric resistance heater
[VTT-TIED-1359] p 974 N94-17547

LUBRICATING OILS
Contained liquids in microgravity, part 2 p 979 N94-16085

LUBRICATION
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533

LUGS
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080

LUMINANCE
The effects of luminance boundaries on color perception
[AD-A268398] p 1133 N94-17397
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513

LUMINOSITY
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533

LUNAR ALBEDO
Mixing model analysis of telescopic lunar spectra p 1284 N94-16371

LUNAR ATMOSPHERE
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433

LUNAR BASES
Lunar base concepts
[NASA-TM-109607] p 1247 N94-15294
Building a lunar base
[NASA-TM-109674] p 983 N94-15519
The first lunar outpost: The design reference mission and a new era in lunar science p 874 N94-16362
Study of the National Science Foundation's South Pole Station as an analogous data base for the logistical support of a Moon laboratory
[NASA-TM-108429] p 1174 N94-17469

LUNAR COMPOSITION
Why is the Moon dark? p 1256 N94-16219
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229
Earth-based and Galileo SSI multispectral observations of eastern mare serenitatis and the Apollo 17 landing site p 1261 N94-16244
On the composition of neuKREEP: QMD contamination at Apollo 11? p 1266 N94-16276
Composition and maturity of the 60013/14 core p 1275 N94-16327
Grain surface features of Apollo 17 orange and black glass p 1289 N94-16397
Gamma ray spectrometer for Lunar Scout 2 p 1037 N94-16426

LUNAR CORE
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242

LUNAR CRATERS
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units p 1252 N94-16199
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
The size of complex craters p 1262 N94-16249
The history of mare volcanism in the Orientale Basin: Mare deposit ages, compositions and morphologies p 1269 N94-16289
Galileo SSI lunar observations: Copernican craters and soils p 1288 N94-16395
Thermogeologic mapping of the Moon from lunar orbit p 1290 N94-16405

LUNAR CRUST
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5 p 1258 N94-16227
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242

LUNAR DUST
Lunar Curatorial Facility resource
[NASA-TM-109531] p 875 N94-15393
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433

LUNAR ECLIPSES
EUVE observations of the Moon p 1250 N94-16185

LUNAR EVOLUTION
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

LUNAR EXPLORATION
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000
The 1966 highlights --- NASA research programs
[NASA-TM-109444] p 1302 N94-15343
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
Opportunity for early science return by the Artemis Program p 1291 N94-16408

LUNAR FAR SIDE
The history of mare volcanism in the Orientale Basin: Mare deposit ages, compositions and morphologies p 1269 N94-16289

LUNAR GEOLOGY
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR p 1248 N94-16177
First oxygen from lunar basalt p 1249 N94-16182

Importance of expansion and contraction in the formation of tectonic features on the Moon
p 1250 N94-16189
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5
p 1258 N94-16227
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
Galileo photometry of Apollo landing sites
p 1259 N94-16234
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Nitrogen isotopic signatures in agglutinates from breccia 79035 p 954 N94-16314
Age determinations and Earth-based multispectral observations of lunar light plains p 1275 N94-16323
Composition of Apollo 17 core 76001
p 1275 N94-16326
Composition and maturity of the 60013/14 core
p 1275 N94-16327
Lunar phase function effects on spectral ratios used for resource assessment p 1278 N94-16342

LUNAR LABORATORIES
The first lunar outpost: The design reference mission and a new era in lunar science p 874 N94-16362
Study of the National Science Foundation's South Pole Station as an analogous data base for the logistical support of a Moon laboratory
[NASA-TM-108429] p 1174 N94-17469

LUNAR LANDING
Galileo photometry of Apollo landing sites
p 1259 N94-16234
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522

LUNAR LANDING MODULES
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000

LUNAR LAUNCH
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010

LUNAR LIMB
Total solar eclipse of 3 November 1994
[NASA-RP-1318] p 1236 N94-15481

LUNAR MANTLE
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5
p 1258 N94-16227
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242

LUNAR MAPS
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units
p 1252 N94-16199
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Thermogeologic mapping of the Moon from lunar orbit
p 1290 N94-16405

LUNAR MARIA
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units
p 1252 N94-16199
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5
p 1258 N94-16227
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242
Earth-based and Galileo SSI multispectral observations of eastern mare serenitatis and the Apollo 17 landing site p 1261 N94-16244
Petrologic models of 15388, a unique Apollo 15 mare basalt p 1264 N94-16258
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components
p 1267 N94-16280
The history of mare volcanism in the Orientale Basin: Mare deposit ages, compositions and morphologies
p 1269 N94-16289
Thermogeologic mapping of the Moon from lunar orbit
p 1290 N94-16405

LUNAR ORBITER
The 1966 highlights --- NASA research programs
[NASA-TM-109444] p 1302 N94-15343

LUNAR ORBITS
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368

LUNAR PHASES
Lunar phase function effects on spectral ratios used for resource assessment p 1278 N94-16342

LUNAR PHOTOGRAPHS
Lunar multispectral mosaics from Galileo's second Earth-Moon flyby p 1288 N94-16394

LUNAR PHOTOGRAPHY
Lunar phase function effects on spectral ratios used for resource assessment p 1278 N94-16342

LUNAR PROBES
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000
The Clementine instrument complement
p 1086 N94-16370

LUNAR PROGRAMS
The first lunar outpost: The design reference mission and a new era in lunar science p 874 N94-16362
Opportunity for early science return by the Artemis Program p 1291 N94-16408

LUNAR RANGEFINDING
Lunar ranging
[NASA-TM-109603] p 1236 N94-15311
Eighth International Workshop on Laser Ranging Instrumentation
[NASA-CP-3214] p 911 N94-15552
Poisson filtering of laser ranging data
p 917 N94-15593
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
LLR: Activities in Wettzell p 876 N94-15600
Performance of the upgraded Orroral laser ranging system p 877 N94-15602
WLRS --- Wettzell Laser Ranging System (WLRS)
p 877 N94-15606

LUNAR RESOURCES
Helium-3 inventory of lunar samples: A potential future energy resource for mankind? p 1295 N94-16428

LUNAR ROCKS
Lunar Curatorial Facility resource
[NASA-TM-109531] p 875 N94-15393
Building a lunar base
[NASA-TM-109674] p 983 N94-15519
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR
p 1248 N94-16177
First oxygen from lunar basalt p 1249 N94-16182
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187
Why is the Moon dark? p 1256 N94-16219
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Galileo photometry of Apollo landing sites
p 1259 N94-16234
A Monazite-bearing clast in Apollo 17 melt breccia
p 1267 N94-16279
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components
p 1267 N94-16280
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Liquidus equilibria of lunar analogs at high pressure
p 1283 N94-16364

LUNAR ROVING VEHICLES
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyond
p 1007 N94-16197
The first lunar outpost: The design reference mission and a new era in lunar science p 874 N94-16362

LUNAR SATELLITES
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000

LUNAR SHADOW
Total solar eclipse of 3 November 1994
[NASA-RP-1318] p 1236 N94-15481

LUNAR SOIL
Lunar Curatorial Facility resource
[NASA-TM-109531] p 875 N94-15393
Building a lunar base
[NASA-TM-109674] p 983 N94-15519
First oxygen from lunar basalt p 1249 N94-16182
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units
p 1252 N94-16199
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Galileo photometry of Apollo landing sites
p 1259 N94-16234
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components
p 1267 N94-16280
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Composition of Apollo 17 core 76001
p 1275 N94-16326
Composition and maturity of the 60013/14 core
p 1275 N94-16327
Lunar phase function effects on spectral ratios used for resource assessment p 1278 N94-16342
Mixing model analysis of telescopic lunar spectra
p 1284 N94-16371
Galileo SSI lunar observations: Copernican craters and soils p 1288 N94-16395
Grain surface features of Apollo 17 orange and black glass p 1289 N94-16397
JSC-1: A new lunar regolith simulant
p 1289 N94-16398

LUNAR SPACECRAFT
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010

LUNAR SURFACE
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR
p 1248 N94-16177
Importance of expansion and contraction in the formation of tectonic features on the Moon
p 1250 N94-16189
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Galileo photometry of Apollo landing sites
p 1259 N94-16234
Earth-based and Galileo SSI multispectral observations of eastern mare serenitatis and the Apollo 17 landing site p 1261 N94-16244
Mixing model analysis of telescopic lunar spectra
p 1284 N94-16371
Lunar multispectral mosaics from Galileo's second Earth-Moon flyby p 1288 N94-16394
Galileo SSI lunar observations: Copernican craters and soils p 1288 N94-16395
Remote visual detection of impacts on the lunar surface p 1290 N94-16404
Thermogeologic mapping of the Moon from lunar orbit
p 1290 N94-16405
Opportunity for early science return by the Artemis Program p 1291 N94-16408
Gamma ray spectrometer for Lunar Scout 2
p 1037 N94-16426
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433

LUNAR TEMPERATURE
Thermogeologic mapping of the Moon from lunar orbit
p 1290 N94-16405

LUNAR TOPOGRAPHY
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5
p 1258 N94-16227
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229

LUNGS
Asbestos Surveillance Program p 1127 N94-16638

LYMAN SPECTRA
The theory of QSO absorption line systems and their relationship to the galaxies
[NASA-CR-194596] p 1236 N94-15679

LYSOZYME
Convective flow effects on protein crystal growth
[NASA-CR-194560] p 1206 N94-15476

M

MACH NUMBER
Flight-determined engine exhaust characteristics of an F404 engine in an F-18 airplane
[NASA-TM-4538] p 869 N94-15141
Tollmien-Schlichting/vortex interactions in compressible boundary layer flows
[NASA-CR-191515] p 1017 N94-15183
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681
Wind tunnel investigation with an operational turbojet engine
[TABES PAPER 93-662] p 870 N94-16157
Aerothermoelastic analysis of a NASP demonstrator model
[NASA-TM-109007] p 867 N94-17055
Higher-order accurate Osher schemes with application to compressible boundary layer stability
[NASA-TM-106355] p 1026 N94-17056
Boundary conditions and the simulation of low Mach number flows
[NASA-TM-106374] p 1029 N94-17448
MACHINE LEARNING
Hidden Markov model approach to skill learning and its application to telerobotics
[AD-A266989] p 1164 N94-15502
Representation in incremental learning
[NASA-CR-194595] p 1221 N94-15719
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
Integrating reactive and deliberative planning for agents
[AD-A267631] p 1166 N94-17201
MACHINE TRANSLATION
Using multiple adaptively-weighted strategies for the resolution of demonstratives
[AD-A266463] p 1150 N94-16585
Automatic generation of production rules for integrity maintenance
[REPT-92-054] p 1156 N94-17501
Automatic translation of database integrity constraints into compensating production rules
[REPT-92-055] p 1234 N94-17502
MACHINING
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
MAGELLAN PROJECT (NASA)
Magellan: Principal Venus science findings
p 989 N94-15887
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654
MAGELLAN SPACECRAFT (NASA)
STS-30 Magellan deploy Sim in SMS and MOCR
[NASA-TM-109571] p 875 N94-15301
STS-26 through STS-34, deploy activities
[NASA-TM-109566] p 1301 N94-15315
STS-30 onboard 16mm photography quick release
[NASA-TM-109579] p 861 N94-15423
The depths of the largest impact craters on Venus
p 1264 N94-16261
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
MAGMA
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia
p 1103 N94-16214
Bubble coalescence in magmas p 1103 N94-16237
Overturn of magma ocean ilmenite cumulate layer: Implications for lunar magmatic evolution and formation of a lunar core p 1261 N94-16242
Experimental constraints on CO2 and H2O in the Martian mantle and primary magmas p 1262 N94-16248
Petrologic models of 15388, a unique Apollo 15 mare basalt p 1264 N94-16258
Constraints on the differentiation of the Earth from the coupled Sm-146,147-Nd-142,143 systematics
p 1103 N94-16271
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling
p 1286 N94-16381
MAGNESIUM
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites
[DE93-015155] p 934 N94-16057
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites
p 1241 N94-16175
MAGNESIUM ALLOYS
Aircraft carrier exposure tests of cast magnesium alloys
[AD-A268260] p 962 N94-17418
MAGNESIUM ISOTOPES
Grosnaja ABCs: Magnesium isotope compositions
p 1241 N94-16191
Petrography, mineralogy, and Mg isotope composition of VICTA: A vigarano CaAl4O7-bearing type A inclusion
p 1103 N94-16203
MAGNESIUM SULFATES
Phase equilibria of the magnesium sulfate-water system to 4 kbars p 953 N94-16247
Crustal structure and igneous processes in a chondritic Io p 1243 N94-16292
MAGNET COILS
Electrodynamic forces of the cross-connected figure-eight null-flux coil suspension system
[DE93-015139] p 1048 N94-16969
MAGNETIC COOLING
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485
MAGNETIC EFFECTS
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978
Magnetic effects in Venus/solar wind interaction
[NASA-CR-194666] p 1299 N94-17281
MAGNETIC ENERGY STORAGE
Engineering design of a high-temperature superconductor current lead
[DE93-015156] p 1013 N94-17226
MAGNETIC FIELD CONFIGURATIONS
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector
[AD-D015788] p 998 N94-16535
The inverse problem to the evaluation of magnetic fields
[DE93-015239] p 1175 N94-17288
MAGNETIC FIELDS
An adiabatic demagnetisation refrigerator with a mechanical pre-cooler for space applications
p 906 N94-15070
Benard convection of magnetic colloids under microgravity p 943 N94-15159
Formation of the stable auroral arc that intensifies at substorm onset
[NASA-CR-193637] p 1098 N94-15433
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875
The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector
[AD-D015788] p 998 N94-16535
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893
The inverse problem to the evaluation of magnetic fields
[DE93-015239] p 1175 N94-17288
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
Comparison of computer predictions and magnetic field measurements for an iron spectrometer magnet
[DE93-016164] p 1176 N94-17658
MAGNETIC FILMS
Epitaxial iron films
[AD-A268286] p 1217 N94-17579
MAGNETIC FLUX
Global auroral imaging: Dynamics of Explorer Miss ion
[NASA-CR-194284] p 1097 N94-15003
Effects of spin-orbit coupling on disordered mesoscopic systems
[ITN-93-85220] p 1180 N94-15288
Solar vector magnetic field research
[AD-A267367] p 1299 N94-17004
MAGNETIC LEVITATION VEHICLES
Controls of maglev suspension systems
[DE93-015540] p 1011 N94-16443
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893
Electrodynamic forces of the cross-connected figure-eight null-flux coil suspension system
[DE93-015139] p 1048 N94-16969
MAGNETIC MATERIALS
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates
p 1260 N94-16238
MAGNETIC MEASUREMENT
Comparison of computer predictions and magnetic field measurements for an iron spectrometer magnet
[DE93-016164] p 1176 N94-17658
MAGNETIC PERMEABILITY
Comparative magnetic and thermoanalytical study of two enstatite chondrites: Adhi Kot and Atlanta
p 1244 N94-16329
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868
Synthesis and characterization of new low-dimensional metal complex conductors
[AD-A268251] p 952 N94-17416
MAGNETIC PROBES
Suggestion for extended Viking magnetic properties experiment on future Mars missions
p 1285 N94-16375
MAGNETIC PROPERTIES
Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization
p 974 N94-14982
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978
Comparative magnetic and thermoanalytical study of two enstatite chondrites: Adhi Kot and Atlanta
p 1244 N94-16329
Suggestion for extended Viking magnetic properties experiment on future Mars missions
p 1285 N94-16375
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533
Epitaxial iron films
[AD-A268286] p 1217 N94-17579
MAGNETIC PUMPING
Studies on the parametric decay of waves in fusion plasmas
[VTT-PUBS-110] p 1200 N94-15204
High frequency Raman current drive
p 1201 N94-15208
On the decay of a dipole pump wave to half-harmonics p 1201 N94-15211
MAGNETIC RECORDING
Magnetic and magneto-optical properties and domain structure of Co/Pd multilayers p 1227 N94-14991
MAGNETIC SIGNATURES
Solar vector magnetic field research
[AD-A267367] p 1299 N94-17004
MAGNETIC STORAGE
Characterization facility for magneto-optic media and systems p 1226 N94-14983
Magnetic and magneto-optical properties and domain structure of Co/Pd multilayers p 1227 N94-14991
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533
MAGNETIC STORMS
Formation of the stable auroral arc that intensifies at substorm onset
[NASA-CR-193637] p 1098 N94-15433
The Solar Flare Myth in solar-terrestrial physics
[DE93-016487] p 1299 N94-16895
A correlative comparison of geomagnetic storms and auroral substorms using geomagnetic indeces
[AD-A268081] p 1102 N94-17512
MAGNETIC SUSPENSION
Controls of maglev suspension systems
[DE93-015540] p 1011 N94-16443
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806

Electrodynamic forces of the cross-connected figure-eight null-flux coil suspension system
[DE93-015139] p 1048 N94-16969

MAGNETICALLY TRAPPED PARTICLES
Investigations of YBaCuO materials with near-room-temperature resistivity transitions
[AD-A268016] p 1216 N94-17477

MAGNETIZATION
Magnetic and magneto-optical properties and domain structure of Co/Pd multilayers p 1227 N94-14991
Comparative magnetic and thermoanalytical study of two enstatite chondrites: Adhi Kot and Atlanta p 1244 N94-16329
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers
[DE93-015809] p 1184 N94-16838

MAGNETO-OPTICS
Research Studies on Advanced Optical Module/Head Designs for Optical Disk Recording Devices
[NASA-CR-194390] p 1226 N94-14981
Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization p 974 N94-14982
Characterization facility for magneto-optic media and systems p 1226 N94-14983
Application of holographic optical elements to magneto-optic read/write heads p 1226 N94-14985
Measurement of birefringence for optical recording disk substrates p 1227 N94-14989
Magnetic and magneto-optical properties and domain structure of Co/Pd multilayers p 1227 N94-14991
A near-field scanning optical microscope for analysis of magneto-optic media p 1199 N94-14995
Determining the locations of the various CIRC recording format information blocks (user data blocks, C2 and C1 words and EFM frames) on a recorded compact disc p 1228 N94-14997

MAGNETOACOUSTIC WAVES
Simulation of enhanced tokamak performance on D3-D using fast wave current drive
[DE93-014009] p 1203 N94-16823

MAGNETOHYDRODYNAMIC FLOW
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
Plasma flow switch and foil implosion experiments on Pegasus 2
[DE93-016464] p 1013 N94-17318

MAGNETOHYDRODYNAMIC GENERATORS
Application of a NEPTUNE propulsion concept to a manned Mars excursion
[AD-A268053] p 929 N94-17587

MAGNETOHYDRODYNAMIC STABILITY
Studies on the parametric decay of waves in fusion plasmas
[VTT-PUBS-110] p 1200 N94-15204
High beta and confinement studies of TFTR
[DE93-016204] p 1202 N94-16446
Direct drive foil implosion experiments on Pegasus 2
[DE93-012666] p 1202 N94-16776
Fundamental-mode RF design in e(+)e(-) storage ring factories
[DE93-015249] p 1183 N94-16809
Structure and damping of toroidal drift waves (and their implications for anomalous transport)
[DE93-014005] p 1203 N94-16822
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
Plasma instabilities and transport in the MPD thruster
[AD-A268268] p 1204 N94-17575

MAGNETOHYDRODYNAMIC TURBULENCE
Broken symmetry in ideal magnetohydrodynamic turbulence
[NASA-TM-109017] p 1023 N94-15964

MAGNETOHYDRODYNAMIC WAVES
Linear and non-linear studies of Alfven waves in space. Stationary and dynamic processes in magnetospheric plasmas
[NASA-CR-193585] p 1239 N94-16647
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869

MAGNETOHYDRODYNAMICS
Magnetic effects in Venus/solar wind interaction
[NASA-CR-194666] p 1299 N94-17281

MAGNETOPLASMADYNAMICS
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308

MAGNETOSPHERIC INSTABILITY
Linear and non-linear studies of Alfven waves in space. Stationary and dynamic processes in magnetospheric plasmas
[NASA-CR-193585] p 1239 N94-16647

MAGNETOSTATIC FIELDS
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133

MAGNETRON SPUTTERING
Application of cylindrical distribution functions to anisotropic scattering from amorphous films
[DE93-015256] p 1183 N94-16811
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122
Anisotropic phase separation in amorphous Fe-Ge alloys
[DE93-015255] p 961 N94-17251

MAGNETRONS
Anisotropic phase separation in amorphous Fe-Ge alloys
[DE93-015255] p 961 N94-17251

MAGNETS
Automated directional solidification furnace
[NASA-TM-109662] p 1175 N94-15233
Comparison of computer predictions and magnetic field measurements for an iron spectrometer magnet
[DE93-016164] p 1176 N94-17658

MAGNIFICATION
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338

MAGNONS
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437

MAINTAINABILITY
RAMCAD design methodology
[AD-A267010] p 1145 N94-15525
Conflict Resolution (CORE) for software quality factors
[AD-A267248] p 1151 N94-16941
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517

MAINTENANCE
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075
Application of thermal spray and ceramic coatings and reinforced epoxy for cavitation damage repair of hydroelectric turbines and pumps
[AD-A267624] p 971 N94-17198

MAINTENANCE TRAINING
STS-31 crew training inflight maintenance and bailout exercises in CCT and WFTF
[NASA-TM-109483] p 876 N94-15450

MALES
Screening for prostate cancer p 1126 N94-16630

MAMMALS
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636

MAMMARY GLANDS
Bioeffects of radiofrequency radiation on cell growth and differentation. Volume 1: Engineering considerations
[AD-A267754] p 1118 N94-17232

MAN ENVIRONMENT INTERACTIONS
Recent advances in radar remote sensing of forest p 991 N94-15897
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006
Global change research: Science and policy
[DE93-015675] p 1096 N94-16445

MAN MACHINE SYSTEMS
Manned vehicle systems research facility
[NASA-TM-109650] p 875 N94-15318
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 378)
[NASA-SP-7011(378)] p 1122 N94-16478
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 380)
[NASA-SP-7011(380)] p 1122 N94-16479
OREMUS: Prototype of an orbit determination center dedicated to mini-satellite control p 878 N94-17156
Acquisition and production of skilled behavior in dynamic decision-making tasks
[NASA-CR-194658] p 1133 N94-17296

MAN-COMPUTER INTERFACE
Serpentine manipulator planning and control for NASA Space-Shuttle payload servicing
[AD-A266961] p 879 N94-14969
A CENTAUR tutorial
[INRIA-RT-140] p 1142 N94-14978
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
A proposed research program in strategic computing
[AD-A267516] p 1153 N94-17078
Design and implementation of an interface editor for the Amadeus multi-relational database front-end system
[AD-A267403] p 1233 N94-17114
Defense Logistics Information System (DLIS). Procedures manual: Logistics On-Line Access (LOLA) procedures manual
[AD-A267685] p 1233 N94-17229
Computer-human interface issues: Theory and application
[AD-A268013] p 1138 N94-17475
Visual display principles for C3I system tasks
[AD-A267969] p 1005 N94-17498

MANAGEMENT INFORMATION SYSTEMS
Department of Defense technical architecture framework for information management. Volume 2: Technical reference model and standards profile, version 2.0
[AD-A267194] p 1229 N94-15788
Department of Defense technical architecture framework for information management. Volume 3: Architecture concepts and design guidance, version 2.0
[AD-A267195] p 1230 N94-15789
Performance Information Management System (PIMS) communication
[AD-A267040] p 1231 N94-16458
Managing information as a corporate asset: Key strategies for information professionals to remain competitive
[DE93-015515] p 1232 N94-16875
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
A proposed research program in strategic computing
[AD-A267516] p 1153 N94-17078
Defense Logistics Information System (DLIS). Procedures manual: Logistics On-Line Access (LOLA) procedures manual
[AD-A267685] p 1233 N94-17229

MANAGEMENT METHODS
NASA directives master list and index
[NHB-1410.13L] p 1229 N94-15414
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
Creating and maintaining a visionary quality program
[DE93-015122] p 1050 N94-16055
Environmental management lessons to be learned from the upcoming CFC phase out or how to insure that we survive the next environmentally mandated process change
[TABES PAPER 93-570] p 1050 N94-16136
Development of a proposed international standard for certification of aircraft to High Intensity Radiated Fields (HIRF)
[NASA-TM-106357] p 863 N94-16520
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027
Module interconnection frameworks for a real-time spreadsheet
[AD-A267317] p 1153 N94-17220
Software Capability Evaluation (SCE) version 1.5 method description. Software capability evaluation project
[AD-A267895] p 1154 N94-17395

MANAGEMENT PLANNING
Testing and management of flight instruments and their data
[NASA-CR-194332] p 868 N94-15187
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
Design Quality Task Force survey comments
[AD-A266283] p 1225 N94-16473
Emergency preparedness and planning p 1124 N94-16613

MANAGEMENT SYSTEMS
Fault management for data systems
[NASA-TM-103953] p 1116 N94-15548
Equipment management user's handbook for property custodians
[NHB-4200.2A] p 1224 N94-15957
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799
A comparison of queueing, cluster and distributed computing systems
[NASA-TM-109025] p 1160 N94-16878
Visual display principles for C3I system tasks
[AD-A267969] p 1005 N94-17498
MANEUVERABLE SPACECRAFT
The fragmentation of Kosmos 2163
[NASA-CR-191643] p 887 N94-16503
MANGANESE
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
MANGANESE COMPOUNDS
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
MANGANESE ISOTOPES
On possible Mn-53 heterogeneity in the early solar system p 1244 N94-16344
MANIPULATORS
Tactile sensing and control in humans and robotic/teleoperated systems
[AD-A267710] p 1163 N94-14937
Fuzzy control and fuzzy kinematic mapping for a redundant space robot
[AD-A266866] p 1163 N94-14950
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
Serpentine manipulator planning and control for NASA Space-Shuttle payload servicing
[AD-A266961] p 879 N94-14969
Real-time implementation of neural network learning control of a flexible space manipulator
[AD-A266962] p 1045 N94-14970
Welding nozzle position manipulator
[NASA-CASE-MFS-29837-1] p 1047 N94-15882
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
A modular control architecture for real-time synchronous and asynchronous systems
[DE93-015439] p 1166 N94-16888
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
Three axis force override rate control of a PUMA 560 manipulator
[AD-A267313] p 1048 N94-16944
MANNED MARS MISSIONS
Application of a NEPTUNE propulsion concept to a manned Mars excursion
[AD-A268053] p 929 N94-17587
MANNED SPACE FLIGHT
Cohen program management briefing
[NASA-TM-109536] p 1223 N94-15367
President Kennedy's speech at Rice University
[NASA-TM-109532] p 1302 N94-15394
History of the manned space flight program
[NASA-TM-109529] p 1303 N94-16069
Human Transportation System (HTS) study, volume 2
[NASA-TM-104779-VOL-2] p 882 N94-17320
MANNED SPACECRAFT
Human Transportation System (HTS) study, volume 2
[NASA-TM-104779-VOL-2] p 882 N94-17320
MANUAL CONTROL
Unistick vehicle controller
[NASA-TM-109618] p 1046 N94-15347
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
MANUALS
User's guide: Hot-mix recycling of asphalt concrete pavements
[AD-A266939] p 983 N94-15177
Defense Logistics Information System (DLIS) procedures manual. Products and services end-user manual
[AD-A267766] p 1232 N94-17007
MANUFACTURING
Geometric tolerance assessment
[NPL-DITC-210/92] p 1049 N94-15013
Production Technology for Components from Nonmetallic Fiber Reinforced Materials
[ETN-93-94607] p 931 N94-15254
Galileo probe spacecraft mission to Jupiter
[NASA-TM-109646] p 1247 N94-16070
Lithium D-cell study
[NASA-CR-192705] p 1011 N94-16505
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797
Materials processing and manufacturing technologies for diamond substrate multichip modules (DSMCM)
[AD-A267316] p 969 N94-16946
Integration ToolKit and Methods (ITKM) manufacturing methods and prototype toolkit. A combined modeling method using IDEFO, IDEF1x and XSpec
[AD-A266176] p 984 N94-16981
Manufacturing the key to binary optics p 1194 N94-17332
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Applications of advanced diffractive optical elements p 1197 N94-17356
MANY BODY PROBLEM
Many-body quantum mechanical studies of molecular clusters
[AD-A266624] p 1180 N94-15727
Dust grain resonant capture: A statistical study p 1245 N94-16384
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
MAPPING
Perception for outdoor navigation
[AD-A266867] p 863 N94-14919
Improved mapping system
[NASA-TM-109643] p 1082 N94-15428
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194577] p 1082 N94-15646
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle
[DE93-015936] p 1101 N94-16840
MAPS
Pargo Chasma and its relationship to global tectonics p 1249 N94-16181
MARIA
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
The ilmenite liquidus and depths of segregation for high-Ti picrite glasses p 975 N94-16241
MARINE BIOLOGY
Abstracts of manuscripts submitted in 1992 for publication
[AD-A267963] p 1113 N94-17383
MARINE ENVIRONMENTS
STS-29 crew bailout in WETF
[NASA-TM-109548] p 1136 N94-15385
Chondritic ratios of Fe/Cr/Ir in Kerguelen Plateau (Hole 738C) K/T carbonate-rich sediments support asteroid-cometary impact at K/T time p 1244 N94-16357
AVIRIS calibration and application in coastal oceanic environments p 1069 N94-16685
Atmospheric correction of AVIRIS data in ocean waters p 1070 N94-16690
MARINE METEOROLOGY
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503
MARINE RESOURCES
The 1970 highlights --- NASA programs and research
[NASA-TM-109628] p 1302 N94-15415
MARINE TECHNOLOGY
Abstracts of manuscripts submitted in 1992 for publication
[AD-A267963] p 1113 N94-17383
MARINER SPACECRAFT
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417
MARINER-MERCURY 1973
The 1973 highlights --- Pioneer and Mariner space probes and other advancements
[NASA-TM-109624] p 1302 N94-15410
MARITIME SATELLITES
Propagation research in Japan p 996 N94-16043
MARKARIAN GALAXIES
Astrophysics with MILAGRO
[DE93-012722] p 1240 N94-17657
MARKET RESEARCH
The closing window of opportunity: Addressing the US space launch vehicle crisis
[TABES PAPER 93-640] p 878 N94-16148
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715
Satellite communications systems and technology. Executive summary
[NASA-TM-109346] p 1006 N94-17661
MARKOV CHAINS
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657
An approximation for computing reduction in bandwidth requirements using intelligent multiplexers
[AD-A267434] p 1001 N94-17026
MARKOV PROCESSES
Hidden Markov model approach to skill learning and its application to telerobotics
[AD-A266989] p 1164 N94-15502
A multilevel-multiresolution method for image processing. A Bayesian framework for reconstructing and representing shapes
[AD-A266772] p 1082 N94-15842
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657
Using Markov chains to model the error behavior of data communications channels
[AD-A266468] p 999 N94-16777
MARS (PLANET)
Mars laser altimeter based on a single photon ranging technique p 921 N94-15619
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Explosive mafic volcanism on Earth and Mars p 1253 N94 16204
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates p 1260 N94-16238
Experimental constraints on CO2 and H2O in the Martian mantle and primary magmas p 1262 N94-16248
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335
MARS ATMOSPHERE
Mars laser altimeter based on a single photon ranging technique p 921 N94-15619
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Martian carbon dioxide: Clues from isotopes in SNC meteorites p 1270 N94-16295
Altitude profile of aerosols on Mars from measurements of its thermal radiation on limb p 1294 N94-16423
Dust-dynamic feedbacks in the Martian atmosphere: Surface dust lifting p 1296 N94-16434
MARS CRATERS
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina p 1251 N94-16196
The seismic response of an aquifer to the propagation of an impact generated shock wave: A possible trigger of the Martian outflow channels? p 1281 N94-16354
MARS ENVIRONMENT
Mars look-alike
[NASA-TM-109667] p 1094 N94-15238
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
International testing of a Mars rover prototype p 1273 N94-16312
Workshop on early Mars: How warm and how wet, part 2?
[NASA-CR-193503] p 1297 N94-17637
MARS LANDING
First US Mars landing
[NASA-TM-109669] p 885 N94-15436
Mars exobiology landing sites for future exploration p 1278 N94-16339
MARS OBSERVER
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
MARS PROBES
Mars Analog Site Study (MASS) p 1252 N94-16200
MARS SAMPLE RETURN MISSIONS
Mars rover sample return mission
[NASA-TM-109521] p 873 N94-15471
MARS SURFACE
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179

Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina p 1251 N94-16196
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong p 1007 N94-16197
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
Modeling the reflectance of CO2 frost with new optical constants: Application to Martian south polar cap spectra p 1256 N94-16217
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates p 1260 N94-16238
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
Martian carbon dioxide: Clues from isotopes in SNC meteorites p 1270 N94-16295
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335
Hellas basin, Mars: Formation by oblique impact p 1280 N94-16350
The seismic response of an aquifer to the propagation of an impact generated shock wave: A possible trigger of the Martian outflow channels? p 1281 N94-16354
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369
Suggestion for extended Viking magnetic properties experiment on future Mars missions p 1285 N94-16375
The dregs of crystallization in Zagami p 1245 N94-16390
Global and regional/seasonal color mosaics of Mars p 1288 N94-16393
The effects of orbital and climatic variations on Martian surface heat flow p 1290 N94-16402
Equatorial ground ice on Mars: Steady-state stability p 1290 N94-16403
Deucalionis Regio, Mars: Evidence for a unique mineralogic endmember and a crusted surface p 1291 N94-16406
Analysis of pyroxene absorptions observed in Martian dark regions p 1292 N94-16411
Mars brine formation experiment p 1293 N94-16419
Terrestrial impact melts as analogues for the hematization of Martian surface materials p 1104 N94-16424
The influence of oceans on Martian volcanism p 1295 N94-16427
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
Variations in the Fe mineralogy of bright Martian soil p 1295 N94-16431
Dust-dynamic feedbacks in the Martian atmosphere: Surface dust lifting p 1296 N94-16434
Composition of weakly altered Martian crust p 1296 N94-16436

MARS VOLCANOES
Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
Fractal geometry of some Martian lava flow margins: Alba Patera p 1270 N94-16298
Martian lavas: Three complementary remote sensing techniques to derive flow properties p 1283 N94-16366
The influence of oceans on Martian volcanism p 1295 N94-16427

MARS 4 SPACECRAFT
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508

MARTENSITIC TRANSFORMATION
Transient phenomena following precipitation and re-solution anneals in a NiTi alloy
[AD-A267557] p 961 N94-17106

MASERS
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953

MASS DISTRIBUTION
Incorporation of boundary layer heating predictive methodology into NSWCDD aeroprediction code
[AD-A267000] p 1020 N94-15632

MASS FLOW
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474

MASS FLOW RATE
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474

MASS RATIOS
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586

MASS SPECTRA
Negative ion formation in small carbon clusters
[DE93-015436] p 1182 N94-16064

MASS SPECTROMETERS
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417

MASS SPECTROSCOPY
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion p 1244 N94-16321
Space Shuttle solid rocket motor exposure monitoring p 976 N94-16624
Elemental impurity analysis of mercuric iodide by ICP/MS
[DE93-015531] p 949 N94-16876
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676

MASS TRANSFER
Density and temperature relaxation near the critical point of carbon dioxide under reduced gravity p 944 N94-15164
Investigation of the influence of applied potential on erosion-corrosion of copper in alkaline chloride solutions
[AD-A266448] p 958 N94-16562

MASSIFS
Composition of Apollo 17 core 76001 p 1275 N94-16326

MASSIVE STARS
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites p 1244 N94-16343

MASSIVELY PARALLEL PROCESSORS
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
Overview of Enhanced Data Stream Array Processor (EDSAP)
[AD-A266986] p 1158 N94-15492
Requirements for supercomputing in energy research: The transition to massively parallel computing
[DE93-012376] p 1160 N94-16774
Efficient scheduling of real-time compute-intensive periodic graphs on large grain data flow multiprocessor
[AD-A267444] p 1141 N94-17030
Benchmarking massively parallel architectures
[DE93-016486] p 1162 N94-17646

MATCHED FILTERS
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372

MATERIALS HANDLING
Materials processing in space: Issues for the third decade
[TABES PAPER 93-260] p 983 N94-16133
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
Materials inventory management manual
[NHB-4100.1C] p 1225 N94-16830

MATERIALS RECOVERY
Investigations into the recovery of waste sulfuric acid with concentrated solar radiation
[DLR-FB-93-11] p 952 N94-17594

MATERIALS SCIENCE
Sounding Rocket Experiments in Fluid Science and Materials Sciences: TEXUS 25 to 27 and MASER 4, volume 3
[ESA-SP-1132-VOL-3] p 943 N94-15157
QUESTS: A microgravity research facility for materials science experiments p 978 N94-16082

MATERIALS TESTS
Building a lunar base
[NASA-TM-109674] p 983 N94-15519
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
Materials, processes, and environmental engineering network
[TABES PAPER 93-610] p 1051 N94-16142

MATHEMATICAL LOGIC
Combinatorial semantics
[TR-444] p 1149 N94-16575
Notes on the use of Dempster-Shafer and fuzzy reasoning to fuse identity attribute data
[AD-A267426] p 1004 N94-17309

MATHEMATICAL MODELS
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: The systemic and pulmonary vasculature
[AD-A266835] p 1119 N94-14917
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Static aeroelastic response of an aircraft with asymmetric wing planforms representative of combat damage
[AD-A266890] p 865 N94-14951
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
Modelling of creep data for plastics
[NPL-DMM(A)-92] p 1057 N94-15017
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
Advanced methods for cascade testing
[AGARD-AG-328] p 1016 N94-15119
Predicted and real development in the aviation in the period 1961-1991 p 853 N94-15122
Rotary engine performance computer program (RCEMAP and RCEMAPPC): User's guide
[NASA-CR-191192] p 869 N94-15192
On the use of the noncentral chi-square density function for the distribution of helicopter spectral estimates
[NASA-CR-191546] p 1176 N94-15487
Hidden Markov model approach to skill learning and its application to telerobotics
[AD-A266989] p 1164 N94-15502
Comparison of RADARC high-frequency radar performance prediction model and ROTHR Amchitka data
[AD-A267077] p 987 N94-15540
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676
Nontidal gravity changes observed with a superconducting gravimeter p 1100 N94-15808
Report of the working group on theoretical tidal model p 1101 N94-15815
Fast simulation of steady-state availability in non-Markovian highly dependable systems
[AD-A266747] p 1174 N94-15823
Nuclear rocket plume studies
[AD-A267154] p 925 N94-15837
A feasibility study of a microgravity enhancement system for Space Station Freedom
[NASA-CR-191550] p 886 N94-15864
Effects of rotation on coolant passage heat transfer. Volume 2: Coolant passages with trips normal and skewed to the flow
[NASA-CR-4396-VOL-2] p 1023 N94-15991
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050
Aerodynamic/dynamic/control interaction
[AD-A266187] p 871 N94-16107
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
Modeling and simulation: A key to future defense technology
[TABES PAPER 93-654] p 1054 N94-16153
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Why is the Moon dark? p 1256 N94-16219
An experimental study of trace element partitioning between perovskite, hibonite and melt: Equilibrium values p 954 N94-16313
Lava crusts and flow dynamics p 1103 N94-16316
On the relationship between tectonic plates and thermal mantle plume morphology p 1104 N94-16349
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 1104 N94-16396

Controls of maglev suspension systems
[DE93-015540] p 1011 N94-16443
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Transcapillary exchange
[AD-A266427] p 1123 N94-16544
Numerical modeling of the temperature gradients and spectra of the plasma armature on Thunderbolt
[AD-A266414] p 878 N94-16552
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Exchange of fluid and solutes between vascular, interstitial, and tissue cell compartments
[AD-A266426] p 1123 N94-16558
Spatial resolution and cloud optical thickness retrievals p 1066 N94-16671
Lossless compression of AVIRIS data: Comparison of methods and instrument constraints
p 1075 N94-16713
Comparison of modeled backscatter with SAR data at P-band p 1076 N94-16735
SAR backscatter from coniferous forest gaps
p 1076 N94-16736
Retrieval of pine forest biomass using JPL AIRSAR data p 1076 N94-16737
Sea bottom topography imaging with SAR
p 1077 N94-16745
Development of a constitutive model for creep and life prediction of advanced silicon nitride ceramics
[DE93-015894] p 968 N94-16813
Emissions of volatile organic compounds from stationary combustion sources: Numerical modeling capabilities
[DE93-014123] p 1096 N94-16825
Textile composite processing science
p 938 N94-16856
Development of braided fiber seals for engine applications p 939 N94-16859
Quantification of processing artifacts in textile composites p 939 N94-16860
Stochastic damage evolution in textile laminates
p 939 N94-16861
Integration ToolKit and Methods (ITKM) manufacturing methods and prototype toolkit. A combined modeling method using IDEFO, IDEF1x and XSpec
[AD-A266176] p 984 N94-16981
Modeling, estimation and control of distributed parameter systems
[AD-A267325] p 1026 N94-17003
Ensemble forecasting techniques in medium-range forecasting
[AD-A267443] p 1107 N94-17029
Studies of changes in the energy stored in metals as a result of subjecting them to a surface type technological process
[IFTR-25/1991] p 960 N94-17063
Proposal of a simple mathematical model for the action of a laser on a metal plate
[IFTR-36/1991] p 1041 N94-17065
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-194645] p 1027 N94-17095
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196
Shielding from space radiations
[NASA-CR-194664] p 1301 N94-17255
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282
The roles of fluid motion and other transport phenomena in the morphology of materials
[NASA-CR-194665] p 1028 N94-17298
ONRASIA scientific information bulletin, volume 18, number 2
[AD-A267798] p 1304 N94-17305
Mathmatical modeling for diffractive optics
p 1195 N94-17342
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426
Energy deposition fluctuations induced by ions in microvolumes and nanovolumes: An analytic approach. 1: Theory
[AD-A267959] p 1173 N94-17495
Application of the finite-difference time-domain method to scattering and radiation problems involving wires and plates
[AD-A268396] p 1005 N94-17496
Compressible flow solvers using unstructured grids
[INRIA-RR-1732] p 1030 N94-17531
Structured finite volume modeling of US Navy aircraft engine test cells. Task 2: Turboprop engine. Volume 2: Code documentation and listings
[AD-A268386] p 873 N94-17569
A basic principles description of liquid vapor phase transitions
[AD-A268331] p 1176 N94-17581
A two-layer quasi-geotrophic spherical model: Formulation and climatology
[DM-63] p 1110 N94-17593

MATHEMATICAL PROGRAMMING
Geometric tolerance assessment
[NPL-DITC-210/92] p 1049 N94-15013

MATRICES (MATHEMATICS)
Automatic differentiation of limit functions
[DE93-016376] p 1168 N94-14928
Decomposition of large sparse symmetric systems for parallel computation. Part 2: Parallelization tool roadmap
[AD-A267072] p 1158 N94-15671
Decomposition of large sparse symmetric systems for parallel computation. Part 1: Theoretical foundations
[AD-A267144] p 1159 N94-15750
Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718
Invariance of slip movements with respect to the control matrix
[IFTR-43/1991] p 1170 N94-17045
The renormalization of the axial anomaly in dimensional regularization
[NIKHEF-H/92-18] p 1220 N94-17618

MATRIX MATERIALS
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Machine development p 932 N94-15258
Carbon-carbon grid for ion engines
[NASA-CASE-NPO-19174-1-CU] p 925 N94-15876
NEXTEL(trademark)/SiC composites using forced chemical vapor infiltration
[DE93-013532] p 934 N94-16008
Overview of chemical vapor infiltration
[DE93-015440] p 934 N94-16065
Wear resistant titanium material development
[AD-A266474] p 959 N94-16780
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052

MATRIX METHODS
Finding stable orientations of assemblies with linear programming
[AD-A266990] p 1143 N94-15212
Construction and calculation p 931 N94-15256
Decomposition of large sparse symmetric systems for parallel computation. Part 1: Theoretical foundations
[AD-A267144] p 1159 N94-15750
Eigenfunctions of the transfer matrix in the presence of linear coupling
[DE93-015020] p 1151 N94-16892
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012

MATRIX THEORY
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283

MATTER (PHYSICS)
Fast pulsars, compact stars, and the strange matter hypothesis
[DE93-015039] p 1239 N94-16052
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567

MAXIMUM LIKELIHOOD ESTIMATES
A new method for generating Bayes classifiers assuming mixtures of Gaussian densities
[FFI-91/4029] p 1172 N94-15298
Statistical analysis of trigonometric parallaxes
[NASA-CR-194558] p 1172 N94-15641
A multilevel-multiresolution method for image processing. A Bayesian framework for reconstructing and representing shapes
[AD-A266772] p 1082 N94-15842
Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718

MAXWELL EQUATION
Measurement of birefringence for optical recording disk substrates p 1227 N94-14989
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825
An asymptotic expansion of an electromagnetic field in the velocity of a caustic in the form of simple waves
[IFTR-14/1991] p 1002 N94-17048
Mathmatical modeling for diffractive optics
p 1195 N94-17342

MEAN
Bounds on inconsistent inferences for sequences of trials with varying probabilities
[AD-A267146] p 1172 N94-15733

MEAN SQUARE VALUES
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503

MEANDERS
Meander properties of Venusian channels
p 1275 N94-16324

MEASURE AND INTEGRATION
Volume integral equations applied to circular and square cylinders
[AD-A266635] p 1169 N94-15785

MEASUREMENT
Lecture notes on engineering measurement for software engineers
[AD-A266959] p 1142 N94-14967

MEASURING INSTRUMENTS
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
Dual active surface, miniature, plug-type heat flux gauge
[NASA-CASE-LEW-15643-1] p 1033 N94-15928
Wind tunnel investigation with an operational turbojet engine
[TABES PAPER 93-662] p 870 N94-16157
Passive tracking of a target using an array of sensors
[DE93-015870] p 997 N94-16169
Cosmic dust and space debris measurements on board the small satellites HITEN and BREM-SAT
p 890 N94-17147
S 80/T: A micro satellite system combining high performances and limited resources
p 893 N94-17166

MECHANICAL DEVICES
Attachment device
[NASA-CASE-MSC-21885-1] p 1047 N94-15925
Nonlinear analysis of mechanical systems under combined harmonic and stochastic excitation
[AD-A266217] p 1173 N94-16937
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210
Computer modeling and animation of mechanical systems
[NIAR-93-3] p 1153 N94-17299

MECHANICAL ENGINEERING
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
Expert system for welding engineering
p 984 N94-16003
Remote diagnosis as used for mechanized parking systems p 984 N94-16004

MECHANICAL MEASUREMENT
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

MECHANICAL PROPERTIES
The effect of aging at 343 C on the mechanical properties and microstructure of type 308 stainless steel weldments
[DE93-015454] p 957 N94-16103
Evaluation of the interfacial mechanical properties in fiber-reinforced ceramic composites
[DE93-015494] p 935 N94-16461
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
Evolution of microstructure in face centered cubic metals during irradiation: A review
[DE93-015682] p 958 N94-16662
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764
Processing of complex sintered reaction bonded silicon nitride parts by microwave heating
[DE93-015811] p 969 N94-16877
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238
Micromechanics modeling and analysis of Haversian compact bone tissues as a fiber reinforced composite material
[AD-A268250] p 1129 N94-17456

MECHANICAL SHOCK
Shear wave measurements in shock-induced, high-pressure phases
[DE93-016461] p 1062 N94-17664

MECHANICAL TWINNING
Slip, twinning and transformation in Laves phases
[DE93-018164] p 960 N94-16972
MEDICAL EQUIPMENT
Cool suit
[NASA-TM-109639] p 1120 N94-15250
New insulin pump
[NASA-TM-109642] p 1120 N94-15253
Living well in space: Clinical care challenge
[NASA-TM-109539] p 1120 N94-15370
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
Annual historical report, calendar year 1992
[AD-A267050] p 1121 N94-15663
Method and apparatus to characterize ultrasonically reflective contrast agents
[NASA-CASE-LAR-14969-1] p 1129 N94-17085
Automated data collection system for the TCM3 transcutaneous pO2/pCO2 monitoring system
[AD-A268400] p 1129 N94-17424
MEDICAL PERSONNEL
Illness/injury pattern complex 40 (Titan)
p 1125 N94-16625
Tuberculosis: A case for increased screening
p 1126 N94-16627
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645
MEDICAL SCIENCE
New insulin pump
[NASA-TM-109642] p 1120 N94-15253
Annual historical report, calendar year 1992
[AD-A267050] p 1121 N94-15663
Localizing visual function in the brain
[AD-A267381] p 1133 N94-17020
MEDICAL SERVICES
Living well in space: Clinical care challenge
[NASA-TM-109539] p 1120 N94-15370
Annual historical report, calendar year 1992
[AD-A267050] p 1121 N94-15663
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Americans with Disabilities Act considerations for the practice of occupational medicine p 1124 N94-16611
Emergency preparedness and planning
p 1124 N94-16613
Ongoing Recovery Basic Information Tool (ORBIT)
p 1124 N94-16616
Illness/injury pattern complex 40 (Titan)
p 1125 N94-16625
Identifying and responding to customer needs at the Kennedy Space Center p 1056 N94-16626
Tuberculosis: A case for increased screening
p 1126 N94-16627
Summary of follow-up results from potential tuberculosis exposures p 1126 N94-16628
Screening for prostate cancer p 1126 N94-16630
Physical fitness and health education program at NASA Headquarters p 1126 N94-16631
Ames Fitness Program p 1126 N94-16632
Asbestos Surveillance Program p 1127 N94-16638
Hearing Conservation Medical Program
p 1127 N94-16639
Lead Surveillance Program p 1127 N94-16640
Mercury Surveillance Program p 1127 N94-16641
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
General Medical Surveillance Program
p 1127 N94-16643
Bloodborne Pathogens Program p 1127 N94-16644
MELTING
Partial melting experiment of Y-Ba-Cu oxide
p 945 N94-15168
Remelting of Fe-C-Si-alloy in a ceramic mold skin
p 945 N94-15169
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676
Partial melting of ordinary chondrites: Lost City (H) and St. Severin (LL) p 1243 N94-16286
On origin of the olivine inclusions from the Kainsaz CO carbonaceous chondrite p 1244 N94-16345
First results from analysis of coordinated AVIRIS, TIMS, and ISM (French) data for the Ronda (Spain) and Beni Bousera (Morocco) peridotites p 1067 N94-16675
MELTING POINTS
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 951 N94-17223
MELTS (CRYSTAL GROWTH)
Siderophile elements in the upper mantle of the Earth: New clues from metal-silicate partition coefficients
p 1103 N94-16250
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth
p 1242 N94-16272
Transition metals in superheat melts
p 962 N94-16273
Angrite LEW87051: Are the olivines pheno's or xeno's? A continuing story p 1103 N94-16285
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
Evaporation kinetics of Mg2SiO4 crystals and melts from molecular dynamics simulations p 1219 N94-16331
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
MEMBRANES
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861
Modification of fluoropolymer surfaces with electronically conductive polymers
[AD-A266294] p 967 N94-16475
MEMORY
The 12th Annual Carmel Conference, distinctiveness and Memory: Cognitive Psychophysiological and Physiological Considerations
[AD-A267181] p 1131 N94-15148
Theoretical and experimental research into biological mechanisms underlying learning and memory
[AD-A267441] p 1133 N94-17022
Synaptic plasticity and memory formation
[AD-A267988] p 1133 N94-17453
MEMORY (COMPUTERS)
Relaxing consistency in recoverable distributed shared memory
[AD-A266931] p 1140 N94-15174
The design of self-checking reduced instruction set computers
[AD-A267012] p 1140 N94-15763
Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
The alignment-distribution graph
[NASA-CR-194609] p 1148 N94-15956
Unipolar terminal-attractor based neural associative memory with adaptive threshold
[NASA-CASE-NPO-18790-1-CU] p 1165 N94-15958
A decision criteria to select an associative-memory organization that minimizes the execution time of a mix of associative-search operations
[AD-A266438] p 1149 N94-16560
A trace-based comparison of shared memory multiprocessor architectures
[TR-432] p 1159 N94-16577
Shared-memory multiprocessor trends and the implications for parallel program performance
[TR-420] p 1159 N94-16578
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Fault-tolerant architectures for multiprocessor and VLSI-based systems
[AD-A267370] p 1140 N94-17005
MENISCI
Evaporation from a meniscus within a capillary tube in microgravity
[NASA-CR-194593] p 976 N94-15654
MENTAL PERFORMANCE
Complex information coordination performance: Differential changes in working memory contributions following training
[AD-A267007] p 1132 N94-15762
Scuba-diving, anxiety and task performance
p 1132 N94-15938
Cognitive engineering models in space systems
[NASA-CR-193473] p 1140 N94-16716
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
MERCURY (METAL)
Mercury Surveillance Program p 1127 N94-16641
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230
MERCURY CADMIUM TELLURIDES
Advanced high performance CdHgTe multiplexed arrays p 903 N94-15051
A 12.5 micron infrared detector for Earth observation
p 903 N94-15052
Proceedings of the 6th International Conference on Narrow Gap Semiconductors
[AD-A268097] p 1015 N94-17570
MERCURY COMPOUNDS
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973
Elemental impurity analysis of mercuric iodide by ICP/MS
[DE93-015531] p 949 N94-16876
MERCURY MA-6 FLIGHT
Astronauts number 3 --- Friendship 7
[NASA-TM-109430] p 874 N94-15501
MERCURY PROJECT
Astronauts number 1 --- mercury project
[NASA-TM-109428] p 1131 N94-15499
MERCURY SPACECRAFT
Astronauts number 2
[NASA-TM-109429] p 873 N94-15500
MESOMETEOROLOGY
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
Mesoscale frontogenesis: An analysis of two cold front case studies
[AD-A267950] p 1107 N94-17054
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
MESON-MESON INTERACTIONS
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
MESON-NUCLEON INTERACTIONS
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283
Past, present and future ((pi),(eta)) experiments
[DE93-016631] p 1182 N94-16115
MESONS
Closed orbit distortion and the beam-beam interaction
[DE93-015284] p 1190 N94-15854
Status of (alpha)(sub s) measurements
[DE93-015179] p 1181 N94-16059
Mesons at finite temperature in the NJL model with gluon condensate
[DE93-626697] p 1185 N94-17310
Production of D-mesons in pp-collisions and quark-gluon string model
[DE93-626721] p 1185 N94-17312
MESOSCALE PHENOMENA
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
Mesoscale modeling of the atmosphere
[AD-A263236] p 1098 N94-15132
Short term weather forecasting in real time in a base weather station setting
[AD-A266872] p 1105 N94-15142
Mesoscale lightning
[NASA-TM-109655] p 1105 N94-15226
Mesoscale frontogenesis: An analysis of two cold front case studies
[AD-A267950] p 1107 N94-17054
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
Propagation characteristics of mesoscale convective systems
[AD-A268130] p 1109 N94-17522
Forecasting the ducting of electromagnetic waves on the mesoscale
[AD-A268101] p 1109 N94-17571
Surface energy balance modeling at mesoscale: The contribution of the future Earth observing system
[BCRS-91-04] p 1085 N94-17616
MESOZOIC ERA
Earth's partial pressure of CO2 over the past 100-500 Ma; evidence from Ce anomalies in mostly shallow seas (less than 200 m) as recorded in carbonate sediments, 2
p 1104 N94-16360
MESSAGE PROCESSING
VDM specification of the MD4 message digest algorithm
[NPL-DITC-204/92] p 1142 N94-14944
RAISE specification of the MD4 message digest algorithm
[NPL-DITC-206/92] p 1142 N94-15010
Understanding partitions and the no partition assumption
[AD-A266296] p 1000 N94-16911
Ground wave emergency network final operational capability: Environmental assessment for central Wyoming relay node, site number RN 8C928WY
[AD-A267842] p 1001 N94-17011
Intel NX to PVM 3.2 message passing conversion library
[NASA-TM-109038] p 1152 N94-17060

Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118
Radiocommunication problems of a position reporting and bidirectional messagery system using VHF/UHF with low-Earth orbit satellites p 889 N94-17136
LEOCOM-SPES: Low cost message communications p 892 N94-17161
STARSYS: A view after WARC-92 — satellite position and messaging system p 893 N94-17168

MESSAGES
Multiphase complete exchange: A theoretical analysis
[NASA-CR-191531] p 1145 N94-15489
A parallel adaptive mesh refinement algorithm
[NASA-CR-191530] p 1168 N94-15724

METABOLISM
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893

METABOLITES
Cumulative effect of repeated brief cerebral ischemia
[AD-A267155] p 1121 N94-15736

METAL BONDING
The thermal dissociation of NH2CHO(ND2CHO) on Si(100)-2x1
[AD-A266903] p 942 N94-14956

METAL COATINGS
Restoring Miss Liberty — inorganic coatings
[NASA-TM-109605] p 963 N94-15313
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973
Transparent conductive coatings in the far ultraviolet
[NASA-CR-194632] p 1191 N94-16024
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle
[DE93-015936] p 1101 N94-16840
Robotic weld overlay coatings for erosion control
[DE93-016938] p 970 N94-16959
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122

METAL CRYSTALS
High temperature materials technology research for advanced thermionic systems
[DE93-018302] p 960 N94-16964

METAL FATIGUE
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453
Fatigue life program using strain-life methods
[AD-A267310] p 1060 N94-16943
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984

METAL FIBERS
Integrated fundamental research on current collection
[AD-A266987] p 1008 N94-15494

METAL FILMS
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Cellulose triacetate, thin film dielectric capacitor
[NASA-CASE-NPO-18935-1-CU] p 1010 N94-15952
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Weibull analysis applied to the pull adhesion test and fracture of a metal-ceramic interface
[DE93-012913] p 1059 N94-15997
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
Transparent conductive coatings in the far ultraviolet
[NASA-CR-194632] p 1191 N94-16024
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282
Epitaxial iron films
[AD-A268286] p 1217 N94-17579

METAL FINISHING
Dry stripping as a surface treatment method
[VTT-TIED-1348] p 965 N94-17544

METAL FLUORIDES
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers
[DE93-015809] p 1184 N94-16838

METAL FOILS
Direct drive foil implosion experiments on Pegasus 2
[DE93-012666] p 1202 N94-16776
Plasma flow switch and foil implosion experiments on Pegasus 2
[DE93-016464] p 1013 N94-17318

METAL HYDRIDES
Small satellite nickel-hydrogen and nickel-metal hydride power applications p 895 N94-17175

METAL IONS
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses
[DE93-015304] p 965 N94-15828
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
Investigation of the effects of polyelectrolyte coatings on colloid transport in porous media
[DE93-018300] p 970 N94-16973
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216

METAL JOINTS
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190

METAL MATRIX COMPOSITES
Fracture toughness tests for particulate MMC UK COSI (IACFA) task group. Meeting report, October 1992
[NPL-DMM(A)-81] p 1057 N94-15021
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 945 N94-15171
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Continuous fabrication of SiC fiber tows by chemical vapor deposition
[AD-A266460] p 936 N94-16569
Techniques for preparation of ingot metallurgical discontinuous composites
[AD-D015748] p 940 N94-16933
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Ceramic fiber coatings development and demonstration
[AD-A267286] p 972 N94-17242
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379

METAL NITRIDES
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides
[AD-A266246] p 950 N94-16931

METAL OXIDE SEMICONDUCTORS
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243

METAL OXIDES
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Molten salt electrodeposition of high temperature superconductors
[AD-A266620] p 1009 N94-15726
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769

METAL PLATES
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
Proposal of a simple mathematical model for the action of a laser on a metal plate
[IFTR-36/1991] p 1041 N94-17065

METAL POWDER
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy
[DE93-015683] p 940 N94-17235

METAL SHEETS
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
Laser weld repair of tantalum sheet
[DE93-016417] p 1041 N94-16871

METAL SURFACES
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567
Vectorial electron transfer in spatially ordered arrays
[DE93-018150] p 1185 N94-16971

METALLIZING
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Robotic weld overlay coatings for erosion control
[DE93-016938] p 970 N94-16959
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605

METALLOGRAPHY
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883

METALLOIDS
Electronic and atomic structure of semiconductors and of high-temperature superconductors
[AD-A266805] p 1205 N94-14913

METALLURGY
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765

METALORGANIC CHEMICAL VAPOR DEPOSITION
Characterization of InTISb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922
Ion doped quantum well lasers
[AD-A267198] p 1038 N94-15853
The growth of InAs(1-x)Sb(x)/InAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE93-015028] p 1208 N94-16012
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577

METALS
Vacancy condensation as the precursor to passivity breakdown
[DE93-012925] p 956 N94-15998
Evolution of microstructure in face centered cubic metals during irradiation: A review
[DE93-015682] p 958 N94-16662
Studies of changes in the energy stored in metals as a result of subjecting them to a surface type technological process
[IFTR-25/1991] p 960 N94-17063

METAMORPHIC ROCKS
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle
[DE93-015936] p 1101 N94-16840

METAMORPHISM (GEOLOGY)
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224

Comparison of reflectance spectra of C asteroids and unique C chondrites Y86720, Y82162, and B7904
p 1242 N94-16246
The group A3 chondrules of Krymka: Further evidence for major evaporative loss during the formation of chondrules p 1242 N94-16257
Different radiation and metamorphic history of the Kainsaz CO 3.2 chondrules p 1243 N94-16296
Heterogeneous plagioclase compositions in the Maralinga CK4 chondrite p 1243 N94-16308
A hydrogen isotope study of CO3 type carbonaceous chondrites; comparison with type 3 ordinary chondrites
p 1246 N94-16425

METASTABLE STATE
Astronomy and astrophysics p 1239 N94-15970
Metastable phases in mechanically alloyed aluminum germanium powders
[DE93-008727] p 958 N94-16463
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

METEORITE COLLISIONS
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion
p 1244 N94-16321
Geochemical evidences for two chondritic-like cometary or asteroidal impacts before and at the K/T boundary
p 1244 N94-16359
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material
p 1244 N94-16377
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383
Remote visual detection of impacts on the lunar surface p 1290 N94-16404

METEORITE CRATERS
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina
p 1251 N94-16196
Collisional and dynamical history of Gaspra
p 1241 N94-16202
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness
p 1103 N94-16211
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Corvid meteoroids and a Giordano Bruno ray are genetically related p 1242 N94-16223
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement
p 1242 N94-16245
The depths of the largest impact craters on Venus
p 1264 N94-16261
Density of impact craters on tessera, Venus
p 1264 N94-16263
A first-order model for impact crater degradation on Venus p 1265 N94-16268
A discontinuous melt sheet in the Manson impact structure p 1103 N94-16269
Al-26 production profile and model comparisons in Canyon Diablo p 1245 N94-16409
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607

METEORITES
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176
Petrography, mineralogy, and Mg isotope composition of VICTA: A vigarano CaAl4O7-bearing type A inclusion
p 1103 N94-16203
The group A3 chondrules of Krymka: Further evidence for major evaporative loss during the formation of chondrules p 1242 N94-16257
I-Xe structure of ILAFEGH 009 and shallowater: Evidence for early formation and rapid cooling of impact-derived enstatite meteorites
p 1243 N94-16305
Isotopic signatures and distribution of nitrogen and trapped and radiogenic xenon in the Acapulco and FRO90011 meteorites p 1243 N94-16317
Effects of bulk composition on production rates of cosmogenic nuclides in meteorites p 1245 N94-16385
Classificational parameters for acapulcoites and lodranites: The cases of FRO 90011, EET 84302 and ALH A81187/84190 p 1245 N94-16389
The dregs of crystallization in Zagami
p 1245 N94-16390
The Nakhla parent melt: REE partition coefficients and clues to major element composition
p 1245 N94-16399
More on the cooling history of angrite LEW 86010
p 1245 N94-16400
Limited subsolidus diffusion in type B1 CAI: Evidence from Ti distribution in spinel p 954 N94-16401
Remote visual detection of impacts on the lunar surface p 1290 N94-16404
Identification of new meteorite, Mihonoseki (L), from broken fragments in Japan p 1246 N94-16415
The thickness of eucritic crust in the HED parent body
p 1104 N94-16416

METEORITIC COMPOSITION
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites
p 1241 N94-16175
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176
Extraction and isotopic analysis of medium molecular weight hydrocarbons from Murchison using supercritical carbon dioxide p 1241 N94-16184
Cretaceous-tertiary boundary spherules and Cenozoic microtektites: Similarities and differences
p 1241 N94-16186
Stalking the LREE-enriched component in ureilites
p 1241 N94-16190
Grosnaja ABCs: Magnesium isotope compositions
p 1241 N94-16191
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina
p 1251 N94-16196
Petrography, mineralogy, and Mg isotope composition of VICTA: A vigarano CaAl4O7-bearing type A inclusion
p 1103 N94-16203
Petrologic constraints on the surface processes on asteroid 4 Vesta and on excavation depths of diogenite fragments p 1241 N94-16208
Systematic chemical variations in large 3AB iron meteorites: Clues to core crystallization
p 1241 N94-16213
Nd-142/Nd-144 in bulk planetary reservoirs, the problem of incomplete mixing of interstellar components and significance of very high precision Nd-145/Nd-144 measurements p 1256 N94-16220
Comparison of reflectance spectra of C asteroids and unique C chondrites Y86720, Y82162, and B7904
p 1242 N94-16246
Gas-grain energy transfer in solar nebula shock waves: Implications for the origin of chondrules
p 1262 N94-16251
The group A3 chondrules of Krymka: Further evidence for major evaporative loss during the formation of chondrules p 1242 N94-16257
Potassium isotope cosmochemistry, volatile depletion and the origin of the Earth p 953 N94-16259
First investigation of noble gases in the Dengli H3,8 chondrite p 953 N94-16264
Shock-thermal history of Kapoeta howardite matter on data of thermoluminescence analysis of individual mineral grains p 953 N94-16267
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth
p 1242 N94-16272
Complex zoning behavior in pyroxene in FeO-rich chondrules in the Semarkona ordinary chondrite
p 1243 N94-16284
Partial melting of ordinary chondrites: Lost City (H) and St. Severin (LL) p 1243 N94-16286
Experimental partitioning of Zr, Ti, and Nb between silicate liquid and a complex noble metal alloy and the partitioning of Ti between perovskite and platinum metal
p 962 N94-16287
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
The Al Rais meteorite: A CR chondrite or close relative? p 1243 N94-16290
Chemical and isotopic compositions in acid residues from various meteorites p 1243 N94-16291
Martian carbon dioxide: Clues from isotopes in SNC meteorites p 1270 N94-16295
Different radiation and metamorphic history of the Kainsaz CO 3.2 chondrules p 1243 N94-16296
Complex radiation-thermal history of Kaidun meteorite on data of track study of silicate minerals
p 1243 N94-16297
I-Xe structure of ILAFEGH 009 and shallowater: Evidence for early formation and rapid cooling of impact-derived enstatite meteorites
p 1243 N94-16305
Heterogeneous plagioclase compositions in the Maralinga CK4 chondrite p 1243 N94-16308
An experimental study of trace element partitioning between perovskite, hibonite and melt: Equilibrium values p 954 N94-16313
Isotopic signatures and distribution of nitrogen and trapped and radiogenic xenon in the Acapulco and FRO90011 meteorites p 1243 N94-16317
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion
p 1244 N94-16321
Terrestrial bitumen analogue of orgueil organic material demonstrates high sensitivity to usual HF-HCl treatment
p 930 N94-16325
Chromite-rich mafic silicate chondrules in ordinary chondrites: Formation by impact melting
p 1244 N94-16330
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites
p 1244 N94-16343
On possible Mn-53 heterogeneity in the early solar system p 1244 N94-16344
On origin of the olivine inclusions from the Kainsaz CO carbonaceous chondrite p 1244 N94-16345
A search for noble-gas evidence for presolar oxide grains p 954 N94-16353
INAA of CAIs from the Maralinga CK4 chondrite: Effects of parent body thermal metamorphism
p 1244 N94-16355
Chondritic ratios of Fe/Cr/Ir in Kerguelen Plateau (Hole 738C) K/T carbonate-rich sediments support asteroid-cometary impact at K/T time
p 1244 N94-16357
Noble gases in twenty Yamato H-chondrites: Comparison with Allan Hills chondrites and modern falls
p 1244 N94-16361
Experimentally reproduced relict enstatite in porphyritic chondrules of enstatite chondrite composition
p 1244 N94-16363
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material
p 1244 N94-16377
Effects of bulk composition on production rates of cosmogenic nuclides in meteorites p 1245 N94-16385
Classificational parameters for acapulcoites and lodranites: The cases of FRO 90011, EET 84302 and ALH A81187/84190 p 1245 N94-16389
The dregs of crystallization in Zagami
p 1245 N94-16390
The Nakhla parent melt: REE partition coefficients and clues to major element composition
p 1245 N94-16399
More on the cooling history of angrite LEW 86010
p 1245 N94-16400
Limited subsolidus diffusion in type B1 CAI: Evidence from Ti distribution in spinel p 954 N94-16401
Remote visual detection of impacts on the lunar surface p 1290 N94-16404
Al-26 production profile and model comparisons in Canyon Diablo p 1245 N94-16409
Exsolved kirschsteinite in angrite LEW86010 olivine
p 1245 N94-16410
Refractory precursor components in an Allende ferromagnesian chondrule p 1245 N94-16412
Igneous fractionation and subsolidus equilibration of diogenite meteorites p 1245 N94-16413
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
Identification of new meteorite, Mihonoseki (L), from broken fragments in Japan p 1246 N94-16415
The thickness of eucritic crust in the HED parent body
p 1104 N94-16416
Zaoyang chondrite cooling history from pyroxene Fe(2+)-Mg intracrystalline ordering and exolutions
p 1246 N94-16417
A hydrogen isotope study of CO3 type carbonaceous chondrites; comparison with type 3 ordinary chondrites
p 1246 N94-16425

Solar noble gases revealed by closed system stepped etching of a metal separate from Fayetteville p 954 N94-16432
Nitrogen and light noble gases in Parsa enstatite chondrite p 1246 N94-16435

METEORITIC DAMAGE
Collisional and dynamical history of Gaspra p 1241 N94-16202
The depths of the largest impact craters on Venus p 1264 N94-16261

METEORITIC MICROSTRUCTURES
Experimentally reproduced relict enstatite in porphyritic chondrules of enstatite chondrite composition p 1244 N94-16363

METEOROID SHOWERS
Corvid meteoroids and a Giordano Bruno ray are genetically related p 1242 N94-16223

METEOROIDS
Corvid meteoroids and a Giordano Bruno ray are genetically related p 1242 N94-16223
Resolving LDEF's flux distribution: Orbital (debris?) and natural meteoroid populations p 1245 N94-16391
Remote visual detection of impacts on the lunar surface p 1290 N94-16404

METEOROLOGICAL INSTRUMENTS
A comparison of ceiling and visibility observation for NWS manned observation sites and ASOS sites [AD-A268356] p 1108 N94-17459

METEOROLOGICAL PARAMETERS
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique [AD-A267711] p 1105 N94-14938
IAI topic: El Nino. Southern oscillation and interannual climate variability [INPE-5410-PRE/1757] p 1111 N94-15186
Determination of sunshine duration from radiation intensity pyranometric measurements of global and sky radiation [BER-181] p 1105 N94-15302
TAFVER 2 users manual [AD-A266850] p 1106 N94-15757
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements [AD-A267192] p 1106 N94-15851
A comparison of cloud attenuation models using measured cloud data p 996 N94-16044
Spatial and frequency diversity in lidar systems [AD-A266192] p 1039 N94-16124
Earth imaging results from Galileo's second encounter p 1252 N94-16201
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center [AD-A266459] p 1106 N94-16568
Investigation of cloud properties and atmospheric stability with MODIS [NASA-CR-193475] p 1107 N94-16717
Mesoscale frontogenesis: An analysis of two cold front case studies [AD-A267950] p 1107 N94-17054
Phillips Laboratory global spectral numerical weather prediction model [AD-A267293] p 1107 N94-17244
Windshear database for forward-looking systems certification [NASA-TM-109012] p 1108 N94-17283
Arctic cyclones and Marginal Ice Zone (MIZ) variability [AD-A268610] p 1108 N94-17465
Atmospheric propagation analysis program [AD-A268231] p 1006 N94-17565
Forecasting the ducting of electromagnetic waves on the mesoscale [AD-A268101] p 1109 N94-17571
An empirical study of tropical cloud clusters using special sensor microwave imager data [AD-A268072] p 1110 N94-17595
The Central American cold surge: An observational analysis of the deep southward penetration of North American cold fronts [AD-A268592] p 1110 N94-17607

METEOROLOGICAL RADAR
Sensitivity testing of a single-Doppler temperature retrieval and forecast system [AD-A267278] p 1105 N94-14958
The Next Generation Weather Radar (NEXRAD)/Air Route Surveillance Radar (ARSR) operational comparison [REPT-93W0000145] p 987 N94-15439
Designing clutter rejection filters with complex coefficients for airborne pulsed Doppler weather radar [NASA-CR-4550] p 862 N94-15444
TRMM radar p 990 N94-15894
Windshear detection radar signal processing studies [NASA-CR-194615] p 994 N94-16022
Radar diagnostic parameters as indicators of severe weather in central Florida [PB93-183507] p 1106 N94-16465
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system [AD-A267479] p 1004 N94-17364
Automatic suppression of anomalous propagation clutter for noncoherent weather radars [KNMI-WR-92-06] p 1004 N94-17407

METEOROLOGICAL SATELLITES
The 1980 highlights [NASA-TM-109672] p 1303 N94-15509
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft [AD-A266404] p 1101 N94-16551
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center [AD-A266459] p 1106 N94-16568
Nowcasting methods for satellite imagery [AD-A267294] p 1108 N94-17267

METEOROLOGICAL SERVICES
TAFVER 2 users manual [AD-A266850] p 1106 N94-15757
A comparison of ceiling and visibility observation for NWS manned observation sites and ASOS sites [AD-A268356] p 1108 N94-17459

METEOROLOGY
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique [AD-A267711] p 1105 N94-14938
Mesoscale modeling of the atmosphere [AD-A263236] p 1098 N94-15132
Ensemble forecasting techniques in medium-range forecasting [AD-A267443] p 1107 N94-17029
Phillips Laboratory global spectral numerical weather prediction model [AD-A267293] p 1107 N94-17244

METHANE
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane [DE93-016850] p 949 N94-16897
The photochemistry of poly(methylphenylphosphazene) [AD-A267320] p 970 N94-16948
Transient studies of low temperature catalysts for methane conversion [DE93-017710] p 950 N94-16962
Biofilm structure and diversity [AD-A267254] p 1118 N94-16989
Methyl chloride via oxyhydrochlorination of methane [DE93-017548] p 952 N94-17218
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom [NASA-TM-107744] p 1138 N94-17452

METHIONINE
The relationship of metallothionein induction to the heat shock response [AD-A266634] p 1122 N94-15741

METHOD OF CHARACTERISTICS
Shock-free supersonic elliptic nozzles and method of forming same [NASA-CASE-LAR-14054-1] p 925 N94-15947
General order characteristic methods for solving neutron transport problems [DE93-015824] p 1170 N94-16167
The (delta)f algorithm for beam dynamics [DE93-015632] p 1187 N94-16660

METHOD OF MOMENTS
Resonant frequencies of irregularly shaped microstrip antennas using method of moments [NASA-TP-3386] p 989 N94-15767
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates [NASA-TP-3361] p 998 N94-16655
Application of the finite-difference time-domain method to scattering and radiation problems involving wires and plates [AD-A268396] p 1005 N94-17496

METHYL ALCOHOL
Contained liquids in microgravity, part 2 p 979 N94-16085
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane [DE93-016850] p 949 N94-16897

METHYL CHLORIDE
Methyl chloride via oxyhydrochlorination of methane [DE93-017548] p 952 N94-17218

METHYL COMPOUNDS
High-valent oxo, methoxorhenium complexes: Models for intermediates and transition states in proton-coupled multi-electron transfer reactions [AD-A266492] p 1211 N94-16782
High octane ethers from synthesis gas-derived alcohols [DE93-016861] p 975 N94-16898
The photophysics of poly(methylphenylphosphazene) [AD-A267321] p 970 N94-16949

METROLOGY
An optically modulated scatterer for microwave antenna metrology [NPL-DES-126] p 986 N94-15020
Improved optical radiation detectors and their calibration: 200 nm - 30 microns p 906 N94-15075

MICA
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites [AD-A266394] p 935 N94-16483

MICROANALYSIS
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials [DE93-015333] p 947 N94-16014
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle [DE93-015936] p 1101 N94-16840
Insights into semiconducting materials and growth phenomena through Z-contrast STEM [DE93-015964] p 1212 N94-16841
Electron spectroscopy analysis [NASA-CR-193591] p 951 N94-17039

MICROBURSTS (METEOROLOGY)
Windshear database for forward-looking systems certification [NASA-TM-109012] p 1108 N94-17283

MICROCHANNEL PLATES
Microchannel plate imaging detectors for the ultraviolet p 901 N94-15037
Microchannel plate detectors for space astronomy p 901 N94-15038
The MIC photon counting detector p 901 N94-15039
The STIS MAMA status: Current detector performance p 905 N94-15069
The Rutherford Appleton Laboratory photon counting detector p 910 N94-15096
Testing and management of flight instruments and their data [NASA-CR-194332] p 868 N94-15187
Performance optimization of detector electronics for millimeter laser ranging p 913 N94-15569
Performance comparison of high speed microchannel plate photomultiplier tubes p 922 N94-15624
Multi-frame x ray imaging with a large area 40ps camera [DE93-017179] p 1035 N94-16960
Detecting small debris using a ground-based photon counting detector [DE93-012623] p 898 N94-17669

MICROCLIMATOLOGY
USAF physiological studies of personal microclimate cooling: A review [AD-A267203] p 1022 N94-15858

MICROCOMPUTERS
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595

MICROCRACKS
Thermo-mechanical analysis of oxidation protected carbon-carbon composites [AD-A268191] p 941 N94-17597

MICROCRYSTALS
A discontinuous melt sheet in the Manson impact structure p 1103 N94-16269

MICROELECTRONICS
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method [AD-A267053] p 1008 N94-15665
The specific heat of titanium disilicide [AD-A267543] p 960 N94-17100
Reliability analysis of Surface Mount Technology (SMT) [AD-A267598] p 1055 N94-17194
RF vacuum microelectronics [AD-A268399] p 1014 N94-17423
Field-emitter arrays for RF vacuum microelectronics [AD-A268397] p 1015 N94-17526
Smart Power: New power integrated circuit technologies and their applications [VTT-TIED-1358] p 1015 N94-17546
Field emitter arrays for RF vacuum microelectronics [AD-A268595] p 1015 N94-17608

MICROGRAVITY
Sounding Rocket Experiments in Fluid Science and Materials Sciences: TEXUS 25 to 27 and MASER 4, volume 3
[ESA-SP-1132-VOL-3] p 943 N94-15157
Measurements of Interfacial Tension: MITE p 943 N94-15158
Orientation of DNA during free-solution electrophoresis p 944 N94-15162
Density and temperature relaxation near the critical point of carbon dioxide under reduced gravity p 944 N94-15164
Temperature propagation in near-critical fluids prior to and during separation p 944 N94-15165
Pressures of supercritical salt solutions p 945 N94-15166
Unidirectional solidification of liquid-crystal material p 945 N94-15167
Partial melting experiment of Y-Ba-Cu oxide p 945 N94-15168
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 945 N94-15171
Heat storage module p 946 N94-15172
Movement in microgravity
[NASA-TM-109526] p 881 N94-15389
Evaporation from a meniscus within a capillary tube in microgravity
[NASA-CR-194593] p 976 N94-15654
Mechanisms of combustion limits in premixed gas flames at microgravity
[NASA-CR-194557] p 946 N94-15713
Explosive boiling at very low heat fluxes: A microgravity phenomenon
[NASA-TM-106325] p 1046 N94-15817
A feasibility study of a microgravity enhancement system for Space Station Freedom
[NASA-CR-191550] p 886 N94-15864
Cultured normal mammalian tissue and process
[NASA-CASE-MSC-21984-1] p 1117 N94-15969
Proceedings of the Second Workshop on Microgravity Experimentation
[DSS-NR15-43-1990] p 977 N94-16071
Scientific use of Space Station Freedom p 977 N94-16072
The Japanese Space Station utilization plan p 977 N94-16074
Canadian microgravity experiments flown in 1989-1990 p 977 N94-16075
New findings and instrumentation from the NASA Lewis Microgravity Facility p 977 N94-16076
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079
Optical systems for the visualization of fluid and solid transparent media under microgravity conditions p 978 N94-16081
QUESTS: A microgravity research facility for materials science experiments p 978 N94-16082
Payloads for the processing of high temperature materials p 979 N94-16083
The Canadian Space Station user development program. Where do we go from here? p 898 N94-16084
Contained liquids in microgravity, part 2 p 979 N94-16085
Study of fractal aggregates p 979 N94-16086
Investigation of two-phase flow and boiling heat transfer during quenching of a tube under microgravity p 979 N94-16087
Use of microgravity in the synthesis of ceramics using sol gel techniques p 979 N94-16088
Gas bubble generation and transport in microgravity p 980 N94-16089
Infra Link: A data transmission system for microgravity research p 980 N94-16091
Characteristics of aimed arm movements in humans under low gravity p 980 N94-16093
Statistical techniques for study design of microgravity life sciences experiments p 980 N94-16094
Transcranial Doppler ultrasound studies of cerebral blood-flow in microgravity p 981 N94-16095
Human ocular torsion during parabolic flight: An investigation using electromagnetic scleral search coil p 981 N94-16096
Heart rate response to parabolic flight manoeuvres p 981 N94-16098
Finite element analytical techniques for ceramic production in microgravity: A hypoelastic model p 981 N94-16099
Precise measurement and utilization of acceleration data p 923 N94-16100
The design and analysis of a modular microgravity test platform for use aboard the NASA KC-135 aircraft p 899 N94-16101
Solution behaviour in microgravity: Considerations for protein crystal growth p 982 N94-16102
Materials processing in space: Issues for the third decade
[TABES PAPER 93-260] p 983 N94-16133
Growth of single crystals of mercuric iodide on the ground and in space
[DE93-015523] p 1209 N94-16442
Looking at science on board Eureca
[ESA-BR-80] p 874 N94-16584
Studies of premixed laminar and turbulent flames at microgravity
[NASA-CR-194656] p 951 N94-17125
The 1990-1991 NASA space biology accomplishments
[NASA-TM-4501] p 1118 N94-17257
Ground testing for the no-vent fill of cryogenic tanks: Results of tests for a 71 cubic foot tank
[NASA-TM-106293] p 1030 N94-17486
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636

MICROGRAVITY APPLICATIONS
Scientific use of Space Station Freedom p 977 N94-16072
The ESA telescience program p 977 N94-16073
The Japanese Space Station utilization plan p 977 N94-16074
New findings and instrumentation from the NASA Lewis Microgravity Facility p 977 N94-16076
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079
Development of the Laser-based R/D Test-bed System (LTS) p 978 N94-16080
Optical systems for the visualization of fluid and solid transparent media under microgravity conditions p 978 N94-16081
QUESTS: A microgravity research facility for materials science experiments p 978 N94-16082
Payloads for the processing of high temperature materials p 979 N94-16083
Materials processing in space: Issues for the third decade
[TABES PAPER 93-260] p 983 N94-16133

MICROHARDNESS
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Mechanical properties and crystal growth studies of semiconductor alloys
[AD-A268144] p 1216 N94-17454

MICROMECHANICS
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites
[DE93-015688] p 934 N94-16158
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223
Micromechanics modeling and analysis of Haversian compact bone tissues as a fiber reinforced composite material
[AD-A268250] p 1129 N94-17456
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597

MICROMETEORITES
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388

MICROMETEOROIDS
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
Densities of 5-15 micron interplanetary dust particles p 1244 N94-16367
The effect of an on-orbit near encounter on the number flux density of micron sized particles p 899 N94-16374
Dust grain resonant capture: A statistical study p 1245 N94-16384
Resolving LDEF's flux distribution: Orbital (debris?) and natural meteoroid populations p 1245 N94-16391

MICROORGANISMS
Regulation of attached bacterial growth by adsorbed proteins
[AD-A267756] p 1118 N94-17275

MICROPHONES
Free-field sensitivity calibration of laboratory standard microphones by the reciprocity technique: Measurements for the 1991 EEC intercomparison
[NPL-RSA(EXT)-0043] p 1176 N94-15019

MICROPHOTOGRAPHS
The effect of an on-orbit near encounter on the number flux density of micron sized particles p 899 N94-16374

MICROPOROSITY
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861

MICROPROCESSORS
VLSI for high-speed digital signal processing
[AD-A267709] p 1007 N94-14936
A microprocessor controller for a towing tank drive and flow visualisation system
[AD-A267087] p 872 N94-15543
Embedded computer systems: Status of C-17 software
[AD-A267307] p 1160 N94-16993

MICROSCOPES
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926

MICROSCOPY
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533

MICROSTRIP ANTENNAS
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998
Resonant frequencies of irregularly shaped microstrip antennas using method of moments
[NASA-TP-3386] p 989 N94-15767
Dual polarization microstrip array antenna
[CA-PATENT-1-307-842] p 994 N94-15986
Proceedings of the 1992 Antenna Applications Symposium, volume 1
[AD-A268167] p 1005 N94-17431

MICROSTRIP DEVICES
The imaging microstrip proportional counter: Features of a practical design p 900 N94-15030
Monte Carlo simulation of the microstrip gas counter
[NIKHEF-H/93-07] p 1035 N94-17619

MICROSTRUCTURE
Characterization of the cyclic plasticity of polycrystalline aluminum in the 90-300K domain: Use of the ultrasonic wave coupling technique - low frequency restraint
[ISAL-92-0083] p 954 N94-14930
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
Partial melting experiment of Y-Ba-Cu oxide p 945 N94-15168
Self-diffusion coefficients of sol-gel intermediates
[AD-A266957] p 963 N94-15179
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
Dynamical Ising model simulations of nucleation and growth in copper-cobalt alloys
[DE93-015336] p 957 N94-16015
Rheology and microstructure of concentrated zirconia-alumina suspensions for gelcasting composites
[DE93-015339] p 966 N94-16016
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
The effect of long-term aging on the impact properties of modified 9Cr-1Mo steel
[DE93-015453] p 957 N94-16068
The influence of thermal aging on the microstructure and fatigue properties of modified 9Cr-1Mo steel
[DE93-015489] p 957 N94-16106
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176

Classificational parameters for acapulcoites and lodranites: The cases of FRO 90011, EET 84302 and ALH A81187/84190 p 1245 N94-16389
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
Evolution of microstructure in face centered cubic metals during irradiation: A review
[DE93-015682] p 958 N94-16662
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883
Slip, twinning and transformation in Laves phases
[DE93-018164] p 960 N94-16972
Transformation toughening of composite ceramics
[AD-A267304] p 971 N94-16980
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Micromechanics modeling and analysis of Haversian compact bone tissues as a fiber reinforced composite material
[AD-A268250] p 1129 N94-17456

MICROWAVE AMPLIFIERS
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526

MICROWAVE ANTENNAS
An optically modulated scatterer for microwave antenna metrology
[NPL-DES-126] p 986 N94-15020
Experimental evaluation of an adaptive focusing algorithm for a microwave planar phased-array hyperthermia system at UCSF
[AD-A267004] p 1121 N94-15634
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector
[AD-D015788] p 998 N94-16535
The TOPSAR interferometric radar topographic mapping instrument p 1078 N94-16749
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228

MICROWAVE EQUIPMENT
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104

MICROWAVE FREQUENCIES
Recent scientific advances in the use of radar in scientific hydrology p 991 N94-15895

MICROWAVE IMAGERY
Fine scale measurements of microwave backscatter from the ocean surface
[AD-A264516] p 1111 N94-15134
A summary of microwave remote sensing investigations planned for BOREAS p 993 N94-15914
An analysis of simulated and actual DMSP SSM/T-2 brightness temperatures
[AD-A268103] p 1109 N94-17573
An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595

MICROWAVE OSCILLATORS
Measurements of the operation of the SINUS-6/BWO system
[AD-A266423] p 1011 N94-16556
Optically-switched submillimeter-wave oscillator and radiator
[NASA-CASE-NPO-18547-1-CU] p 1014 N94-17324

MICROWAVE PROBES
An optically modulated scatterer for microwave antenna metrology
[NPL-DES-126] p 986 N94-15020

MICROWAVE RADIOMETERS
Comparison of OLYMPUS beacon and radiometric attenuation measurements at Blacksburg, Virginia p 996 N94-16046
Earth observation from small satellites p 891 N94-17150
Validation and analysis of microwave-derived rainfall over the tropics
[AD-A267785] p 1108 N94-17303
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439
A conceptual design study for a two-dimensional, electronically scanned thinned array radiometer
[NASA-TM-109051] p 1085 N94-17665

MICROWAVE REFLECTOMETERS
Microwave reflectometer ionization sensor
[NASA-CR-191464] p 922 N94-17083

MICROWAVE SCATTERING
Fine scale measurements of microwave backscatter from the ocean surface
[AD-A264516] p 1111 N94-15134

MICROWAVE SENSORS
Relating multifrequency radar backscattering to forest biomass: Modeling and AIRSAR measurement p 1077 N94-16741

MICROWAVE SIGNATURES
Microwave properties and systems overview p 924 N94-15222

MICROWAVE TRANSMISSION
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228

MICROWAVES
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Microwave interaction with plasmas
[AD-A267048] p 1201 N94-15661
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
Efficient computational methods to study new and innovative signal detection techniques in SETI
[NASA-CR-193602] p 998 N94-16649
Processing of complex sintered reaction bonded silicon nitride parts by microwave heating
[DE93-015811] p 969 N94-16877
Large signal characterization and modeling of heterojunction bipolar transistors
[AD-A266184] p 1012 N94-16935
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535

MID-OCEAN RIDGES
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214

MIDAIR COLLISIONS
National Transportation Safety Board annual review of aircraft accident data, US general aviation, calendar year 1989
[PB93-160687] p 863 N94-16464

MIDALTITUDE
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage p 893 N94-17164

MIDDLE ATMOSPHERE
Second flight of the Spacelab grille spectrometer during the Atlas-1 mission
[AERONAUTICA-ACTA-A-367-199] p 923 N94-17592

MIE SCATTERING
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187

MILITARY AIR FACILITIES
The use of the Air Force Academy high wind alert system in forecasting moderate intensity wind events for military bases in the Colorado Springs area
[AD-A267648] p 1107 N94-17245

MILITARY AIRCRAFT
Naval aviation: The Navy is taking actions to improve the combat capabilities of its tactical aircraft. Report to Congressional Requesters
[AD-A268002] p 868 N94-17472

MILITARY AVIATION
Naval aviation: The Navy is taking actions to improve the combat capabilities of its tactical aircraft. Report to Congressional Requesters
[AD-A268002] p 868 N94-17472

MILITARY OPERATIONS
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943
Space countersurveillance: A requisite for theater defense planning
[AD-A266871] p 884 N94-15147
Technical evaluation report on the AGARD-PEP Specialists Meeting on Combat Aircraft Noise
[NLR-TP-91445-U] p 1177 N94-15506
Annual historical report, calendar year 1992
[AD-A267050] p 1121 N94-15663
Technical urban search and rescue, System To Locate Survivors (STOLS) units: Operator's manual
[AD-A266317] p 862 N94-16438
Design Quality Task Force survey comments
[AD-A266283] p 1225 N94-16473
Not ready for the first space war. What about the second?
[AD-A266557] p 1174 N94-16665
Nonlinear methods for communications
[AD-A267376] p 1001 N94-17019
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306

MILITARY SPACECRAFT
Military satellite communications: Opportunity to save billions of dollars. Report to the Chairman, Legislation, and National Security Subcommittee, Committee on Government Operations, House of Representatives
[AD-A267627] p 1002 N94-17199

MILITARY TECHNOLOGY
Symposium on the Future of Aeronautics in the Netherlands
[ETN-93-93780] p 853 N94-15120
Expectations for the future of military aviation p 854 N94-15128
Annual historical report, calendar year 1992
[AD-A267050] p 1121 N94-15663
Multiobjective functions optimization for task allocation mapping to multicomputer nodes
[AD-A267071] p 1146 N94-15670
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Modeling and simulation: A key to future defense technology
[TABES PAPER 93-654] p 1054 N94-16153
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Not ready for the first space war. What about the second?
[AD-A266557] p 1174 N94-16665
Diffractive optics in adverse environments p 1197 N94-17352
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523

MILLIMETER WAVES
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Applications of SLR p 911 N94-15556
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Millimeter accuracy satellites for two color ranging p 916 N94-15583
Improvement of SLR accuracy, a possible new step p 917 N94-15588

MILLING
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960

MIMD (COMPUTERS)
A trace-based comparison of shared memory multiprocessor architectures
[TR-432] p 1159 N94-16577

MINERAL DEPOSITS
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
A Monazite-bearing clast in Apollo 17 melt breccia p 1267 N94-16279
The influence of oceans on Martian volcanism p 1295 N94-16427
AVIRIS study of Death Valley evaporite deposits using least-squares band-fitting methods p 1067 N94-16676
Ground-truthing AVIRIS mineral mapping at Cuprite, Nevada p 1069 N94-16682
Expert system-based mineral mapping using AVIRIS p 1073 N94-16704

MINERALOGY
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Grosnaja ABCs: Magnesium isotope compositions p 1241 N94-16191
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong p 1007 N94-16197
Petrography, mineralogy, and Mg isotope composition of VICTA: A vigarano CaAl4O7-bearing type A inclusion p 1103 N94-16203

Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Lunar scout missions: Galileo encounter results and application to scientific problems and exploration requirements p 1259 N94-16229
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
The group A3 chondrules of Krymka: Further evidence for major evaporative loss during the formation of chondrules p 1242 N94-16257
Shock-thermal history of Kapoeta howardite matter on data of thermoluminescence analysis of individual mineral grains p 953 N94-16267
Searching for neuKREEP: An EMP study of Apollo 11 Group A basalts p 1266 N94-16275
A Monazite-bearing clast in Apollo 17 melt breccia p 1267 N94-16279
Carbon abundances, major element chemistry, and mineralogy of hydrated interplanetary dust particles p 1243 N94-16309
An initial perspective of S-asteroid subtypes within asteroid families p 1243 N94-16310
Isotopic signatures and distribution of nitrogen and trapped and radiogenic xenon in the Acapulco and FRO90011 meteorites p 1243 N94-16317
Chromite-rich mafic silicate chondrules in ordinary chondrites: Formation by impact melting p 1244 N94-16330
On possible Mn-53 heterogeneity in the early solar system p 1244 N94-16344
The Nakhla parent melt: REE partition coefficients and clues to major element composition p 1245 N94-16399
More on the cooling history of angrite LEW 86010 p 1245 N94-16400
Deucalionis Regio, Mars: Evidence for a unique mineralogic endmember and a crusted surface p 1291 N94-16406
Exsolved kirschsteinite in angrite LEW86010 olivine p 1245 N94-16410
Analysis of pyroxene absorptions observed in Martian dark regions p 1292 N94-16411
Igneous fractionation and subsolidus equilibration of diogenite meteorites p 1245 N94-16413
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
Identification of new meteorite, Mihonoseki (L), from broken fragments in Japan p 1246 N94-16415
The thickness of eucritic crust in the HED parent body p 1104 N94-16416
Optical effects of regolith processes on S asteroids as simulated by laser impulse alteration of ordinary chondrite p 1246 N94-16422
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
Variations in the Fe mineralogy of bright Martian soil p 1295 N94-16431
Composition of weakly altered Martian crust p 1296 N94-16436
Mapping the mineralogy and lithology of Canyonlands, Utah with imaging spectrometer data and the multiple spectral feature mapping algorithm p 1066 N94-16670
First results from analysis of coordinated AVIRIS, TIMS, and ISM (French) data for the Ronda (Spain) and Beni Bousera (Morocco) peridotites p 1067 N94-16675
Integrating remote sensing techniques at Cuprite, Nevada: AVIRIS, Thematic Mapper, and field spectroscopy p 1072 N94-16701
Expert system-based mineral mapping using AVIRIS p 1073 N94-16704

MINERALS
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites p 1241 N94-16175
Stalking the LREE-enriched component in ureilites p 1241 N94-16190
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
Complex radiation-thermal history of Kaidun meteorite on data of track study of silicate minerals p 1243 N94-16297
Refractory precursor components in an Allende ferromagnesian chondrule p 1245 N94-16412
From minerals to rocks: Toward modeling lithologies with remote sensing p 1086 N94-16437
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607
Mapping the mineralogy and lithology of Canyonlands, Utah with imaging spectrometer data and the multiple spectral feature mapping algorithm p 1066 N94-16670
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods p 1073 N94-16703

MINICOMPUTERS
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595

MINIMAX TECHNIQUE
Finding stable orientations of assemblies with linear programming [AD-A266990] p 1143 N94-15212

MIRANDA
Voyager encounters Uranus [NASA-TM-109619] p 1247 N94-15348
Spacework 16 — Simulated Space Shuttle Program [NASA-TM-109436] p 1221 N94-15420

MIRRORS
Rotary encoding device [NASA-CASE-GSC-13556-1] p 1148 N94-15943
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector [AD-D015788] p 998 N94-16535

MIS (SEMICONDUCTORS)
Atomic layer epitaxy of boron nitride [AD-A266260] p 1212 N94-16932

MISALIGNMENT
Systematic study of effects of load misalignment in uniaxial low cycle fatigue testing at high temperatures [NPL-DMM(A)-27] p 1057 N94-15015

MISS DISTANCE
Hypervelocity orbital intercept guidance using certainty control [AD-A267297] p 1174 N94-17219

MISSILE CONFIGURATIONS
Missile datcom user's manual [AD-A267447] p 1152 N94-17032

MISSILE CONTROL
Wind tunnel investigation with an operational turbojet engine [TABES PAPER 93-662] p 870 N94-16157

MISSILE DEFENSE
Plume radiation p 924 N94-15223

MISSILE DESIGN
Missile datcom user's manual [AD-A267447] p 1152 N94-17032

MISSILE DETECTION
Rocket Motor Plume Technology [AGARD-LS-188] p 923 N94-15217
Plume primary smoke p 923 N94-15218
Microwave properties and systems overview p 924 N94-15222

MISSILE SIGNATURES
Propulsion p 924 N94-15219
Microwave properties and systems overview p 924 N94-15222

MISSILE SYSTEMS
Propulsion p 924 N94-15219
Dependable software technology exchange [AD-A267103] p 1146 N94-15638

MISSILE TRAJECTORIES
Hypervelocity orbital intercept guidance usirlg certainty control [AD-A267297] p 1174 N94-17219

MISSILES
The effect of the nose shape and wing location toward the wing vortex breakdown [AD-A267724] p 855 N94-14942
Wind tunnel investigation with an operational turbojet engine [TABES PAPER 93-662] p 870 N94-16157
Missile datcom user's manual [AD-A267447] p 1152 N94-17032

MISSION ADAPTIVE WINGS
Mission adaptive wing [NASA-TM-109448] p 865 N94-15321

MISSION PLANNING
Pre-phase a study report of lunar polar orbiter [NASDA-TK-SS0440] p 873 N94-15000
HSTS: Integrating planning and scheduling [AD-A266991] p 1222 N94-15213
Dare to dream — The Space Station Freedom development [NASA-TM-109512] p 885 N94-15458
STS-26 crew participation in meetings [NASA-TM-109519] p 873 N94-15469
Mars rover sample return mission [NASA-TM-109521] p 873 N94-15471
Commitment to challenge [NASA-TM-109523] p 876 N94-15473
Long Duration Exposure Facility [NASA-TM-109427] p 885 N94-15497
SATCOP mission planning software package p 912 N94-15562
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919
Scientific use of Space Station Freedom p 977 N94-16072
Approaching the new reality [TABES PAPER 93-230] p 1050 N94-16131
A mission concept of Phobos/Deimos exploration p 1287 N94-16387
Chairmanship of the Neptune/Pluto outer planets science working group [NASA-CR-194625] p 1297 N94-16832
AMIGAU: A prototype tool aimed at mission analysis for satellites and satellite constellations p 888 N94-17133
Small missions for space science p 874 N94-17142
Strategy for a small satellite program and a proposal for a first mission p 874 N94-17143
Small satellite missions to long-period comets p 874 N94-17144
Big results with small space systems: What small systems are doing today p 896 N94-17187
Human Transportation System (HTS) study, volume 2 [NASA-TM-104779-VOL-2] p 882 N94-17320

MIXING
Hot electron mixers, the potential competition p 903 N94-15055

MIXING LAYERS (FLUIDS)
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows [NASA-CR-193131] p 1018 N94-15427
Parametric resonant triad interactions in a free shear layer [NASA-TM-106365] p 1021 N94-15751
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations [DE93-017155] p 1025 N94-16903
Transmission of light through a turbulent mixing layer [AD-A267266] p 1193 N94-17264

MOBILE COMMUNICATION SYSTEMS
Propagation-related AMT design aspects and supporting experiments p 995 N94-16042
Propagation research in Japan p 996 N94-16043
The ORBCOMM system p 893 N94-17163
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage p 893 N94-17164
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167

MODAL RESPONSE
A simplistic look at limit stresses from random loading [NASA-TM-108427] p 1058 N94-15710

MODELS
Infrared remote activity transceiver universal model [AD-A266965] p 1188 N94-15144
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Multi-resolution processing for fractal analysis of airborne remotely sensed data p 1065 N94-16604
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations [NASA-CR-194654] p 1118 N94-17279

MODULATED CONTINUOUS RADIATION
Microwave reflectometer ionization sensor [NASA-CR-191464] p 922 N94-17083

MODULATION
Controlling chaotic behavior in CO2 and other lasers [AD-A266431] p 1040 N94-16546
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation [DE93-016131] p 1212 N94-16844
Nonlinear methods for communications [AD-A267376] p 1001 N94-17019
Field-emitter arrays for RF vacuum microelectronics [AD-A268397] p 1015 N94-17526

MODULATORS
Optical residue processing module [AD-A267721] p 1188 N94-14940
Velocity matched millimeterwave electro-optic modulator [AD-A267264] p 1188 N94-14957

Controlling chaotic behavior in CO2 and other lasers
[AD-A266431] p 1040 N94-16546
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
High-speed nonlinear switching mechanisms and devices for multi-gigabit data processing
[AD-A267753] p 1014 N94-17375
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645

MODULES
SAR sensor electronics: T/R modules
p 993 N94-15911

MODULUS OF ELASTICITY
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555
The determination of the Young moduli of a material after exposure to laser light and delineation of the zone of laser alterations
[IFTR-37/1991] p 1061 N94-17058

MOIRE INTERFEROMETRY
Optical systems for the visualization of fluid and solid transparent media under microgravity conditions
p 978 N94-16081
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041

MOISTURE CONTENT
An assessment of acid fog
[DE93-009347] p 1095 N94-15940
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Water in Earth's mantle: Hydrogen analysis of mantle olivine, pyroxenes and garnet using the SIMS
p 1104 N94-16336
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
A snow wetness retrieval algorithm for SAR
p 1075 N94-16732

MOLDING MATERIALS
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765

MOLDS
Remelting of Fe-C-Si-alloy in a ceramic mold skin
p 945 N94-15169

MOLECULAR BEAM EPITAXY
Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization
p 974 N94-14982
High temperature superconductivity
[AD-A267006] p 1008 N94-15635
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
A high flux radical beam diamond growth
[AD-A266754] p 1207 N94-15955
JSEP fellowship
[AD-A266568] p 1211 N94-16800
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490
Epitaxial iron films
[AD-A268286] p 1217 N94-17579
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

MOLECULAR BEAMS
Molecular beam studies of reaction dynamics
[DE93-015035] p 1181 N94-15995

MOLECULAR CLOUDS
Boundary conditions for the paleoenvironment: Chemical and physical processes in the pre-solar nebula
[NASA-CR-194418] p 1298 N94-15421
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648

MOLECULAR COLLISIONS
Single-collision studies of energy transfer and chemical reaction
[DE93-017603] p 1182 N94-16121
Atomic processes in hydrogen and deuterium negative ion discharges
[DE93-013432] p 1183 N94-16817

MOLECULAR DIFFUSION
Reaction and diffusion in turbulent combustion
[DE93-017085] p 943 N94-15146
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046

MOLECULAR EXCITATION
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
Synthesis and chemistry of novel cyclic fluorocarbons
[AD-A267148] p 929 N94-15734
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
In-situ electron and optical spectroscopies of transiational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560

MOLECULAR GASES
Study of multi-dimensional radiative energy transfer in molecular gases
[NASA-CR-194613] p 1181 N94-15752
BACKSCAT lidar simulation version 3.0: Technical documentation and users guide
[AD-A267296] p 1003 N94-17268

MOLECULAR INTERACTIONS
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536

MOLECULAR IONS
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145

MOLECULAR ORBITALS
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111
Thermochemistry of silicate speciation in aqueous sodium silicate solutions: Ionization and polymerization of small silicate ion
[AD-A266825] p 964 N94-15683

MOLECULAR OSCILLATIONS
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722

MOLECULAR OSCILLATORS
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722

MOLECULAR PHYSICS
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927

MOLECULAR ROTATION
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046

MOLECULAR STRUCTURE
Thermochemistry of silicate speciation in aqueous sodium silicate solutions: Ionization and polymerization of small silicate ion
[AD-A266825] p 964 N94-15683
Many-body quantum mechanical studies of molecular clusters
[AD-A266624] p 1180 N94-15727
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by anomalous x ray scattering in Fe-Ni alloys
[DE93-015906] p 1209 N94-16171
Structural effects in electron transfer reactions: Comparative interfacial electrochemical kinetics for cis- versus trans-dioxorhenium (V) (bi)pyridine oxidation
[AD-A266307] p 1182 N94-16466
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
The photochemistry of poly(methylphenylphosphazene)
[AD-A267320] p 970 N94-16948
Responsive copolymers for enhanced petroleum recovery
[DE93-018030] p 971 N94-16999
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319

MOLECULAR THEORY
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722

MOLECULAR WEIGHT
Hemoglobin
[AD-A266455] p 1123 N94-16566
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994

MOLECULES
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936

MOLTEN SALTS
Ultrasound absorption in molten salts
p 944 N94-15161
Molten salt electrodeposition of high temperature superconductors
[AD-A266620] p 1009 N94-15726
Hydride-containing molten salts and their technology implications
[AD-A266458] p 1092 N94-16567

MOLYBDENUM ALLOYS
Tensile and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires
[NASA-TM-106350] p 962 N94-17652

MOLYBDENUM OXIDES
Siderophile elements in the upper mantle of the Earth: New clues from metal-silicate partition coefficients
p 1103 N94-16250

MOMENTUM
Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137

MOMENTUM TRANSFER
A global traveling wave on Venus
[NASA-CR-194356] p 1246 N94-15182
Gas-grain energy transfer in solar nebula shock waves: Implications for the origin of chondrules
p 1262 N94-16251
The pp elastic scattering experiment at RHIC and polarization studies in the Coulomb Nuclear Interference region
[DE93-015391] p 1187 N94-16829
Production of D-mesons in pp-collisions and quark-gluon string model
[DE93-626721] p 1185 N94-17312

MONATOMIC GASES
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021

MONITORS
Automated data collection system for the TCM3 transcutaneous pO2/pCO2 monitoring system
[AD-A268400] p 1129 N94-17424

MONOCHROMATIC RADIATION
A comparison of calculated and observed monochromatic type Ia supernova light curves
[MPA-709] p 1237 N94-17629

MONOMERS
Compounds containing meta-biphenylenedioxy moieties and polymers therefrom
[NASA-CASE-LAR-14517-1] p 965 N94-15879
Swelling equilibria for temperature-sensitive ampholytic hydrogels
[DE93-015264] p 966 N94-15996

MONOPOLE ANTENNAS
Design of broadband wire antennas for frequency hopping applications
[AD-A267405] p 1001 N94-17025

The analysis of low-profile, broadband, monopole, vehicle antennas and matching network synthesis
[AD-A268340] p 1006 N94-17582

MONOPULSE RADAR
Enhanced down-range profiles of complex targets using wideband radar echo returns
[AD-A266508] p 999 N94-16788
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031

MONOTECTIC ALLOYS
Separation behaviour of monotectic alloys
p 945 N94-15170

MONOTONE FUNCTIONS
Monotone approximate query processing
[AD-A267153] p 1169 N94-15779

MONTE CARLO METHOD
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
DSMC simulations of Mach 20 nitrogen flows about a 70 degree blunted cone and its wake
[NASA-TM-107762] p 1018 N94-15291
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
Study of multi-dimensional radiative energy transfer in molecular gases
[NASA-CR-194613] p 1181 N94-15752
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
Investigation of radiative interaction in laminar flows using Monte Carlo simulation
[NASA-CR-194604] p 1021 N94-15795
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
Abundance recovery error analysis using simulated AVIRIS data p 1074 N94-16708
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
Simulation reduction using the Taguchi method
[NASA-CR-4542] p 1055 N94-17082

MOON
EUVE observations of the Moon p 1250 N94-16185

MORPHOLOGY
Effects of aging time on V205 sol-gel coatings
[AD-A266824] p 965 N94-15843
Micro- and meso-scale simulations of magnetospheric processes related to the aurora and substorm morphology
[NASA-CR-193437] p 1102 N94-17527

MOSAICS
Global Magellan-image map of Venus at full resolution
p 1274 N94-16319
Global and regional/seasonal color mosaics of Mars
p 1288 N94-16393
Lunar multispectral mosaics from Galileo's second Earth-Moon flyby p 1288 N94-16394

MOSSBAUER EFFECT
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system
p 1259 N94-16233
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation
[DE93-015406] p 1212 N94-16887

MOTION PERCEPTION
Neural basis of motion perception
[AD-A267267] p 1133 N94-17265

MOTION SICKNESS
Autogenic-Feedback Training (AFT) as a preventive method for space motion sickness: Background and experimental design
[NASA-TM-108780] p 1120 N94-15537
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
Flight simulator-induced sickness and visual displays evaluation
[AD-A267019] p 1122 N94-15845
Evaluation of putative neurochemical intermediaries in space/motion sickness
[NASA-CR-193607] p 1118 N94-17090

MOTION SIMULATION
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725

MOTOR VEHICLES
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516

MOUNTAINS
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218

MOVING TARGET INDICATORS
Moving target indicator using higher order statistics
[AD-D015890] p 1000 N94-16917

MULLITES
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466

MULTIBEAM ANTENNAS
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998
Proceedings of the 1992 Antenna Applications Symposium, volume 1
[AD-A268167] p 1005 N94-17431

MULTICHANNEL COMMUNICATION
Call sign intelligibility improvement using a spatial auditory display
[NASA-TM-104014] p 1177 N94-15549
On-board packet switch architectures for communication satellites
[NASA-TM-106328] p 883 N94-17488

MULTIGRID METHODS
A parallel adaptive mesh refinement algorithm
[NASA-CR-191530] p 1168 N94-15724
A multilevel-multiresolution method for image processing. A Bayesian framework for reconstructing and representing shapes
[AD-A266772] p 1082 N94-15842
An upwind multigrid method for solving viscous flows on unstructured triangular meshes
[NASA-TM-109343] p 1027 N94-17061
Multigrid time-accurate integration of Navier-Stokes equations
[NASA-TM-106373] p 1028 N94-17258
Multigrid direct numerical simulation of the whole process of flow transition in 3-D boundary layers
[NASA-TM-106369] p 1030 N94-17557
Thin-layer and full Navier-Stokes calculations for turbulent supersonic flow over a cone at an angle of attack
[NASA-CR-189103] p 861 N94-17558

MULTILAYER INSULATION
Approximate Green's function methods for HZE transport in multilayered materials
[NASA-TM-4519] p 1300 N94-17084
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124

MULTIMEDIA
Bandwidth characteristics of multimedia data traffic on a local area network
[NASA-TM-104026] p 883 N94-15648
Processor capacity reserves for multimedia operating systems
[AD-A266639] p 1158 N94-15745
A computer-based training system combining virtual reality and multimedia
[DE93-013768] p 1132 N94-16819

MULTIMISSION MODULAR SPACECRAFT
Earth observation from small satellites
p 891 N94-17150

MULTIPATH TRANSMISSION
Diffraction of microwaves at rectangular facades of buildings with and without ground reflections (Fresnel-Kirchhoff-Approximation)
[DLR-FB-92-35] p 987 N94-15155
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 2: Appendices
[AD-A267021] p 987 N94-15527
Broadband conventional beamforming incorporating adaptive equalization
[AD-A267090] p 987 N94-15544
Alternative optical architectures for multichannel adaptive optical processing
[AD-A267052] p 1189 N94-15664
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
Satellite sound broadcast propagation measurements
p 996 N94-16047
An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048
A study of land mobile satellite service multipath effects using SATLAB software p 997 N94-16051
ATCRBS reply environment at Memphis International Airport
[AD-A266322] p 864 N94-16439

MULTIPHASE FLOW
Fundamental studies of rocket combustion chemistry and combustion instability
[AD-A266248] p 925 N94-16482

MULTIPHOTON ABSORPTION
Multiphoton ionization studies of WF6 and UF6
[DE93-016232] p 1181 N94-15863
Characterization of UV emissions resulting from electronic energy transfer in atmospheric molecules
[AD-A266244] p 1101 N94-16469
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520

MULTIPLE ACCESS
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557

MULTIPLEXING
Advanced high performance CdHgTe multiplexed arrays p 903 N94-15051
A linear monolithic 4-6 on silicon IR detector array
p 910 N94-15098
An approximation for computing reduction in bandwidth requirements using intelligent multiplexers
[AD-A267434] p 1001 N94-17026
Review of rigorous coupled-wave analysis and of homogeneous effective medium approximations for high spatial-frequency surface-relief gratings
p 1194 N94-17335
3-D optical memory disk
[AD-A267908] p 1141 N94-17380

MULTIPLIERS
Method and apparatus for spur-reduced digital sinusoid synthesis
[NASA-CASE-NPO-18789-1-CU] p 1154 N94-17326

MULTIPOLAR FIELDS
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
Multipolar-like form of nonabelian gauge theories
[DE93-626690] p 1171 N94-17314

MULTIPROCESSING (COMPUTERS)
Relaxing consistency in recoverable distributed shared memory
[AD-A266931] p 1140 N94-15174
Multiobjective functions optimization for task allocation mapping to multicomputer nodes
[AD-A267071] p 1146 N94-15670
A trace-based comparison of shared memory multiprocessor architectures
[TR-432] p 1159 N94-16577
Shared-memory multiprocessor trends and the implications for parallel program performance
[TR-420] p 1159 N94-16578
Efficient compilation of array statements for private memory multicomputers
[AD-A266595] p 1160 N94-16724
Applications and development of communication models for the touchstone GAMMA and DELTA prototypes
[NASA-CR-193617] p 999 N94-16867
Fault-tolerant architectures for multiprocessor and VLSI-based systems
[AD-A267370] p 1140 N94-17005

MULTISENSOR APPLICATIONS
Comparison of JPL-AIRSAR and DLR E-SAR images from the MAC Europe 1991 campaign over testsite Oberpfaffenhofen: Frequency and polarization dependent backscatter variations from agricultural fields
p 1075 N94-16733
Image accuracy and representational enhancement through low-level, multi-sensor integration techniques
[DE93-014888] p 1167 N94-17287

MULTISPECTRAL BAND SCANNERS
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 2: TIMS Workshop
[NASA-CR-194541] p 1063 N94-16595
TIMS performance evaluation summary
p 1063 N94-16596
A quantitative analysis of TIMS data obtained on the Learjet 23 at various altitudes p 1063 N94-16597
Analysis of TIMS performance subjected to simulated wind blast p 1063 N94-16598
Sensitivity of blackbody reference panels to wind blast
p 1063 N94-16599
Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600
Application of split window technique to TIMS data
p 1064 N94-16601
Atmospheric corrections for TIMS estimated emittance
p 1064 N94-16602
An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605

Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 1: AVIRIS Workshop
[NASA-CR-194540] p 1066 N94-16666
MULTISPECTRAL PHOTOGRAPHY
Age determinations and Earth-based multispectral observations of lunar light plains p 1275 N94-16323
Lunar multispectral mosaics from Galileo's second Earth-Moon flyby p 1288 N94-16394
MULTISPECTRAL RESOURCE SAMPLER
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
MULTISTAGE ROCKET VEHICLES
ARIANE 5 light derivatives p 878 N94-17140
NEXT launch system p 878 N94-17141
MULTIVARIATE STATISTICAL ANALYSIS
Development of pattern recognition techniques for the evaluation of toxicant impacts to multispecies systems
[AD-A267197] p 1095 N94-15790
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657
Computing science and statistics. Volume 24: Graphics and visualization
[AD-A266571] p 1150 N94-16721
MUONS
Electroweak physics from D0
[DE93-015041] p 1181 N94-16053
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
The 3D-Flow processor for a programmable level-1 trigger (feasibility study)
[DE93-016045] p 1159 N94-16172
Calorimeter based detectors for high energy hadron colliders
[DE93-017055] p 1188 N94-16900
Electroweak results from D0
[DE93-014926] p 1185 N94-16968
MURCHISON METEORITE
Extraction and isotopic analysis of medium molecular weight hydrocarbons from Murchison using supercritical carbon dioxide p 1241 N94-16184
Do SiC grains in Orgueil differ from those in Murchison? p 1242 N94-16260
MUSCLES
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621
MUSIC
Sights and sounds of space
[NASA-TM-109610] p 1302 N94-15424
MUTATIONS
Isolation of thermostable enzyme mutants by cloning and selection in thermophilic bacteria
[AD-A266378] p 1117 N94-16514
MYSTERE 20 AIRCRAFT
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
[AD-A266493] p 1138 N94-16793

N

N-TYPE SEMICONDUCTORS
Diamond p-n junction cold cathode
[AD-A266926] p 1206 N94-15107
NACELLES
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
NAKHLITES
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth p 1242 N94-16272
Martian carbon dioxide: Clues from isotopes in SNC meteorites p 1270 N94-16295
NAMING
Model designation of military aerospace vehicles
[AD-A267852] p 898 N94-17388
NARROWBAND
Filters for the International Solar Terrestrial Physics (ISTP) mission far ultraviolet imager
[NASA-CR-194633] p 1190 N94-15868
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694
NASA PROGRAMS
SHARP
[NASA-TM-109659] p 1221 N94-15230
University Joint Venture: JOVE

Commercial space opportunities advanced concepts and technology overview
[TABES PAPER 93-240] p 1050 N94-16132
NATIONAL AEROSPACE PLANE PROGRAM
National Aero-Space Plane
[NASA-TM-109450] p 865 N94-15323
National Aero-Space Plane resource reel
[NASA-TM-109451] p 865 N94-15324
Fluid flow and heat convection studies for actively cooled airframes
[NASA-CR-194624] p 1024 N94-16491
Trajectory optimization for the National Aerospace Plane
[NASA-CR-194618] p 867 N94-16498
NATIONAL LAUNCH VEHICLE PROGRAM
Aerodynamic flight control to increase payload capability of future launch vehicles
[NASA-CR-193850] p 870 N94-15532
NATURAL GAS
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
Methyl chloride via oxyhydrochlorination of methane
[DE93-017548] p 952 N94-17218
NATURAL LANGUAGE (COMPUTERS)
Using multiple adaptively-weighted strategies for the resolution of demonstratives
[AD-A266463] p 1150 N94-16585
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
NATURAL SATELLITES
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyond p 1007 N94-16197
NAUSEA
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
NAVIER-STOKES EQUATION
Rocket motor plume flowfields: Phenomenology and simulation p 924 N94-15221
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 2: User's guide
[NASA-TM-106338-VOL-2] p 1019 N94-15475
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 1: Analysis description
[NASA-TM-106336-VOL-1] p 1019 N94-15485

Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 2: User's guide
[NASA-TM-106340-VOL-2] p 1020 N94-15488
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 3: Programmer's reference
[NASA-TM-106341] p 1022 N94-15865
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 3: Programmer's reference
[NASA-TM-106339] p 1022 N94-15867
Computation of a controlled store separation from a cavity p 858 N94-16513
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 1: Analysis description
[NASA-TM-106337] p 1024 N94-16527
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966
An upwind multigrid method for solving viscous flows on unstructured triangular meshes
[NASA-TM-109343] p 1027 N94-17061
Computational aerodynamics with icing effects
[AD-A267509] p 860 N94-17074
On solving the compressible Navier-Stokes equations for unsteady flows at very low Mach numbers
[NASA-TM-106380] p 1027 N94-17128
Multigrid time-accurate integration of Navier-Stokes equations
[NASA-TM-106373] p 1028 N94-17258
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
Boundary conditions and the simulation of low Mach number flows
[NASA-TM-106374] p 1029 N94-17448
Thin-layer and full Navier-Stokes calculations for turbulent supersonic flow over a cone at an angle of attack
[NASA-CR-189103] p 861 N94-17558
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674

NAVIGATION

Wide-area Differential Global Positioning System (WDGPS)/Wide-area Integrity Broadcast (WIB) alternatives analysis
[DOT/FAA/SE-93/3] p 864 N94-16906

NAVIGATION INSTRUMENTS

Perception for outdoor navigation
[AD-A266867] p 863 N94-14919

NAVIGATION SATELLITES

Not ready for the first space war. What about the second?
[AD-A266557] p 1174 N94-16665

NAVY

Structured finite volume modeling of US Navy aircraft engine test cells task 2: Turboprop engine, volume 1
[AD-A267833] p 872 N94-17405
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine, volume 1
[AD-A268176] p 873 N94-17432
Naval aviation: The Navy is taking actions to improve the combat capabilities of its tactical aircraft. Report to Congressional Requesters
[AD-A268002] p 868 N94-17472
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine-code documentation and listings, volume 2
[AD-A268177] p 873 N94-17508

NEAR FIELDS

A near-field scanning optical microscope for analysis of magneto-optic media p 1199 N94-14995
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196
How to deduce the far field of an antenna from planar near-field measurements
[NPL-DES-123] p 1006 N94-17545

NEAR INFRARED RADIATION

New K type asteroids p 1241 N94-16195

NEBULAE

Boundary conditions for the paleoenvironment: Chemical and physical processes in the pre-solar nebula
[NASA-CR-194418] p 1298 N94-15421

NEGATIVE ELECTRON AFFINITY

Diamond p-n junction cold cathode
[AD-A266926] p 1206 N94-15107

NEGATIVE IONS

Swelling equilibria for temperature-sensitive ampholytic hydrogels
[DE93-015264] p 966 N94-15996
Negative ion formation in small carbon clusters
[DE93-015436] p 1182 N94-16064
Atomic processes in hydrogen and deuterium negative ion discharges
[DE93-013432] p 1183 N94-16817
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436

NEODYMIUM ISOTOPES

Nd-142/Nd-144 in bulk planetary reservoirs, the problem of incomplete mixing of interstellar components and significance of very high precision Nd-145/Nd-144 measurements p 1256 N94-16220
Constraints on the differentiation of the Earth from the coupled Sm-146,147-Nd-142,143 systematics p 1103 N94-16271

NEODYMIUM LASERS

Nd:YLF laser for airborne/spaceborne laser ranging p 913 N94-15563
An improved light source for laser ranging p 913 N94-15567
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Measuring atmospheric dispersion with WLRS in multiple wavelength mode p 916 N94-15582
Upgrading of the Borowiec laser station p 877 N94-15604
Results of the MTLRS-1 upgrade p 877 N94-15610
The new MTLRS transmitting system p 877 N94-15612
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
The third generation SLR station Potsdam no. 7836 p 877 N94-15623
Laser weld repair of tantalum sheet
[DE93-016417] p 1041 N94-16871
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630

NEON

Observation of nonsequential ionization of helium and its impact on intensity monitoring
[DE93-017174] p 949 N94-16904

NEON ISOTOPES

The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR p 1248 N94-16177
Effects of bulk composition on production rates of cosmogenic nuclides in meteorites p 1245 N94-16385
Solar noble gases revealed by closed system stepped etching of a metal separate from Fayetteville p 954 N94-16432

NEPTUNE (PLANET)

Neptune encounter highlights
[NASA-TM-109421] p 1246 N94-15240
NASA report to education, volume 7
[NASA-TM-109435] p 1247 N94-15419
Voyager 2: Neptune encounter
[NASA-TM-109423] p 1247 N94-15491
Tidal interaction: A possible explanation for geysers and other fluid phenomena in the Neptune-Triton system p 1272 N94-16311
Mapping the stability region of the 3:2 Neptune-Pluto resonance p 1280 N94-16351

NERVES

Cortical adaptive filtering in bioacoustic signal classification
[AD-A266229] p 1177 N94-16939

NERVOUS SYSTEM

Development of the OMPAT neuropsychological/psychomotor performance evaluation and OMPAT data and timing support programs
[AD-A266954] p 1122 N94-15759
Neural mechanisms of attention
[AD-A266315] p 1132 N94-16456

NETHERLANDS

Symposium on the Future of Aeronautics in the Netherlands
[ETN-93-93780] p 853 N94-15120
Aviation and the KLM: Past and future p 853 N94-15126
Developments in the Higher Technical Aerospace Education p 854 N94-15130

NETWORK ANALYSIS

Stochastic scheduling in in-forest networks
[INRIA-RR-1719] p 1164 N94-15695
Congestion control of high-speed networks
[AD-A267013] p 989 N94-15748
State space partitioning methods for solving a class of stochastic network problems
[AD-A267494] p 1173 N94-17585

NETWORK CONTROL

Real-time implementation of neural network learning control of a flexible space manipulator
[AD-A266962] p 1045 N94-14970
Panacea: An active sensor controller for the ALVINN autonomous driving system
[AD-A266964] p 864 N94-14972
The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
The IMS software integration platform
[AD-A266285] p 1151 N94-16910

NEURAL NETS

Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
Real-time implementation of neural network learning control of a flexible space manipulator
[AD-A266962] p 1045 N94-14970
Panacea: An active sensor controller for the ALVINN autonomous driving system
[AD-A266964] p 864 N94-14972
Multiobjective functions optimization for task allocation mapping to multicomputer nodes
[AD-A267071] p 1146 N94-15670
The bootstrapped algorithm: Fast algorithm for blind signal separation
[AD-A266671] p 1147 N94-15772
Unipolar terminal-attractor based neural associative memory with adaptive threshold
[NASA-CASE-NPO-18790-1-CU] p 1165 N94-15958
Neural-network-directed alignment of optical systems using the laser-beam spatial filter as an example
[NASA-TP-3372] p 1034 N94-15961
Real-time adaptive neural network data processing
[TABES PAPER 93-660] p 1054 N94-16155
Neural mechanisms of attention
[AD-A266315] p 1132 N94-16456
AVIRIS data and neural networks applied to an urban ecosystem p 1073 N94-16705
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
ONRASIA scientific information bulletin, volume 18, number 2
[AD-A267798] p 1304 N94-17305

NEUROLOGY

Development of the OMPAT neuropsychological/psychomotor performance evaluation and OMPAT data and timing support programs
[AD-A266954] p 1122 N94-15759
Localizing visual function in the brain
[AD-A267381] p 1133 N94-17020

NEUROMUSCULAR TRANSMISSION

Synaptic plasticity and memory formation
[AD-A267988] p 1133 N94-17453

NEURONS

Neurotoxicity of hemoglobin in cortical cell culture
[AD-A266506] p 1128 N94-16786
Theoretical and experimental research into biological mechanisms underlying learning and memory
[AD-A267441] p 1133 N94-17022

NEUROPHYSIOLOGY

The 12th Annual Carmel Conference, distinctiveness and Memory: Cognitive Psychophysiological and Physiological Considerations
[AD-A267181] p 1131 N94-15148
Cumulative effect of repeated brief cerebral ischemia
[AD-A267155] p 1121 N94-15736
Unipolar terminal-attractor based neural associative memory with adaptive threshold
[NASA-CASE-NPO-18790-1-CU] p 1165 N94-15958
Neurotoxicity of hemoglobin in cortical cell culture
[AD-A266506] p 1128 N94-16786
Cortical adaptive filtering in bioacoustic signal classification
[AD-A266229] p 1177 N94-16939
Localizing visual function in the brain
[AD-A267381] p 1133 N94-17020
Evaluation of putative neurochemical intermediaries in space/motion sickness
[NASA-CR-193607] p 1118 N94-17090
Neural basis of motion perception
[AD-A267267] p 1133 N94-17265

NEUROTRANSMITTERS

Synaptic plasticity and memory formation
[AD-A267988] p 1133 N94-17453

NEUTRAL BEAMS

High beta and confinement studies of TFTR
[DE93-016204] p 1202 N94-16446

NEUTRAL CURRENTS
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951
NEUTRAL PARTICLES
Linear characteristic spatial quadrature for discrete ordinates neutral particle transport on arbitrary triangles
[AD-A267485] p 1185 N94-17365
NEUTRINOS
On the 17-keV neutrino
[DE93-012638] p 1181 N94-15974
Possible dust contamination of the early solar system p 1244 N94-16352
Contained (nu) events observed in Soudan 2
[DE93-015548] p 1300 N94-17233
NEUTRON ACTIVATION ANALYSIS
INAA of CAIs from the Maralinga CK4 chondrite: Effects of parent body thermal metamorphism p 1244 N94-16355
NEUTRON COUNTERS
Preliminary results from bubble detector measurements aboard Biocosmos-2044 p 981 N94-16097
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951
NEUTRON DIFFRACTION
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
NEUTRON IRRADIATION
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
NEUTRON SCATTERING
Multiple process simulations for correction factor calculations in experiments with neutrons. LUSMK program
[DE93-623957] p 1179 N94-14932
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers
[DE93-015809] p 1184 N94-16838
NEUTRON SPECTRA
Preliminary results from bubble detector measurements aboard Biocosmos-2044 p 981 N94-16097
NEUTRON STARS
Astronomy and astrophysics p 1239 N94-15970
Relativistic mean-field calculations of lambda and sigma hypernuclei
[DE93-015269] p 1181 N94-16013
Fast pulsars, compact stars, and the strange matter hypothesis
[DE93-015039] p 1239 N94-16052
NEUTRONS
Multiple process simulations for correction factor calculations in experiments with neutrons. LUSMK program
[DE93-623957] p 1179 N94-14932
General order characteristic methods for solving neutron transport problems
[DE93-015824] p 1170 N94-16167
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194
ARIES tokamak reactor study
[DE93-017059] p 1203 N94-16901
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
NEWS MEDIA
COBE video news
[NASA-TM-109598] p 987 N94-15292
NICKEL
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon
[DE93-015449] p 1209 N94-16066
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649
NICKEL ALLOYS
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885
A sulfur segregation study of PWA 1480, NiCrAl, and NiAl alloys
[NASA-TM-106289] p 956 N94-15992
A reexamination of grain boundary fracture in Ni3Al: Environmental and alloying effects
[DE93-015431] p 1208 N94-16063
Robotic weld overlay coatings for erosion control
[DE93-016938] p 970 N94-16959
Transient phenomena following precipitation and re-solution anneals in a NiTi alloy
[AD-A267557] p 961 N94-17106
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282
NICKEL CADMIUM BATTERIES
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
A power system for a microsatellite p 895 N94-17176
NICKEL HYDROGEN BATTERIES
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
Small satellite nickel-hydrogen and nickel-metal hydride power applications p 895 N94-17175
NICKEL OXIDES
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
Siderophile elements in the upper mantle of the Earth: New clues from metal-silicate partition coefficients p 1103 N94-16250
NICKEL STEELS
Stress corrosion cracking of 316 SS and Incoloy-800 in high temperature aqueous containing sulfate and chloride
[DE93-623325] p 952 N94-17302
NIGHT
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943
NIGHT SKY
Tip-tilt compensation: Resolution limits for ground-based telescopes using laser guide star adaptive optics
[DE93-016426] p 1237 N94-16872
NIGHT VISION
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
[AD-A266493] p 1138 N94-16793
SYDONI: An intensified system for night observation p 891 N94-17153
NIMBUS 6 SATELLITE
The fragmentation of the Nimbus 6 rocket body
[NASA-CR-191645] p 926 N94-16504
NIMBUS 7 SATELLITE
Coastal zone color scanner: Nimbus 7
[NASA-TM-109590] p 1111 N94-15281
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439
NIOBIUM
Submillimeterwave SIS mixer developments p 903 N94-15054
Nb-based SJTJ for nuclear detection: Preliminary results with alpha radiation p 905 N94-15068
Preparation and properties of Nb/Al SIS and SIN junctions for millimeter and submillimeter radioastronomical receivers p 907 N94-15078
NIOBIUM ALLOYS
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883
NIOBIUM CARBIDES
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883
NITRAMINE PROPELLANTS
Spectral studies of solid propellant combustion 4: Absorption and burn rate results for M43, XM39, and M10 propellants
[AD-A267119] p 946 N94-15685
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
NITRATE ESTERS
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
NITRATES
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Atmospheric ionization by solar particles detected by nitrate measurement in antarctic snow
[AD-A267583] p 1299 N94-17208
Chemical tracer studies at IOSDL. 3: The measurement of silicate, nitrate and phosphate in seawater
[IOS-302-1992] p 1114 N94-17489
NITRIC ACID
An assessment of acid fog
[DE93-009347] p 1095 N94-15940
NITRIC OXIDE
Direct catalytic decomposition of nitric oxide
[DE93-016689] p 949 N94-16896
Factors determining the release of nitric oxide --- Calcium/cadmium transport by renal cortical collectin duct cells
[AD-A266232] p 1118 N94-17224
NITRIDES
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466
NITRO COMPOUNDS
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
NITROGEN
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
A Pluto thermal model p 1256 N94-16216
Nitrogen and light noble gases in Parsa enstatite chondrite p 1246 N94-16435
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
NITROGEN COMPOUNDS
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997
NITROGEN ISOTOPES
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Nitrogen isotopic signatures in agglutinates from breccia 79035 p 954 N94-16314
NITROGEN LASERS
Bibliography of short wavelength chemical laser research
[AD-A267619] p 1041 N94-17195
NITROGEN OXIDES
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436
NOBLE METALS
Experimental partitioning of Zr, Ti, and Nb between silicate liquid and a complex noble metal alloy and the partitioning of Ti between perovskite and platinum metal p 962 N94-16287
NOCTURNAL VARIATIONS
Formation of the stable auroral arc that intensifies at substorm onset
[NASA-CR-193637] p 1098 N94-15433
NOISE INTENSITY
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115
Technical evaluation report on the AGARD-PEP Specialists Meeting on Combat Aircraft Noise
[NLR-TP-91445-U] p 1177 N94-15506
NOISE MEASUREMENT
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115
Cryogenic measurements of aerojet GaAs n-JFETs
[NASA-TM-103972] p 1009 N94-15765
Noise measurement flight test of five light helicopters
[AD-A268566] p 1179 N94-17599
NOISE POLLUTION
Strategic planning for aircraft noise route impact analysis: A three dimensional approach
[NASA-CR-191484] p 1178 N94-17278

NOISE PREDICTION (AIRCRAFT)
Strategic planning for aircraft noise route impact analysis: A three dimensional approach
[NASA-CR-191484] p 1178 N94-17278
NOISE PROPAGATION
Sound exposure level prediction for impulse sound sources above variable terrain
[AD-A267535] p 1178 N94-17119
NOISE REDUCTION
The 1968 highlights --- NASA programs and research
[NASA-TM-109627] p 1302 N94-15413
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417
Technical evaluation report on the AGARD-PEP Specialists Meeting on Combat Aircraft Noise
[NLR-TP-91445-U] p 1177 N94-15506
Hydraulic pump with integral electric motor
[AD-D015782] p 1011 N94-16549
NOISE SPECTRA
Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718
NONADIABATIC CONDITIONS
Supersymmetry of gauge equations and geometric nonadiabatic phases
[DE93-626671] p 1219 N94-14935
NONDESTRUCTIVE TESTS
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
Component testing and quality assurance
p 932 N94-15259
The Marshall Automated Weld System (MAWS)
[TABES PAPER 93-602] p 1049 N94-16138
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596
NONEQUILIBRIUM FLOW
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215
NONEQUILIBRIUM PLASMAS
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
NONEQUILIBRIUM RADIATION
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-194645] p 1027 N94-17095
NONGRAY GAS
Study of multi-dimensional radiative energy transfer in molecular gases
[NASA-CR-194613] p 1181 N94-15752
NONINTRUSIVE MEASUREMENT
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655
NONLINEAR EQUATIONS
Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833
Nonlinear problems in fluid dynamics and inverse scattering
[AD-A266234] p 1026 N94-16927
Applications of the phi-transform
[AD-A266247] p 1170 N94-16940
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540
NONLINEAR FILTERS
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
NONLINEAR OPTICS
Optimum wavelengths for two color ranging
p 915 N94-15580
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
High-performance nonlinear optical material developed in Japan
[AD-A266194] p 1191 N94-16126
Rational design, construction, and processing of high-performance nonlinear optical materials
[AD-A266185] p 1191 N94-16454
New organic materials for nonlinear optics applications
[AD-A266451] p 1192 N94-16563
Main chain chromophoric polymers with second order nonlinear optical properties
[AD-D015893] p 969 N94-16920
Theoretical studies of nonlinear optical properties of conjugated polymers
[AD-A267390] p 1193 N94-17024
Two-dimensional acousto-optical interaction theory and experimental analysis
[AD-A267761] p 1193 N94-17254
High-speed nonlinear switching mechanisms and devices for multi-gigabit data processing
[AD-A267753] p 1014 N94-17375
Spectral inverse scattering theory for dielectric media: Application to optical devices
[AD-A268635] p 1199 N94-17427
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455
NONLINEAR PROGRAMMING
A sequential quadratic programming algorithm using an incomplete solution of the subproblem
[DE93-017439] p 1149 N94-16120
NONLINEAR SYSTEMS
Iteration scheme for the multiparameter nonlinear boundary value problem with the additional conditions and its application to some field models
[DE93-626638] p 1168 N94-14933
Controlling chaotic behavior in CO2 and other lasers
[AD-A266431] p 1040 N94-16546
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
Nonlinear problems in fluid dynamics and inverse scattering
[AD-A266234] p 1026 N94-16927
Nonlinear analysis of mechanical systems under combined harmonic and stochastic excitation
[AD-A266217] p 1173 N94-16937
Stochastic chaos: An analog of quantum chaos
[DE93-016619] p 1220 N94-16956
Nonlinear methods for communications
[AD-A267376] p 1001 N94-17019
Discrete sliding mode control for nonlinear sampled data systems
[AD-A267500] p 1167 N94-17369
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
Robust control of uncertain nonlinear systems
[AD-A268056] p 1167 N94-17506
Nonlinear random response prediction using MSC/NASTRAN
[NASA-TM-109029] p 1179 N94-17650
NONLINEARITY
High-performance nonlinear optical material developed in Japan
[AD-A266194] p 1191 N94-16126
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869
Processing of resonance parameter covariance files
[DE93-015506] p 1231 N94-16874
Acoustic waves in complicated geometries and their interactions with liquid-propellant droplet combustion
[AD-A267260] p 1178 N94-16991
Nonlinear methods for communications
[AD-A267376] p 1001 N94-17019
Theoretical studies of nonlinear optical properties of conjugated polymers
[AD-A267390] p 1193 N94-17024
A search for evidence of nonlinear elasticity in the earth
[DE93-015279] p 1102 N94-17252
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
NONPARAMETRIC STATISTICS
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657
Computing science and statistics. Volume 24: Graphics and visualization
[AD-A266571] p 1150 N94-16721
NONPOINT SOURCES
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426
NONRELATIVISTIC MECHANICS
Effects of spin-orbit coupling on disordered mesoscopic systems
[ITN-93-85220] p 1180 N94-15288
NONUNIFORMITY
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
NOREPINEPHRINE
Neuropeptide-Y (NPY) increases total blood flow in the tail, and reduces cutaneous microvascular blood flow in the tail and foot of the rat
[AD-A266839] p 1115 N94-14918
NORMAL DENSITY FUNCTIONS
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
NORMAL SHOCK WAVES
Laser Doppler velocimetry measurements across a normal shock in transonic flow
[AD-A267240] p 855 N94-14973
NORMS
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
NORTHERN HEMISPHERE
Southern and Northern Hemisphere total ozone as seen by TOMS
[NASA-TM-109591] p 1098 N94-15282
NOSE CONES
The effect of the nose shape and wing location toward the wing vortex breakdown
[AD-A267724] p 855 N94-14942
NOTCH SENSITIVITY
The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
NOTCH STRENGTH
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
NOTCHES
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
NOWCASTING
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267
NOZZLE DESIGN
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock isentropic light piston facility
[RAE-TM-AERO/PROP-19] p 856 N94-15696
Welding nozzle position manipulator
[NASA-CASE-MFS-29837-1] p 1047 N94-15882
Shock-free supersonic elliptic nozzles and method of forming same
[NASA-CASE-LAR-14054-1] p 925 N94-15947
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
NOZZLE FLOW
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
Experimental studies on a gas dynamic laser with narrow throat and high area-ratio grid nozzles
[AD-A267818] p 1042 N94-17400

NOZZLE GEOMETRY
Shock-free supersonic elliptic nozzles and method of forming same
[NASA-CASE-LAR-14054-1] p 925 N94-15947
Experimental studies on a gas dynamic laser with narrow throat and high area-ratio grid nozzles
[AD-A267818] p 1042 N94-17400
NOZZLE INSERTS
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
NOZZLE WALLS
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551
NOZZLES
Welding nozzle position manipulator
[NASA-CASE-MFS-29837-1] p 1047 N94-15882
NUCLEAR ASTROPHYSICS
Fast pulsars, compact stars, and the strange matter hypothesis
[DE93-015039] p 1239 N94-16052
Properties of nuclei in astrophysical environments: Binding energies, weak-interaction rates
[MPA-706] p 1240 N94-17628
NUCLEAR BINDING ENERGY
Electronic spectroscopy of the gas-phase OH-Kr van der Waals complex
[AD-A266891] p 942 N94-14946
Simulation studies for surfaces and materials strength
[NASA-CR-193387] p 1056 N94-15004
Photoemission study of diamond (100) surface
[DE93-015251] p 1208 N94-16062
NUCLEAR ELECTRIC PROPULSION
Space exploration initiative fuels, materials and related nuclear propulsion technologies panel
[NASA-TM-105706] p 923 N94-15118
Application of a NEPTUNE propulsion concept to a manned Mars excursion
[AD-A268053] p 929 N94-17587
NUCLEAR EXPLOSIONS
Ground wave emergency network environmental assessment for northwestern Colorado relay node site number RN 8C924CO
[AD-A267654] p 1003 N94-17249
Ground wave emergency network final operational capability. Environmental assessment for southern Arkansas relay node site no. RN 8C912AR
[AD-A268001] p 1004 N94-17376
Environmental assessment for northwestern Indiana relay node site no. RN 8C902IN
[AD-A267849] p 1004 N94-17406
NUCLEAR FISSION
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
NUCLEAR FUEL ELEMENTS
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
NUCLEAR FUELS
Space exploration initiative fuels, materials and related nuclear propulsion technologies panel
[NASA-TM-105706] p 923 N94-15118
Space Nuclear Facility test capability at the Baikal-1 and IGR sites Semipalatinsk-21, Kazakhstan
[DE93-011662] p 926 N94-16773
NUCLEAR FUSION
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
Chemical and isotopic compositions in acid residues from various meteorites p 1243 N94-16291
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites p 1244 N94-16343
NUCLEAR INTERACTIONS
Calculations of cosmic-ray helium transport in shielding materials
[NASA-TP-3354] p 1301 N94-17666
NUCLEAR MAGNETIC RESONANCE
Multinuclear NMR study of aluminosilicate sol-gel synthesis reasons for the homogeneous gelation using the prehydrolysis method
[AD-A266877] p 962 N94-14921
NMR and theoretical investigation of cation binding with sol-gel silicates
[AD-A266999] p 963 N94-15631
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation
[DE93-015406] p 1212 N94-16887
NUCLEAR MODELS
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
NUCLEAR PHYSICS
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
NUCLEAR PROPULSION
Space exploration initiative fuels, materials and related nuclear propulsion technologies panel
[NASA-TM-105706] p 923 N94-15118
Space Nuclear Facility test capability at the Baikal-1 and IGR sites Semipalatinsk-21, Kazakhstan
[DE93-011662] p 926 N94-16773
Development and analysis of startup strategies for particle bed nuclear rocket engine
[AD-A267949] p 927 N94-17053
NUCLEAR RADIATION
AFRRI reports, first quarter 1993
[AD-A266380] p 1123 N94-16515
NUCLEAR REACTIONS
Multiple process simulations for correction factor calculations in experiments with neutrons. LUSMK program
[DE93-623957] p 1179 N94-14932
Al-26-Mg-26 ages of iron meteorites p 1242 N94-16240
Possible dust contamination of the early solar system p 1244 N94-16352
NUCLEAR REACTOR CONTROL
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
NUCLEAR REACTORS
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
NUCLEAR ROCKET ENGINES
Nuclear rocket plume studies
[AD-A267154] p 925 N94-15837
Space Nuclear Facility test capability at the Baikal-1 and IGR sites Semipalatinsk-21, Kazakhstan
[DE93-011662] p 926 N94-16773
Development and analysis of startup strategies for particle bed nuclear rocket engine
[AD-A267949] p 927 N94-17053
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
NUCLEAR SCATTERING
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation
[DE93-015406] p 1212 N94-16887
NUCLEATION
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
Dynamical Ising model simulations of nucleation and growth in copper-cobalt alloys
[DE93-015336] p 957 N94-16015
The role of interfacial chemistry in surface nucleation and growth of calcium oxalate
[DE93-015689] p 1209 N94-16159
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
Atomic layer epitaxy group IV materials: Surface processes, thin films, devices and their characterization
[AD-A267527] p 1213 N94-17116
Diamond growth on carbide surfaces using a selective etching technique
[AD-A267989] p 973 N94-17413
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553
NUCLEI (NUCLEAR PHYSICS)
Properties of nuclei in astrophysical environments: Binding energies, weak-interaction rates
[MPA-706] p 1240 N94-17628
NUCLEIC ACIDS
Release of iron from hemoglobin
[AD-A266503] p 1128 N94-16784
NUCLEON-NUCLEON INTERACTIONS
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
NUCLEON-NUCLEON SCATTERING
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
NUCLEOPHILES
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides
[AD-A266246] p 950 N94-16931
NUCLIDES
Effects of bulk composition on production rates of cosmogenic nuclides in meteorites p 1245 N94-16385
NUMERICAL ANALYSIS
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
C++ as a language for object-oriented numerics
[DE93-015027] p 1148 N94-15985
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
Applications of the phi-transform
[AD-A266247] p 1170 N94-16940
Elastic waves in discretely continuous mechanical systems
[IFTR-21/1992] p 1061 N94-17091
Phillips Laboratory global spectral numerical weather prediction model
[AD-A267293] p 1107 N94-17244
Mathematical Sciences Division 1992 programs
[AD-A268586] p 1140 N94-17623
NUMERICAL CONTROL
A microprocessor controller for a towing tank drive and flow visualisation system
[AD-A267087] p 872 N94-15543
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
A modular control architecture for real-time synchronous and asynchronous systems
[DE93-015439] p 1166 N94-16888
Automated strain gauge plethysmograph
[AD-A267323] p 1035 N94-17002
A measurement station for study of Earth moving tools and ground cutting processes
[IFTR-10/1991] p 985 N94-17068
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
NUMERICAL FLOW VISUALIZATION
The 1989 computational fluid dynamics highlights
[NASA-TM-109635] p 1018 N94-15246
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows
[NASA-CR-193131] p 1018 N94-15427
The 1988 computational fluid dynamics highlights
[NASA-TM-109645] p 1019 N94-15431
NAS technical summaries: Numerical aerodynamic simulation program, March 1991 - February 1992
[NASA-TM-109335] p 854 N94-15798
NUMERICAL INTEGRATION
Comparison of level-1 and level-2 buckling and postbuckling solutions
[NASA-CR-194611] p 1057 N94-15154
Volume integral equations applied to circular and square cylinders
[AD-A266635] p 1169 N94-15785
Fast algorithms for polynomial interpolation, integration and differentiation
[AD-A267505] p 1154 N94-17370
NUMERICAL STABILITY
Linear stability of stationary solutions of the Vlasov-Poisson system in three dimensions
[DE93-013873] p 1174 N94-16820
NUMERICAL WEATHER FORECASTING
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
TAFVER 2 users manual
[AD-A266850] p 1106 N94-15757
Ensemble forecasting techniques in medium-range forecasting
[AD-A267443] p 1107 N94-17029

Phillips Laboratory global spectral numerical weather prediction model
[AD-A267293] p 1107 N94-17244

NUTATION
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications
p 916 N94-15586

NUTRITION
International food research project
[NASA-TM-109540] p 1135 N94-15371

NUTS (FASTENERS)
Tilt mechanism
[AD-D015780] p 1047 N94-16548

NYLON (TRADEMARK)
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494

O

O RING SEALS
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213

OAO
The 1968 highlights --- NASA programs and research
[NASA-TM-109627] p 1302 N94-15413

OBJECT-ORIENTED PROGRAMMING
Development of a computer supported instrumentation for economic planning and evaluation of production facilities for fiber reinforced composites elements
p 932 N94-15260
The distributed database dynamic reconfiguration project
[AD-A267116] p 1229 N94-15652
An experimental comparison of CLOS and C(++) implementations of an object-oriented graphical simulation of walking robot kinematics
[AD-A267168] p 1165 N94-15855
Integration ToolKit and Methods (ITKM) manufacturing methods and prototype toolkit. A combined modeling method using IDEFO, IDEF1x and XSpec
[AD-A266176] p 984 N94-16981
An object-oriented program specification for a mobile robot motion control language
[AD-A267213] p 1166 N94-16986
Design and implementation of an interface editor for the Amadeus multi-relational database front-end system
[AD-A267403] p 1233 N94-17114
An object-oriented dynamic software process model
[AD-A267726] p 1154 N94-17371
Research in presistent simulation: Development of the persistent ModSim object-oriented programming language
[AD-A268568] p 1157 N94-17620

OBLIQUE SHOCK WAVES
On the interaction between the shock wave attached to a wedge and freestream disturbances
[NASA-CR-191528] p 1019 N94-15478
An investigation of oblique shock/boundary layer interaction control
[AD-A268106] p 861 N94-17574

OBLIQUE WINGS
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509

OBSERVATORIES
Unmasking the Sun
[NASA-TM-109595] p 1298 N94-15287
Lunar ranging
[NASA-TM-109603] p 1236 N94-15311
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951

OBSTACLE AVOIDANCE
Perception for outdoor navigation
[AD-A266867] p 863 N94-14919
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677

OCCUPATION
Carpal tunnel syndrome and other cumulative trauma disorders of the arm and hand and occupation in US Navy enlisted personnel
[AD-A267747] p 1129 N94-17374

OCCUPATIONAL DISEASES
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
Americans with Disabilities Act considerations for the practice of occupational medicine p 1124 N94-16611
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
Tuberculosis: A case for increased screening
p 1126 N94-16627
Summary of follow-up results from potential tuberculosis exposures p 1126 N94-16628
Legionella: An overview p 1126 N94-16629
Asbestos Surveillance Program p 1127 N94-16638
Lead Surveillance Program p 1127 N94-16640
Mercury Surveillance Program p 1127 N94-16641
General Medical Surveillance Program
p 1127 N94-16643
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645
Carpal tunnel syndrome and other cumulative trauma disorders of the arm and hand and occupation in US Navy enlisted personnel
[AD-A267747] p 1129 N94-17374

OCEAN BOTTOM
LFASE report: Crustal study
[AD-A266893] p 1111 N94-14947
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009
Mapping of sea bottom topography
p 1077 N94-16744
Sea bottom topography imaging with SAR
p 1077 N94-16745
The Megascience Forum
[DE93-014445] p 1303 N94-16804
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A267868] p 1113 N94-17391
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467
Report detailing modifications to the 1/8 degree global bathymetry
[AD-A268178] p 1114 N94-17509

OCEAN COLOR SCANNER
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11
[NASA-TM-104566-VOL-12] p 1111 N94-15529

OCEAN CURRENTS
IAI topic: El Nino. Southern oscillation and interannual climate variability
[INPE-5410-PRE/1757] p 1111 N94-15186
Optical properties of the Red Sea
[AD-A266466] p 1113 N94-16588
SAR observations in the Gulf of Mexico
p 1077 N94-16742
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A267868] p 1113 N94-17391
Meridional circulation in the tropical north atlantic
[AD-A268222] p 1114 N94-17555

OCEAN DATA ACQUISITIONS SYSTEMS
The IOSDL SeaSoar hydraulic unit
[IOS-300-1992] p 1114 N94-17516

OCEAN DYNAMICS
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
Observations and modelling of winds and waves during the Surface Wave Dynamics Experiment. Report 1: Intensive observation period IOP-1, 20-31 October 1990
[AD-A266384] p 1113 N94-16517
Earth system dynamics: The interrelation of atmospheric, ocean and solid earth dynamics
[NASA-CR-193487] p 1081 N94-17444
Statistics and physical oceanography
[AD-A268565] p 1115 N94-17598

OCEAN MODELS
Exploring the southern ocean response to climate change
[NASA-CR-194601] p 1112 N94-15680
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
Observations and modelling of winds and waves during the Surface Wave Dynamics Experiment. Report 1: Intensive observation period IOP-1, 20-31 October 1990
[AD-A266384] p 1113 N94-16517
The use of General Circulation Models in detecting climate change induced by greenhouse gases
[DE93-014369] p 1096 N94-16802
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A267868] p 1113 N94-17391
Report detailing modifications to the 1/8 degree global bathymetry
[AD-A268178] p 1114 N94-17509
Statistics and physical oceanography
[AD-A268565] p 1115 N94-17598

OCEAN SURFACE
Fine scale measurements of microwave backscatter from the ocean surface
[AD-A264516] p 1111 N94-15134
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139
Testing the waters from space --- Thermal mapping
[NASA-TM-109623] p 1082 N94-15409
Exploring the southern ocean response to climate change
[NASA-CR-194601] p 1112 N94-15680
Observations and modelling of winds and waves during the Surface Wave Dynamics Experiment. Report 1: Intensive observation period IOP-1, 20-31 October 1990
[AD-A266384] p 1113 N94-16517
Field observations of infragravity, sea and swell directional spectra
[AD-A266439] p 1113 N94-16561
Investigation of AIRSAR signatures of the Gulf Stream
p 1077 N94-16743
Preliminary estimates of frequency-direction spectra derived from the SAMSON pressure gage array, November 1990 to May 1991
[AD-A267960] p 1114 N94-17497

OCEAN TEMPERATURE
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A267868] p 1113 N94-17391

OCEANOGRAPHIC PARAMETERS
Preliminary estimates of frequency-direction spectra derived from the SAMSON pressure gage array, November 1990 to May 1991
[AD-A267960] p 1114 N94-17497

OCEANOGRAPHY
Short walk to everywhere --- Space, Earth, Ocean Center
[NASA-TM-109541] p 1221 N94-15372
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications
p 916 N94-15586
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568
SAR observations in the Gulf of Mexico
p 1077 N94-16742
The Megascience Forum
[DE93-014445] p 1303 N94-16804
Adequation of mini satellites to oceanic altimetry missions p 891 N94-17152
Abstracts of manuscripts submitted in 1992 for publication
[AD-A267963] p 1113 N94-17383
Arctic cyclones and Marginal Ice Zone (MIZ) variability
[AD-A268610] p 1108 N94-17485
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467
Report detailing modifications to the 1/8 degree global bathymetry
[AD-A268178] p 1114 N94-17509
List of the scientific and personal papers of Sir George Deacon, FRS
[IOS-301-1992] p 1114 N94-17518
Statistics and physical oceanography
[AD-A268565] p 1115 N94-17598

OCEANS
Coastal zone color scanner: Nimbus 7
[NASA-TM-109590] p 1111 N94-15281
What we can learn about ocean tides from tide gauge and gravity loading measurements?
p 1100 N94-15811
A study of the observed tidal residue vectors B versus oceanic tidal load vectors L p 1100 N94-15813
The influence of oceans on Martian volcanism
p 1295 N94-16427
AVIRIS calibration and application in coastal oceanic environments p 1069 N94-16685
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467
Statistics and physical oceanography
[AD-A268565] p 1115 N94-17598

OFFGASSING
Space Shuttle solid rocket motor exposure monitoring
p 976 N94-16624

OGO
The 1966 highlights --- NASA research programs
[NASA-TM-109444] p 1302 N94-15343

The 1968 highlights --- NASA programs and research
[NASA-TM-109627] p 1302 N94-15413

OHMS LAW
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869

OIL RECOVERY
Responsive copolymers for enhanced petroleum recovery
[DE93-018030] p 971 N94-16999

OLEIC ACID
Contained liquids in microgravity, part 2
p 979 N94-16085

OLIGOMERS
New organic materials for nonlinear optics applications
[AD-A266451] p 1192 N94-16563
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994

OLIVINE
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites
p 1241 N94-16175
Stalking the LREE-enriched component in ureilites
p 1241 N94-16190
Angrite LEW87051: Are the olivines pheno's or xeno's? A continuing story p 1103 N94-16285
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
Water in Earth's mantle: Hydrogen analysis of mantle olivine, pyroxenes and garnet using the SIMS
p 1104 N94-16336
On origin of the olivine inclusions from the Kainsaz CO carbonaceous chondrite p 1244 N94-16345
Liquidus equilibria of lunar analogs at high pressure
p 1283 N94-16364
Mixing model analysis of telescopic lunar spectra
p 1284 N94-16371
Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material
p 1244 N94-16377
More on the cooling history of angrite LEW 86010
p 1245 N94-16400
The thickness of eucritic crust in the HED parent body
p 1104 N94-16416

ON-LINE SYSTEMS
Complexity analysis of real-time reinforcement learning applied to finding shortest paths in deterministic domains
[AD-A266636] p 1131 N94-15742
RELMA: On-line quality control in the rubber mixing room using laser analysis p 984 N94-16005
NASA Electronic Library System (NELS): The system impact of security
[NASA-CR-194614] p 1231 N94-16499
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974
Critically evaluated/distributed database of IRAS LRS spectra
[NASA-CR-193611] p 1232 N94-17038
Defense RDT&E online system (DROLS) handbook
[AD-A267546] p 1232 N94-17101
Defense Logistics Information System (DLIS). Procedures manual: Logistics On-Line Access (LOLA) procedures manual
[AD-A267685] p 1233 N94-17229
Processes involved in the integration of pictures and discourse
[AD-A268150] p 1134 N94-17468

ONBOARD DATA PROCESSING
NASA Lewis Meshed VSAT Workshop meeting summary
[NASA-TM-106332] p 883 N94-17487

ONBOARD EQUIPMENT
STS-29 crew IMAX camera training
[NASA-TM-109546] p 1031 N94-15380
Regulated emergency oxygen system
[AD-A266228] p 1138 N94-16983
The STRV On Board Data Handling (OBDH) system: An introduction p 895 N94-17178
MINISAT programme p 896 N94-17182
The space technology research vehicle: Development status p 896 N94-17183
TITUS: A micro-satellite for technology demonstration
p 896 N94-17186
Key trends of the small satellite market
p 897 N94-17191

ONTOGENY
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636

OPEN CIRCUIT VOLTAGE
Potential transients, transmission and electrochemical corrosion detection
[DE93-014055] p 956 N94-15922

OPERATING SYSTEMS (COMPUTERS)
Integrated trusted systems development environment
[AD-A267029] p 1146 N94-15674
Fast interrupt priority management in operating system kernels
[AD-A266638] p 1140 N94-15744
Processor capacity reserves for multimedia operating systems
[AD-A266639] p 1158 N94-15745
Disconnected operation in a distributed file system
[AD-A266461] p 1231 N94-16570
An internetwork authentication architecture
[AD-A268579] p 1162 N94-17622

OPERATING TEMPERATURE
Cryogenic measurements of aerojet GaAs n-JFETs
[NASA-TM-103972] p 1009 N94-15765

OPERATIONAL AMPLIFIERS
Stray insensitive switched capacitor composite operational amplifiers
[AD-A267412] p 1012 N94-16976

OPERATIONAL PROBLEMS
The airline quality report 1993
[NIAR-93-11] p 863 N94-17262

OPERATIONS RESEARCH
Logarithmic asymptotics for steady-state tail probabilities in a single-server queue
[AD-A266746] p 1165 N94-15775
Fast simulation of steady-state availability in non-Markovian highly dependable systems
[AD-A266747] p 1174 N94-15823
Research and development: Engine of innovation at Krupp p 984 N94-16001
Kennedy Space Center exercise program
p 1126 N94-16634
An object-oriented dynamic software process model
[AD-A267726] p 1154 N94-17371
Mathematical Sciences Division 1992 programs
[AD-A268586] p 1140 N94-17623

OPERATOR PERFORMANCE
Cognitive engineering models in space systems
[NASA-CR-193473] p 1140 N94-16716
Preliminary validation of the task analysis/workload methodology
[AD-A267514] p 1138 N94-17077

OPERATORS (MATHEMATICS)
Steepest descent approximations for accretive operator equations
[DE93-628586] p 1171 N94-17667

OPTICAL COMMUNICATION
Congestion control of high-speed networks
[AD-A267013] p 989 N94-15748
A formal protocol test procedure for the Survivable Adaptable Fiber Optic Embedded Network (SAFENET)
[AD-A267410] p 1192 N94-16975
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028
Non-blocking crossbar permutation engine with constant routing latency
[NASA-CASE-NPO-18864-1-CU] p 1161 N94-17328
A scalable wrap-around shuffle exchange network with deflection routing
[NASA-CASE-NPO-18983-1-CU] p 1161 N94-17330
Laser beam steering device p 1045 N94-17357
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651

OPTICAL COMPUTERS
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Database system studies in fine grain optoelectronic computing
[AD-A267026] p 1145 N94-15627
Alternative optical architectures for multichannel adaptive optical processing
[AD-A267052] p 1189 N94-15664
Wideband acousto-optic correlator for an ESM receiver upgrade
[TABES PAPER 93-661] p 1054 N94-16156
Optical computing
[AD-A267881] p 1141 N94-17015
Low cost paths to binary optics p 1197 N94-17353
Computer-aided design package for designers of digital optical computers
[AD-A267866] p 1154 N94-17390

OPTICAL CONTROL
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228

OPTICAL CORRECTION PROCEDURE
Emittance and beam size distortion due to linear coupling
[DE93-015402] p 1184 N94-16886

OPTICAL CORRELATORS
Alternative optical architectures for multichannel adaptive optical processing
[AD-A267052] p 1189 N94-15664
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791

OPTICAL COUPLING
Optical coupling elements for coherent optical multiport receivers
[ETN-93-94398] p 1188 N94-15447

OPTICAL DATA PROCESSING
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Research Studies on Advanced Optical Module/Head Designs for Optical Disk Recording Devices
[NASA-CR-194390] p 1226 N94-14981
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791
Optical computing
[AD-A267881] p 1141 N94-17015
A scalable wrap-around shuffle exchange network with deflection routing
[NASA-CASE-NPO-18983-1-CU] p 1161 N94-17330
Asymmetric three-beam binary optic grating
p 1195 N94-17340
Low cost paths to binary optics p 1197 N94-17353
Color separation gratings p 1198 N94-17362
The photonical, pure grid method
[NLR-TP-91478-U] p 1062 N94-17600

OPTICAL DATA STORAGE MATERIALS
MeV ion-beam analysis of optical data storage films
p 1226 N94-14984
Application of holographic optical elements to magneto-optic read/write heads p 1226 N94-14985
Dynamic testbed laboratory and micro-optics
p 1199 N94-14986
Magnetic and magneto-optical properties and domain structure of Co/Pd multilayers p 1227 N94-14991
Effects of a shading band in the data path of an optical drive p 1199 N94-14993

OPTICAL DISKS
Characterization facility for magneto-optic media and systems p 1226 N94-14983
Compact disk error measurements
p 1227 N94-14988
Measurement of birefringence for optical recording disk substrates p 1227 N94-14989
Ring lens focusing and push-pull tracking scheme for optical disk systems p 1227 N94-14990
Determining the locations of the various CIRC recording format information blocks (user data blocks, C2 and C1 words and EFM frames) on a recorded compact disc
p 1228 N94-14997
3-D optical memory disk
[AD-A267908] p 1141 N94-17380

OPTICAL EMISSION SPECTROSCOPY
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992

OPTICAL EQUIPMENT
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Polished substrate surface and cleaning study for coated optic quality
[DE93-014116] p 1190 N94-15975
Optical ionospheric instrumentation and research
[AD-A266403] p 1192 N94-16550
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331
Manufacturing the key to binary optics
p 1194 N94-17332
Binary optics: Trends and limitations
p 1194 N94-17333
Diffractive optics: Design, fabrication, and applications
p 1194 N94-17334
Scalar limitations of diffractive optical elements
p 1194 N94-17336
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338
Asymmetric three-beam binary optic grating
p 1195 N94-17340
Scattering from binary optics p 1195 N94-17341

Mathmatical modeling for diffractive optics
p 1195 N94-17342
Binary optics at Hughes Danbury Optical Systems
p 1195 N94-17344
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Applications of advanced diffractive optical elements
p 1197 N94-17356
SURPHEX (tm): New dry photopolymers for replication of surface relief diffractive optics p 1198 N94-17358
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
Optical system storage design with diffractive optical elements p 1198 N94-17360
Spectral inverse scattering theory for dielectric media: Application to optical devices
[AD-A268635] p 1199 N94-17427
Test methods for acceptance testing of telescopes
[AD-A268316] p 1237 N94-17568
Comparison of computer predictions and magnetic field measurements for an iron spectrometer magnet
[DE93-016164] p 1176 N94-17658

OPTICAL FIBERS
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Prospects for high pressure imaging gas scintillation drift chambers p 901 N94-15040
Optical coupling elements for coherent optical multiport receivers
[ETN-93-94398] p 1188 N94-15447
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
The three-dimensional ray trajectories of the WKB optical fiber modes
[AD-A267167] p 1189 N94-15739
Plasma arc welding weld imaging
[NASA-CASE-MFS-28797-1] p 1047 N94-15949
Pulse propagation in inhomogeneous optical waveguides
[DE93-013378] p 1191 N94-16007
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414

OPTICAL FILTERS
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933

OPTICAL HETERODYNING
Optical coupling elements for coherent optical multiport receivers
[ETN-93-94398] p 1188 N94-15447

OPTICAL MATERIALS
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
High-performance nonlinear optical material developed in Japan
[AD-A266194] p 1191 N94-16126
Rational design, construction, and processing of high-performance nonlinear optical materials
[AD-A266185] p 1191 N94-16454
Main chain chromophoric polymers with second order nonlinear optical properties
[AD-D015893] p 969 N94-16920
Static and dynamic investigations of brittle elasto-optical material
[IFTR-3/1992] p 1061 N94-17086

OPTICAL MEASUREMENT
Measurement of birefringence for optical recording disk substrates p 1227 N94-14989
Sensor modelling for the Cyclops focal plane detector array based technology demonstrator
[AD-A267172] p 1190 N94-15846
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft
[AD-A266404] p 1101 N94-16551
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308

OPTICAL MEASURING INSTRUMENTS
Neural-network-directed alignment of optical systems using the laser-beam spatial filter as an example
[NASA-TP-3372] p 1034 N94-15961
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
Earth observation from small satellites
p 891 N94-17150

OPTICAL MEMORY (DATA STORAGE)
Database system studies in fine grain optoelectronic computing
[AD-A267026] p 1145 N94-15627
Optical system storage design with diffractive optical elements p 1198 N94-17360
3-D optical memory disk
[AD-A267908] p 1141 N94-17380

OPTICAL MICROSCOPES
A near-field scanning optical microscope for analysis of magneto-optic media p 1199 N94-14995

OPTICAL PATHS
A method of detecting and locating electrical current imbalances
[NASA-CASE-LEW-15407-1] p 1009 N94-15706
Fabrication and phase tuning of an optical waveguide device
[AD-D015815] p 1191 N94-16489

OPTICAL POLARIZATION
Application of holographic optical elements to magneto-optic read/write heads p 1226 N94-14985

OPTICAL PROPERTIES
Plume primary smoke p 923 N94-15218
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Why is the Moon dark? p 1256 N94-16219
Optical effects of regolith processes on S asteroids as simulated by laser impulse alteration of ordinary chondrite p 1246 N94-16422
Variations in the Fe mineralogy of bright Martian soil
p 1295 N94-16431
Optical properties of the Red Sea
[AD-A266466] p 1113 N94-16588
Elastooptical brittle materials in experimental studies of the state of stress and deformation
[IFTR-22/1991] p 1059 N94-16651
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Main chain chromophoric polymers with second order nonlinear optical properties
[AD-D015893] p 969 N94-16920
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
Theoretical studies of nonlinear optical properties of conjugated polymers
[AD-A267390] p 1193 N94-17024
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
A new method of designing multilayer optical thin film coatings
[DE93-624683] p 974 N94-17611

OPTICAL PUMPING
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689

OPTICAL RADAR
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
IR detectors and subsystems for space applications
p 909 N94-15091
Prelaunch optical characterization of the Laser Geodynamic Satellite (LAGEOS 2)
[NASA-TP-3400] p 884 N94-15193
Heterodyne efficiency for a coherent laser radar with diffuse or aerosol targets
[NASA-CR-194563] p 1038 N94-15477
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
BACKSCAT lidar simulation version 3.0: Technical documentation and users guide
[AD-A267296] p 1003 N94-17268
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1194 N94-17321
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 1004 N94-17322
Laser beam steering device p 1045 N94-17357

OPTICAL REFLECTION
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973

OPTICAL RESONATORS
Pulsed hydrogen fluoride overtone chemical laser studies
[AD-A267597] p 1041 N94-17193

OPTICAL SCANNERS
A near-field scanning optical microscope for analysis of magneto-optic media p 1199 N94-14995
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1194 N94-17321

OPTICAL SWITCHING
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
Optical coupling elements for coherent optical multiport receivers
[ETN-93-94398] p 1188 N94-15447
Optically-switched submillimeter-wave oscillator and radiator
[NASA-CASE-NPO-18547-1-CU] p 1014 N94-17324
A scalable wrap-around shuffle exchange network with deflection routing
[NASA-CASE-NPO-18983-1-CU] p 1161 N94-17330
High-speed nonlinear switching mechanisms and devices for multi-gigabit data processing
[AD-A267753] p 1014 N94-17375

OPTICAL THICKNESS
Altitude profile of aerosols on Mars from measurements of its thermal radiation on limb p 1294 N94-16423
Spatial resolution and cloud optical thickness retrievals p 1066 N94-16671

OPTICAL TRACKING
RACCOON: A Real-Time Autonomous Car Chaser Operating Optimally at Night
[AD-A266963] p 863 N94-14971
Laser tracking for vertical control p 911 N94-15553
Historical MOBLAS system characterization
p 915 N94-15579
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Millimeter accuracy satellites for two color ranging
p 916 N94-15583
Two wavelength satellite laser ranging using SPAD
p 916 N94-15584
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications
p 916 N94-15586
On the accuracy of ERS-1 orbit predictions
p 874 N94-15589
HP upgrade operational streamlining
p 918 N94-15596
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
Ground based laser ranging for satellite location
p 919 N94-15607
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625

OPTICAL TRANSITION
Evaluation of hemoglobin-oxygen equilibrium binding by rapid-scanning spectrophotometry and singular-value decomposition
[AD-A266453] p 1123 N94-16564

OPTICAL WAVEGUIDES
Pulse propagation in inhomogeneous optical waveguides
[DE93-013378] p 1191 N94-16007
OETC optical backplane bus testbed. IBM tasks: Receiver OEIC and link simulation tools and analysis
[AD-A266198] p 1191 N94-16128
Fabrication and phase tuning of an optical waveguide device
[AD-D015815] p 1191 N94-16489
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028
Spectral inverse scattering theory for dielectric media: Application to optical devices
[AD-A268635] p 1199 N94-17427

OPTICS
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494
Conference on Binary Optics: An Opportunity for Technical Exchange
[NASA-CP-3227] p 1194 N94-17331

Manufacturing the key to binary optics p 1194 N94-17332
Binary optics: Trends and limitations p 1194 N94-17333
Diffractive optics: Design, fabrication, and applications p 1194 N94-17334
Scattering from binary optics p 1195 N94-17341

OPTIMAL CONTROL
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412
Robust control of uncertain nonlinear systems
[AD-A268056] p 1167 N94-17506

OPTIMIZATION
Development of x ray CCDs p 900 N94-15033
Optimisation of FIR photoconductors for atmospheric spectroscopy p 902 N94-15048
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
Stochastic scheduling in a multiclass G/G/1 queue
[INRIA-RR-1746] p 1162 N94-17537
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549
State space partitioning methods for solving a class of stochastic network problems
[AD-A267494] p 1173 N94-17585

OPTOELECTRONIC DEVICES
Optical coupling elements for coherent optical multiport receivers
[ETN-93-94398] p 1188 N94-15447
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Almaz p 898 N94-15889
Sputtered ferroelectric thin films of KTN for electro-optic devices
[AD-A266573] p 968 N94-16723
JSEP fellowship
[AD-A266568] p 1211 N94-16800
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Micro-optics technology and sensor systems applications p 1197 N94-17350
Fabrication of micro-optical devices p 1197 N94-17351
Diffractive optics in adverse environments p 1197 N94-17352
Thermal Weapon Sight (TWS) AN/PAS-13 diffractive optics designed for producibility p 1197 N94-17354
Measurements of microlens performance p 1197 N94-17355
Laser beam steering device p 1045 N94-17357
Theory of dispersive microlenses p 1198 N94-17361
Color separation gratings p 1198 N94-17362
OSA proceedings on Ultrafast Electronics and Optoelectronics, volume 14
[AD-A267972] p 1014 N94-17410
Mechanical properties and crystal growth studies of semiconductor alloys
[AD-A268144] p 1216 N94-17454

OPTOMETRY
Enhancing sight
[NASA-TM-109637] p 1221 N94-15248

ORBIT CALCULATION
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586
Closed orbit distortion and the beam-beam interaction
[DE93-015284] p 1190 N94-15854
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103
BRIDGE: A small scientific satellite for geodesy p 890 N94-17146
Adequation of mini satellites to oceanic altimetry missions p 891 N94-17152
OREMUS: Prototype of an orbit determination center dedicated to mini-satellite control p 878 N94-17156

ORBIT DECAY
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379

ORBIT INSERTION
Inertial Upper Stage
[NASA-TM-109654] p 885 N94-15278
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378
Small launchers (current and future projects in the world) p 878 N94-17137
NEXT launch system p 878 N94-17141
TITUS: A micro-satellite for technology demonstration p 896 N94-17186

ORBIT PERTURBATION
A simultaneous estimation of the mass of Mars and its natural satellites, Phobos and Deimos, from the orbital perturbations on the Mariner 9, Viking 1, and Viking 2 orbiters p 1279 N94-16347
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379
Dust grain resonant capture: A statistical study p 1245 N94-16384

ORBIT TRANSFER VEHICLES
Minimum accommodation for aerobrake assembly. Phase 2: Structural concepts for a lunar transfer vehicle aerobrake which can be assembled on orbit
[NASA-TM-107610] p 885 N94-15446
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522

ORBITAL ASSEMBLY
Minimum accommodation for aerobrake assembly. Phase 2: Structural concepts for a lunar transfer vehicle aerobrake which can be assembled on orbit
[NASA-TM-107610] p 885 N94-15446
Ground integrated ET-derived space platforms for onorbit applications
[TABES PAPER 93-652] p 899 N94-16152
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088
Space Station/Orbiter berthing dynamics during an assembly flight
[NASA-TM-109049] p 1062 N94-17451

ORBITAL ELEMENTS
On the accuracy of ERS-1 orbit predictions p 874 N94-15589
Formation of on-site normal points p 917 N94-15592
The effects of orbital and climatic variations on Martian surface heat flow p 1290 N94-16402

ORBITAL LAUNCHING
STS-26 through STS-34, deploy activities
[NASA-TM-109566] p 1301 N94-15315

ORBITAL MANEUVERING VEHICLES
Computational analysis of Variable Thrust Engine (VTE) performance
[NASA-CR-193852] p 928 N94-17442

ORBITAL MECHANICS
Space flight: The application of orbital mechanics
[NASA-TM-109424] p 874 N94-15493
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

ORBITAL POSITION ESTIMATION
On the accuracy of ERS-1 orbit predictions p 874 N94-15589
Laser ranging data analysis
[NASA-CR-193547] p 1041 N94-16719

ORBITAL RESONANCES (CELESTIAL MECHANICS)
Mapping the stability region of the 3:2 Neptune-Pluto resonance p 1280 N94-16351
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379
Dust grain resonant capture: A statistical study p 1245 N94-16384

ORBITAL SERVICING
STS-37 CETA evaluation with Ross
[NASA-TM-109495] p 1135 N94-15330
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1046 N94-15871

ORBITAL SPACE TESTS
Third LDEF Post-Retrieval Symposium Abstracts
[NASA-CP-10120] p 1303 N94-16495

ORBITAL VELOCITY
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936

ORDER-DISORDER TRANSFORMATIONS
Electron-microscopy study of antiphase boundaries in Cu3Pd and Fe3Al alloys near the order-disorder transition
[ONERA-NT-1993-1] p 1206 N94-15295
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
Thermal disorder in adsorbed Cl on Si(100)
[AD-A266295] p 1210 N94-16476
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

ORGANIC COMPOUNDS
Emissions of volatile organic compounds from stationary combustion sources: Numerical modeling capabilities
[DE93-014123] p 1096 N94-16825
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455

ORGANIC MATERIALS
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Terrestrial bitumen analogue of orgueil organic material demonstrates high sensitivity to usual HF-HCl treatment p 930 N94-16325
Bioorganic models for protein ion channels
[AD-A266365] p 1117 N94-16441
New organic materials for nonlinear optics applications
[AD-A266451] p 1192 N94-16563

ORGANIC SULFUR COMPOUNDS
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997

ORGANIC WASTES (FUEL CONVERSION)
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006

ORGANIZATIONS
Fifty years of the Netherlands Association of Aeronautical Engineers p 853 N94-15121
PET team
[NASA-TM-109599] p 1223 N94-15293
Managing information as a corporate asset: Key strategies for information professionals to remain competitive
[DE93-015515] p 1232 N94-16875
Research grant handbook
[NHB-5800.1C] p 1225 N94-16907
Plasma Science Committee (PLSC) and the Panel on Opportunities in Plasma Science and Technology (OPST)
[DE93-018142] p 1204 N94-16995
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396

ORGANOMETALLIC COMPOUNDS
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides
[AD-A266246] p 950 N94-16931

ORGUEIL METEORITE
Do SiC grains in Orgueil differ from those in Murchison? p 1242 N94-16260
Terrestrial bitumen analogue of orgueil organic material demonstrates high sensitivity to usual HF-HCl treatment p 930 N94-16325

ORIENTATION
Challenger Center: Orientation
[NASA-TM-109433] p 1221 N94-15505

OROGRAPHY
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247

ORR-SOMMERFELD EQUATIONS
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450

ORTHOGONAL FUNCTIONS
Simulation reduction using the Taguchi method
[NASA-CR-4542] p 1055 N94-17082

ORTHOTROPIC SHELLS
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150

OSCILLATIONS
Breakdown of adiabatic invariance
[AD-A267246] p 1219 N94-14977
Effect of wind tunnel acoustic modes on linear oscillating cascade aerodynamics
[NASA-TM-106367] p 869 N94-15866
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
Search for chaos in free shear flows
[AD-A266245] p 1023 N94-16470
The (delta)f algorithm for beam dynamics
[DE93-015632] p 1187 N94-16660

OSCILLATOR STRENGTHS
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses
[DE93-015304] p 965 N94-15828
OSCILLATORS
Melatonin, the pineal gland, and circadian rhythms
[AD-A268200] p 1129 N94-17478
OSMIUM ISOTOPES
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth
p 1242 N94-16272
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion
p 1244 N94-16321
OSO
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417
OUTGASSING
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383
OVER-THE-HORIZON RADAR
Comparison of RADARC high-frequency radar performance prediction model and ROTHR Amchitka data
[AD-A267077] p 987 N94-15540
OXALATES
The role of interfacial chemistry in surface nucleation and growth of calcium oxalate
[DE93-015689] p 1209 N94-16159
OXIDATION
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
Effects of alloying and temperature on the high-temperature oxidation of Cr-Cr2Nb
[DE93-015800] p 957 N94-16163
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE93-016850] p 949 N94-16897
Transient studies of low temperature catalysts for methane conversion
[DE93-017710] p 950 N94-16962
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597
OXIDATION RESISTANCE
A sulfur segregation study of PWA 1480, NiCrAl, and NiAl alloys
[NASA-TM-106289] p 956 N94-15992
Overview of chemical vapor infiltration
[DE93-015440] p 934 N94-16065
Effects of alloying and temperature on the high-temperature oxidation of Cr-Cr2Nb
[DE93-015800] p 957 N94-16163
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
Environmental effects on iron aluminides
[DE93-015820] p 958 N94-16166
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597
OXIDATION-REDUCTION REACTIONS
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061
Earth's partial pressure of CO2 over the past 120 Ma; evidence from Ce anomalies in the deep (greater than 600 m) Pacific Ocean, 1 p 1104 N94-16358
High-valent oxo, methoxorhenium complexes: Models for intermediates and transition states in proton-coupled multi-electron transfer reactions
[AD-A266492] p 1211 N94-16782
Release of iron from hemoglobin
[AD-A266503] p 1128 N94-16784
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006
OXIDE FILMS
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
Vacancy condensation as the precursor to passivity breakdown
[DE93-012925] p 956 N94-15998
OXIDES
A search for noble-gas evidence for presolar oxide grains p 954 N94-16353
Thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18694-1-CU] p 1014 N94-17325
OXYGEN
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
First oxygen from lunar basalt p 1249 N94-16182
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764
Regulated emergency oxygen system
[AD-A266228] p 1138 N94-16983
Automated data collection system for the TCM3 transcutaneous pO2/pCO2 monitoring system
[AD-A268400] p 1129 N94-17424
Oxygen diffusion in YBa2Cu3O(6+delta) ceramics on heating
[DE93-629161] p 974 N94-17633
Influence of the granular surface on the oxygen uptake in YBa2Cu3O(6+delta) ceramics
[DE93-629162] p 974 N94-17634
OXYGEN ATOMS
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques
[AD-A267055] p 885 N94-15666
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam
[NASA-CR-193851] p 946 N94-15766
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS
[DE93-016218] p 1209 N94-16447
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436
OXYGEN CONSUMPTION
Increased vascular resistance with hemoglobin-based oxygen carriers
[AD-A266454] p 1123 N94-16565
Metabolic monitoring of hypobaric subjects
[AD-A268221] p 1130 N94-17554
OXYGEN IONS
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam
[NASA-CR-193851] p 946 N94-15766
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436
OXYGEN ISOTOPES
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383
OXYGEN PRODUCTION
First oxygen from lunar basalt p 1249 N94-16182
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452
OXYGEN SUPPLY EQUIPMENT
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Regulated emergency oxygen system
[AD-A266228] p 1138 N94-16983
OXYGEN 17
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation
[DE93-016435] p 1039 N94-16450
OXYGEN 18
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation
[DE93-016435] p 1039 N94-16450
OZONE
Southern and Northern Hemisphere total ozone as seen by TOMS
[NASA-TM-109591] p 1098 N94-15282
Atlas of TOMS ozone, 1978-1988
[NASA-TM-109456] p 1094 N94-15329
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
Geochemistry and cosmochemistry of fullerenes 3: Reaction of C60 and C70 with ozone
p 953 N94-16243
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214
OZONE DEPLETION
Atlas of TOMS ozone, 1978-1988
[NASA-TM-109456] p 1094 N94-15329
Arctic ozone
[NASA-TM-109614] p 1095 N94-15365
Prioritization methodology for chemical replacement
[NASA-TP-3421] p 976 N94-15723
Environmental management lessons to be learned from the upcoming CFC phase out or how to insure that we survive the next environmentally mandated process change
[TABES PAPER 93-570] p 1050 N94-16136
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
OZONOSPHERE
Atlas of TOMS ozone, 1978-1988
[NASA-TM-109456] p 1094 N94-15329
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143

P

P WAVES
NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125
P-I-N JUNCTIONS
Design of broadband wire antennas for frequency hopping applications
[AD-A267405] p 1001 N94-17025
P-N JUNCTIONS
The XMM pn-CCD detector system: First results
p 900 N94-15034
PACIFIC OCEAN
IAI topic: El Nino. Southern oscillation and interannual climate variability
[INPE-5410-PRE/1757] p 1111 N94-15186
PACKET SWITCHING
Overview of Enhanced Data Stream Array Processor (EDSAP)
[AD-A266986] p 1158 N94-15492
On-board B-ISDN fast packet switching architectures. Phase 1: Study
[NASA-CR-191143] p 883 N94-17111
Non-blocking crossbar permutation engine with constant routing latency
[NASA-CASE-NPO-18864-1-CU] p 1161 N94-17328
A scalable wrap-around shuffle exchange network with deflection routing
[NASA-CASE-NPO-18983-1-CU] p 1161 N94-17330
Isochronets: A high-speed network switching architecture
[AD-A267811] p 1161 N94-17409
NASA Lewis Meshed VSAT Workshop meeting summary
[NASA-TM-106332] p 883 N94-17487
On-board packet switch architectures for communication satellites
[NASA-TM-106328] p 883 N94-17488
PACKET TRANSMISSION
Bandwidth characteristics of multimedia data traffic on a local area network
[NASA-TM-104026] p 883 N94-15648
Non-blocking crossbar permutation engine with constant routing latency
[NASA-CASE-NPO-18864-1-CU] p 1161 N94-17328
PACKETS (COMMUNICATION)
An approximation for computing reduction in bandwidth requirements using intelligent multiplexers
[AD-A267434] p 1001 N94-17026
Non-blocking crossbar permutation engine with constant routing latency
[NASA-CASE-NPO-18864-1-CU] p 1161 N94-17328
PAINTS
XPS analysis of Al/EPDM bondlines from IUS SRM-1 polar bosses
[AD-A266851] p 1056 N94-14945
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1046 N94-15873

Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542
Dry stripping as a surface treatment method
[VTT-TIED-1348] p 985 N94-17544

PALEOCLIMATOLOGY
Earth's partial pressure of CO2 over the past 100-500 Ma; evidence from Ce anomalies in mostly shallow seas (less than 200 m) as recorded in carbonate sediments, 2
p 1104 N94-16360

PALEONTOLOGY
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210

PALEOZOIC ERA
Earth's partial pressure of CO2 over the past 100-500 Ma; evidence from Ce anomalies in mostly shallow seas (less than 200 m) as recorded in carbonate sediments, 2
p 1104 N94-16360

PALLADIUM
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973

PANEL METHOD (FLUID DYNAMICS)
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571
Computational aerodynamics with icing effects
[AD-A267509] p 860 N94-17074

PARABOLIC DIFFERENTIAL EQUATIONS
Higher-order accurate Osher schemes with application to compressible boundary layer stability
[NASA-TM-106355] p 1026 N94-17056

PARABOLIC FLIGHT
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078
Heart rate response to parabolic flight manoeuvres
p 981 N94-16098

PARACHUTE DESCENT
1990 ASCAN ground egress/parasail
[NASA-TM-109528] p 1136 N94-15391
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432

PARACHUTES
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432
Adamson, Jim — ASCAN training programs
[NASA-TM-109507] p 1137 N94-15454

PARALLEL COMPUTERS
A task adaptive parallel graphics renderer
[DE93-017123] p 1149 N94-16119
Computation of the Fluid and Optical Fields About the Stratospheric Observatory for Infrared Astronomy (SOFIA) and the Coupling of Fluids, Dynamics, and Control Laws on Parallel Computers
[NASA-CR-193168] p 858 N94-16510
Requirements for supercomputing in energy research: The transition to massively parallel computing
[DE93-012376] p 1160 N94-16774
Asynchronous design for parallel processing architectures
[AD-A266523] p 1160 N94-16791
Testing string superprimitivity in parallel
[AD-A267814] p 1155 N94-17399

PARALLEL PLATES
Investigation of radiative interaction in laminar flows using Monte Carlo simulation
[NASA-CR-194604] p 1021 N94-15795
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450

PARALLEL PROCESSING (COMPUTERS)
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
The alignment-distribution graph
[NASA-CR-194292] p 1168 N94-15112
Mobile and replicated alignment of arrays in data-parallel programs
[NASA-CR-194294] p 1158 N94-15113
The application of compiler-assisted multiple instruction retry to VLIW architectures
[AD-A266930] p 1158 N94-15173
Parallel spatial direct numerical simulations on the Intel iPSC/860 hypercube
[NASA-CR-191513] p 1144 N94-15483
Multiphase complete exchange: A theoretical analysis
[NASA-CR-191531] p 1145 N94-15489
Overview of Enhanced Data Stream Array Processor (EDSAP)
[AD-A266986] p 1158 N94-15492
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498
Decomposition of large sparse symmetric systems for parallel computation. Part 2: Parallelization tool roadmap
[AD-A267072] p 1158 N94-15671
A parallel adaptive mesh refinement algorithm
[NASA-CR-191530] p 1168 N94-15724
Decomposition of large sparse symmetric systems for parallel computation. Part 1: Theoretical foundations
[AD-A267144] p 1159 N94-15750
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
Generating local addresses and communication sets for data-parallel programs
[NASA-CR-194605] p 1159 N94-15796
Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
Distributed computing feasibility in a non-dedicated homogeneous distributed system
[NASA-CR-191532] p 1149 N94-15989
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
A task adaptive parallel graphics renderer
[DE93-017123] p 1149 N94-16119
The 3D-Flow processor for a programmable level-1 trigger (feasibility study)
[DE93-016045] p 1159 N94-16172
A decision criteria to select an associative-memory organization that minimizes the execution time of a mix of associative-search operations
[AD-A266438] p 1149 N94-16560
Requirements for supercomputing in energy research: The transition to massively parallel computing
[DE93-012376] p 1160 N94-16774
Asynchronous design for parallel processing architectures
[AD-A266523] p 1160 N94-16791
Information technology division technical paper abstracts
[AD-A266227] p 1166 N94-16938
Optical computing
[AD-A267881] p 1141 N94-17015
Efficient scheduling of real-time compute-intensive periodic graphs on large grain data flow multiprocessor
[AD-A267444] p 1141 N94-17030
Networked workstations and parallel processing utilizing functional languages
[AD-A267464] p 1160 N94-17034
Intel NX to PVM 3.2 message passing conversion library
[NASA-TM-109038] p 1152 N94-17060
Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool
[AD-A267560] p 1153 N94-17107
Development of iterative techniques for the solution of unsteady compressible viscous flows
[NASA-CR-194657] p 1027 N94-17129
ONRASIA scientific information bulletin, volume 18, number 2
[AD-A267798] p 1304 N94-17305
Estimating task execution delay in a real-time system via static source code analysis
[AD-A267496] p 1161 N94-17367
Accurate analysis of array references
[AD-A268069] p 1162 N94-17550
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
Benchmarking massively parallel architectures
[DE93-016486] p 1162 N94-17646

PARALLEL PROGRAMMING
Reactive system verification case study: Fault-tolerant transputer communication
[NASA-TM-108784] p 1145 N94-15538
Decomposition of large sparse symmetric systems for parallel computation. Part 1: Theoretical foundations
[AD-A267144] p 1159 N94-15750
The alignment-distribution graph
[NASA-CR-194609] p 1148 N94-15956
Shared-memory multiprocessor trends and the implications for parallel program performance
[TR-420] p 1159 N94-16578
Networked workstations and parallel processing utilizing functional languages
[AD-A267464] p 1160 N94-17034
Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool
[AD-A267560] p 1153 N94-17107
Testing string superprimitivity in parallel
[AD-A267814] p 1155 N94-17399
Construction of d-dimensional hyperoctrees on a hypercube multiprocessor
[INRIA-RR-1752] p 1162 N94-17539

PARAMETER IDENTIFICATION
Exploitation of cyclostationarity for signal-parameter estimation and system identification
[AD-A267137] p 988 N94-15690
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
Small satellite constellation system: Optimization criteria p 888 N94-17132

PARASITIC DISEASES
Combating malaria
[NASA-TM-109609] p 1081 N94-15297

PARTIAL DIFFERENTIAL EQUATIONS
Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833
C++ as a language for object-oriented numerics
[DE93-015027] p 1148 N94-15985
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
Applications of the phi-transform
[AD-A266247] p 1170 N94-16940

PARTIAL PRESSURE
Earth's partial pressure of CO2 over the past 120 Ma; evidence from Ce anomalies in the deep (greater than 600 m) Pacific Ocean, 1 p 1104 N94-16358
Earth's partial pressure of CO2 over the past 100-500 Ma; evidence from Ce anomalies in mostly shallow seas (less than 200 m) as recorded in carbonate sediments, 2
p 1104 N94-16360

PARTICLE ACCELERATOR TARGETS
Past, present and future ((pi),(eta)) experiments
[DE93-016631] p 1182 N94-16115
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670

PARTICLE ACCELERATORS
Calorimeter based detectors for high energy hadron colliders
[DE93-017055] p 1188 N94-16900
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662

PARTICLE BEAMS
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931
Confinement and stability of a Crystal Beam
[DE93-015400] p 1181 N94-16020
The (delta)f algorithm for beam dynamics
[DE93-015632] p 1187 N94-16660
Evolution of hadron beams under intrabeam scattering
[DE93-014330] p 1184 N94-16826
A review of some dynamics models in six-dimensional phase space and their suitable conditions of motion equation
[DE93-623741] p 1175 N94-17317

PARTICLE COLLISIONS
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
Fundamental-mode RF design in e(+)e(-) storage ring factories
[DE93-015249] p 1183 N94-16809
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
Production of D-mesons in pp-collisions and quark-gluon string model
[DE93-626721] p 1185 N94-17312
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662

PARTICLE DIFFUSION
The (delta)f algorithm for beam dynamics
[DE93-015632] p 1187 N94-16660

PARTICLE FLUX DENSITY
The effect of an on-orbit near encounter on the number flux density of micron sized particles
p 899 N94-16374

PARTICLE IMAGE VELOCIMETRY
Evaporation from a meniscus within a capillary tube in microgravity
[NASA-CR-194593] p 976 N94-15654

PARTICLE IN CELL TECHNIQUE
Emittance growth in displaced, space-charge-dominated beams with energy spread
[DE93-016514] p 1188 N94-17672
PARTICLE INTERACTIONS
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam
[NASA-CR-193851] p 946 N94-15766
The three-loop QCD beta-function and anomalous dimensions
[NIKHEF-H/92-17] p 1186 N94-17617
PARTICLE MASS
Densities of 5-15 micron interplanetary dust particles
p 1244 N94-16367
PARTICLE MOTION
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674
PARTICLE PRODUCTION
Electroweak physics from D0
[DE93-015041] p 1181 N94-16053
Status of (alpha)(sub s) measurements
[DE93-015179] p 1181 N94-16059
Past, present and future ((pi),(eta)) experiments
[DE93-016631] p 1182 N94-16115
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194
Electroweak results from D0
[DE93-014926] p 1185 N94-16968
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
Production of D-mesons in pp-collisions and quark-gluon string model
[DE93-626721] p 1185 N94-17312
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662
PARTICLE SIZE DISTRIBUTION
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388
From minerals to rocks: Toward modeling lithologies with remote sensing p 1086 N94-16437
PARTICLE SPIN
Quark-loop effects in high energy spin-flip processes
[DE93-626692] p 1188 N94-17313
PARTICLE THEORY
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
On the 17-keV neutrino
[DE93-012638] p 1181 N94-15974
Particle physics and cosmology, Task C
[DE93-016865] p 1239 N94-16118
Multipolar-like form of nonabelian gauge theories
[DE93-626690] p 1171 N94-17314
PARTICLE TRAJECTORIES
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
PARTICLES
An assessment of acid fog
[DE93-009347] p 1095 N94-15940
Particle Engulfment and Pushing by Solidifying Interfaces (PEPSI)
[NASA-CR-193856] p 960 N94-17079
PARTICULATE REINFORCED COMPOSITES
Fracture toughness tests for particulate MMC UK COSI (IACFA) task group. Meeting report, October 1992
[NPL-DMM(A)-81] p 1057 N94-15021
PARTICULATE SAMPLING
Suggestion for extended Viking magnetic properties experiment on future Mars missions
p 1285 N94-16375
PARTICULATES
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques
[AD-A267055] p 885 N94-15666
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
PARTITIONS (MATHEMATICS)
Understanding partitions and the no partition assumption
[AD-A266296] p 1000 N94-16911
A domain-partition method for the advection-diffusion equation
[INRIA-RR-1740] p 1030 N94-17534
PASSIVITY
Vacancy condensation as the precursor to passivity breakdown
[DE93-012925] p 956 N94-15998
In situ studies of passive film chemistry using x ray absorption spectroscopy
[DE93-014023] p 947 N94-16011
PATHOGENS
Bloodborne Pathogens Program p 1127 N94-16644
OSHA bloodborne pathogens standards exposure control plan p 1127 N94-16645
PATTERN RECOGNITION
Segmenting textured 3D surfaces using the space/frequency representation
[AD-A266960] p 1163 N94-14968
A new method for generating Bayes classifiers assuming mixtures of Gaussian densities
[FFI-91/4029] p 1172 N94-15298
Cooperativity and 3-D representation
[AD-A267180] p 1131 N94-15694
The bootstrapped algorithm: Fast algorithm for blind signal separation
[AD-A266671] p 1147 N94-15772
Efficient algorithmic techniques for combinatorial problems
[AD-A267151] p 1172 N94-15777
Development of pattern recognition techniques for the evaluation of toxicant impacts to multispecies systems
[AD-A267197] p 1095 N94-15790
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791
Exploiting world structure to efficiently search for objects
[TR-434] p 1231 N94-16576
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659
Image accuracy and representational enhancement through low-level, multi-sensor integration techniques
[DE93-014888] p 1167 N94-17287
A high-speed object recognition chip based on a biologically-realistic hybrid temporal processing
[AD-A268270] p 1134 N94-17576
PAVEMENTS
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676
PAYLOAD DELIVERY (STS)
Inertial Upper Stage
[NASA-TM-109654] p 885 N94-15278
PAYLOAD DEPLOYMENT & RETRIEVAL SYSTEM
Cognitive engineering models in space systems
[NASA-CR-193473] p 1140 N94-16716
PAYLOAD INTEGRATION
Serpentine manipulator planning and control for NASA Space-Shuttle payload servicing
[AD-A266961] p 879 N94-14969
PAYLOAD RETRIEVAL (STS)
STS-32 onboard 16mm photography quick release
[NASA-TM-109472] p 880 N94-15376
STS-32 LDEF EVA training in WETF with Low and Dunbar
[NASA-TM-109473] p 1135 N94-15377
STS-32 LDEF approach in SES
[NASA-TM-109474] p 880 N94-15379
PAYLOAD STATIONS
STS-30 onboard 16mm photography quick release
[NASA-TM-109579] p 881 N94-15423
PAYLOADS
Non-lethal Unmanned Aerial Vehicles (UAVs)
[AD-A267139] p 866 N94-15692
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079
QUESTS: A microgravity research facility for materials science experiments p 978 N94-16082
Choosing ESRO's first scientific satellites
[ESA-HSR-3] p 887 N94-16523
ARIANE 5 light derivatives p 878 N94-17140
PEARSON DISTRIBUTIONS
The distribution of a sum of binomial random variables
[AD-A266969] p 1172 N94-15002
PEEK
Progress in the modeling of the shock response and mitigation of thick composite shells
[AD-A267009] p 1057 N94-15524
PEELING
The effect of plasma treatment on interfacial bond characteristics of Kevlar/epoxy laminates as measured by T-peel tests
[AD-A266920] p 930 N94-14999
PEGASUS AIR-LAUNCHED BOOSTER
NASA report to education, volume 7
[NASA-TM-109435] p 1247 N94-15419
PENDULUMS
Results of tidal gravity observations with a conical pendulum p 1100 N94-15810
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263
PENETRANTS
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727
PENETRATION
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
Slidesurfaces with adaptive new definitions (SAND) for transient analysis
[DE93-014909] p 1059 N94-15983
PENTABORANES
A proposed mechanism for the pyrolysis of diborane
[DE93-014275] p 947 N94-15977
PENTANES
Synthesis of potential high-energy fuels
[AD-A267508] p 975 N94-17073
PEPTIDES
Neuropeptide-Y (NPY) increases total blood flow in the tail, and reduces cutaneous microvascular blood flow in the tail and foot of the rat
[AD-A266839] p 1115 N94-14918
Bioorganic models for protein ion channels
[AD-A266365] p 1117 N94-16441
Vectorial electron transfer in spatially ordered arrays
[DE93-018150] p 1185 N94-16971
PERCEPTION
Perception for outdoor navigation
[AD-A266867] p 863 N94-14919
PERCEPTUAL ERRORS
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513
PERCOLATION
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
PERFORATING
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
PERFORMANCE
Performance of the upgraded Orroral laser ranging system p 877 N94-15602
PERFORMANCE PREDICTION
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Rotary engine performance computer program (RCEMAP and RCEMAPPC): User's guide
[NASA-CR-191192] p 869 N94-15192
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Comparison of RADARC high-frequency radar performance prediction model and ROTHR Amchitka data
[AD-A267077] p 987 N94-15540
GLRS-R 2-colour retroreflector target design and predicted performance p 921 N94-15615
A rapid computational model for estimating the performance of compliant airfoils in cascades
[AD-A266275] p 857 N94-16471
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 1: Predicted veersus actual performance of AH-1 crews induced with symptoms simulating radiation sickness
[AD-A268376] p 1138 N94-17460
Space Station Freedom electrical performance model
[NASA-TM-106395] p 929 N94-17483
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
PERFORMANCE TESTS
Performance comparison of high speed microchannel plate photomultiplier tubes p 922 N94-15624
Development of the OMPAT neuropsychological/psychomotor performance evaluation and OMPAT data and timing support programs
[AD-A266954] p 1122 N94-15759
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
Lithium D-cell study
[NASA-CR-192705] p 1011 N94-16505
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
TIMS performance evaluation summary
p 1063 N94-16596

Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers
[DE93-015215] p 1024 N94-16808
Category (CAT) 3B level 1 test plan for Global Positioning System (GPS)
[DOT/FAA/RD-93/21] p 864 N94-16835
CALS test network handbook
[AD-A267587] p 1160 N94-17209
A ten year review of performance of photovoltaic systems
[DE93-015649] p 1093 N94-17217
Measurements of microlens performance
p 1197 N94-17355
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549
Test methods for acceptance testing of telescopes
[AD-A268316] p 1237 N94-17568

PERIDOTITE
First results from analysis of coordinated AVIRIS, TIMS, and ISM (French) data for the Ronda (Spain) and Beni Bousera (Morocco) peridotites p 1067 N94-16675

PERIHELIONS
Dust grain resonant capture: A statistical study
p 1245 N94-16384

PERIOD DOUBLING
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394

PERIODIC VARIATIONS
Nonlinear acoustics: Periodic waveguide, scattering of sound by sound, three-layer fluid, finite amplitude sound in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A267145] p 1177 N94-15732
Research into the influence of spatial variability and scale on the parameterization of hydrological processes
[NASA-CR-194610] p 1082 N94-16026
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028

PERIPHERAL CIRCULATION
Automated strain gauge plethysmograph
[AD-A267323] p 1035 N94-17002

PERIPHERAL VISION
The effects of luminance boundaries on color perception
[AD-A268398] p 1133 N94-17397

PERISCOPES
Atmospheric propagation analysis program
[AD-A268231] p 1006 N94-17565

PERMANENT MAGNETS
Suggestion for extended Viking magnetic properties experiment on future Mars missions
p 1285 N94-16375
Electrodynamic forces of the cross-connected figure-eight null-flux coil suspension system
[DE93-015139] p 1048 N94-16969

PERMEABILITY
HyperVentilate: Decision-support software for soil vapor extraction technology application
[PB93-134880] p 1094 N94-15136
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
Influence of fiber packing structure on permeability
p 938 N94-16857
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
Factors determining the release of nitric oxide --- Calcium/cadmium transport by renal cortical collectin duct cells
[AD-A266232] p 1118 N94-17224

PERMITTIVITY
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825
Cyanoresin, cyanoresin/cellulose triacetate blends for thin film, dielectric capacitors
[NASA-CASE-NPO-18913-1-CU] p 966 N94-15930
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605

PERMUTATIONS
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657
Non-blocking crossbar permutation engine with constant routing latency
[NASA-CASE-NPO-18864-1-CU] p 1161 N94-17328

PEROVSKITES
Experimental partitioning of Zr, Ti, and Nb between silicate liquid and a complex noble metal alloy and the partitioning of Ti between perovskite and platinum metal
p 982 N94-16287
An experimental study of trace element partitioning between perovskite, hibonite and melt: Equilibrium values p 954 N94-16313

PERSONAL COMPUTERS
Applying paperless technology to achieve excellence in manufacturing operations
[TABES PAPER 93-630] p 1052 N94-16147

PERSONNEL
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943
Return to flight 3, the journey continues
[NASA-TM-109651] p 1223 N94-15319
Permanent change of station: The NASA employee's guide to an easier move
[NHB-9760.1A] p 1223 N94-15931
The Senior Executive Service
[NHB-3100.6] p 1224 N94-15945
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
The Langley Fitness Center p 1126 N94-16635
Carpal tunnel syndrome and other cumulative trauma disorders of the arm and hand and occupation in US Navy enlisted personnel
[AD-A267747] p 1129 N94-17374

PERSONNEL DEVELOPMENT
PET team
[NASA-TM-109599] p 1223 N94-15293
The Senior Executive Service
[NHB-3100.6] p 1224 N94-15945

PERSONNEL MANAGEMENT
NASA directives master list and index
[NHB-1410.13L] p 1229 N94-15414
Permanent change of station: The NASA employee's guide to an easier move
[NHB-9760.1A] p 1223 N94-15931
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937
Industrial labor relations manual
[NHB-5200.1B] p 1224 N94-15939
The NASA competitive placement plan for positions GS-15 and below (including trades and labor positions)
[NHB-3335.1C] p 1224 N94-15944
The Senior Executive Service
[NHB-3100.6] p 1224 N94-15945
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
Ongoing Recovery Basic Information Tool (ORBIT)
p 1124 N94-16616
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
The Goddard Space Flight Center ergonomics program p 1125 N94-16621
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623

PERSONNEL SELECTION
Astronauts number 1 --- mercury project
[NASA-TM-109428] p 1131 N94-15499
The NASA competitive placement plan for positions GS-15 and below (including trades and labor positions)
[NHB-3335.1C] p 1224 N94-15944
The Senior Executive Service
[NHB-3100.6] p 1224 N94-15945

PERTURBATION THEORY
Shielding from space radiations
[NASA-CR-194578] p 1180 N94-15715
Many-body quantum mechanical studies of molecular clusters
[AD-A266624] p 1180 N94-15727
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103
The renormalization of the axial anomaly in dimensional regularization
[NIKHEF-H/92-18] p 1220 N94-17618

PETROGRAPHY
Stalking the LREE-enriched component in ureilites
p 1241 N94-16190
Grosnaja ABCs: Magnesium isotope compositions
p 1241 N94-16191
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Petrography, mineralogy, and Mg isotope composition of VICTA: A vigarano CaAl4O7-bearing type A inclusion
p 1103 N94-16203
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224
Angrite LEW87051: Are the olivines pheno's or xeno's? A continuing story p 1103 N94-16285
Cat Mountain: A meteoritic sample of an impact-melted chondritic asteroid p 1244 N94-16328
Classificational parameters for acapulcoites and lodranites: The cases of FRO 90011, EET 84302 and ALH A81187/84190 p 1245 N94-16389
A hydrogen isotope study of CO3 type carbonaceous chondrites; comparison with type 3 ordinary chondrites
p 1246 N94-16425

PETROLOGY
Stalking the LREE-enriched component in ureilites
p 1241 N94-16190
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
Petrologic constraints on the surface processes on asteroid 4 Vesta and on excavation depths of diogenite fragments p 1241 N94-16208
Petrologic models of 15388, a unique Apollo 15 mare basalt p 1264 N94-16258
Complex zoning behavior in pyroxene in FeO-rich chondrules in the Semarkona ordinary chondrite
p 1243 N94-16284
Angrite LEW87051: Are the olivines pheno's or xeno's? A continuing story p 1103 N94-16285
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
An initial perspective of S-asteroid subtypes within asteroid families p 1243 N94-16310
Manson impact structure, Iowa: First geochemical results for drill core M-1 p 1103 N94-16322
The monzonorite-anorthosite connection: The petrogenesis of terrestrial KREEP p 1104 N94-16365
The dregs of crystallization in Zagami
p 1245 N94-16390
The Nakhla parent melt: REE partition coefficients and clues to major element composition
p 1245 N94-16399
Igneous fractionation and subsolidus equilibration of diogenite meteorites p 1245 N94-16413
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle
[DE93-015936] p 1101 N94-16840

PH
Factors determining the release of nitric oxide --- Calcium/cadmium transport by renal cortical collectin duct cells
[AD-A266232] p 1118 N94-17224

PHARMACOLOGY
Evaluation of putative neurochemical intermediaries in space/motion sickness
[NASA-CR-193607] p 1118 N94-17090

PHASE CHANGE MATERIALS
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761

PHASE CONTROL
Ceramic fiber coatings development and demonstration
[AD-A267286] p 972 N94-17242

PHASE DETECTORS
Synchronous sampling phase and amplitude detection method and apparatus
[NASA-CASE-LAR-14725-1] p 1050 N94-15870

PHASE DIAGRAMS
Silica-bearing objects in the Dengli H3.8 and Gorlovka H3-4 chondrites p 1242 N94-16265

PHASE LOCKED SYSTEMS
Improvements to pulsed phase locked loop strain monitor
[NASA-CASE-LAR-14887-1] p 1033 N94-15877

PHASE SEPARATION (MATERIALS)
Sounding Rocket Experiments in Fluid Science and Materials Sciences: TEXUS 25 to 27 and MASER 4, volume 3
[ESA-SP-1132-VOL-3] p 943 N94-15157
Temperature propagation in near-critical fluids prior to and during separation p 944 N94-15165

PHASE SHIFT
Adaptive beamforming with imperfect arrays: Pattern effects and their partial correction
[AD-A267079] p 987 N94-15541
A study of the observed tidal residue vectors B versus oceanic tidal load vectors L p 1100 N94-15813
Interaction types and their like-polarization phase-angle difference signatures p 1079 N94-16756
Fundamental-mode RF design in e(+)e(-) storage ring factories
[DE93-015249] p 1183 N94-16809
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
Optical system storage design with diffractive optical elements p 1198 N94-17360

PHASE STABILITY (MATERIALS)
Mesons at finite temperature in the NJL model with gluon condensate
[DE93-626697] p 1185 N94-17310
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659
PHASE TRANSFORMATIONS
Pressures of supercritical salt solutions
p 945 N94-15166
Unidirectional solidification of liquid-crystal material
p 945 N94-15167
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885
Dynamical Ising model simulations of nucleation and growth in copper-cobalt alloys
[DE93-015336] p 957 N94-16015
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034
Phase equilibria of the magnesium sulfate-water system to 4 kbars p 953 N94-16247
Electrorheological fluid chemical processing
[AD-D015785] p 948 N94-16532
Process for shaping articles from electrosetting compositions
[AD-D015787] p 935 N94-16534
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
Slip, twinning and transformation in Laves phases
[DE93-018164] p 960 N94-16972
An investigation of the hydrolytic resistance of sodium-calcium plate glass with a layer of silica deposited on its surface
[IFTR-34/1991] p 971 N94-17120
Anisotropic phase separation in amorphous Fe-Ge alloys
[DE93-015255] p 961 N94-17251
A basic principles description of liquid vapor phase transitions
[AD-A268331] p 1176 N94-17581
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659
Shear wave measurements in shock-induced, high-pressure phases
[DE93-016461] p 1062 N94-17664
PHASED ARRAYS
Overview of Enhanced Data Stream Array Processor (EDSAP)
[AD-A266986] p 1158 N94-15492
Experimental evaluation of an adaptive focusing algorithm for a microwave planar phased-array hyperthermia system at UCSF
[AD-A267004] p 1121 N94-15634
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228
Proceedings of the 1992 Antenna Applications Symposium, volume 1
[AD-A268167] p 1005 N94-17431
PHENOLOGY
Recent advances in radar remote sensing of forest
p 991 N94-15897
PHENOLS
Preconversion catalytic deoxygenation of phenolic functional groups
[DE93-017034] p 950 N94-16912
Interpenetrating polymer network acoustic damping material
[AD-D015889] p 969 N94-16916
PHENYLALANINE
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111
PHENYLS
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
PHOBOS
A simultaneous estimation of the mass of Mars and its natural satellites, Phobos and Deimos, from the orbital perturbations on the Mariner 9, Viking 1, and Viking 2 orbiters p 1279 N94-16347
A mission concept of Phobos/Deimos exploration
p 1287 N94-16387
The spectrum of Phobos from Phobos 2 observations at 0.3-2.6 microns: Comparison to previous data and meteorite analogs p 1295 N94-16429
PHONONS
Basic optical studies of high T(c) oxide superconductors
[AD-A268148] p 1014 N94-17428
PHOSPHATES
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE93-016850] p 949 N94-16897
PHOSPHAZENE
The photochemistry of poly(methylphenylphosphazene)
[AD-A267320] p 970 N94-16948
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
PHOSPHIDES
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
PHOSPHINES
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
PHOSPHORESCENCE
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
PHOSPHORS
Preparation and investigation of improved low voltage electron excitable phosphors
[AD-A266852] p 963 N94-14948
PHOSPHORUS
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
PHOSPHORUS ISOTOPES
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194
PHOTOACOUSTIC SPECTROSCOPY
An electroacoustic transducer for purposes of photoacoustic spectroscopy
[IFTR-7/1992] p 1013 N94-17071
PHOTOCATHODES
Microchannel plate imaging detectors for the ultraviolet p 901 N94-15037
PHOTOCHEMICAL REACTIONS
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Photochemistry in thin polymeric films
[AD-A266716] p 964 N94-15729
Molecular beam studies of reaction dynamics
[DE93-015035] p 1181 N94-15995
Binding of carbon dioxide to metal macrocycles: Toward a mechanistic understanding of electrochemical and photochemical carbon dioxide reduction
[DE93-016244] p 949 N94-16870
The photochemistry of poly(methylphenylphosphazene)
[AD-A267320] p 970 N94-16948
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455
PHOTOCONDUCTIVITY
Characterization of InTISb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922
Impurity conduction photoconductor detectors
p 902 N94-15046
Lead chalcogenides based IR photosensitive array detectors with coordinate addressing
p 903 N94-15053
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Surface flashover of semiconductors: A fundamental study
[AD-A267382] p 1012 N94-17023
OSA proceedings on Ultrafast Electronics and Optoelectronics, volume 14
[AD-A267972] p 1014 N94-17410
PHOTOCONDUCTORS
Nonstationary behaviour of low background photon detectors p 902 N94-15049
Performance testing of doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15066
Non-linear effects in doped-germanium photoconductors for the ISO long wavelength spectrometer p 905 N94-15067
Extrinsic photoconductor detectors for the wavelength range 2 microns to 240 microns p 906 N94-15073
Ionising radiation-induced effects in doped germanium FIR photoconductors p 907 N94-15077
Silicon gallium doped photoconductor development for the AROME balloon borne instrument
p 908 N94-15087
A monolithic PbTeCCD focal plane array for MWIR imaging p 910 N94-15100
PHOTODETACHMENT
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436
PHOTODIODES
Advanced high performance CdHgTe multiplexed arrays p 903 N94-15051
X-ray spectroscopy with silicon pin and avalanche photo diodes p 906 N94-15072
Improved optical radiation detectors and their calibration: 200 nm - 30 microns p 906 N94-15075
Applications for large area silicon drift detectors on x ray and gamma ray astronomy p 909 N94-15090
Measuring atmospheric dispersion with WLRS in multiple wavelength mode p 916 N94-15582
Two wavelength satellite laser ranging using SPAD
p 916 N94-15584
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 1004 N94-17322
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
PHOTODISSOCIATION
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
Molecular beam studies of reaction dynamics
[DE93-015035] p 1181 N94-15995
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation
[DE93-016435] p 1039 N94-16450
Studies of combustion reactions at the state-resolved differential cross section level
[DE93-017605] p 948 N94-16462
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
PHOTOELASTIC ANALYSIS
Use of photostress and strain gages to analyze behavior of weldments and use of photostress and strain gages to analyze behavior of an aft skirt test specimen
[NASA-CR-194575] p 1058 N94-15716
PHOTOELASTIC MATERIALS
Use of photostress and strain gages to analyze behavior of weldments and use of photostress and strain gages to analyze behavior of an aft skirt test specimen
[NASA-CR-194575] p 1058 N94-15716
PHOTOELECTRIC EMISSION
Photoemission study of diamond (100) surface
[DE93-015251] p 1208 N94-16062
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560
PHOTOELECTRON SPECTROSCOPY
A sulfur segregation study of PWA 1480, NiCrAl, and NiAl alloys
[NASA-TM-106289] p 956 N94-15992
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
Photoemission study of diamond (100) surface
[DE93-015251] p 1208 N94-16062
The interaction of HCN(DCN) with Si(111)-7x7 studied with HREELS, UPS, and XPS
[AD-A266237] p 1182 N94-16111
Electron spectroscopy analysis
[NASA-CR-193591] p 951 N94-17039
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676
PHOTOEXCITATION
X ray laser program
[AD-A267075] p 1038 N94-15628

PHOTOGEOLOGY
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
PHOTOGRAPHIC EQUIPMENT
STS-30 crew photo in building 4
[NASA-TM-109573] p 1031 N94-15304
STS-27 crew photo training and habitation procedures
[NASA-TM-109553] p 1032 N94-15405
STS-35 payload specialists Durrance and Parise: 70mm photo training and cabin familiarization
[NASA-TM-109499] p 1032 N94-15463
PHOTOGRAPHIC FILM
Optical computing
[AD-A267881] p 1141 N94-17015
PHOTOGRAPHS
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
PHOTOGRAPHY
National Aero-Space Plane
[NASA-TM-109450] p 865 N94-15323
National Aero-Space Plane resource reel
[NASA-TM-109451] p 865 N94-15324
STS-34 onboard 16mm photography quick release
[NASA-TM-109460] p 880 N94-15355
STS-27 crew photo training and habitation procedures
[NASA-TM-109553] p 1032 N94-15405
STS-41 crew training bailout in CCT, 16mm camera class EVA prep, habitation equipment procedures, and food tasting
[NASA-TM-109517] p 876 N94-15517
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBC
[DE93-015491] p 1210 N94-16460
Optical computing
[AD-A267881] p 1141 N94-17015
PHOTOIONIZATION
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774
Multiphoton ionization studies of WF6 and UF6
[DE93-016232] p 1181 N94-15863
Characterization of UV emissions resulting from electronic energy transfer in atmospheric molecules
[AD-A266244] p 1101 N94-16469
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting
[DE93-013582] p 1183 N94-16818
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520
A physical model for one-dimension and time-dependent ionosphere. Part 2: Results and discussions
[DE93-627959] p 1103 N94-17631
PHOTOLITHOGRAPHY
Scalar limitations of diffractive optical elements p 1194 N94-17336
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
Diffractive optics fabricated by direct write methods with an electron beam p 1196 N94-17347
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Fabrication of micro-optical devices p 1197 N94-17351
SURPHEX (tm): New dry photopolymers for replication of surface relief diffractive optics p 1198 N94-17358
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359
PHOTOLUMINESCENCE
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Numerical studies of the photoluminescence spectrum of quantum Hall systems
[DE93-015822] p 1220 N94-16810
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437
PHOTOLYSIS
Photodegradation of polyimides. V1: Effect of donor-acceptor groups on the photooxidative stability of polyimides and model compounds
[AD-A267319] p 970 N94-16947
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
PHOTOMAPPING
Galileo imaging results from the second Earth-Moon flyby: Lunar Maria and related units p 1252 N94-16199
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
PHOTOMASKS
Fabrication of micro-optical devices p 1197 N94-17351
Low cost paths to binary optics p 1197 N94-17353
PHOTOMETERS
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
Visible light photon counters for astronomy p 902 N94-15043
Photoconductors and arrays for the far-infrared p 902 N94-15045
Impurity conduction photoconductor detectors p 902 N94-15046
BIB photodetectors based on antimony doped silicon p 902 N94-15047
Optimisation of FIR photoconductors for atmospheric spectroscopy p 902 N94-15048
Nonstationary behaviour of low background photon detectors p 902 N94-15049
A 12.5 micron infrared detector for Earth observation p 903 N94-15052
Lead chalcogenides based IR photosensitive array detectors with coordinate addressing p 903 N94-15053
Performance optimization of detector electronics for millimeter laser ranging p 913 N94-15569
Tracking capabilities of SPADs for laser ranging p 914 N94-15570
How to squeeze high quantum efficiency and high time resolution out of a SPAD p 914 N94-15571
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
The new MTLRS-1 receiving system p 877 N94-15611
Linear encoding device
[NASA-CASE-GSC-13562-1] p 1147 N94-15703
Mass of Saturn's A ring p 1263 N94-16252
Optical ionospheric instrumentation and research
[AD-A266403] p 1192 N94-16550
Acousto-optical classifier
[AD-D015894] p 1000 N94-16921
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272
PHOTOMICROGRAPHS
Grain surface features of Apollo 17 orange and black glass p 1289 N94-16397
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207
PHOTOMULTIPLIER TUBES
A new detector concept for energetic auroral x ray imaging p 907 N94-15081
Performance optimization of detector electronics for millimeter laser ranging p 913 N94-15569
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
Performance comparison of high speed microchannel plate photomultiplier tubes p 922 N94-15624
PHOTON-ELECTRON INTERACTION
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
PHOTONICS
Alternative optical architectures for multichannel adaptive optical processing
[AD-A267052] p 1189 N94-15664
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
The photonical, pure grid method
[NLR-TP-91478-U] p 1062 N94-17600
PHOTONS
Proceedings of an ESA Symposium on Photon Detectors for Space Instrumentation
[ESA-SP-356] p 899 N94-15025
A new approach to optical photon detection p 899 N94-15028
Superconductive x ray photon detectors p 900 N94-15031
Metastable superconductors as photon detectors p 900 N94-15032
The MIC photon counting detector p 901 N94-15039
CCDs and photon counting devices: Applications in space and from the ground p 901 N94-15041
Visible light photon counters for astronomy p 902 N94-15043
Outlook for hard x ray and gamma ray astronomy p 904 N94-15057
Developments in extreme ultraviolet and x ray instrumentation p 904 N94-15058
The TAUVEX experiment p 905 N94-15064
The Rutherford Appleton Laboratory photon counting detector p 910 N94-15096
Work at Graz on satellite signatures p 898 N94-15558
Sensor modelling for the Cyclops focal plane detector array based technology demonstrator
[AD-A267172] p 1190 N94-15846
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Scintillation mechanism in stoichiometric cerium compounds
[DE93-015499] p 948 N94-16771
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936
Detecting small debris using a ground-based photon counting detector
[DE93-012623] p 898 N94-17669
PHOTORECEPTORS
Melatonin, the pineal gland, and circadian rhythms
[AD-A268200] p 1129 N94-17478
PHOTOSENSITIVITY
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
PHOTOSTRESSES
Use of photostress and strain gages to analyze behavior of weldments and use of photostress and strain gages to analyze behavior of an aft skirt test specimen
[NASA-CR-194575] p 1058 N94-15716
PHOTOSYNTHESIS
Using AVIRIS images to measure temporal trends in abundance of photosynthetic and nonphotosynthetic canopy components p 1066 N94-16668
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687
Atmospheric correction of AVIRIS data in ocean waters p 1070 N94-16690
Tracking photosynthetic efficiency with narrow-band spectroradiometry
[CIW-PUBL-1133] p 1072 N94-16698
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations
[NASA-CR-194654] p 1118 N94-17279
PHOTOVOLTAIC CELLS
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240
Field investigation of the relationship between battery size and PV system performance
[DE93-016503] p 1016 N94-17671
PHOTOVOLTAIC CONVERSION
Futurepath 1 --- power systems
[NASA-TM-109431] p 925 N94-15503
A ten year review of performance of photovoltaic systems
[DE93-015649] p 1093 N94-17217
PHYSICAL CHEMISTRY
Dissociation rates of diatomic molecules
[AD-A266464] p 1182 N94-16586

PHYSICAL EXAMINATIONS
Monograph of the aviation epidemiology data register for FY 1991
[AD-A266896] p 1119 N94-14952
Ames Fitness Program p 1126 N94-16632
PHYSICAL EXERCISE
GSFC Fun Run
[NASA-TM-109587] p 1120 N94-15271
Living well in space: Ensuring crew capability
[NASA-TM-109538] p 1120 N94-15369
STS-27 crew presentation clip
[NASA-TM-109551] p 881 N94-15403
Ames Fitness Program p 1126 N94-16632
Johnson Space Center health related fitness program p 1126 N94-16633
Kennedy Space Center exercise program p 1126 N94-16634
The Langley Fitness Center p 1126 N94-16635
Physical Exercise Program p 1127 N94-16636
Metabolic monitoring of hypobaric subjects
[AD-A268221] p 1130 N94-17554
PHYSICAL FACTORS
Particle simulations on massively parallel machines
[DE93-015644] p 1157 N94-14927
PHYSICAL FITNESS
Monograph of the aviation epidemiology data register for FY 1991
[AD-A266896] p 1119 N94-14952
Living well in space: Ensuring crew capability
[NASA-TM-109538] p 1120 N94-15369
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Physical fitness and the Healthy People 2000 goals p 1125 N94-16619
Physical fitness and health education program at NASA Headquarters p 1126 N94-16631
Physical Exercise Program p 1127 N94-16636
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
PHYSICAL OPTICS
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
PHYSICAL WORK
Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
PHYSICIANS
Tuberculosis: A case for increased screening p 1126 N94-16627
PHYSIOLOGICAL EFFECTS
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A266958] p 1120 N94-15180
Living well in space: Ensuring crew capability
[NASA-TM-109538] p 1120 N94-15369
Transcranial Doppler ultrasound studies of cerebral blood-flow in microgravity p 981 N94-16095
Synaptic plasticity and memory formation
[AD-A267988] p 1133 N94-17453
Ontogenesis of mammals in microgravity
[NASA-TM-103978] p 1139 N94-17636
PHYSIOLOGICAL RESPONSES
Neuropeptide-Y (NPY) increases total blood flow in the tail, and reduces cutaneous microvascular blood flow in the tail and foot of the rat
[AD-A266839] p 1115 N94-14918
Autogenic-Feedback Training (AFT) as a preventive method for space motion sickness: Background and experimental design
[NASA-TM-108780] p 1120 N94-15537
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
Heart rate response to parabolic flight manoeuvres p 981 N94-16098
AFRRI reports, first quarter 1993
[AD-A266380] p 1123 N94-16515
The nature of dynamic arteriolar vasoreactivity: A mini-review and A classification scheme
[AD-A266499] p 1128 N94-16783
Neurotoxicity of hemoglobin in cortical cell culture
[AD-A266506] p 1128 N94-16786
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893
Synaptic plasticity and memory formation
[AD-A267988] p 1133 N94-17453
PHYSIOLOGICAL TESTS
STS-32 crew training for lower body negative pressure unit and AFE
[NASA-TM-109475] p 1120 N94-15381
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
PHYSIOLOGY
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
Studies of aural acoustic emmissions with the use of an original apparatus and investigative methodology
[IFTR-20/1992] p 1177 N94-16650
Evaluation of spatial productivity patterns in an annual grassland during an AVIRIS overflight
[CIW-PUBL-1134] p 1067 N94-16672
Multitemporal diurnal AVIRIS images of a forested ecosystem p 1074 N94-16709
PHYTOPLANKTON
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
Seasonal and spatial variations in phytoplanktonic chlorophyll in eutrophic Mono Lake, California, measured with the Airborne Visible and Infrared Imaging Spectrometer (AVIRIS) p 1069 N94-16684
PICOSECOND PULSES
Nd:YLF laser for airborne/spaceborne laser ranging p 913 N94-15563
A study of high field transport in wide band gap electronic materials using a picosecond transient charge technique
[AD-A267098] p 1008 N94-15636
PIEZOELECTRIC TRANSDUCERS
Nanocomposites for electronic applications, volume 1
[AD-A267070] p 1009 N94-15669
Nanocomposites for electronic applications, volume 3
[AD-A267073] p 1009 N94-15672
Nanocomposites for electronic applications, volume 2
[AD-A267074] p 1009 N94-15673
Mechanical and surface force nanoprobe
[AD-D015792] p 1034 N94-16536
Fabrication of piezoelectric ceramic/polymer composites by injection molding
[AD-A267302] p 972 N94-17227
PIEZOELECTRICITY
Nanocomposites for electronic applications, volume 1
[AD-A267070] p 1009 N94-15669
Nanocomposites for electronic applications, volume 3
[AD-A267073] p 1009 N94-15672
Nanocomposites for electronic applications, volume 2
[AD-A267074] p 1009 N94-15673
Fabrication of piezoelectric ceramic/polymer composites by injection molding
[AD-A267302] p 972 N94-17227
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
PIGMENTS
Materials Research Society Symposium Proceedings, Volume 292: Biomolecular Materials
[AD-A265776] p 1116 N94-15138
PILOT ERROR
Altitude deviations: Breakdowns of an error-tolerant system
[NASA-TM-108788] p 862 N94-15550
PILOT PERFORMANCE
An information processing classification of beyond-visual-range air intercepts
[AD-A266927] p 1131 N94-15108
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 1: Predicted veersus actual performance of AH-1 crews induced with symptoms simulating radiation sickness
[AD-A268376] p 1138 N94-17460
PILOT TRAINING
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659
PINEAL GLAND
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893
Melatonin, the pineal gland, and circadian rhythms
[AD-A268200] p 1129 N94-17478
PIONEER SPACE PROBES
The 1978 highlights
[NASA-TM-109625] p 1302 N94-15411
The 1968 highlights --- NASA programs and research
[NASA-TM-109627] p 1302 N94-15413
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508
PIONEER VENUS SPACECRAFT
Pioneer-Venus press clip --- Solar System formation and extraterrestrial life
[NASA-TM-109425] p 1239 N94-15495
PIONEER VENUS 1 SPACECRAFT
Pioneer Venus data analysis for the retarding potential analyzer
[NASA-CR-194673] p 1297 N94-17292
PIONS
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117
A high sensitivity search for CP violating rare K(sub L) decays and precision measurement of the direct CP violation parameter (epsilon)(prime)/(epsilon) via the four K (yields) 2(pi) decay modes
[DE93-016866] p 1184 N94-16899
PIPE FLOW
On solving the compressible Navier-Stokes equations for unsteady flows at very low Mach numbers
[NASA-TM-106380] p 1027 N94-17128
PIPES (TUBES)
Long baseline watertubes p 1037 N94-15803
Potential transients, transmission and electrochemical corrosion detection
[DE93-014055] p 956 N94-15922
Investigation of two-phase flow and boiling heat transfer during quenching of a tube under microgravity p 979 N94-16087
PISTON ENGINES
Some single-piston closed-cycle machines and Peter Tailer's thermal lag engine
[DE93-015983] p 1049 N94-17675
PISTONS
Hydraulic pump with integral electric motor
[AD-D015782] p 1011 N94-16549
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263
High temperature hydraulic seals
[AD-A268257] p 1048 N94-17433
Some single-piston closed-cycle machines and Peter Tailer's thermal lag engine
[DE93-015983] p 1049 N94-17675
PITCH (INCLINATION)
The free decay of coupled heave and pitch motions of a model frigate
[DRA/TM(AWMH)92340] p 1146 N94-15702
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
PITCHING MOMENTS
Suppression of dynamic stall with a leading-edge slat on a VR-7 airfoil
[NASA-TP-3357] p 856 N94-15657
PITS
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
PIVOTS
Tilt mechanism
[AD-D015780] p 1047 N94-16548
PIXELS
A monolithic PbTeCCD focal plane array for MWIR imaging p 910 N94-15100
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498
Pixel-level fusion using interest images
[AD-A266640] p 1164 N94-15746
A task adaptive parallel graphics renderer
[DE93-017123] p 1149 N94-16119
PLAINS
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
PLANAR STRUCTURES
Orientation of Planar Deformation Features (PDFs) in quartz p 1219 N94-16341
PLANE STRAIN
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method
[NASA-CR-194267] p 1062 N94-17445
PLANE STRESS
Analysis of the strengthening of aluminum alloy undergoing plastic deformation under conditions of a compound state of stress
[IFTR-21/1991] p 960 N94-17093
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method
[NASA-CR-194267] p 1062 N94-17445
PLANE WAVES
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751

Regular and irregular reflection of a wave from a slanting flat wall
[IFTR-13/1991] p 1193 N94-17049
The exact solution of the problem of diffraction of an electromagnetic plane wave by a conductive half-plane situated at an interface
[IFTR-3/91] p 1002 N94-17057

PLANETARY ATMOSPHERES
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180

PLANETARY BOUNDARY LAYER
Phillips Laboratory global spectral numerical weather prediction model
[AD-A267293] p 1107 N94-17244
Further development and testing of a second-order bulk boundary layer model
[AD-A268071] p 1109 N94-17552

PLANETARY COMPOSITION
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
A Pluto thermal model p 1256 N94-16216
Modeling the reflectance of CO2 frost with new optical constants: Application to Martian south polar cap spectra p 1256 N94-16217
Nd-142/Nd-144 in bulk planetary reservoirs, the problem of incomplete mixing of interstellar components and significance of very high precision Nd-145/Nd-144 measurements p 1256 N94-16220
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system p 1259 N94-16233
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
Evolution of Triton's volatile budget p 1284 N94-16373
Mars brine formation experiment p 1293 N94-16419

PLANETARY CORES
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335

PLANETARY CRATERS
Magellan: Principal Venus science findings p 989 N94-15887
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
The three ages of Venus: A hypothesis based on the cratering record p 1261 N94-16239
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement p 1242 N94-16245
The size of complex craters p 1262 N94-16249
The depths of the largest impact craters on Venus p 1264 N94-16261
A first-order model for impact crater degradation on Venus p 1265 N94-16268
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
Implications of crater distributions on Venus p 1270 N94-16300
Manson impact structure, Iowa: First geochemical results for drill core M-1 p 1103 N94-16322
Preliminary Ar-40/Ar-39 age spectrum and laser probe dating of the M1 core of the Manson Impact Structure, Iowa: A K-T boundary crater candidate p 1104 N94-16334
Tectonic resurfacing of Venus p 1285 N94-16380
Relief of some small landforms on Venus p 1293 N94-16418
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654

PLANETARY CRUSTS
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
The depths of the largest impact craters on Venus p 1264 N94-16261
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
Density of impact craters on tessera, Venus p 1264 N94-16263
An inversion of geoid and topography for mantle and crustal structure on Mars p 1273 N94-16315
Models of thermal/chemical boundary layer convection: Potential application to Venus p 1279 N94-16348
Large-scale volcanism associated with coronae on Venus p 1285 N94-16376
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Variations in the Fe mineralogy of bright Martian soil p 1295 N94-16431
Composition of weakly altered Martian crust p 1296 N94-16436
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036

PLANETARY ENVIRONMENTS
Directory of research projects: Planetary materials and geochemistry
[NASA-TM-4484] p 1095 N94-15781
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions p 954 N94-16372

PLANETARY EVOLUTION
Pioneer-Venus press clip --- Solar System formation and extraterrestrial life
[NASA-TM-109425] p 1239 N94-15495
Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
Potassium isotope cosmochemistry, volatile depletion and the origin of the Earth p 953 N94-16259
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335
Evolution of Triton's volatile budget p 1284 N94-16373
Workshop on early Mars: How warm and how wet, part 2?
[NASA-CR-193503] p 1297 N94-17637

PLANETARY GEOLOGY
Magellan: Principal Venus science findings p 989 N94-15887
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices p 1248 N94-16178
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Pargo Chasma and its relationship to global tectonics p 1249 N94-16181
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Cretaceous-tertiary boundary spherules and Cenozoic microtektites: Similarities and differences p 1241 N94-16186
Rheology of water and ammonia-water ices p 953 N94-16188
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Mars Analog Site Study (MASS) p 1252 N94-16200
Earth imaging results from Galileo's second encounter p 1252 N94-16201
Collisional and dynamical history of Gaspra p 1241 N94-16202
Explosive mafic volcanism on Earth and Mars p 1253 N94-16204
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness p 1103 N94-16211
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Lava flow-field morphological classification and interpretation: Examples from Venus p 1259 N94-16230
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus p 1260 N94-16235
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates p 1260 N94-16238
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
A first-order model for impact crater degradation on Venus p 1265 N94-16268
Fractal geometry of some Martian lava flow margins: Alba Patera p 1270 N94-16298
Tectonics of Neyterkob corona on Venus p 1270 N94-16299
Implications of crater distributions on Venus p 1270 N94-16300
Megaplumes on Venus p 1271 N94-16301
Preliminary analysis of Dione Regio, Venus: The final Magellan regional imaging gap p 1271 N94-16302
The distribution of large volcanoes on Venus as a function of height and altitude p 1271 N94-16303
Tidal interaction: A possible explanation for geysers and other fluid phenomena in the Neptune-Triton system p 1272 N94-16311
An inversion of geoid and topography for mantle and crustal structure on Mars p 1273 N94-16315
Global Magellan-image map of Venus at full resolution p 1274 N94-16319
Meander properties of Venusian channels p 1275 N94-16324
Cat Mountain: A meteoritic sample of an impact-melted chondritic asteroid p 1244 N94-16328
Spectral study of Venus global topography and geoid from Magellan and PVO data p 1276 N94-16332
Vertical structure models of the 1990 equatorial disturbance on Saturn p 1277 N94-16333
Sheet flow fields on Venus p 1278 N94-16338
Hellas basin, Mars: Formation by oblique impact p 1280 N94-16350
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369
Evolution of Triton's volatile budget p 1284 N94-16373
Suggestion for extended Viking magnetic properties experiment on future Mars missions p 1285 N94-16375
Large-scale volcanism associated with coronae on Venus p 1285 N94-16376
Tectonic resurfacing of Venus p 1285 N94-16380
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
The dregs of crystallization in Zagami p 1245 N94-16390
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 1104 N94-16396
Deucalionis Regio, Mars: Evidence for a unique mineralogic endmember and a crusted surface p 1291 N94-16406
Analysis of pyroxene absorptions observed in Martian dark regions p 1292 N94-16411
Relief of some small landforms on Venus p 1293 N94-16418
Mars brine formation experiment p 1293 N94-16419
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654

PLANETARY IONOSPHERES
Pioneer Venus data analysis for the retarding potential analyzer
[NASA-CR-194673] p 1297 N94-17292

PLANETARY LIMB
Altitude profile of aerosols on Mars from measurements of its thermal radiation on limb p 1294 N94-16423

PLANETARY MAGNETIC FIELDS
Magnetic effects in Venus/solar wind interaction
[NASA-CR-194666] p 1299 N94-17281

PLANETARY MAGNETOSPHERES
Multispectral observations of the Jovian aurora
[NASA-CR-193628] p 1297 N94-16884

PLANETARY MAGNETOTAILS
Linear and non-linear studies of Alfven waves in space. Stationary and dynamic processes in magnetospheric plasmas
[NASA-CR-193585] p 1239 N94-16647

PLANETARY MANTLES
Experimental constraints on CO2 and H2O in the Martian mantle and primary magmas p 1262 N94-16248
Estimates of lithospheric thickness on Venus p 1267 N94-16277
An inversion of geoid and topography for mantle and crustal structure on Mars p 1273 N94-16315
Models of thermal/chemical boundary layer convection: Potential application to Venus p 1279 N94-16348
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle p 1293 N94-16421

PLANETARY MAPPING
Pargo Chasma and its relationship to global tectonics p 1249 N94-16181
Earth imaging results from Galileo's second encounter p 1252 N94-16201
Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush p 1086 N94-16318
Global Magellan-image map of Venus at full resolution p 1274 N94-16319
The cartography of Venus with Magellan data p 1274 N94-16320
Hellas basin, Mars: Formation by oblique impact p 1280 N94-16350
Tectonic resurfacing of Venus p 1285 N94-16380
The use of TIMS for mapping different pahoehoe surfaces: Mauna Iki, Kilauea p 1065 N94-16606
Unmixing AVIRIS data to provide a method for vegetation fraction subtraction p 1066 N94-16669
Mapping the mineralogy and lithology of Canyonlands, Utah with imaging spectrometer data and the multiple spectral feature mapping algorithm p 1066 N94-16670

PLANETARY MASS
A simultaneous estimation of the mass of Mars and its natural satellites, Phobos and Deimos, from the orbital perturbations on the Mariner 9, Viking 1, and Viking 2 orbiters p 1279 N94-16347

PLANETARY NEBULAE
Gas-grain energy transfer in solar nebula shock waves: Implications for the origin of chondrules p 1262 N94-16251
Evolution of Triton's volatile budget p 1284 N94-16373
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379

PLANETARY ORBITS
The effects of orbital and climatic variations on Martian surface heat flow p 1290 N94-16402

PLANETARY QUAKES
The seismic response of an aquifer to the propagation of an impact generated shock wave: A possible trigger of the Martian outflow channels? p 1281 N94-16354

PLANETARY RADIATION
Altitude profile of aerosols on Mars from measurements of its thermal radiation on limb p 1294 N94-16423

PLANETARY ROTATION
Neptune encounter highlights [NASA-TM-109421] p 1246 N94-15240

PLANETARY STRUCTURE
Experimental constraints on CO2 and H2O in the Martian mantle and primary magmas p 1262 N94-16248
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382

PLANETARY SURFACES
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M [NASA-CR-193174] p 1247 N94-16173
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong p 1007 N94-16197
Lava flow-field morphological classification and interpretation: Examples from Venus p 1259 N94-16230
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
Guide to Magellan image interpretation [NASA-CR-194340] p 1298 N94-17654

PLANETARY SYSTEMS
Teaching planetary sciences to elementary school teachers: Programs that work p 1222 N94-16346

PLANETARY TEMPERATURE
The effects of orbital and climatic variations on Martian surface heat flow p 1290 N94-16402
Equatorial ground ice on Mars: Steady-state stability p 1290 N94-16403

PLANETARY WAVES
A global traveling wave on Venus [NASA-CR-194356] p 1246 N94-15182
Ray tracing on topographic Rossby waves [AD-A267014] p 1112 N94-15844
Real time system for practical acoustic monitoring of global ocean temperature [AD-A267868] p 1113 N94-17391

PLANETS
The planetary data system educational CD-ROM p 1234 N94-16209

PLANFORMS
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line [NASA-TP-3359] p 859 N94-16574

PLANTS (BOTANY)
Plant research [NASA-TM-109664] p 1116 N94-15235
The 1990-1991 NASA space biology accomplishments [NASA-TM-4501] p 1118 N94-17257

PLASMA ACCELERATION
Numerical modeling of the temperature gradients and spectra of the plasma armature on Thunderbolt [AD-A266414] p 878 N94-16552

PLASMA ARC WELDING
Plasma arc welding weld imaging [NASA-CASE-MFS-28797-1] p 1047 N94-15949
The Marshall Automated Weld System (MAWS) [TABES PAPER 93-602] p 1049 N94-16138
Plasma arc welding repair of space flight hardware [TABES PAPER 93-603] p 1049 N94-16139
Robotic weld overlay coatings for erosion control [DE93-016938] p 970 N94-16959

PLASMA CONTROL
ITER-HARD Toroidal Field coil structural analysis [DE93-014834] p 1201 N94-15981
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT) [DE93-015799] p 1202 N94-16162
High beta and confinement studies of TFTR [DE93-016204] p 1202 N94-16446
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector [AD-D015788] p 998 N94-16535
3D and r,z particle simulations of heavy ion fusion beams [DE93-013417] p 1205 N94-17670

PLASMA CURRENTS
Inductive effects during second harmonic current drive experiments on T-10 [DE93-014411] p 1202 N94-16803
Simulation of enhanced tokamak performance on D3-D using fast wave current drive [DE93-014009] p 1203 N94-16823

PLASMA DECAY
Studies on the parametric decay of waves in fusion plasmas [VTT-PUBS-110] p 1200 N94-15204
On the decay of a dipole pump wave to half-harmonics p 1201 N94-15211

PLASMA DIAGNOSTICS
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT) [DE93-015799] p 1202 N94-16162
Numerical modeling of the temperature gradients and spectra of the plasma armature on Thunderbolt [AD-A266414] p 878 N94-16552
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting [DE93-013582] p 1183 N94-16818
The effects of radiation transport on line ratios used as temperature and density diagnostic [DE93-016424] p 1205 N94-17663

PLASMA DRIFT
Structure and damping of toroidal drift waves (and their implications for anomalous transport) [DE93-014005] p 1203 N94-16822

PLASMA DYNAMICS
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques [AD-A267055] p 885 N94-15666
Spectroscopic and computer modeling investigations of a laser-sustained plasma [IFTR-30/1991] p 1204 N94-17066
Granular fluctuations in plasma turbulence and their role in transport [DE93-013465] p 1187 N94-17674

PLASMA ENGINES
Plasma instabilities and transport in the MPD thruster [AD-A268268] p 1204 N94-17575

PLASMA EQUILIBRIUM
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT) [DE93-015799] p 1202 N94-16162

PLASMA FREQUENCIES
Double stimulated Brillouin scattering p 1200 N94-15205

PLASMA GENERATORS
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode [AD-A267214] p 1204 N94-16987

PLASMA HEATING
High frequency Raman current drive p 1201 N94-15208
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
Simulations of wave-particle interactions in stimulated Raman forward scattering in a magnetized plasma [TKK-F-A704] p 1201 N94-15210
Synthesis of ceramic oxide powders in a microwave plasma device [DE93-012741] p 965 N94-15920
Inductive effects during second harmonic current drive experiments on T-10 [DE93-014411] p 1202 N94-16803
Recent results from the 60 GHz inside launch ECH system on the D3-D tokamak [DE93-013027] p 1203 N94-16816
Simulation of enhanced tokamak performance on D3-D using fast wave current drive [DE93-014009] p 1203 N94-16823

PLASMA INTERACTIONS
Synthesis of ceramic oxide powders in a microwave plasma device [DE93-012741] p 965 N94-15920

PLASMA LAYERS
The effect of process parameters on the surface finish of plasma polymers [DE93-014112] p 966 N94-15924
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector [AD-D015788] p 998 N94-16535

PLASMA OSCILLATIONS
Double stimulated Brillouin scattering p 1200 N94-15205

PLASMA PHYSICS
Direct drive foil implosion experiments on Pegasus 2 [DE93-012666] p 1202 N94-16776
Linear stability of stationary solutions of the Vlasov-Poisson system in three dimensions [DE93-013873] p 1174 N94-16820
Nonlinear problems in fluid dynamics and inverse scattering [AD-A266234] p 1026 N94-16927
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode [AD-A267214] p 1204 N94-16987
Plasma Science Committee (PLSC) and the Panel on Opportunities in Plasma Science and Technology (OPST) [DE93-018142] p 1204 N94-16995
Application of group theory to integral-difference equations of plasma physics [IFTR-23/1992] p 1204 N94-17067
Role and development of small satellite missions in space plasma physics p 891 N94-17149
Granular fluctuations in plasma turbulence and their role in transport [DE93-013465] p 1187 N94-17674

PLASMA PRESSURE
Formation of the stable auroral arc that intensifies at substorm onset [NASA-CR-193637] p 1098 N94-15433

PLASMA PROPULSION
Plasma instabilities and transport in the MPD thruster [AD-A268268] p 1204 N94-17575
Application of a NEPTUNE propulsion concept to a manned Mars excursion [AD-A268053] p 929 N94-17587

PLASMA SPECTRA
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT) [DE93-015799] p 1202 N94-16162

PLASMA SPRAYING
Krupp technical reports no. 2, English edition, October 1992 [ETN-93-94631] p 984 N94-16000
Vacuum plasma spraying p 975 N94-16002

PLASMA TEMPERATURE
ARIES tokamak reactor study [DE93-017059] p 1203 N94-16901

PLASMA TURBULENCE
Active probing of plasma edge turbulence and feedback studies on the Texas experimental tokamak (TEXT) [DE93-015799] p 1202 N94-16162
Plasma instabilities and transport in the MPD thruster [AD-A268268] p 1204 N94-17575
Granular fluctuations in plasma turbulence and their role in transport [DE93-013465] p 1187 N94-17674

PLASMA WAVES
Studies on the parametric decay of waves in fusion plasmas
[VTT-PUBS-110] p 1200 N94-15204
Double stimulated Brillouin scattering
p 1200 N94-15205
Dynamics of douple stimulated Brillouin scattering
p 1200 N94-15206
Soliton-like structures in double stimulated Brillouin scattering p 1200 N94-15207
High frequency Raman current drive
p 1201 N94-15208
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
Simulations of wave-particle interactions in stimulated Raman forward scattering in a magnetized plasma
[TKK-F-A704] p 1201 N94-15210
On the decay of a dipole pump wave to half-harmonics p 1201 N94-15211
Structure and damping of toroidal drift waves (and their implications for anomalous transport)
[DE93-014005] p 1203 N94-16822
PLASMA-ELECTROMAGNETIC INTERACTION
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting
[DE93-013582] p 1183 N94-16818
PLASMA-PARTICLE INTERACTIONS
Simulations of wave-particle interactions in stimulated Raman forward scattering in a magnetized plasma
[TKK-F-A704] p 1201 N94-15210
PLASMAS (PHYSICS)
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
Numerical modeling of the temperature gradients and spectra of the plasma armature on Thunderbolt
[AD-A266414] p 878 N94-16552
Linear and non-linear studies of Alfven waves in space. Stationary and dynamic processes in magnetospheric plasmas
[NASA-CR-193585] p 1239 N94-16647
Elemental impurity analysis of mercuric iodide by ICP/MS
[DE93-015531] p 949 N94-16876
Hollow cathode heater development for the Space Station plasma contactor
[NASA-CR-191131] p 926 N94-16880
ARIES tokamak reactor study
[DE93-017059] p 1203 N94-16901
Plasma Science Committee (PLSC) and the Panel on Opportunities in Plasma Science and Technology (OPST)
[DE93-018142] p 1204 N94-16995
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
Plasma flow switch and foil implosion experiments on Pegasus 2
[DE93-016464] p 1013 N94-17318
Kinetic plasma processes occurring in the outer plasmasphere
[NASA-CR-193452] p 1300 N94-17524
Optimal pulse modulator design criteria for plasma source ion implanters
[DE93-016465] p 1205 N94-17645
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670
PLASMASPHERE
Kinetic plasma processes occurring in the outer plasmasphere
[NASA-CR-193452] p 1300 N94-17524
PLASTIC DEFORMATION
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
Slip, twinning and transformation in Laves phases
[DE93-018164] p 960 N94-16972
Studies of changes in the energy stored in metals as a result of subjecting them to a surface type technological process
[IFTR-25/1991] p 960 N94-17063
Analysis of the strengthening of aluminum alloy undergoing plastic deformation under conditions of a compound state of stress
[IFTR-21/1991] p 960 N94-17093
PLASTIC PROPERTIES
Characterization of the cyclic plasticity of polycrystalline aluminum in the 90-300K domain: Use of the ultrasonic wave coupling technique - low frequency restraint
[ISAL-92-0083] p 954 N94-14930
Anisotropic damage mechanics modeling in metal matrix composites
[AD-A266328] p 934 N94-16440
Quantitative assessment of the accuracy of constitutive laws for plasticity with an emphasis on cyclic deformation
[AD-A267562] p 961 N94-17109
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method
[NASA-CR-194267] p 1062 N94-17445
PLASTICS
Modelling of creep data for plastics
[NPL-DMM(A)-92] p 1057 N94-15017
Dry stripping as a surface treatment method
[VTT-TIED-1348] p 985 N94-17544
PLATEAUS
A mineralized zone in Western Candor Chasma, Mars
p 1248 N94-16179
PLATELETS
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A266958] p 1120 N94-15180
PLATES (STRUCTURAL MEMBERS)
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Stress analysis of laminated composites with preformed holes. Part 1: Single plies with embedded material discontinuities
[AD-A266524] p 936 N94-16795
PLATES (TECTONICS)
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
On the relationship between tectonic plates and thermal mantle plume morphology p 1104 N94-16349
PLATINUM
Experimental partitioning of Zr, Ti, and Nb between silicate liquid and a complex noble metal alloy and the partitioning of Ti between perovskite and platinum metal
p 962 N94-16287
PLETHYSMOGRAPHY
Validation of respiratory inductive plethysmography for measuring exercise tidal volumes
[AD-A266883] p 1119 N94-14923
Automated strain gauge plethysmograph
[AD-A267323] p 1035 N94-17002
PLUMES
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
Rocket Motor Plume Technology
[AGARD-LS-188] p 923 N94-15217
Propulsion p 924 N94-15219
Nuclear rocket plume studies
[AD-A267154] p 925 N94-15837
Megaplumes on Venus p 1271 N94-16301
On the relationship between tectonic plates and thermal mantle plume morphology p 1104 N94-16349
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling
p 1286 N94-16381
The use of TIMS data to estimate the SO2 concentrations of volcanic plumes: A case study at Mount Etna, Sicily p 1065 N94-16608
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
PLUTO (PLANET)
A Pluto thermal model p 1256 N94-16216
Mapping the stability region of the 3:2 Neptune-Pluto resonance p 1280 N94-16351
PLUTO ATMOSPHERE
A Pluto thermal model p 1256 N94-16216
POINT DEFECTS
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
POINT SPREAD FUNCTIONS
Measurements of microlens performance
p 1197 N94-17355
POINTING CONTROL SYSTEMS
Performance of the upgraded Orroral laser ranging system p 877 N94-15602
POISSON DENSITY FUNCTIONS
Poisson filtering of laser ranging data
p 917 N94-15593
POISSON EQUATION
Linear stability of stationary solutions of the Vlasov-Poisson system in three dimensions
[DE93-013873] p 1174 N94-16820
POLAR CAPS
Global auroral imaging: Dynamics of Explorer Miss ion
[NASA-CR-194284] p 1097 N94-15003
A Pluto thermal model p 1256 N94-16216
POLAR ORBITS
Small launchers (current and future projects in the world) p 878 N94-17137
POLAR REGIONS
Imaging radar studies of polar ice p 991 N94-15899
TOPSAT: Global space topographic mission
p 992 N94-15905
POLAR SUBSTORMS
A correlative comparison of geomagnetic storms and auroral substorms using geomagnetic indeces
[AD-A268081] p 1102 N94-17512
POLAR WANDERING (GEOLOGY)
Nontidal gravity changes observed with a superconducting gravimeter p 1100 N94-15808
POLARIMETERS
Ultraviolet spectrometer and polarimeter (UVSP) catalog of observations. Volume 1: Experiments 1-30719, February 1980 - April 1985
[NASA-CR-4529-VOL-1] p 1298 N94-15023
Ultraviolet spectrometer and polarimeter (UVSP) catalog of observations. Volume 2: Experiments 30720-63057, April 1985 - February 1988
[NASA-CR-4529-VOL-2] p 1298 N94-15024
Mass of Saturn's A ring p 1263 N94-16252
POLARIMETRY
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
Comparison of JPL-AIRSAR and DLR E-SAR images from the MAC Europe 1991 campaign over testsite Oberpfaffenhofen: Frequency and polarization dependent backscatter variations from agricultural fields
p 1075 N94-16733
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR)
p 1076 N94-16738
Supervised fully polarimetric classification of the Black Forest test site: From MAESTROI to MAC Europe
p 1076 N94-16740
Processing of polarimetric SAR data for soil moisture estimation over Mahantango watershed area
p 1079 N94-16754
POLARIZATION (WAVES)
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
POLARIZATION CHARACTERISTICS
Interaction types and their like-polarization phase-angle difference signatures p 1079 N94-16756
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046
POLARIZED LIGHT
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187
POLARIZED RADIATION
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
POLARIZERS
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
POLARONS
New organic materials for nonlinear optics applications
[AD-A266451] p 1192 N94-16563
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437
POLICIES
Mission management aircraft operations manual
[NHB-7900.3] p 1225 N94-16729
Aircraft operations management manual
[NHB-7900.3(V1)] p 1225 N94-16730
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799
The Megascience Forum
[DE93-014445] p 1303 N94-16804
Computer Science and Telecommunications Board activities
[DE93-018141] p 1000 N94-17000
Abstracts of manuscripts submitted in 1992 for publication
[AD-A267963] p 1113 N94-17383

POLISHING
Polished substrate surface and cleaning study for coated optic quality
[DE93-014116] p 1190 N94-15975
POLITICS
The strategic environmental research and development program: A new paradigm for space, the environment, and national security
[AD-A266222] p 1174 N94-16109
POLLUTION CONTROL
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
The 11th annual report of accomplishments under the airport improvement program: Fiscal year 1992
[AD-A268328] p 865 N94-17458
POLLUTION MONITORING
New York MARKAL: An evaluation of carbon dioxide emission control strategies in New York State
[DE93-013149] p 1095 N94-15999
Statement on global climate change before the Subcommittee on Energy and Power, United States House of Representatives
[DE93-013163] p 1095 N94-16006
Utility emissions associated with electric and hybrid vehicle (EHV) charging
[DE93-013734] p 1011 N94-16459
POLYACRYLONITRILE
Characterization of the lithium/pan-based polymer electrolytes interface
[AD-A268401] p 973 N94-17434
POLYATOMIC MOLECULES
Geochemistry and cosmochemistry of fullerenes 3: Reaction of C60 and C70 with ozone
p 953 N94-16243
Spectroscopic investigations of nonambient systems with millimeter and submillimeter probes
[AD-A266537] p 968 N94-16796
POLYCARBONATES
Optical studies of glasses embedded with inorganic ions and organic dyes
[AD-A268146] p 1199 N94-17455
POLYCRYSTALS
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
POLYETHYLENES
Thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18694-1-CU] p 1014 N94-17325
POLYIMIDES
Structures from low dielectric polyimides
[NASA-CASE-LAR-14988-1] p 965 N94-15880
Improved composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 934 N94-15926
Photodegradation of polyimides. V1: Effect of donor-acceptor groups on the photooxidative stability of polyimides and model compounds
[AD-A267319] p 970 N94-16947
Low dielectric polyimides
[NASA-CASE-LAR-14987-2] p 974 N94-17559
POLYMER BLENDS
Polymer Infiltration Studies
[NASA-CR-194494] p 932 N94-15275
Cyanoresin, cyanoresin/cellulose triacetate blends for thin film, dielectric capacitors
[NASA-CASE-NPO-18913-1-CU] p 966 N94-15930
POLYMER CHEMISTRY
Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494
POLYMER MATRIX COMPOSITES
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295
POLYMERIC FILMS
Organic polymeric electro-optic materials: Synthesis, processing, and device applications
[AD-A267133] p 964 N94-15688
Photochemistry in thin polymeric films
[AD-A266716] p 964 N94-15729
The effect of process parameters on the surface finish of plasma polymers
[DE93-014112] p 966 N94-15924
Improved composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 934 N94-15926
Cyanoresin, cyanoresin/cellulose triacetate blends for thin film, dielectric capacitors
[NASA-CASE-NPO-18913-1-CU] p 966 N94-15930
Synthesis of novel electrically conducting polymers: Potential conducting Langmuir-Blodgett films and conducting polymers on defined surfaces
[NASA-CR-194651] p 972 N94-17297
POLYMERIZATION
Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques
[AD-A267055] p 885 N94-15666
Thermochemistry of silicate speciation in aqueous sodium silicate solutions: Ionization and polymerization of small silicate ion
[AD-A266825] p 964 N94-15683
Photochemistry in thin polymeric films
[AD-A266716] p 964 N94-15729
Effects of aging time on V205 sol-gel coatings
[AD-A266824] p 965 N94-15843
Structures from low dielectric polyimides
[NASA-CASE-LAR-14988-1] p 965 N94-15880
Use of microgravity in the synthesis of ceramics using sol gel techniques p 979 N94-16088
Interpenetrating polymer network acoustic damping material
[AD-D015889] p 969 N94-16916
Synthetic and mechanistic investigation of olefin polymerization catalyzed by early transition metal compounds
[DE93-018301] p 970 N94-16963
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494
POLYMERS
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727
Main chain chromophoric polymers with second order nonlinear optical properties
[AD-D015893] p 969 N94-16920
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
SURPHEX (tm): New dry photopolymers for replication of surface relief diffractive optics p 1198 N94-17358
POLYMETHYL METHACRYLATE
Progress in the modeling of the shock response and mitigation of thick composite shells
[AD-A267009] p 1057 N94-15524
Contained liquids in microgravity, part 2
p 979 N94-16085
Phase holograms in PMMA with proximity effect correction p 1037 N94-17348
POLYMORPHISM
C++ as a language for object-oriented numerics
[DE93-015027] p 1148 N94-15985
POLYNOMIALS
Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833
Reductions to sets of low information content
[TR-417] p 1150 N94-16579
Fast algorithms for polynomial interpolation, integration and differentiation
[AD-A267505] p 1154 N94-17370
POLYPHENYLS
The photochemistry of poly(methylphenylphosphazene)
[AD-A267320] p 970 N94-16948
POLYSTYRENE
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494
POLYSULFIDES
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
POLYTETRAFLUOROETHYLENE
Wide angle, single screen, gridded square-loop frequency selective surface for diplexing two closely separated frequency bands
[NASA-CASE-NPO-18664-1-CU] p 1237 N94-17438
POLYURETHANE RESINS
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994
POLYVINYL CHLORIDE
A model for non-linear creep and physical ageing in PVC
[NPL-DMM(A)-91] p 1057 N94-15016
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133
POPULATION INVERSION
X ray laser program
[AD-A267075] p 1038 N94-15628
POPULATIONS
Development of pattern recognition techniques for the evaluation of toxicant impacts to multispecies systems
[AD-A267197] p 1095 N94-15790
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Resolving LDEF's flux distribution: Orbital (debris?) and natural meteoroid populations p 1245 N94-16391
Biofilm structure and diversity
[AD-A267254] p 1118 N94-16989
POROSITY
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites
[DE93-015155] p 934 N94-16057
The cooling rates of pahoehoe flows: The importance of lava porosity p 1103 N94-16282
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
Investigation of the effects of polyelectrolyte coatings on colloid transport in porous media
[DE93-018300] p 970 N94-16973
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052
Micromechanics modeling and analysis of Haversian compact bone tissues as a fiber reinforced composite material
[AD-A268250] p 1129 N94-17456
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596
POROUS MATERIALS
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Operator overloading as an enabling technology for automatic differentiation
[DE93-012899] p 1170 N94-16778
Investigation of the effects of polyelectrolyte coatings on colloid transport in porous media
[DE93-018300] p 970 N94-16973
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing
[NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327
PORTABLE EQUIPMENT
Experience and results of the 1991 MTLRS-1 USSR campaign p 914 N94-15575
Experience with disconnected operation in a mobile computing environment
[AD-A267524] p 1141 N94-17115
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage
p 893 N94-17164
POSEIDON SATELLITE
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578
POSITION (LOCATION)
Satellite sound broadcast propagation measurements
p 996 N94-16047
POSITION (TITLE)
The Senior Executive Service
[NHB-3100.6] p 1224 N94-15945
POSITION ERRORS
Laser ranging data analysis
[NASA-CR-193547] p 1041 N94-16719
Category (CAT) 3B level 1 test plan for Global Positioning System (GPS)
[DOT/FAA/RD-93/21] p 864 N94-16835
POSITION INDICATORS
Double-driven shield capacitive type proximity sensor
[NASA-CASE-GSC-13541-1] p 1165 N94-15946

Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035

POSITION SENSING
Rotary encoding device
[NASA-CASE-GSC-13543-1] p 1189 N94-15705
Capacifiector camera
[NASA-CASE-GSC-13564-1] p 1033 N94-15872
Double-driven shield capacitive type proximity sensor
[NASA-CASE-GSC-13541-1] p 1165 N94-15946

POSITIONING
Wide-area Differential Global Positioning System (WDGPS)/Wide-area Integrity Broadcast (WIB) alternatives analysis
[DOT/FAA/SE-93/3] p 864 N94-16906
Radiocommunication problems of a position reporting and bidirectional messagery system using VHF/UHF with low-Earth orbit satellites p 889 N94-17136
Adequation of mini satellites to oceanic altimetry missions p 891 N94-17152
The ORBCOMM system p 893 N94-17163

POSITIVE IONS
Investigation of the effects of polyelectrolyte coatings on colloid transport in porous media
[DE93-018300] p 970 N94-16973

POSITRONS
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117

POSTFLIGHT ANALYSIS
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207
Postflight hardware evaluation 360T026 (RSRM-26, STS-47)
[NASA-CR-192559] p 882 N94-17656

POTASSIUM ISOTOPES
Potassium isotope cosmochemistry, volatile depletion and the origin of the Earth p 953 N94-16259

POTENTIAL ENERGY
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
Impending motion direction of contacting rigid bodies
[AD-A266814] p 1164 N94-15756
A molecular dynamics simulator for optimal control of molecular motion
[AD-A266572] p 1183 N94-16722

POTENTIAL FIELDS
Energy potential analysis of zero velocity curves in the restricted three-body problem
[AD-A267512] p 1170 N94-17076
Path planning for robotic truss assembly
[NASA-CR-194652] p 897 N94-17280

POTENTIAL FLOW
Modal element method for potential flow in non-uniform ducts: Combining closed form analysis with CFD
[NASA-TM-106347] p 1169 N94-15799

POWDER (PARTICLES)
Polymer Infiltration Studies
[NASA-CR-194494] p 932 N94-15275
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
The physical mechanism of comet outbursts: An experiment p 1242 N94-16221
Comparison of reflectance spectra of C asteroids and unique C chondrites Y86720, Y82162, and B7904 p 1242 N94-16246
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy
[DE93-015683] p 940 N94-17235

POWDER METALLURGY
Army P/M research and development overview
[AD-A266921] p 954 N94-15104
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764

POWER CONDITIONING
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256

POWER CONVERTERS
SPDE/SPRE final summary report
[NASA-CR-187066] p 924 N94-15482
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 1010 N94-15874
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256

POWER GAIN
Windshear radar calibration, 1992 flights: Transmitter power and receiver gain stability
[NASA-TM-108997] p 986 N94-15140
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230

POWER LINES
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693

POWER SERIES
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222

POWER SPECTRA
Segmenting textured 3D surfaces using the space/frequency representation
[AD-A266960] p 1163 N94-14968

POWER SUPPLY CIRCUITS
Circle diagram approach for self excited induction generators
[DE93-010031] p 1010 N94-15971
A power system for a microsatellite p 895 N94-17176
Smart Power: New power integrated circuit technologies and their applications
[VTT-TIED-1358] p 1015 N94-17546

POWERED LIFT AIRCRAFT
The lift-fan powered-lift aircraft concept: Lessons learned
[NASA-CR-177616] p 866 N94-15718

PRASEODYMIUM
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS
[DE93-016218] p 1209 N94-16447

PREAMPLIFIERS
Discrete CMT infrared detectors for space application, from ISSR to second generation Meteosat and MIPAS p 905 N94-15065

PRECAMBRIAN PERIOD
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

PRECESSION
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586

PRECIPITATES
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883

PRECIPITATION (METEOROLOGY)
The standardized precipitation index and its use in the western contiguous United States
[AD-A267547] p 1107 N94-17102
Phillips Laboratory global spectral numerical weather prediction model
[AD-A267293] p 1107 N94-17244

PRECIPITATION HARDENING
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885

PRECISION
The precision of today's satellite laser ranging systems p 912 N94-15559

PRECONDITIONING
On solving the compressible Navier-Stokes equations for unsteady flows at very low Mach numbers
[NASA-TM-106380] p 1027 N94-17128

PREDICTION ANALYSIS TECHNIQUES
On the accuracy of ERS-1 orbit predictions p 874 N94-15589
Compensation for the distortion in satellite laser range predictions due to varying pulse travel times p 917 N94-15590
Incorporation of boundary layer heating predictive methodology into NSWCDD aeroprediction code
[AD-A267000] p 1020 N94-15632
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
A fuzzy method for preliminary design random access memory failure rate prediction
[AD-A267948] p 1055 N94-17044

PREDICTIONS
Predicted and real development in the aviation in the period 1961-1991 p 853 N94-15122
On predicting the person-in-water drift for search and rescue
[AD-A268083] p 1055 N94-17514

PREFORMS
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
An overview of the NASA textile composites program p 937 N94-16846
Design and cost drivers in 2-D braiding p 937 N94-16849
Weaving multi-layer fabrics for reinforcement of engineering components p 937 N94-16850
Textile composite processing science p 938 N94-16856

PRELAUNCH SUMMARIES
Galileo probe spacecraft mission to Jupiter
[NASA-TM-109646] p 1247 N94-16070

PREMIXED FLAMES
Mechanisms of combustion limits in premixed gas flames at microgravity
[NASA-CR-194557] p 946 N94-15713
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060
Studies of premixed laminar and turbulent flames at microgravity
[NASA-CR-194656] p 951 N94-17125

PREMIXING
Mechanisms of combustion limits in premixed gas flames at microgravity
[NASA-CR-194557] p 946 N94-15713

PREPARATION
Food for space
[NASA-TM-109668] p 1136 N94-15435

PREPOLYMERS
Preparation of homogeneous aluminosilicate gels by sol/gel techniques
[AD-A266823] p 962 N94-14914

PREPREGS
Machine development p 932 N94-15258
Polymer Infiltration Studies
[NASA-CR-194494] p 932 N94-15275
A new NASA LaRC Multi-Purpose Prepregging Unit p 932 N94-15276

PREPROCESSING
Adaptive median filtering for preprocessing of time series measurements p 912 N94-15561
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment p 995 N94-16038

PRESSURE
Hypersonic shock wave boundary layer interactions over simplified deflected control surface configurations p 1018 N94-15203
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions p 954 N94-16372

PRESSURE BROADENING
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684

PRESSURE CHAMBERS
Simulation of collisional fragmentation with explosives p 1063 N94-16254

PRESSURE DEPENDENCE
Orientation of Planar Deformation Features (PDFs) in quartz p 1219 N94-16341

PRESSURE DISTRIBUTION
Laser Doppler velocimetry measurements across a normal shock in transonic flow
[AD-A267240] p 855 N94-14973
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681

PRESSURE EFFECTS
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868

PRESSURE GAGES
Determination of equivalent circuit for PVDF shock-pressure gauges
[DE93-016492] p 1034 N94-16452

PRESSURE GRADIENTS
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247

PRESSURE HEADS
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031

PRESSURE MEASUREMENT
Measurements of Interfacial Tension: MITE p 943 N94-15158
Pressures of supercritical salt solutions p 945 N94-15166
Mechanical and surface force nanoprobe
[AD-D015792] p 1034 N94-16536
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221

Experimental study of vortex and aerodynamic characteristics of stack wings with sideslip
[AD-A267722] p 860 N94-17274
An experimental study of fluctuating wall pressures in a highly swept, sharp fin-induced, Mach 5 shock wave/turbulent boundary layer interaction
[AD-A268394] p 861 N94-17461

PRESSURE PULSES
Acousto-optical confirmation of the localized wave phenomena
[DE93-016425] p 1177 N94-16448

PRESSURE REDUCTION
Effects of rotation on coolant passage heat transfer. Volume 2: Coolant passages with trips normal and skewed to the flow
[NASA-CR-4396-VOL-2] p 1023 N94-15991

PRESSURE SUITS
Aircrew/groundcrew life support systems research. Volume 1: CLIN 0001 research requirements
[AD-A268229] p 1139 N94-17563
Aircrew/groundcrew life support systems research. Volume 2: CLIN 0002 task order requirements
[AD-A268230] p 1139 N94-17564

PRESSURE VESSELS
Design of a cruciform bend specimen for determination of out-of-plane biaxial tensile stress effects on fracture toughness for shallow cracks
[DE93-015455] p 1059 N94-16104
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246

PRETREATMENT
Assessment of chromate and non-chromate conversion coatings for Al alloys using electrochemical impedance spectroscopy
[AD-A267205] p 965 N94-15859
Wound healing after laser injury to skin: The effect of occlusion and vitamin E
[AD-A266473] p 1128 N94-16779

PREVENTION
Legionella: An overview p 1126 N94-16629

PRIMITIVE EARTH ATMOSPHERE
Earth's partial pressure of CO2 over the past 100-500 Ma; evidence from Ce anomalies in mostly shallow seas (less than 200 m) as recorded in carbonate sediments, 2 p 1104 N94-16360

PRIORITIES
Chairmanship of the Neptune/Pluto outer planets science working group
[NASA-CR-194625] p 1297 N94-16832

PRISMS
Three short articles from Japanese laser journal
[AD-A268249] p 1042 N94-17415

PRIVACY
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937

PROBABILITY DENSITY FUNCTIONS
A new method for generating Bayes classifiers assuming mixtures of Gaussian densities
[FFI-91/4029] p 1172 N94-15298
On the use of the noncentral chi-square density function for the distribution of helicopter spectral estimates
[NASA-CR-191546] p 1176 N94-15487
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372

PROBABILITY DISTRIBUTION FUNCTIONS
The distribution of a sum of binomial random variables
[AD-A266969] p 1172 N94-15002
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372

PROBABILITY THEORY
Statistical computation of tolerance limits
[NASA-TM-108424] p 1172 N94-15535
Logarithmic asymptotics for steady-state tail probabilities in a single-server queue
[AD-A266746] p 1165 N94-15775
The cooling of confined ions driven by laser beams
[DE93-016612] p 1039 N94-16114
Combinatorial semantics
[TR-444] p 1149 N94-16575
Set-based Bayesianism
[TR-407] p 1170 N94-16582
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659
Nonlinear methods for communications
[AD-A267376] p 1001 N94-17019
Statistics of the half-integer stopband
[DE93-016101] p 1173 N94-17236
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
Mathematical Sciences Division 1992 programs
[AD-A268586] p 1140 N94-17623

PROBLEM SOLVING
HSTS: Integrating planning and scheduling
[AD-A266991] p 1222 N94-15213
Representation in incremental learning
[NASA-CR-194595] p 1221 N94-15719
Module interconnection frameworks for a real-time spreadsheet
[AD-A267317] p 1153 N94-17220
Design and diagnosis problem solving with multifunctional technical knowledge bases
[AD-A268375] p 1234 N94-17419

PROCEDURES
A TRALINET guide to the Internet
[AD-A266946] p 1229 N94-15178

PROCESS CONTROL (INDUSTRY)
Contribution to the elaboration of some adaptive control algorithms for fermentation processes monitoring
[LAAS-92513] p 1116 N94-15643
A software process framework for the SEI capability maturity model: Repeatable level
[AD-A268059] p 1157 N94-17588

PROCUREMENT
Software reliability management through metrics
[AD-A267129] p 1146 N94-15687
CALS test network handbook
[AD-A267587] p 1160 N94-17209

PROCUREMENT MANAGEMENT
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
Equipment Management Manual
[NHB-4200.1D] p 1225 N94-16799
Materials inventory management manual
[NHB-4100.1C] p 1225 N94-16830

PROCUREMENT POLICY
Equipment management user's handbook for property custodians
[NHB-4200.2A] p 1224 N94-15957

PRODUCT DEVELOPMENT
Production Technology for Components from Nonmetallic Fiber Reinforced Materials
[ETN-93-94607] p 931 N94-15254
Production process p 931 N94-15257
Prioritization methodology for chemical replacement
[NASA-TP-3421] p 976 N94-15723
Research and development: Engine of innovation at Krupp p 984 N94-16001
Government/contractor development teams
[TABES PAPER 93-460] p 1050 N94-16134
Status of molten carbonate fuel cell technology development
[DE93-015666] p 1092 N94-16715
Small satellite product assurance p 896 N94-17188
Key trends of the small satellite market p 897 N94-17191
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626

PRODUCTION COSTS
Production process p 931 N94-15257
Development of a computer supported instrumentation for economic planning and evaluation of production facilities for fiber reinforced composites elements p 932 N94-15260
Conflict Resolution (CORE) for software quality factors
[AD-A267248] p 1151 N94-16941

PRODUCTION ENGINEERING
Government/contractor development teams
[TABES PAPER 93-460] p 1050 N94-16134
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation
[DE93-016435] p 1039 N94-16450

PRODUCTION PLANNING
Production Technology for Components from Nonmetallic Fiber Reinforced Materials
[ETN-93-94607] p 931 N94-15254
Development of a computer supported instrumentation for economic planning and evaluation of production facilities for fiber reinforced composites elements p 932 N94-15260

PRODUCTIVITY
PET team
[NASA-TM-109599] p 1223 N94-15293
The Langley Fitness Center p 1126 N94-16635
Evaluation of spatial productivity patterns in an annual grassland during an AVIRIS overflight
[CIW-PUBL-1134] p 1067 N94-16672

PROGRAM VERIFICATION (COMPUTERS)
Army Software Test and Evaluation Panel (STEP) software metrics initiatives report
[AD-A266889] p 1142 N94-14924
Lecture notes on engineering measurement for software engineers
[AD-A266959] p 1142 N94-14967
Evaluation of ALSYS 037 Ada Compiler
[AD-A266972] p 1143 N94-15110
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
An expert system shell for inferring vegetation characteristics: Atmospheric techniques (Task G)
[NASA-CR-194570] p 1082 N94-15531
An elementary tutorial on formal specification and verification using PVS
[NASA-TM-108991] p 1158 N94-15536
Process-centered development environments: An exploration of issues
[AD-A266997] p 1145 N94-15630
Integrated trusted systems development environment
[AD-A267029] p 1146 N94-15674
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075
Progress in computational unsteady aerodynamics
[NASA-CR-177630] p 860 N94-17081
Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396
A protocol validator for the SCM and CFSM models
[AD-A268523] p 1156 N94-17541

PROGRAMMERS
Process-centered development environments: An exploration of issues
[AD-A266997] p 1145 N94-15630
ACE: Lessons learned, volume 1
[AD-A267979] p 1155 N94-17411

PROGRAMMING ENVIRONMENTS
Open environments to support systems engineering tool integration: A study using the Portable Common Tool Environment (PCTE)
[NASA-TM-4489] p 1144 N94-15486
Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool
[AD-A267560] p 1153 N94-17107
Process evolution for the MARVEL environment
[AD-A267813] p 1155 N94-17398
Concurrency control in rule-based software development environments
[AD-A267829] p 1155 N94-17404
Language-based document processing
[INRIA-RR-1731] p 1234 N94-17529

PROGRAMMING LANGUAGES
VDM specification of the MD4 message digest algorithm
[NPL-DITC-204/92] p 1142 N94-14944
A CENTAUR tutorial
[INRIA-RT-140] p 1142 N94-14978
The CAML numbers reference manual
[INRIA-RT-141] p 1142 N94-14979
Applicability of the session and the presentation layers for the support of high speed applications
[INRIA-RT-144] p 1158 N94-14980
The use of formal methods in data security standards
[NPL-DITC-205/92] p 1142 N94-15008
RAISE specification of the MD4 message digest algorithm
[NPL-DITC-206/92] p 1142 N94-15010
The application of programming languages to the production of reference implementations
[NPL-DITC-209/92] p 1143 N94-15012
Testability of data security standards
[NPL-DITC-217/93] p 1143 N94-15022
ACM SIGPLAN Workshop on ML and Its Applications
[AD-A266617] p 1147 N94-15725
Models for reactivity
[AD-A266419] p 1149 N94-16554
Monads and comonads in intensional semantics
[AD-A266522] p 1151 N94-16790
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
Sequential functions on indexed domains and full abstraction for a sub-language of PCF
[AD-A267838] p 1152 N94-17009
Networked workstations and parallel processing utilizing functional languages
[AD-A267464] p 1160 N94-17034

Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool
[AD-A267560] p 1153 N94-17107
Automatic translation of database integrity constraints into compensating production rules
[REPT-92-055] p 1234 N94-17502
Language-based document processing
[INRIA-RR-1731] p 1234 N94-17529

PROJECT MANAGEMENT
Cohen program management briefing
[NASA-TM-109536] p 1223 N94-15367
An analysis of SEI software process assessment results: 1987-1991
[AD-A266996] p 1145 N94-15629
Creating and maintaining a visionary quality program
[DE93-015122] p 1050 N94-16055
Scientific use of Space Station Freedom
p 977 N94-16072
Design Quality Task Force survey comments
[AD-A266283] p 1225 N94-16473
Physical fitness and health education program at NASA Headquarters p 1126 N94-16631
Chairmanship of the Neptune/Pluto outer planets science working group
[NASA-CR-194625] p 1297 N94-16832
Cost drivers: Why do conventional satellites cost so much? p 897 N94-17190
An object-oriented dynamic software process model
[AD-A267726] p 1154 N94-17371
Software Capability Evaluation (SCE) version 1.5 method description. Software capability evaluation project
[AD-A267895] p 1154 N94-17395
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396

PROJECT PLANNING
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
Creating and maintaining a visionary quality program
[DE93-015122] p 1050 N94-16055

PROJECT SETI
Search for Extraterrestrial Intelligence (SETI)
p 1125 N94-16620
Efficient computational methods to study new and innovative signal detection techniques in SETI
[NASA-CR-193602] p 998 N94-16649

PROJECTILES
An electronic imaging system for the Aeroballistic Research Facility
[AD-A267157] p 1033 N94-15826
The physical mechanism of comet outbursts: An experiment p 1242 N94-16221

PROJECTORS
Display of dynamic, volume graphic images by holographic voxel projection: Initial investigation
[AD-A267622] p 1035 N94-17197

PROLATENESS
Anisotropic phase separation in amorphous Fe-Ge alloys
[DE93-015255] p 961 N94-17251

PROP-FAN TECHNOLOGY
Back to propellers
[NASA-TM-109445] p 869 N94-15344
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508

PROPELLANT ADDITIVES
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507

PROPELLANT CHEMISTRY
Spectral studies of solid propellant combustion 4: Absorption and burn rate results for M43, XM39, and M10 propellants
[AD-A267119] p 946 N94-15685
Space Shuttle solid rocket motor exposure monitoring
p 976 N94-16624

PROPELLANT SENSITIVITY
Densifying and stabilizing ingredient
[AD-D015751] p 975 N94-16934

PROPELLANT SPRAYS
Computational analysis of Variable Thrust Engine (VTE) performance
[NASA-CR-193852] p 928 N94-17442

PROPELLANT TANKS
Power Reactant Storage Assembly (PRSA) (Space Shuttle). PRSA hydrogen and oxygen OVT tank refurbishment
[NASA-CR-188262] p 926 N94-16922

PROPELLANT TESTS
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962

PROPELLANTS
Densifying and stabilizing ingredient
[AD-D015751] p 975 N94-16934

PROPELLER BLADES
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115

PROPELLER FANS
Back to propellers
[NASA-TM-109445] p 869 N94-15344
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508

PROPELLER NOISE
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115

PROPELLERS
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115

PROPORTIONAL CONTROL
Real-time implementation of neural network learning control of a flexible space manipulator
[AD-A266962] p 1045 N94-14970
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392

PROPORTIONAL COUNTERS
The imaging microstrip proportional counter: Features of a practical design p 900 N94-15030
The high pressure gas scintillation proportional counter for SAX p 906 N94-15076
Performance of the position-sensitive proportional counters of the Yohkoh Bragg crystal spectrometer
p 909 N94-15094
The formation process of the He I lambda 10830 line in cool giant stars
[NASA-CR-194648] p 1240 N94-17094
Monte Carlo simulation of the microstrip gas counter
[NIKHEF-H/93-07] p 1035 N94-17619

PROPULSION
Propulsion p 924 N94-15219

PROPULSION SYSTEM CONFIGURATIONS
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
Space Propulsion Synergy Group ETO technology assessments
[TABES PAPER 93-641] p 929 N94-16149
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 2
[NASA-CR-193863] p 927 N94-17096
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 3
[NASA-CR-193864] p 927 N94-17097
Advanced transportation system studies technical area 3: Alternate propulsion system concepts. SSME upper stage use
[NASA-CR-193865] p 927 N94-17098

PROPULSION SYSTEM PERFORMANCE
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Research in robust control for hypersonic aircraft
[NASA-CR-194106] p 870 N94-15416
NASA Operational Environment Team (NOET): NASA's key to environmental technology
[TABES PAPER 93-611] p 1052 N94-16143
Emerging technologies for the changing global market
[TABES PAPER 93-612] p 930 N94-16144
Space Propulsion Synergy Group ETO technology assessments
[TABES PAPER 93-641] p 929 N94-16149
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834

PROPULSIVE EFFICIENCY
Plasma instabilities and transport in the MPD thruster
[AD-A268268] p 1204 N94-17575

PROPYLENE
Synthesis of potential high-energy fuels
[AD-A267508] p 975 N94-17073

PROSTATE GLAND
Screening for prostate cancer p 1126 N94-16630

PROTEASE
Regulation of attached bacterial growth by adsorbed proteins
[AD-A267756] p 1118 N94-17275

PROTECTION
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937

PROTECTIVE CLOTHING
Firefighters breathing system
[NASA-TM-109611] p 1135 N94-15362
STS-29 crew bailout in WETF
[NASA-TM-109548] p 1136 N94-15385
Investigation of the effects of extravehicular activity (EVA) gloves on performance
[NASA-TP-3401] p 1137 N94-15717
USAF physiological studies of personal microclimate cooling: A review
[AD-A267203] p 1022 N94-15858
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 378)
[NASA-SP-7011(378)] p 1122 N94-16478
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 380)
[NASA-SP-7011(380)] p 1122 N94-16479

PROTECTIVE COATINGS
Restoring Miss Liberty --- inorganic coatings
[NASA-TM-109605] p 963 N94-15313
Assessment of chromate and non-chromate conversion coatings for Al alloys using electrochemical impedance spectroscopy
[AD-A267205] p 965 N94-15859
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
Vacuum plasma spraying p 975 N94-16002
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
Robotic weld overlay coatings for erosion control
[DE93-016938] p 970 N94-16959
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473

PROTEIN CRYSTAL GROWTH
STS-26 protein growth (PCG) experiment
[NASA-TM-109533] p 976 N94-15395
Convective flow effects on protein crystal growth
[NASA-CR-194560] p 1206 N94-15476
Solution behaviour in microgravity: Considerations for protein crystal growth p 982 N94-16102
The roles of fluid motion and other transport phenomena in the morphology of materials
[NASA-CR-194665] p 1028 N94-17298

PROTEINS
Materials Research Society Symposium Proceedings, Volume 292: Biomolecular Materials
[AD-A265776] p 1116 N94-15138
The relationship of metallothionein induction to the heat shock response
[AD-A266634] p 1122 N94-15741
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
Bioorganic models for protein ion channels
[AD-A266365] p 1117 N94-16441
Heat shock protein induction in human cells by CO2 laser irradiation
[AD-A266430] p 1117 N94-16545
Hemoglobin
[AD-A266455] p 1123 N94-16566
Release of iron from hemoglobin
[AD-A266503] p 1128 N94-16784
Regulation of attached bacterial growth by adsorbed proteins
[AD-A267756] p 1118 N94-17275

PROTOCOL (COMPUTERS)
Applicability of the session and the presentation layers for the support of high speed applications
[INRIA-RT-144] p 1158 N94-14980
The Third Annual NASA Science Internet User Working Group Conference
[NASA-CP-3170] p 1228 N94-15116
A formal protocol test procedure for the Survivable Adaptable Fiber Optic Embedded Network (SAFENET)
[AD-A267410] p 1192 N94-16975
Isochronets: A high-speed network switching architecture
[AD-A267811] p 1161 N94-17409
NASA Lewis Meshed VSAT Workshop meeting summary
[NASA-TM-106332] p 883 N94-17487
A protocol validator for the SCM and CFSM models
[AD-A268523] p 1156 N94-17541

An internetwork authentication architecture
[AD-A268579] p 1162 N94-17622
PROTON BEAMS
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
PROTON FLUX DENSITY
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR
p 1248 N94-16177
PROTON SCATTERING
The pp elastic scattering experiment at RHIC and polarization studies in the Coulomb Nuclear Interference region
[DE93-015391] p 1187 N94-16829
PROTONS
Study of the rare decays K(sub L)(sup 0) yields (mu)e, K(sub L)(sup 0) yields ee, and K(sub L)(sup 0) yields (mu)(mu) at KEK
[DE93-753247] p 1180 N94-15135
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
Energy-loss cross sections for inclusive charge-exchange reactions at intermediate energies
[NASA-TM-4522] p 1188 N94-17018
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662
PROTOPLANETS
Petrologic constraints on the surface processes on asteroid 4 Vesta and on excavation depths of diogenite fragments p 1241 N94-16208
I-Xe structure of ILAFEGH 009 and shallowater: Evidence for early formation and rapid cooling of impact-derived enstatite meteorites
p 1243 N94-16305
An initial perspective of S-asteroid subtypes within asteroid families p 1243 N94-16310
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379
PROTOTYPES
Progress in the concentrator initiative program
[DE93-015006] p 1091 N94-15984
Center of Excellence in Laser Medicine
[DE93-016541] p 1122 N94-16113
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
ACE: Lessons learned, volume 1
[AD-A267979] p 1155 N94-17411
PROXIMITY
Steering capacifiector sensor
[NASA-CASE-GSC-13489-1] p 1164 N94-15704
PSYCHOLOGICAL EFFECTS
Scuba-diving, anxiety and task performance
p 1132 N94-15938
PSYCHOLOGY
Development of the OMPAT neuropsychological/psychomotor performance evaluation and OMPAT data and timing support programs
[AD-A266954] p 1122 N94-15759
PSYCHOMOTOR PERFORMANCE
Development of the OMPAT neuropsychological/psychomotor performance evaluation and OMPAT data and timing support programs
[AD-A266954] p 1122 N94-15759
PSYCHOPHYSICS
The 12th Annual Carmel Conference, distinctiveness and Memory: Cognitive Psychophysiological and Physiological Considerations
[AD-A267181] p 1131 N94-15148
PSYCHOPHYSIOLOGY
The 12th Annual Carmel Conference, distinctiveness and Memory: Cognitive Psychophysiological and Physiological Considerations
[AD-A267181] p 1131 N94-15148
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513
PUBLIC HEALTH
An assessment of acid fog
[DE93-009347] p 1095 N94-15940
Physical fitness and the Healthy People 2000 goals
p 1125 N94-16619
PUBLIC RELATIONS
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306
PULSARS
Fast pulsars, compact stars, and the strange matter hypothesis
[DE93-015039] p 1239 N94-16052
PULSE COMMUNICATION
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
A study on an experimental communication system using microsatellites p 892 N94-17160
PULSE COMPRESSION
Simultaneous compression of the passively mode-locked pulsewidth and pulse train
p 913 N94-15566
PULSE DOPPLER RADAR
Designing clutter rejection filters with complex coefficients for airborne pulsed Doppler weather radar
[NASA-CR-4550] p 862 N94-15444
PULSE DURATION
Dynamics of douple stimulated Brillouin scattering
p 1200 N94-15206
Simultaneous compression of the passively mode-locked pulsewidth and pulse train
p 913 N94-15566
Optimum wavelengths for two color ranging
p 915 N94-15580
Pulse response based control for minimum time maneuver of flexible spacecraft
[AD-A266186] p 886 N94-16455
PULSE GENERATORS
User manual and program description of the data acquisition system of PML-pulse physics
[AD-A266752] p 1147 N94-15776
A microsecond-pulsewidth, intense, light-ion beam accelerator
[DE93-016455] p 1202 N94-16451
Digital laser range finder emulator
[AD-D015811] p 1040 N94-16540
Multi-frame x ray imaging with a large area 40ps camera
[DE93-017179] p 1035 N94-16960
PULSE MODULATION
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307
PULSE RADAR
Target detection by way of Kalman filtering
[AD-A267314] p 1000 N94-16945
PULSED LASER DEPOSITION
Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
PULSED LASERS
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931
Prelaunch optical characterization of the Laser Geodynamic Satellite (LAGEOS 2)
[NASA-TP-3400] p 884 N94-15193
Nd:YLF laser for airborne/spaceborne laser ranging
p 913 N94-15563
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
An improved light source for laser ranging
p 913 N94-15567
The solid state detector technology for picosecond laser ranging p 914 N94-15572
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
Multi-beam laser altimeter p 921 N94-15620
X ray laser program
[AD-A267075] p 1038 N94-15628
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Observation of nonsequential ionization of helium and its impact on intensity monitoring
[DE93-017174] p 949 N94-16904
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
Pulsed hydrogen fluoride overtone chemical laser studies
[AD-A267597] p 1041 N94-17193
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 1004 N94-17322
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567
PULSED RADIATION
A review of some dynamics models in six-dimensional phase space and their suitable conditions of motion equation
[DE93-623741] p 1175 N94-17317
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
PUMPS
New insulin pump
[NASA-TM-109642] p 1120 N94-15253
Electro-rheological disk pump
[AD-D015783] p 1047 N94-16531
Hydraulic pump with integral electric motor
[AD-D015782] p 1011 N94-16549
High pressure pump for electro-rheological fluids
[AD-D015888] p 1048 N94-16915
Application of thermal spray and ceramic coatings and reinforced epoxy for cavitation damage repair of hydroelectric turbines and pumps
[AD-A267624] p 971 N94-17198
PUSHING
Particle Engulfment and Pushing by Solidifying Interfaces (PEPSI)
[NASA-CR-193856] p 960 N94-17079
PYRANOMETERS
Determination of sunshine duration from radiation intensity pyranometric measurements of global and sky radiation
[BER-181] p 1105 N94-15302
PYRIDINES
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
PYROLYSIS
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
A proposed mechanism for the pyrolysis of diborane
[DE93-014275] p 947 N94-15977
Nitrogen isotopic signatures in agglutinates from breccia 79035 p 954 N94-16314
Advanced thermally stable jet fuels
[DE93-017711] p 975 N94-16996
PYROLYTIC GRAPHITE
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006
PYROTECHNICS
Densifying and stabilizing ingredient
[AD-D015751] p 975 N94-16934
PYROXENES
The Fe2(+)-Mg interdiffusion in orthopyroxene: Constraints from cation ordering and structural data and implications for cooling rates of meteorites
p 1241 N94-16175
Stalking the LREE-enriched component in ureilites
p 1241 N94-16190
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224
Complex zoning behavior in pyroxene in FeO-rich chondrules in the Semarkona ordinary chondrite
p 1243 N94-16284
Water in Earth's mantle: Hydrogen analysis of mantle olivine, pyroxenes and garnet using the SIMS
p 1104 N94-16336
Mixing model analysis of telescopic lunar spectra
p 1284 N94-16371
Analysis of pyroxene absorptions observed in Martian dark regions p 1292 N94-16411
Zaoyang chondrite cooling history from pyroxene Fe(2+)-Mg intracrystalline ordering and exolutions
p 1246 N94-16417
Composition of weakly altered Martian crust
p 1296 N94-16436

PYRROLES
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928

Q

Q FACTORS
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Q SWITCHED LASERS
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
QUADRATIC PROGRAMMING
Impending motion direction of contacting rigid bodies
[AD-A266814] p 1164 N94-15756
A sequential quadratic programming algorithm using an incomplete solution of the subproblem
[DE93-017439] p 1149 N94-16120
QUADRATURE AMPLITUDE MODULATION
Exploitation of cyclostationarity for signal-parameter estimation and system identification
[AD-A267137] p 988 N94-15690
QUADRATURES
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Linear characteristic spatial quadrature for discrete ordinates neutral particle transport on arbitrary triangles
[AD-A267485] p 1185 N94-17365
QUADRUPOLES
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978
Emittance and beam size distortion due to linear coupling
[DE93-015402] p 1184 N94-16886
Statistics of the half-integer stopband
[DE93-016101] p 1173 N94-17236
QUALIFICATIONS
The Senior Executive Service
[NHB-3100.6] p 1224 N94-15945
QUALITY
The airline quality report 1993
[NIAR-93-11] p 863 N94-17262
QUALITY CONTROL
Geometric tolerance assessment
[NPL-DITC-210/92] p 1049 N94-15013
Component testing and quality assurance p 932 N94-15259
IG nuts and bolts
[NASA-TM-109652] p 1049 N94-15320
Statistical computation of tolerance limits
[NASA-TM-108424] p 1172 N94-15535
An analysis of SEI software process assessment results: 1987-1991
[AD-A266996] p 1145 N94-15629
Prioritization methodology for chemical replacement
[NASA-TP-3421] p 976 N94-15723
TAFVER 2 users manual
[AD-A266850] p 1106 N94-15757
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
RELMA: On-line quality control in the rubber mixing room using laser analysis p 984 N94-16005
Design Quality Task Force survey comments
[AD-A266283] p 1225 N94-16473
Mission management aircraft operations manual
[NHB-7900.3] p 1225 N94-16729
Conflict Resolution (CORE) for software quality factors
[AD-A267248] p 1151 N94-16941
Simulation reduction using the Taguchi method
[NASA-CR-4542] p 1055 N94-17082
Small satellite product assurance p 896 N94-17188
Software Capability Evaluation (SCE) version 1.5 method description. Software capability evaluation project
[AD-A267895] p 1154 N94-17395
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396
QUANTITATIVE ANALYSIS
A quantitative analysis of TIMS data obtained on the Learjet 23 at various altitudes p 1063 N94-16597
Elemental impurity analysis of mercuric iodide by ICP/MS
[DE93-015531] p 949 N94-16876
QUANTUM CHROMODYNAMICS
Iteration scheme for the multiparameter nonlinear boundary value problem with the additional conditions and its application to some field models
[DE93-626638] p 1168 N94-14933
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Quark-loop effects in high energy spin-flip processes
[DE93-626692] p 1188 N94-17313
The three-loop QCD beta-function and anomalous dimensions
[NIKHEF-H/92-17] p 1186 N94-17617
The renormalization of the axial anomaly in dimensional regularization
[NIKHEF-H/92-18] p 1220 N94-17618
QUANTUM EFFICIENCY
CCDs and photon counting devices: Applications in space and from the ground p 901 N94-15041
Visible light photon counters for astronomy p 902 N94-15043
How to squeeze high quantum efficiency and high time resolution out of a SPAD p 914 N94-15571
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272
QUANTUM ELECTRODYNAMICS
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953
Multipolar-like form of nonabelian gauge theories
[DE93-626690] p 1171 N94-17314
QUANTUM ELECTRONICS
Electronic and atomic structure of semiconductors and of high-temperature superconductors
[AD-A266805] p 1205 N94-14913
Spectroscopic investigations of nonambient systems with millimeter and submillimeter probes
[AD-A266537] p 968 N94-16796
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651
QUANTUM MECHANICS
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
Electronic structure and enthalpy of hydrogen and helium mixtures
[DE93-014128] p 1208 N94-15976
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
Stochastic chaos: An analog of quantum chaos
[DE93-016619] p 1220 N94-16956
SUSY in the sky
[NIKHEF-H/93-04] p 1240 N94-17603
Quantum phase fluctuations in the Jaynes-Cummings model: Effects of cavity damping
[DE93-627984] p 1186 N94-17612
The renormalization of the axial anomaly in dimensional regularization
[NIKHEF-H/92-18] p 1220 N94-17618
QUANTUM NUMBERS
Clusterization of quantum states in the Hartmann model
[DE93-626624] p 1220 N94-17315
QUANTUM OPTICS
Quantum phase fluctuations in the Jaynes-Cummings model: Effects of cavity damping
[DE93-627984] p 1186 N94-17612
QUANTUM THEORY
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953
The universality of the shift of the Chern-Simons parameter for a general class of BRS invariant regularizations
[NIKHEF-H/93-03] p 1220 N94-17602
Quantum Heisenberg groups and Sklyanin algebras
[DE93-628590] p 1175 N94-17643
QUANTUM WELL LASERS
Ion doped quantum well lasers
[AD-A267198] p 1038 N94-15853
QUANTUM WELLS
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848
JSEP fellowship
[AD-A266568] p 1211 N94-16800
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
Development of ultra-low noise, high performance 3-V Quantum Well Infrared Photodectors (QWIP's) for focal plane array staring image sensor systems
[AD-A267715] p 1214 N94-17272
High-speed nonlinear switching mechanisms and devices for multi-gigabit data processing
[AD-A267753] p 1014 N94-17375
QUARK MODELS
Production of D-mesons in pp-collisions and quark-gluon string model
[DE93-626721] p 1185 N94-17312
The three-loop QCD beta-function and anomalous dimensions
[NIKHEF-H/92-17] p 1186 N94-17617
The renormalization of the axial anomaly in dimensional regularization
[NIKHEF-H/92-18] p 1220 N94-17618
QUARKS
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
Astronomy and astrophysics p 1239 N94-15970
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
Calorimeter based detectors for high energy hadron colliders
[DE93-017055] p 1188 N94-16900
Heavy ion physics research at Creighton University
[DE93-016809] p 1185 N94-16957
Mesons at finite temperature in the NJL model with gluon condensate
[DE93-626697] p 1185 N94-17310
Quark-loop effects in high energy spin-flip processes
[DE93-626692] p 1188 N94-17313
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662
QUARTZ
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194
Orientation of Planar Deformation Features (PDFs) in quartz p 1219 N94-16341
Investigation of the effects of polyelectrolyte coatings on colloid transport in porous media
[DE93-018300] p 970 N94-16973
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659
QUARTZ CRYSTALS
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480
QUARTZ LAMPS
An analysis of the radiation field beneath a bank of tubular quartz lamps
[NASA-CR-191551] p 1024 N94-16542
QUASARS
The theory of QSO absorption line systems and their relationship to the galaxies
[NASA-CR-194596] p 1236 N94-15679
Complex QSO absorbers: High-redshift clusters of galaxies?
[NASA-CR-194617] p 1237 N94-16833
QUENCHING (COOLING)
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060
Investigation of two-phase flow and boiling heat transfer during quenching of a tube under microgravity p 979 N94-16087
QUEUEING THEORY
Stochastic scheduling in in-forest networks
[INRIA-RR-1719] p 1164 N94-15695
Logarithmic asymptotics for steady-state tail probabilities in a single-server queue
[AD-A266746] p 1165 N94-15775
A comparison of queueing, cluster and distributed computing systems
[NASA-TM-109025] p 1160 N94-16878
Stochastic scheduling in a multiclass G/G/1 queue
[INRIA-RR-1746] p 1162 N94-17537

R

RADAR
Notes on the use of Dempster-Shafer and fuzzy reasoning to fuse identity attribute data
[AD-A267426] p 1004 N94-17309
RADAR ANTENNAS
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Advanced antennas for SAR spacecraft
p 993 N94-15912
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797
RADAR BEACONS
ATCRBS reply environment at Memphis International Airport
[AD-A266322] p 864 N94-16439
RADAR BEAMS
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
RADAR CORNER REFLECTORS
Prelaunch optical characterization of the Laser Geodynamic Satellite (LAGEOS 2)
[NASA-TP-3400] p 884 N94-15193
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs
p 911 N94-15555
Evaluation of the TOPSAR performance by using passive and active calibrators p 1078 N94-16750
External calibration of polarimetric radar images using distributed targets p 1079 N94-16753
RADAR CROSS SECTIONS
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
Measurements of the radar cross section and Inverse Synthetic Aperture Radar (ISAR) images of a Piper Navajo at 9.5 GHz and 49 GHz
[AD-A267570] p 1002 N94-17110
RADAR DATA
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
Recent advances in radar remote sensing of forest
p 991 N94-15897
Imaging radar studies of polar ice p 991 N94-15899
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
Recent advances and plans in processing and geocoding of SAR data at the DFD p 992 N94-15909
Data distribution p 993 N94-15910
International collaboration in SAR ground data systems p 993 N94-15917
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush
p 1086 N94-16318
SAR backscatter from coniferous forest gaps
p 1076 N94-16736
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR)
p 1076 N94-16738
Supervised fully polarimetric classification of the Black Forest test site: From MAESTROI to MAC Europe
p 1076 N94-16740
Extraction of quantitative surface characteristics from AIRSAR data for Death Valley, California
p 1078 N94-16748
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
RADAR DETECTION
Adaptive interference canceller
[CA-PATENT-1-310-709] p 988 N94-15698
Windshear detection radar signal processing studies
[NASA-CR-194615] p 994 N94-16022
Enhanced down-range profiles of complex targets using wideband radar echo returns
[AD-A266508] p 999 N94-16788
Target detection by way of Kalman filtering
[AD-A267314] p 1000 N94-16945
Signal detection in correlated Gaussian and non-Gaussian radar clutter
[AD-A267453] p 1001 N94-17033
Intelligent use of CFAR algorithms
[AD-A267755] p 1003 N94-17206
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
[AD-A267479] p 1004 N94-17364
RADAR ECHOES
Enhanced down-range profiles of complex targets using wideband radar echo returns
[AD-A266508] p 999 N94-16788
RADAR EQUIPMENT
High resolution SAR applications and instrument design p 993 N94-15913
RADAR FILTERS
Adaptive interference canceller
[CA-PATENT-1-310-709] p 988 N94-15698
RADAR GEOLOGY
Geologic remote sensing with radar
p 991 N94-15900
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 3: AIRSAR Workshop
[NASA-CR-194542] p 1075 N94-16731
A snow wetness retrieval algorithm for SAR
p 1075 N94-16732
RADAR HOMING MISSILES
Enhanced down-range profiles of complex targets using wideband radar echo returns
[AD-A266508] p 999 N94-16788
RADAR IMAGERY
Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
Almaz p 898 N94-15889
Recent advances in radar remote sensing of forest
p 991 N94-15897
Imaging radar studies of polar ice p 991 N94-15899
Geologic remote sensing with radar
p 991 N94-15900
Multifrequency observations p 992 N94-15902
Spaceborne radar for geoscientific applications in North China p 993 N94-15915
Primary studies of Chinese spaceborne SAR
p 993 N94-15916
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong
p 1007 N94-16197
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush
p 1086 N94-16318
The cartography of Venus with Magellan data
p 1274 N94-16320
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368
Relief of some small landforms on Venus
p 1293 N94-16418
Comparison of JPL-AIRSAR and DLR E-SAR images from the MAC Europe 1991 campaign over testsite Oberpfaffenhofen: Frequency and polarization dependent backscatter variations from agricultural fields
p 1075 N94-16733
Monitoring environmental state of Alaskan forests with AIRSAR p 1075 N94-16734
Comparison of modeled backscatter with SAR data at P-band p 1076 N94-16735
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR)
p 1076 N94-16738
SAR observations in the Gulf of Mexico
p 1077 N94-16742
Investigation of AIRSAR signatures of the Gulf Stream
p 1077 N94-16743
Mapping of sea bottom topography
p 1077 N94-16744
Sea bottom topography imaging with SAR
p 1077 N94-16745
Preliminary results of polarization signatures for glacial moraines in the Mono Basin, Eastern Sierra Nevada
p 1078 N94-16746
Fitting a three-component scattering model to polarimetric SAR data p 1079 N94-16751
External calibration of polarimetric radar images using distributed targets p 1079 N94-16753
Processing of polarimetric SAR data for soil moisture estimation over Mahantango watershed area
p 1079 N94-16754
Evaluation of polarimetric SAR parameters for soil moisture retrieval p 1079 N94-16755
Interaction types and their like-polarization phase-angle difference signatures p 1079 N94-16756
Radar Analysis and Visualization Environment (RAVEN): Software for polarimetric radar analysis
p 1080 N94-16758
Measuring ocean coherence time with dual-baseline interferometry p 1080 N94-16759
Comparison of edges detected at different polarisations in MAESTRO data p 1080 N94-16761
Moving target indicator using higher order statistics
[AD-D015890] p 1000 N94-16917
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Measurements of the radar cross section and Inverse Synthetic Aperture Radar (ISAR) images of a Piper Navajo at 9.5 GHz and 49 GHz
[AD-A267570] p 1002 N94-17110
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
Arctic cyclones and Marginal Ice Zone (MIZ) variability
[AD-A268610] p 1108 N94-17465
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654
RADAR MAPS
The TOPSAR interferometric radar topographic mapping instrument p 1078 N94-16749
RADAR MEASUREMENT
TRMM radar p 990 N94-15894
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
Calibration: Practical experience with ERS-1
p 992 N94-15907
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124
A snow wetness retrieval algorithm for SAR
p 1075 N94-16732
Fitting a three-component scattering model to polarimetric SAR data p 1079 N94-16751
RADAR RECEIVERS
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031
Signal detection in correlated Gaussian and non-Gaussian radar clutter
[AD-A267453] p 1001 N94-17033
RADAR REFLECTORS
Method and apparatus for forming an agile plasma mirror effective as a microwave reflector
[AD-D015788] p 998 N94-16535
RADAR SCATTERING
Radar response of vegetation: An overview
p 991 N94-15898
Relating multifrequency radar backscattering to forest biomass: Modeling and AIRSAR measurement
p 1077 N94-16741
Evaluation of polarimetric SAR parameters for soil moisture retrieval p 1079 N94-16755
What is the radar tracking Glint problem and can it be solved?
[AD-A266509] p 999 N94-16789
RADAR SIGNATURES
Investigation of AIRSAR signatures of the Gulf Stream
p 1077 N94-16743
Lithological and textural controls on radar and diurnal thermal signatures of weathered volcanic deposits, Lunar Crater region, Nevada p 1080 N94-16762
RADAR TARGETS
Enhanced down-range profiles of complex targets using wideband radar echo returns
[AD-A266508] p 999 N94-16788
Moving target indicator using higher order statistics
[AD-D015890] p 1000 N94-16917
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Target detection by way of Kalman filtering
[AD-A267314] p 1000 N94-16945
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031
Measurements of the radar cross section and Inverse Synthetic Aperture Radar (ISAR) images of a Piper Navajo at 9.5 GHz and 49 GHz
[AD-A267570] p 1002 N94-17110
RADAR TRACKING
Sea ice motions in the central arctic ice central arctic pack ice as inferred from AVHRR imagery
[NASA-CR-194572] p 1112 N94-15701
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465
What is the radar tracking Glint problem and can it be solved?
[AD-A266509] p 999 N94-16789
RADAR TRANSMISSION
Comparison of RADARC high-frequency radar performance prediction model and ROTHR Amchitka data
[AD-A267077] p 987 N94-15540
Forecasting the ducting of electromagnetic waves on the mesoscale
[AD-A268101] p 1109 N94-17571

RADAR TRANSMITTERS
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523
RADARSAT
RADARSAT program p 898 N94-15893
RADIAL DISTRIBUTION
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433
RADIANCE
Unmixing AVIRIS data to provide a method for vegetation fraction subtraction p 1066 N94-16669
Hyperspectral modeling for extracting aerosols from aircraft/satellite data p 1067 N94-16673
A field measure of the shade fraction p 1068 N94-16677
Seasonal and spatial variations in phytoplanktonic chlorophyll in eutrophic Mono Lake, California, measured with the Airborne Visible and Infrared Imaging Spectrometer (AVIRIS) p 1069 N94-16684
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687
Atmospheric correction of AVIRIS data in ocean waters p 1070 N94-16690
Simulation of AVHRR-K band ratios with AVIRIS p 1075 N94-16714
RADIANT COOLING
Investigate wave-mean flow interaction and transport in the extratropical winter stratosphere
[NASA-CR-194555] p 1098 N94-15639
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1046 N94-15873
RADIANT FLUX DENSITY
Observation of nonsequential ionization of helium and its impact on intensity monitoring
[DE93-017174] p 949 N94-16904
Spectroscopic and computer modeling investigations of a laser-sustained plasma
[IFTR-30/1991] p 1204 N94-17066
RADIANT HEATING
Investigation of radiative interaction in laminar flows using Monte Carlo simulation
[NASA-CR-194604] p 1021 N94-15795
An analysis of the radiation field beneath a bank of tubular quartz lamps
[NASA-CR-191551] p 1024 N94-16542
RADIATION
Global climate study
[NASA-TM-109612] p 1098 N94-15363
RADIATION ABSORPTION
Spectroscopic and computer modeling investigations of a laser-sustained plasma
[IFTR-30/1991] p 1204 N94-17066
RADIATION COUNTERS
The MIC photon counting detector p 901 N94-15039
CCDs and photon counting devices: Applications in space and from the ground p 901 N94-15041
Visible light photon counters for astronomy p 902 N94-15043
The TAUVEX experiment p 905 N94-15064
The Rutherford Appleton Laboratory photon counting detector p 910 N94-15096
The 3D-Flow processor for a programmable level-1 trigger (feasibility study)
[DE93-016045] p 1159 N94-16172
Calorimeter based detectors for high energy hadron colliders
[DE93-017055] p 1188 N94-16900
Electroweak results from D0
[DE93-014926] p 1185 N94-16968
Astrophysics with MILAGRO
[DE93-012722] p 1240 N94-17657
Detecting small debris using a ground-based photon counting detector
[DE93-012623] p 898 N94-17669
RADIATION DAMAGE
Radiation hardening of a CCD technology through process and design modifications p 906 N94-15071
RADIATION DETECTORS
Metastable superconductors as photon detectors p 900 N94-15032
Thinned, backside illuminated, area CCD imager for electron detection p 901 N94-15036
Outlook for hard x ray and gamma ray astronomy p 904 N94-15057
Work at Graz on satellite signatures p 898 N94-15558
The solid state detector technology for picosecond laser ranging p 914 N94-15572
Electroweak physics from D0
[DE93-015041] p 1181 N94-16053
ALEXIS and HETE: Two small, low cost, scientific satellite systems p 896 N94-17185
Contained (nu) events observed in Soudan 2
[DE93-015548] p 1300 N94-17233
Detecting small debris using a ground-based photon counting detector
[DE93-012623] p 898 N94-17669
RADIATION DISTRIBUTION
An analysis of the radiation field beneath a bank of tubular quartz lamps
[NASA-CR-191551] p 1024 N94-16542
RADIATION DOSAGE
Exposure fluctuations of astronauts due to orientation
[NASA-TP-3364] p 1300 N94-15816
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Quantifying lifetime exposure to ultraviolet radiation in the epidemiology of cutaneous malignant melanoma: A pilot study
[DE93-015274] p 1128 N94-16812
The determination of the Young moduli of a material after exposure to laser light and delineation of the zone of laser alterations
[IFTR-37/1991] p 1061 N94-17058
Bioeffects of radiofrequency radiation on cell growth and differentation. Volume 1: Engineering considerations
[AD-A267754] p 1118 N94-17232
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 1: Predicted veersus actual performance of AH-1 crews induced with symptoms simulating radiation sickness
[AD-A268376] p 1138 N94-17460
Energy deposition fluctuations induced by ions in microvolumes and nanovolumes: An analytic approach. 1: Theory
[AD-A267959] p 1173 N94-17495
RADIATION EFFECTS
Theoretical studies relating to the interaction of radiation with matter
[AD-A266894] p 1179 N94-14949
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145
Plume radiation p 924 N94-15223
Fault handling schemes in electronic systems with specific application to radiation tolerance and VLSI design
[NASA-CR-194559] p 1008 N94-15640
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
Investigation of radiative interaction in laminar flows using Monte Carlo simulation
[NASA-CR-194604] p 1021 N94-15795
Exposure fluctuations of astronauts due to orientation
[NASA-TP-3364] p 1300 N94-15816
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
AFRRI reports, first quarter 1993
[AD-A266380] p 1123 N94-16515
Ergonomics in the office environment p 1124 N94-16612
Evolution of microstructure in face centered cubic metals during irradiation: A review
[DE93-015682] p 958 N94-16662
The role of constitutive and inducible processes in the response of human squamous cell carcinoma cell lines to ionizing radiation
[DE93-015150] p 1129 N94-16970
L-shell binning and display of sensor data from the CRRES spacecraft
[AD-A267256] p 888 N94-16990
The determination of the Young moduli of a material after exposure to laser light and delineation of the zone of laser alterations
[IFTR-37/1991] p 1061 N94-17058
Studies of premixed laminar and turbulent flames at microgravity
[NASA-CR-194656] p 951 N94-17125
Bioeffects of radiofrequency radiation on cell growth and differentation. Volume 1: Engineering considerations
[AD-A267754] p 1118 N94-17232
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 1: Predicted veersus actual performance of AH-1 crews induced with symptoms simulating radiation sickness
[AD-A268376] p 1138 N94-17460
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480
Energy deposition fluctuations induced by ions in microvolumes and nanovolumes: An analytic approach. 1: Theory
[AD-A267959] p 1173 N94-17495
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
Basic studies of the liquid state of matter: Electrical properties and laser interactions
[AD-A268311] p 1042 N94-17567
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676
RADIATION HARDENING
Impurity conduction photoconductor detectors p 902 N94-15046
Radiation hardening of a CCD technology through process and design modifications p 906 N94-15071
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
RADIATION HAZARDS
Hazard calculations of diffuse reflected laser radiation for the SELENE program
[NASA-TM-4520] p 1042 N94-17285
RADIATION INJURIES
Wound healing after laser injury to skin: The effect of occlusion and vitamin E
[AD-A266473] p 1128 N94-16779
RADIATION MEASUREMENT
Real time radiation measurements in space p 980 N94-16092
RADIATION MEASURING INSTRUMENTS
Proceedings of an ESA Symposium on Photon Detectors for Space Instrumentation
[ESA-SP-356] p 899 N94-15025
Outlook for hard x ray and gamma ray astronomy p 904 N94-15057
Nb-based SJTJ for nuclear detection: Preliminary results with alpha radiation p 905 N94-15068
Improved optical radiation detectors and their calibration: 200 nm - 30 microns p 906 N94-15075
In orbit adiabatic demagnetization refrigeration for bolometric and microcalorimetric detectors p 907 N94-15079
Silicon radiation sensor systems for gamma and x ray detection at SI p 909 N94-15095
The space technology research vehicle: Development status p 896 N94-17183
RADIATION PROTECTION
Exposure fluctuations of astronauts due to orientation
[NASA-TP-3364] p 1300 N94-15816
RADIATION SHIELDING
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Shielding from space radiations
[NASA-CR-194578] p 1180 N94-15715
Exposure fluctuations of astronauts due to orientation
[NASA-TP-3364] p 1300 N94-15816
Approximate Green's function methods for HZE transport in multilayered materials
[NASA-TM-4519] p 1300 N94-17084
Shielding from space radiations
[NASA-CR-194664] p 1301 N94-17255
Calculations of cosmic-ray helium transport in shielding materials
[NASA-TP-3354] p 1301 N94-17666
RADIATION SICKNESS
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 1: Predicted veersus actual performance of AH-1 crews induced with symptoms simulating radiation sickness
[AD-A268376] p 1138 N94-17460
RADIATION SOURCES
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
RADIATION SPECTRA
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
RADIATION THERAPY
The role of constitutive and inducible processes in the response of human squamous cell carcinoma cell lines to ionizing radiation
[DE93-015150] p 1129 N94-16970
RADIATION TOLERANCE
Fault handling schemes in electronic systems with specific application to radiation tolerance and VLSI design
[NASA-CR-194559] p 1008 N94-15640
The role of constitutive and inducible processes in the response of human squamous cell carcinoma cell lines to ionizing radiation
[DE93-015150] p 1129 N94-16970
RADIATION TRANSPORT
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663

RADIATIVE HEAT TRANSFER
Study of multi-dimensional radiative energy transfer in molecular gases
[NASA-CR-194613] p 1181 N94-15752
The cooling rates of pahoehoe flows: The importance of lava porosity p 1103 N94-16282
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215

RADIATIVE LIFETIME
Scintillation mechanism in stoichiometric cerium compounds
[DE93-015499] p 948 N94-16771

RADIATIVE RECOMBINATION
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145

RADIATIVE TRANSFER
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
Study of multi-dimensional radiative energy transfer in molecular gases
[NASA-CR-194613] p 1181 N94-15752

RADIATORS
Optically-switched submillimeter-wave oscillator and radiator
[NASA-CASE-NPO-18547-1-CU] p 1014 N94-17324

RADICALS
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273

RADIO ALTIMETERS
The cartography of Venus with Magellan data
p 1274 N94-16320
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368

RADIO ANTENNAS
A review of OPEX activities and measurement results
p 994 N94-16036
The analysis of low-profile, broadband, monopole, vehicle antennas and matching network synthesis
[AD-A268340] p 1006 N94-17582

RADIO ASTRONOMY
Preparation and properties of Nb/Al SIS and SIN junctions for millimeter and submillimeter radioastronomical receivers p 907 N94-15078
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651

RADIO BEACONS
Olympus propagation measurement results at Virginia Tech p 995 N94-16037
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment
p 995 N94-16038
Propagation measurements in Alaska using ACTS beacons p 995 N94-16040
Comparison of OLYMPUS beacon and radiometric attenuation measurements at Blacksburg, Virginia
p 996 N94-16046

RADIO COMMUNICATION
The ACTS propagation program p 995 N94-16039
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
Ground wave emergency network final operational capability: Environmental assessment for central Wyoming relay node, site number RN 8C928WY
[AD-A267842] p 1001 N94-17011
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
Radiocommunication problems of a position reporting and bidirectional messagery system using VHF/UHF with low-Earth orbit satellites p 889 N94-17136
Ground wave emergency network final operational capability: Environmental assessment for central Nevada relay node, site number RN 8W917NV
[AD-A267630] p 1002 N94-17200
Ground wave emergency network environmental assessment for northwestern Colorado relay node site number RN 8C924CO
[AD-A267654] p 1003 N94-17249
Ground wave emergency network final operational capability. Environmental assessment for southern Arkansas relay node site no. RN 8C912AR
[AD-A268001] p 1004 N94-17376

RADIO ELECTRONICS
Spaceborne Imaging Radar-C instrument
p 990 N94-15890

RADIO EQUIPMENT
Ground wave emergency network final operational capability: Environmental assessment for central Nevada relay node, site number RN 8W917NV
[AD-A267630] p 1002 N94-17200
Ground wave emergency network final operational capability: Environmental assessment for southern Nevada relay node site number RN 8W918NV
[AD-A267647] p 1002 N94-17205
Ground wave emergency network final operational capability: Environmental assessment for central Utah relay node, site number RN 8C920UT
[AD-A267628] p 1003 N94-17211
Ground wave emergency network final operational capability: Environmental assessment for northwestern Nebraska relay node, site number RN 8C930NE
[AD-A267629] p 1003 N94-17212
Environmental assessment for northwestern Indiana relay node site no. RN 8C902IN
[AD-A267849] p 1004 N94-17406

RADIO FREQUENCIES
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933
Satellite sound broadcast propagation measurements
p 996 N94-16047
Measurements of the operation of the SINUS-6/BWO system
[AD-A266423] p 1011 N94-16556
Fundamental-mode RF design in e(+)e(-) storage ring factories
[DE93-015249] p 1183 N94-16809
Cortical adaptive filtering in bioacoustic signal classification
[AD-A266229] p 1177 N94-16939
Radiocommunication problems of a position reporting and bidirectional messagery system using VHF/UHF with low-Earth orbit satellites p 889 N94-17136
RF vacuum microelectronics
[AD-A268399] p 1014 N94-17423
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526
Field emitter arrays for RF vacuum microelectronics
[AD-A268595] p 1015 N94-17608

RADIO FREQUENCY INTERFERENCE
A simulation study of the performance of the NASA (2,1,6) convolutional code on RFI/burst channels
p 997 N94-16508

RADIO HORIZONS
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 2: Appendices
[AD-A267021] p 987 N94-15527

RADIO RECEIVERS
On-board spatial scientific experiment project on small satellites p 896 N94-17184

RADIO RELAY SYSTEMS
Ground wave emergency network final operational capability: Environmental assessment for central Wyoming relay node, site number RN 8C928WY
[AD-A267842] p 1001 N94-17011
Ground wave emergency network final operational capability: Environmental assessment for central Nevada relay node, site number RN 8W917NV
[AD-A267630] p 1002 N94-17200
Ground wave emergency network final operational capability: Environmental assessment for southern Nevada relay node site number RN 8W918NV
[AD-A267647] p 1002 N94-17205
Ground wave emergency network final operational capability: Environmental assessment for central Utah relay node, site number RN 8C920UT
[AD-A267628] p 1003 N94-17211
Ground wave emergency network final operational capability: Environmental assessment for northwestern Nebraska relay node, site number RN 8C930NE
[AD-A267629] p 1003 N94-17212
Ground wave emergency network. Final operational capability. Environmental assessment for southeastern Idaho relay node, site no. RN8W927ID
[AD-A267796] p 1003 N94-17304
Ground wave emergency network final operational capability. Environmental assessment for southern Arkansas relay node site no. RN 8C912AR
[AD-A268001] p 1004 N94-17376
Environmental assessment for northwestern Indiana relay node site no. RN 8C902IN
[AD-A267849] p 1004 N94-17406

RADIO TELESCOPES
Search for Extraterrestrial Intelligence (SETI)
p 1125 N94-16620
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225

RADIO TRANSMISSION
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 2: Appendices
[AD-A267021] p 987 N94-15527
Proceedings of the Fifteenth NASA Propagation Experimenters Meeting (NAPEX 15) and the Advanced Communications Technology Satellite (ACTS) Propagation Studies Miniworkshop
[NASA-CR-194539] p 994 N94-16035
A review of OPEX activities and measurement results
p 994 N94-16036
An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048
Database for propagation models p 996 N94-16049
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050

RADIO TRANSMITTERS
Ground wave emergency network environmental assessment for northwestern Colorado relay node site number RN 8C924CO
[AD-A267654] p 1003 N94-17249
An electromagnetic interference study of potential transmitter sites for the HF Active Auroral Research Program (HAARP)
[AD-A267743] p 1004 N94-17373

RADIO WAVES
Proceedings of the Fifteenth NASA Propagation Experimenters Meeting (NAPEX 15) and the Advanced Communications Technology Satellite (ACTS) Propagation Studies Miniworkshop
[NASA-CR-194539] p 994 N94-16035
A review of OPEX activities and measurement results
p 994 N94-16036
Propagation measurements in Alaska using ACTS beacons p 995 N94-16040
Planned LMSS propagation experiment using ACTS: Preliminary antenna pointing results during mobile operations p 995 N94-16041
A comparison of cloud attenuation models using measured cloud data p 996 N94-16044
Comparison of OLYMPUS beacon and radiometric attenuation measurements at Blacksburg, Virginia
p 996 N94-16046
Satellite sound broadcast propagation measurements
p 996 N94-16047
An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048
Database for propagation models p 996 N94-16049
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050
A study of land mobile satellite service multipath effects using SATLAB software p 997 N94-16051
Ground wave emergency network final operational capability: Environmental assessment for central Utah relay node, site number RN 8C920UT
[AD-A267628] p 1003 N94-17211
Effect of powerful oblique HF waves on ionospheric D-layer absorption
[AD-A268443] p 1102 N94-17499

RADIOACTIVE DECAY
On the 17-keV neutrino
[DE93-012638] p 1181 N94-15974
Electroweak physics from D0
[DE93-015041] p 1181 N94-16053
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117
Neutrino mass and mixing: Summary of the neutrino sessions
[DE93-014342] p 1183 N94-16801
A high sensitivity search for CP violating rare K(sub L) decays and precision measurement of the direct CP violation parameter (epsilon)(prime)/(epsilon) via the four K (yields) 2(pi) decay modes
[DE93-016866] p 1184 N94-16899
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951
Search for the top quark from (e(mu)) and (e,e) events in the D0 detector in p(bar-p) collisions at the square root of s = 1.8 TeV
[DE93-016350] p 1186 N94-17662

RADIOACTIVE MATERIALS
Nuclear rocket plume studies
[AD-A267154] p 925 N94-15837

RADIOACTIVITY
Al-26-Mg-26 ages of iron meteorites
p 1242 N94-16240

Operator overloading as an enabling technology for automatic differentiation
[DE93-012699] p 1170 N94-16778

RADIOBIOLOGY
AFRRI reports, first quarter 1993
[AD-A266380] p 1123 N94-16515

RADIOGENIC MATERIALS
Isotopic signatures and distribution of nitrogen and trapped and radiogenic xenon in the Acapulco and FRO90011 meteorites p 1243 N94-16317

RADIOGRAPHY
Laser weld repair of tantalum sheet
[DE93-016417] p 1041 N94-16871

RADIOMETERS
Absolute Radiometric Measurements in Space: ARMS p 908 N94-15085
The laboratory performance of the short wavelength instrument for the Along Track Scanning Radiometer ATSR-2 (initial results) p 908 N94-15088
Absolute, Extreme-Ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A267045] p 1299 N94-15836
ERS-1: 18 months in orbit p 990 N94-15888
Olympus propagation measurement results at Virginia Tech p 995 N94-16037
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment p 995 N94-16038
Brightness temperature and attenuation statistics at 20.6 and 31.65 GHz p 996 N94-16045
Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600
In-flight calibration of the spectral and radiometric characteristics of AVIRIS in 1991 p 1037 N94-16667
Simulation of ASTER data using AVIRIS images p 1071 N94-16693

RADIOMETRIC RESOLUTION
Improved optical radiation detectors and their calibration: 200 nm - 30 microns p 906 N94-15075

RADOMES
Antenna gain loss and pattern degradation due to transmission through dielectric radomes
[AD-A267242] p 986 N94-14974
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031

RAILGUN ACCELERATORS
Numerical modeling of the temperature gradients and spectra of the plasma armature on Thunderbolt
[AD-A266414] p 878 N94-16552

RAIN
Wind shear and heavy rain --- effects on flight stability
[NASA-TM-109453] p 1105 N94-15326
TRMM radar p 990 N94-15894
Recent scientific advances in the use of radar in scientific hydrology p 991 N94-15895
Some thoughts on future rain mapping missions (TRMM follow-on) p 992 N94-15906
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028
Olympus propagation measurement results at Virginia Tech p 995 N94-16037
A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050
Validation and analysis of microwave-derived rainfall over the tropics
[AD-A267785] p 1108 N94-17303

RAIN FORESTS
Application of symmetry properties to polarimetric remote sensing with JPL AIRSAR data p 1079 N94-16752

RAINSTORMS
Wind shear and heavy rain --- effects on flight stability
[NASA-TM-109453] p 1105 N94-15326

RAMAN SPECTRA
Studies on the parametric decay of waves in fusion plasmas
[VTT-PUBS-110] p 1200 N94-15204
High frequency Raman current drive p 1201 N94-15208
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
Simulations of wave-particle interactions in stimulated Raman forward scattering in a magnetized plasma
[TKK-F-A704] p 1201 N94-15210
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
BACKSCAT lidar simulation version 3.0: Technical documentation and users guide
[AD-A267296] p 1003 N94-17268

RAMAN SPECTROSCOPY
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061

RAMJET ENGINES
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435

RANDOM ACCESS MEMORY
A fuzzy method for preliminary design random access memory failure rate prediction
[AD-A267948] p 1055 N94-17044

RANDOM LOADS
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710

RANDOM NOISE
A simulation study of the performance of the NASA (2,1,6) convolutional code on RFI/burst channels p 997 N94-16508
Analysis of temporal symmetry in non-gaussian random fields
[AD-A266496] p 999 N94-16794
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463

RANDOM PROCESSES
Implications of crater distributions on Venus p 1270 N94-16300
Towards dynamic randomized algorithms in computational geometry
[INRIA-RR-1727] p 1156 N94-17528

RANDOM SAMPLING
Fast simulation of steady-state availability in non-Markovian highly dependable systems
[AD-A266747] p 1174 N94-15823

RANDOM VARIABLES
The distribution of a sum of binomial random variables
[AD-A266969] p 1172 N94-15002
Bounds on inconsistent inferences for sequences of trials with varying probabilities
[AD-A267146] p 1172 N94-15733
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028
Closed form characteristic function for general complex second-order form in correlated complex Gaussian random variables
[AD-A267883] p 1171 N94-17393

RANGEFINDING
Eighth International Workshop on Laser Ranging Instrumentation
[NASA-CP-3214] p 911 N94-15552
Laser tracking for vertical control p 911 N94-15553
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs p 911 N94-15555
Satellite signatures in SLR observations p 912 N94-15557
Work at Graz on satellite signatures p 898 N94-15558
The precision of today's satellite laser ranging systems p 912 N94-15559
SLR data screening; location of peak of data distribution p 912 N94-15560
Adaptive median filtering for preprocessing of time series measurements p 912 N94-15561
SATCOP mission planning software package p 912 N94-15562
Nd:YLF laser for airborne/spaceborne laser ranging p 913 N94-15563
Alternative wavelengths for laser ranging p 913 N94-15564
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
An improved light source for laser ranging p 913 N94-15567
Preliminary results from the portable standard satellite laser ranging intercomparison with MOBLAS-7 p 913 N94-15568
Performance optimization of detector electronics for millimeter laser ranging p 913 N94-15569
Tracking capabilities of SPADs for laser ranging p 914 N94-15570
The solid state detector technology for picosecond laser ranging p 914 N94-15572
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
The first satellite laser echoes recorded on the streak camera p 914 N94-15574
Experience and results of the 1991 MTLRS-1 USSR campaign p 914 N94-15575
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Historical MOBLAS system characterization p 915 N94-15579
Optimum wavelengths for two color ranging p 915 N94-15580
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Measuring atmospheric dispersion with WLRS in multiple wavelength mode p 916 N94-15582
Millimeter accuracy satellites for two color ranging p 916 N94-15583
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586
Geometric analysis of satellite laser ranging data p 917 N94-15587
Improvement of SLR accuracy, a possible new step p 917 N94-15588
Compensation for the distortion in satellite laser range predictions due to varying pulse travel times p 917 N94-15590
Timebias corrections to predictions p 875 N94-15591
Formation of on-site normal points p 917 N94-15592
Poisson filtering of laser ranging data p 917 N94-15593
Computer networking at SLR stations p 917 N94-15594
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
HP upgrade operational streamlining p 918 N94-15596
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
LLR: Activities in Wettzell p 876 N94-15600
Matera Laser Ranging Observatory (MLRO): An overview p 877 N94-15601
Sub-cm ranging and other improvements in Graz p 919 N94-15603
Upgrading of the Borowiec laser station p 877 N94-15604
Development of Shanghai satellite laser ranging station p 877 N94-15605
WLRS --- Wettzell Laser Ranging System (WLRS) p 877 N94-15606
New progress of ranging technology at Wuhan Satellite Laser Ranging Station p 877 N94-15608
TLRS-3 system upgrades p 877 N94-15609
Results of the MTLRS-1 upgrade p 877 N94-15610
The new MTLRS-1 receiving system p 877 N94-15611
The new MTLRS transmitting system p 877 N94-15612
Airborne 2 color ranging experiment p 920 N94-15614
GLRS-R 2-colour retroreflector target design and predicted performance p 921 N94-15615
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Mars laser altimeter based on a single photon ranging technique p 921 N94-15619
Satellite laser station Helwan status 1992 p 877 N94-15621
Optical attenuation mechanism upgrades, MOBLAS, and TLRS systems p 922 N94-15622
The third generation SLR station Potsdam no. 7836 p 877 N94-15623
Performance comparison of high speed microchannel plate photomultiplier tubes p 922 N94-15624
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
Digital laser range finder emulator
[AD-D015811] p 1040 N94-16540
Atomic beam studies relevant to the space environment
[AD-A268628] p 1186 N94-17436

RANGELANDS
Using AVIRIS images to measure temporal trends in abundance of photosynthetic and nonphotosynthetic canopy components p 1066 N94-16668

RANKING
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657

RARE EARTH ELEMENTS
An experimental study of trace element partitioning between perovskite, hibonite and melt: Equilibrium values p 954 N94-16313
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods p 1073 N94-16703
Theoretical studies of the crystal structure of rare earths and actinides at zero temperature
[DE93-016488] p 1214 N94-17301
RARE GASES
Al-26-Mg-26 ages of iron meteorites p 1242 N94-16240
First investigation of noble gases in the Dengli H3,8 chondrite p 953 N94-16264
Transition metals in superheat melts p 962 N94-16273
A search for noble-gas evidence for presolar oxide grains p 954 N94-16353
Noble gases in twenty Yamato H-chondrites: Comparison with Allan Hills chondrites and modern falls p 1244 N94-16361
Nitrogen and light noble gases in Parsa enstatite chondrite p 1246 N94-16435
RAREFACTION
DSMC simulations of Mach 20 nitrogen flows about a 70 degree blunted cone and its wake
[NASA-TM-107762] p 1018 N94-15291
RAREFIED GAS DYNAMICS
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021
RAREFIED GASES
Electronic spectroscopy of the gas-phase OH-Kr van der Waals complex
[AD-A266891] p 942 N94-14946
RASTER SCANNING
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
RELMA: On-line quality control in the rubber mixing room using laser analysis p 984 N94-16005
RATINGS
The airline quality report 1993
[NIAR-93-11] p 863 N94-17262
RATIOS
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194
Encapsulation of hemoglobin in non-phospholipid vesicles
[AD-A266505] p 1128 N94-16785
RATS
Neuropeptide-Y (NPY) increases total blood flow in the tail, and reduces cutaneous microvascular blood flow in the tail and foot of the rat
[AD-A266839] p 1115 N94-14918
TransRapid TR-07 maglev-spectrum magnetic field effects on daily pineal indoleamine metabolic rhythms in rodents
[DE93-015143] p 1117 N94-16893
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
RAWINSONDES
Empirical relationships among atmospheric variables from rawinsonde and field data as surrogates for AVIRIS measurements: Estimation of regional land surface evapotranspiration p 1074 N94-16712
RAY TRACING
The three-dimensional ray trajectories of the WKB optical fiber modes
[AD-A267167] p 1189 N94-15739
Ray tracing on topographic Rossby waves
[AD-A267014] p 1112 N94-15844
A ray trace model for propagation loss
[AD-A266314] p 997 N94-16467
RAYLEIGH SCATTERING
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
RDX
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
REACTING FLOW
Reaction and diffusion in turbulent combustion
[DE93-017085] p 943 N94-15146
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows
[NASA-CR-193131] p 1018 N94-15427
Fundamental studies of rocket combustion chemistry and combustion instability
[AD-A266248] p 925 N94-16482
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215
Chemical reactions in turbulent mixing flows
[AD-A268287] p 881 N94-17580
REACTION BONDING
NMR and theoretical investigation of cation binding with sol-gel silicates
[AD-A266999] p 963 N94-15631
REACTION KINETICS
Reactions of chemiluminescence induced by singlet oxygen with metals
[ONERA-NT-1992-13] p 955 N94-15149
Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
A proposed mechanism for the pyrolysis of diborane
[DE93-014275] p 947 N94-15977
Molecular beam studies of reaction dynamics
[DE93-015035] p 1181 N94-15995
A comparison of one and two dimensional flame quenching: Heat transfer results
[DE93-015196] p 947 N94-16060
Corrosion kinetics and mechanisms for nuclear grade graphites
[DE93-015462] p 947 N94-16105
Single-collision studies of energy transfer and chemical reaction
[DE93-017603] p 1182 N94-16121
Evaporation kinetics of Mg2SiO4 crystals and melts from molecular dynamics simulations p 1219 N94-16331
Studies of combustion reactions at the state-resolved differential cross section level
[DE93-017605] p 948 N94-16462
Structural effects in electron transfer reactions: Comparative interfacial electrochemical kinetics for cis- versus trans-dioxorhenium (V) (bi)pyridine oxidation
[AD-A266307] p 1182 N94-16466
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805
Emissions of volatile organic compounds from stationary combustion sources: Numerical modeling capabilities
[DE93-014123] p 1096 N94-16825
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
Materials processing and manufacturing technologies for diamond substrate multichip modules (DSMCM)
[AD-A267316] p 969 N94-16946
Advanced thermally stable jet fuels
[DE93-017711] p 975 N94-16996
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006
The influence of an electric field on the kinetics of nucleation
[IFTR-2/91] p 1213 N94-17046
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538
Coefficients for calculating thermodynamic and transport properties of individual species
[NASA-TM-4513] p 1220 N94-17624
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659
REACTION PRODUCTS
Geochemistry and cosmochemistry of fullerenes 3: Reaction of C60 and C70 with ozone p 953 N94-16243
Studies of combustion reactions at the state-resolved differential cross section level
[DE93-017605] p 948 N94-16462
REACTION TIME
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
Apparatus for and a method of growing thin films of elemental semiconductors
[AD-D015813] p 1210 N94-16487
REACTIVITY
Models for reactivity
[AD-A266419] p 1149 N94-16554
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532
REACTOR MATERIALS
Space exploration initiative fuels, materials and related nuclear propulsion technologies panel
[NASA-TM-105706] p 923 N94-15118
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
REACTOR SAFETY
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
REACTOR TECHNOLOGY
Space exploration initiative fuels, materials and related nuclear propulsion technologies panel
[NASA-TM-105706] p 923 N94-15118
READERS
The impact of report of investigation writing style on the assessment times, impressions, perceptions and preferences of adjudicators
[AD-A265748] p 1223 N94-15682
READING
Enhancing sight
[NASA-TM-109637] p 1221 N94-15248
The impact of report of investigation writing style on the assessment times, impressions, perceptions and preferences of adjudicators
[AD-A265748] p 1223 N94-15682
READOUT
Cryogenic readout electronics for astronomical applications p 910 N94-15099
REAL TIME OPERATION
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
Evaluation of ALSYS 037 Ada Compiler
[AD-A266972] p 1143 N94-15110
Short term weather forecasting in real time in a base weather station setting
[AD-A266872] p 1105 N94-15142
Overview of Enhanced Data Stream Array Processor (EDSAP)
[AD-A266986] p 1158 N94-15492
Hidden Markov model approach to skill learning and its application to telerobotics
[AD-A266989] p 1164 N94-15502
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
HP upgrade operational streamlining p 918 N94-15596
Complexity analysis of real-time reinforcement learning applied to finding shortest paths in deterministic domains
[AD-A266636] p 1131 N94-15742
Adaptive weld control for high-integrity welding applications
[TABES PAPER 93-604] p 1049 N94-16140
Real-time adaptive neural network data processing
[TABES PAPER 93-660] p 1054 N94-16155
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
Efficient scheduling of real-time compute-intensive periodic graphs on large grain data flow multiprocessor
[AD-A267444] p 1141 N94-17030
Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118
ARPA unmanned ground vehicle stereo vision program at Teleos Research
[AD-A267632] p 1167 N94-17202
Module interconnection frameworks for a real-time spreadsheet
[AD-A267317] p 1153 N94-17220
Module interconnection frameworks for a real-time spreadsheet
[AD-A267752] p 1153 N94-17231
Image accuracy and representational enhancement through low-level, multi-sensor integration techniques
[DE93-014888] p 1167 N94-17287

Estimating task execution delay in a real-time system via static source code analysis
[AD-A267496] p 1161 N94-17367
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A267868] p 1113 N94-17391
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551

RECEIVERS
Preparation and properties of Nb/Al SIS and SIN junctions for millimeter and submillimeter radioastronomical receivers p 907 N94-15078
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
The new MTLRS-1 receiving system p 877 N94-15611
Optical attenuation mechanism upgrades, MOBLAS, and TLRS systems p 922 N94-15622
The third generation SLR station Potsdam no. 7836 p 877 N94-15623
Planned LMSS propagation experiment using ACTS: Preliminary antenna pointing results during mobile operations p 995 N94-16041
OETC optical backplane bus testbed. IBM tasks: Receiver OEIC and link simulation tools and analysis
[AD-A266198] p 1191 N94-16128
Notes on the use of Dempster-Shafer and fuzzy reasoning to fuse identity attribute data
[AD-A267426] p 1004 N94-17309

RECEPTION DIVERSITY
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124

RECOMBINATION REACTIONS
Merged beam studies of laser stimulated radiative recombination
[AD-A267186] p 1037 N94-15145
OSA proceedings on Ultrafast Electronics and Optoelectronics, volume 14
[AD-A267972] p 1014 N94-17410

RECONNAISSANCE
Space countersurveillance: A requisite for theater defense planning
[AD-A266871] p 884 N94-15147

RECONNAISSANCE SPACECRAFT
Space countersurveillance: A requisite for theater defense planning
[AD-A266871] p 884 N94-15147

RECONSTRUCTION
Unitary plan wind tunnel landmark dedication and revitalization
[NASA-TM-109649] p 1302 N94-15434

RECORDS
Monitoring history
[NASA-TM-109640] p 1229 N94-15251

RECORDS MANAGEMENT
Monitoring history
[NASA-TM-109640] p 1229 N94-15251
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937
Managing information as a corporate asset: Key strategies for information professionals to remain competitive
[DE93-015515] p 1232 N94-16875

RECREATION
GSFC Fun Run
[NASA-TM-109587] p 1120 N94-15271

RECRYSTALLIZATION
Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon
[DE93-015449] p 1209 N94-16066
Isotopic signatures and distribution of nitrogen and trapped and radiogenic xenon in the Acapulco and FRO90011 meteorites p 1243 N94-16317
Tensile and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires
[NASA-TM-106350] p 962 N94-17652

RECTANGULAR BEAMS
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710

RECTENNAS
Dual polarization microstrip array antenna
[CA-PATENT-1-307-842] p 994 N94-15986

RECYCLING
User's guide: Hot-mix recycling of asphalt concrete pavements
[AD-A266939] p 983 N94-15177
Investigations into the recovery of waste sulfuric acid with concentrated solar radiation
[DLR-FB-93-11] p 952 N94-17594

RED SEA
Optical properties of the Red Sea
[AD-A266466] p 1113 N94-16588

RED SHIFT
Complex QSO absorbers: High-redshift clusters of galaxies?
[NASA-CR-194617] p 1237 N94-16833

REDOX CELLS
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006

REDUCTION (CHEMISTRY)
In situ studies of passive film chemistry using x ray absorption spectroscopy
[DE93-014023] p 947 N94-16011

REDUNDANCY ENCODING
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551

REED-SOLOMON CODES
Compact disk error measurements p 1227 N94-14988

REENTRY VEHICLES
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 886 N94-15951

REFERENCE STARS
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929
Tip-tilt compensation: Resolution limits for ground-based telescopes using laser guide star adaptive optics
[DE93-016426] p 1237 N94-16872

REFILLING
Kinetic plasma processes occurring in the outer plasmasphere
[NASA-CR-193452] p 1300 N94-17524

REFLECTANCE
An expert system shell for inferring vegetation characteristics: Atmospheric techniques (Task G)
[NASA-CR-194570] p 1082 N94-15531
ETALON-1,-2 center of mass correction and array reflectivity p 915 N94-15576
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
Modeling the reflectance of CO2 frost with new optical constants: Application to Martian south polar cap spectra p 1256 N94-16217
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates p 1260 N94-16238
Iron oxide bands in the visible and near-infrared reflectance spectra of primitive asteroids p 1242 N94-16274
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494
Unmixing AVIRIS data to provide a method for vegetation fraction subtraction p 1066 N94-16669
Ground-truthing AVIRIS mineral mapping at Cuprite, Nevada p 1069 N94-16682
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
Simulation of ASTER data using AVIRIS images p 1071 N94-16693
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204

REFLECTED WAVES
Regular and irregular reflection of a wave from a slanting flat wall
[IFTR-13/1991] p 1193 N94-17049

REFLECTION
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009
High-resolution seismic reflection survey at the Manson crater, Iowa p 1103 N94-16307
ATCRBS reply environment at Memphis International Airport
[AD-A266322] p 864 N94-16439

REFLECTOR ANTENNAS
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998
Proceedings of the 1992 Antenna Applications Symposium, volume 1
[AD-A268167] p 1005 N94-17431

REFLECTORS
An improved patch for radiative coolers
[NASA-CASE-GSC-13503-1] p 1046 N94-15873

REFRACTION
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009

REFRACTIVITY
Determination of average refractive index of spin coated DCG films for HOE fabrication p 1036 N94-14992
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187
A ray trace model for propagation loss
[AD-A266314] p 997 N94-16467
Characterization of voids formed during liquid impregnation of nonwoven multifilament glass networks as related to composite processing p 939 N94-16858
BACKSCAT lidar simulation version 3.0: Technical documentation and users guide
[AD-A267296] p 1003 N94-17268
Review of rigorous coupled-wave analysis and of homogeneous effective medium approximations for high spatial-frequency surface-relief gratings p 1194 N94-17335
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338
Applications of advanced diffractive optical elements p 1197 N94-17356
Predesign of diamond turned refractive/diffractive elements for IR objectives p 1198 N94-17359

REFRACTORIES
Refractory precursor components in an Allende ferromagnesian chondrule p 1245 N94-16412

REFRACTORY MATERIALS
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
High temperature advanced structural composites. Volume 2: Ceramic matrix composites, fiber processiing and properties, and interfaces
[AD-A267023] p 933 N94-15528
High temperature advanced structural composites. Volume 1: Executive summary and intermetallic compounds
[AD-A267022] p 933 N94-15835
Techniques for preparation of ingot metallurgical discontinuous composites
[AD-D015748] p 940 N94-16933

REFRACTORY METAL ALLOYS
High temperature materials technology research for advanced thermionic systems
[DE93-018302] p 960 N94-16964

REFRACTORY METALS
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
Experimental partitioning of Zr, Ti, and Nb between silicate liquid and a complex noble metal alloy and the partitioning of Ti between perovskite and platinum metal p 962 N94-16287
Properties of thin films for high temperature flow sensors
[NASA-CR-191526] p 967 N94-16541

REFRIGERANTS
Cycle performance testing of nonazeotropic mixtures of HFC-142A/HCFC-124 and HFC-32/HCFC-124 with enhanced surface heat exchangers
[DE93-015215] p 1024 N94-16808

REFRIGERATING
Space Station thermal storage/refrigeration system research and development
[NASA-CR-193841] p 879 N94-15191
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485

REFRIGERATORS
An adiabatic demagnetisation refrigerator with a mechanical pre-cooler for space applications p 906 N94-15070
In orbit adiabatic demagnetization refrigeration for bolometric and microcalorimetric detectors p 907 N94-15079
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484

Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485

REGENERATIVE COOLING
Proceedings of the 7th International Cryocooler Conference, part 1
[AD-A268448] p 985 N94-17482
Proceedings of the 7th International Cryocooler Conference, part 2
[AD-A268449] p 985 N94-17484
Proceedings of the 7th International Cryocooler Conference, part 3
[AD-A268450] p 985 N94-17485

REGOLITH
A test of the applicability of independent scattering to high albedo planetary regoliths p 1250 N94-16187
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Why is the Moon dark? p 1256 N94-16219
The physical mechanism of comet outbursts: An experiment p 1242 N94-16221
JSC-1: A new lunar regolith simulant p 1289 N94-16398
Equatorial ground ice on Mars: Steady-state stability p 1290 N94-16403
Mars brine formation experiment p 1293 N94-16419
Helium-3 inventory of lunar samples: A potential future energy resource for mankind? p 1295 N94-16428

REGRESSION ANALYSIS
Efficiency effects of variation in controlled experimental variables
[DE93-014345] p 1169 N94-15979
A linear spectral matching technique for retrieving equivalent water thickness and biochemical constituents of green vegetation p 1068 N94-16678
Computing science and statistics. Volume 24: Graphics and visualization
[AD-A266571] p 1150 N94-16721
Ensemble forecasting techniques in medium-range forecasting
[AD-A267443] p 1107 N94-17029

REGULARITY
On a class of singular quasilinear elliptic equations with general structure and distribution data
[DE93-628585] p 1171 N94-17613

REGULATIONS
Permanent change of station: The NASA employee's guide to an easier move
[NHB-9760.1A] p 1223 N94-15931
Incorporating global warming risks in power sector planning. Volume 1: A case study of the New England region
[DE93-015241] p 1096 N94-17289

REGULATORS
Regulated emergency oxygen system
[AD-A266228] p 1138 N94-16983

REINFORCED PLASTICS
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473

REINFORCED PLATES
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143

REINFORCEMENT (STRUCTURES)
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473

REINFORCING FIBERS
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Production process p 931 N94-15257
Sound radiation from infinite laminated composite shell with periodic rib stiffening
[DRA/TM(USGR)92326] p 933 N94-15699
NEXTEL(trademark)/SiC composites using forced chemical vapor infiltration
[DE93-013532] p 934 N94-16008
Overview of chemical vapor infiltration
[DE93-015440] p 934 N94-16065
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites
[DE93-015688] p 934 N94-16158
Continuous fabrication of SiC fiber tows by chemical vapor deposition
[AD-A266460] p 936 N94-16569
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Fiber strength utilization in carbon/carbon composites
[AD-A267713] p 940 N94-17271
Direct observation of fracture of CAS-glass/SiC composites and processing of toughened alumina
[AD-A268275] p 941 N94-17457

REINFORCING MATERIALS
Continuous fabrication of SiC fiber tows by chemical vapor deposition
[AD-A266460] p 936 N94-16569

RELATIVISTIC EFFECTS
Investigation of the interactions of radiation with matter
[AD-A266743] p 1181 N94-15774

RELATIVISTIC THEORY
Relativistic mean-field calculations of lambda and sigma hypernuclei
[DE93-015269] p 1181 N94-16013
Lunar LIGO: A new concept in gravitational wave astronomy p 1277 N94-16337
Relativistic dynamics of spin in strong external fields
[NIKHEF-H/93-06] p 1240 N94-17604

RELAXATION OSCILLATORS
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414

RELIABILITY
Statistical computation of tolerance limits
[NASA-TM-108424] p 1172 N94-15535
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method
[AD-A267053] p 1008 N94-15665
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
Fast simulation of steady-state availability in non-Markovian highly dependable systems
[AD-A266747] p 1174 N94-15823
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
A ten year review of performance of photovoltaic systems
[DE93-015649] p 1093 N94-17217
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517

RELIABILITY ANALYSIS
Software reliability through fault-avoidance and fault-tolerance
[NASA-CR-194353] p 1143 N94-15114
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Technology transfers and reliable oxides
[AD-A266948] p 1175 N94-15758
NASA trend analysis procedures
[NASA-RP-1290] p 1223 N94-15782
General Monte Carlo reliability simulation code including common mode failures and HARP fault/error-handling
[NASA-CR-187587] p 1150 N94-16594
Reducing data dimension to lower signal processing computational requirements and maximize performance
[AD-A266606] p 999 N94-16728
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194
Tutorial: Advanced fault tree applications using HARP
[NASA-TM-102747] p 1155 N94-17447

RELIABILITY ENGINEERING
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Small satellite product assurance p 896 N94-17188

RELIEF MAPS
Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush p 1086 N94-16318

RELOCATION
Permanent change of station: The NASA employee's guide to an easier move
[NHB-9760.1A] p 1223 N94-15931

REMOTE CONTROL
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
Remote diagnosis as used for mechanized parking systems p 984 N94-16004
The ESA telescience program p 977 N94-16073
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079

REMOTE HANDLING
STS-41 VCS training with mission specialist Bruce Melnick and Bill Shepard
[NASA-TM-109513] p 1046 N94-15459

REMOTE MANIPULATOR SYSTEM
STS-26 EVA rescue training
[NASA-TM-109563] p 875 N94-15333
Space Station/Orbiter berthing dynamics during an assembly flight
[NASA-TM-109049] p 1062 N94-17451

REMOTE SENSING
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
Views from space
[NASA-TM-109634] p 1081 N94-15245
Combating malaria
[NASA-TM-109609] p 1081 N94-15297
Heterodyne efficiency for a coherent laser radar with diffuse or aerosol targets
[NASA-CR-194563] p 1038 N94-15477
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11
[NASA-TM-104566-VOL-12] p 1111 N94-15529
An expert system shell for inferring vegetation characteristics: Atmospheric techniques (Task G)
[NASA-CR-194570] p 1082 N94-15531
Steering capaciflector sensor
[NASA-CASE-GSC-13489-1] p 1164 N94-15704
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements
[AD-A267192] p 1106 N94-15851
Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
ERS-1: 18 months in orbit p 990 N94-15888
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
ENVISAT ASAR p 898 N94-15892
TRMM radar p 990 N94-15894
Driving terrestrial ecosystem models from space p 991 N94-15896
Recent advances in radar remote sensing of forest p 991 N94-15897
Radar response of vegetation: An overview p 991 N94-15898
Geologic remote sensing with radar p 991 N94-15900
SIR-C/X-SAR free flyer concept p 898 N94-15903
EOS SAR: A new approach p 992 N94-15904
A summary of microwave remote sensing investigations planned for BOREAS p 993 N94-15914
Primary studies of Chinese spaceborne SAR p 993 N94-15916
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124
Earth imaging results from Galileo's second encounter p 1252 N94-16201
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Far-infrared spectra of CO2 clathrate hydrate frosts p 954 N94-16340
Martian lavas: Three complementary remote sensing techniques to derive flow properties p 1283 N94-16366
The Clementine instrument complement p 1086 N94-16370
A mission concept of Phobos/Deimos exploration p 1287 N94-16387
Remote visual detection of impacts on the lunar surface p 1290 N94-16404
Do it yourself remote sensing: Generating an inexpensive, high tech, real science lake mapping project for the classroom p 1086 N94-16407
A quantitative analysis of TIMS data obtained on the Learjet 23 at various altitudes p 1063 N94-16597
Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600
An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603
Multi-resolution processing for fractal analysis of airborne remotely sensed data p 1065 N94-16604
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607

Using AVIRIS images to measure temporal trends in abundance of photosynthetic and nonphotosynthetic canopy components p 1066 N94-16668
Mapping the mineralogy and lithology of Canyonlands, Utah with imaging spectrometer data and the multiple spectral feature mapping algorithm p 1066 N94-16670
Hyperspectral modeling for extracting aerosols from aircraft/satellite data p 1067 N94-16673
AVIRIS study of Death Valley evaporite deposits using least-squares band-fitting methods p 1067 N94-16676
A field measure of the shade fraction p 1068 N94-16677
A linear spectral matching technique for retrieving equivalent water thickness and biochemical constituents of green vegetation p 1068 N94-16678
Mapping the spectral variability in photosynthetic and non-photosynthetic vegetation, soils, and shade using AVIRIS p 1068 N94-16679
Exploring the remote sensing of foliar biochemical concentrations with AVIRIS data p 1069 N94-16683
AVIRIS calibration and application in coastal oceanic environments p 1069 N94-16685
Mapping vegetation types with the multiple spectral feature mapping algorithm in both emission and absorption p 1069 N94-16686
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687
Using endmembers in AVIRIS images to estimate changes in vegetative biomass p 1070 N94-16689
The 1991 AVIRIS/POLDER experiment in Camargue, France p 1070 N94-16691
JPL activities on development of acousto-optic tunable filter imaging spectrometer p 1037 N94-16696
Measuring dry plant residues in grasslands: A case study using AVIRIS p 1072 N94-16697
Tracking photosynthetic efficiency with narrow-band spectroradiometry
| CIW-PUBL-1133 | p 1072 N94-16698
Integrating remote sensing techniques at Cuprite, Nevada: AVIRIS, Thematic Mapper, and field spectroscopy p 1072 N94-16701
Oregon transect: Comparison of leaf-level reflectance with canopy-level and modelled reflectance p 1073 N94-16702
Expert system-based mineral mapping using AVIRIS p 1073 N94-16704
AVIRIS data and neural networks applied to an urban ecosystem p 1073 N94-16705
Temporal variation in spectral detection thresholds of substrate and vegetation in AVIRIS images p 1073 N94-16706
A comparison of LOWTRAN-7 corrected Airborne Visible/Infrared Imaging Spectrometer (AVIRIS) data with ground spectral measurements p 1074 N94-16710
Discrimination among semi-arid landscape endmembers using the Spectral Angle Mapper (SAM) algorithm p 1074 N94-16711
Empirical relationships among atmospheric variables from rawinsonde and field data as surrogates for AVIRIS measurements: Estimation of regional land surface evapotranspiration p 1074 N94-16712
Retrieval of pine forest biomass using JPL AIRSAR data p 1076 N94-16737
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR) p 1076 N94-16738
Strategies for detection of floodplain inundation with multi-frequency polarimetric SAR p 1076 N94-16739
Supervised fully polarimetric classification of the Black Forest test site: From MAESTRO1 to MAC Europe p 1076 N94-16740
Relating multifrequency radar backscattering to forest biomass: Modeling and AIRSAR measurement p 1077 N94-16741
Mapping of sea bottom topography p 1077 N94-16744
Preliminary results of polarization signatures for glacial moraines in the Mono Basin, Eastern Sierra Nevada p 1078 N94-16746
Extraction of quantitative surface characteristics from AIRSAR data for Death Valley, California p 1078 N94-16748
Application of symmetry properties to polarimetric remote sensing with JPL AIRSAR data p 1079 N94-16752
Processing of polarimetric SAR data for soil moisture estimation over Mahantango watershed area p 1079 N94-16754
Soil conservation applications with C-band SAR p 1080 N94-16760
Earth observational research using multistage EOS-like data
| NASA-CR-194626 | p 1084 N94-16831
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
| AD-A267479 | p 1004 N94-17364
Arctic cyclones and Marginal Ice Zone (MIZ) variability
| AD-A268610 | p 1108 N94-17465
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
| AD-A268052 | p 1114 N94-17503
An analysis of simulated and actual DMSP SSM/T-2 brightness temperatures
| AD-A268103 | p 1109 N94-17573

REMOTE SENSORS
The laboratory performance of the short wavelength instrument for the Along Track Scanning Radiometer ATSR-2 (initial results) p 908 N94-15088
IR detectors and subsystems for space applications p 909 N94-15091
ENVISAT ASAR p 898 N94-15892

REMOTELY PILOTED VEHICLES
Non-lethal Unmanned Aerial Vehicles (UAVs)
| AD-A267139 | p 866 N94-15692

REMOVAL
Dry stripping as a surface treatment method
| VTT-TIED-1348 | p 985 N94-17544

RENDEZVOUS GUIDANCE
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
| AD-A267498 | p 898 N94-17368

RENDEZVOUS TRAJECTORIES
A mission concept of Phobos/Deimos exploration p 1287 N94-16387

RENORMALIZATION GROUP METHODS
Large-Eddy Simulations (LES) of flows and turbulence distribution
| AD-A267182 | p 1016 N94-15151
Computation of confined coflow jets with three turbulence models
| NASA-TM-106378 | p 1025 N94-16879

REPORTS
AFOSR technical report summaries, January - March 1993
| AD-A267187 | p 1230 N94-15850
List of the scientific and personal papers of Sir George Deacon, FRS
| IOS-301-1992 | p 1114 N94-17518

REPRODUCTION (COPYING)
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
| AD-A267413 | p 1232 N94-16977
Theory of dispersive microlenses p 1198 N94-17361

RESCUE OPERATIONS
STS-26 EVA rescue training
| NASA-TM-109563 | p 875 N94-15333
Life saving satellites
| NASA-TM-109616 | p 862 N94-15426
Inflatable rescue device
| NASA-CASE-MSC-22244-1 | p 1137 N94-15883
Technical urban search and rescue, System To Locate Survivors (STOLS) units: Operator's manual
| AD-A266317 | p 862 N94-16438
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
| AD-A266493 | p 1138 N94-16793
On predicting the person-in-water drift for search and rescue
| AD-A268083 | p 1055 N94-17514

RESEARCH
NASA Space Engineering Research Center for VLSI System Design
| NASA-CR-194587 | p 1008 N94-15547

RESEARCH AIRCRAFT
Canadian microgravity experiments flown in 1989-1990 p 977 N94-16075
The vibro-acoustic mapping of low gravity trajectories on a Learjet aircraft p 978 N94-16078

RESEARCH AND DEVELOPMENT
Infrared detectors and coolers for space instrumentation: Summary and concluding remarks p 904 N94-15059
Expectations for the future of military aviation p 854 N94-15128
Expectations for the future of the National Aerospace Laboratory p 854 N94-15129
Expectations for the future of the Faculty of Aeronautics and Astronautics of the Technical University of Delft p 854 N94-15131

RESEARCH FACILITIES
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
| AD-A267667 | p 943 N94-14962
Expectations for the future of the National Aerospace Laboratory p 854 N94-15129
GFSC-TV demo tape
| NASA-TM-109586 | p 875 N94-15270
Stock footage of Goddard Space Flight Center and Headquarters
| NASA-TM-109589 | p 875 N94-15273
Manned vehicle systems research facility
| NASA-TM-109650 | p 875 N94-15318
NASA images 6
| NASA-TM-109437 | p 862 N94-15336
Building 46 grand opening
| NASA-TM-109524 | p 875 N94-15386
Lunar Curatorial Facility resource
| NASA-TM-109531 | p 875 N94-15393
Johnson Space Center and downtown Houston, Texas aerials
| NASA-TM-109522 | p 1032 N94-15472
Commitment to challenge
| NASA-TM-109523 | p 876 N94-15473
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock isentropic light piston facility
| RAE-TM-AERO/PROP-19 | p 856 N94-15696
Facilities maintenance handbook
| NHB-8831.2 | p 1224 N94-15934
Scientific use of Space Station Freedom p 977 N94-16072
New findings and instrumentation from the NASA Lewis Microgravity Facility p 977 N94-16076
QUESTS: A microgravity research facility for materials science experiments p 978 N94-16082
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions p 954 N94-16372
An electromagnetic interference study of potential transmitter sites for the HF Active Auroral Research Program (HAARP)
| AD-A267743 | p 1004 N94-17373
Design of an experiment hardware for the ESA space facility BIOPAN
| DLR-FB-93-06 | p 876 N94-17548

RESEARCH MANAGEMENT
Army Software Test and Evaluation Panel (STEP) software metrics initiatives report
[AD-A266889] p 1142 N94-14924
NASA information resources management handbook
[NHB-2410.1E] p 1230 N94-15941
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
Research and development: Engine of innovation at Krupp p 984 N94-16001
Mathematical Sciences Division 1992 programs
[AD-A268586] p 1140 N94-17623
RESEARCH PROJECTS
Earth system dynamics: The interrelation of atmospheric, ocean and solid earth dynamics
[NASA-CR-193487] p 1081 N94-17444
RESERVOIRS
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
RESIDUAL STRENGTH
Low and high velocity impact response of thick hybrid composites p 936 N94-16837
RESIDUAL STRESS
Finite element analytical techniques for ceramic production in microgravity: A hypoelastic model p 981 N94-16099
Evaluation of the interfacial mechanical properties in fiber-reinforced ceramic composites
[DE93-015494] p 935 N94-16461
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Measurement and theory of the dependence of hardness on residual stress
[AD-A267553] p 1061 N94-17105
Evaluation of interfacial properties of fiber-reinforced ceramic composites using fiber push-in tests
[DE93-015427] p 972 N94-17253
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605
RESIN MATRIX COMPOSITES
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Polymer Infiltration Studies
[NASA-CR-194494] p 932 N94-15275
RESIN TRANSFER MOLDING
An overview of the NASA textile composites program p 937 N94-16846
Textile composite processing science p 938 N94-16856
RESINS
Construction, testing, and representation of resin and fiber reinforced materials p 931 N94-15255
Cyanoresin, cyanoresin/cellulose triacetate blends for thin film, dielectric capacitors
[NASA-CASE-NPO-18913-1-CU] p 966 N94-15930
RESISTANCE HEATING
Heating of lubricant with an electric resistance heater
[VTT-TIED-1359] p 974 N94-17547
RESISTOJET ENGINES
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452
RESISTORS
Stray insensitive switched capacitor composite operational amplifiers
[AD-A267412] p 1012 N94-16976
RESONANCE
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978
Orbital evolution of dust from comet Schwassmann-Wachmann 1: A case of one-to-one resonance trapping p 1242 N94-16270
Processing of resonance parameter covariance files
[DE93-015506] p 1231 N94-16874
An automated system for ultrasound measurements of liquids by the resonance (Eggers) method
[IFTR-17/1992] p 1178 N94-17087
RESONANCE SCATTERING
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation
[DE93-015406] p 1212 N94-16887
RESONANT FREQUENCIES
Parametric study of a finite element model of the Sidewinder missile
[AD-A267245] p 865 N94-14976
Resonant frequencies of irregularly shaped microstrip antennas using method of moments
[NASA-TP-3386] p 989 N94-15767
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919
Wide angle, single screen, gridded square-loop frequency selective surface for diplexing two closely separated frequency bands
[NASA-CASE-NPO-18664-1-CU] p 1237 N94-17438
RESONATORS
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480
RESOURCE ALLOCATION
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027
Satellite communications systems and technology. Executive summary
[NASA-TM-109346] p 1006 N94-17661
RESOURCES MANAGEMENT
Applicability of computer spreadsheet simulation for solving resource allocation problems
[AD-A267436] p 1152 N94-17027
RESPIRATION
Validation of respiratory inductive plethysmography for measuring exercise tidal volumes
[AD-A266883] p 1119 N94-14923
RESPIRATORS
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
RESPIRATORY DISEASES
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
RESPIRATORY PHYSIOLOGY
Validation of respiratory inductive plethysmography for measuring exercise tidal volumes
[AD-A266883] p 1119 N94-14923
RESPIRATORY SYSTEM
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
RESPIROMETERS
Validation of respiratory inductive plethysmography for measuring exercise tidal volumes
[AD-A266883] p 1119 N94-14923
RESTARTABLE ROCKET ENGINES
Advanced transportation system studies technical area 3: Alternate propulsion system concepts. SSME upper stage use
[NASA-CR-193865] p 927 N94-17098
RESTORATION
Restoring Miss Liberty --- inorganic coatings
[NASA-TM-109605] p 963 N94-15313
Computing and Information Sciences
[DE93-017149] p 1151 N94-16902
RESUSCITATION
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Transcapillary exchange
[AD-A266427] p 1123 N94-16544
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Exchange of fluid and solutes between vascular, interstitial, and tissue cell compartments
[AD-A266426] p 1123 N94-16558
Increased vascular resistance with hemoglobin-based oxygen carriers
[AD-A266454] p 1123 N94-16565
The nature of dynamic arteriolar vasoreactivity: A mini-review and A classification scheme
[AD-A266499] p 1128 N94-16783
RETENTION (PSYCHOLOGY)
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
RETICLES
Test methods for acceptance testing of telescopes
[AD-A268316] p 1237 N94-17568
RETINA
Reference frames in vision
[AD-A266174] p 1132 N94-16925
RETRIEVAL
EVA retriever demonstration
[NASA-TM-109510] p 1046 N94-15456
RETROREFLECTION
Reduction of parasitic lasing
[NASA-CASE-LAR-14645-1-SB] p 1039 N94-15942
RETROREFLECTORS
Work at Graz on satellite signatures p 898 N94-15558
Alternative wavelengths for laser ranging p 913 N94-15564
ETALON-1,-2 center of mass correction and array reflectivity p 915 N94-15576
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578
Millimeter accuracy satellites for two color ranging p 916 N94-15583
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
GLRS-R 2-colour retroreflector target design and predicted performance p 921 N94-15615
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Reduction of parasitic lasing
[NASA-CASE-LAR-14645-1-SB] p 1039 N94-15942
REVERBERATION
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919
REYNOLDS EQUATION
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 3: Programmer's reference
[NASA-TM-106341] p 1022 N94-15865
Unsteady fluid and optical simulation of transonic aero-windows
[AIAA PAPER 93-3017] p 858 N94-16512
Computation of a controlled store separation from a cavity p 858 N94-16513
REYNOLDS NUMBER
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381
REYNOLDS STRESS
Computation of confined coflow jets with three turbulence models
[NASA-TM-106378] p 1025 N94-16879
Three-dimensional turbulent boundary layer
[AD-A266261] p 1025 N94-16908
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Investigation of high-speed free shear flows using improved pressure-strain correlated Reynolds stress turbulence model
[NASA-CR-194661] p 1027 N94-17127
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
RHENIUM
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion p 1244 N94-16321
Structural effects in electron transfer reactions: Comparative interfacial electrochemical kinetics for cis- versus trans-dioxorhenium (V) (bi)pyridine oxidation
[AD-A266307] p 1182 N94-16466
RHENIUM COMPOUNDS
High-valent oxo, methoxorhenium complexes: Models for intermediates and transition states in proton-coupled multi-electron transfer reactions
[AD-A266492] p 1211 N94-16782
RHEOLOGY
Rheology and microstructure of concentrated zirconia-alumina suspensions for gelcasting composites
[DE93-015339] p 966 N94-16016
Rheology of water and ammonia-water ices p 953 N94-16188
The rheology and composition of cryovolcanic flows on icy satellites p 1243 N94-16294
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Electro-rheological disk pump
[AD-D015783] p 1047 N94-16531
RHYOLITE
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling p 1286 N94-16381
RIBBONS
Polymer Infiltration Studies
[NASA-CR-194494] p 932 N94-15275
RIBLETS
Riblets: New speed technology
[NASA-TM-109641] p 1018 N94-15252
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286

RIBONUCLEIC ACIDS
Biofilm structure and diversity
[AD-A267254] p 1118 N94-16989
RIBS (SUPPORTS)
Sound radiation from infinite laminated composite shell with periodic rib stiffening
[DRA/TM(USGR)92326] p 933 N94-15699
RICHARDSON NUMBER
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381
RIFLES
Thermal Weapon Sight (TWS) AN/PAS-13 diffractive optics designed for producibility p 1197 N94-17354
RIGID STRUCTURES
Impending motion direction of contacting rigid bodies
[AD-A266814] p 1164 N94-15756
Computation of a controlled store separation from a cavity p 858 N94-16513
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435
RINGS (MATHEMATICS)
Modal ring method for the scattering of sound
[NASA-TM-106342] p 1177 N94-16497
Distributively generated matrix near rings
[DE93-628588] p 1175 N94-17641
RISK
Efficient management of cardiovascular risk screening programs p 1125 N94-16622
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
ROADS
YARF: An open-ended framework for robot road following
[AD-A266788] p 1163 N94-14910
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498
ROBOT ARMS
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
Three axis force override rate control of a PUMA 560 manipulator
[AD-A267313] p 1048 N94-16944
ROBOT CONTROL
Tactile sensing and control in humans and robotic/teleoperated systems
[AD-A267710] p 1163 N94-14937
Fuzzy inverse kinematic mapping: Rule generation, efficiency, and implementation
[AD-A266967] p 1163 N94-14954
Real-time implementation of neural network learning control of a flexible space manipulator
[AD-A266962] p 1045 N94-14970
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
A modular control architecture for real-time synchronous and asynchronous systems
[DE93-015439] p 1166 N94-16888
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
Three axis force override rate control of a PUMA 560 manipulator
[AD-A267313] p 1048 N94-16944
An object-oriented program specification for a mobile robot motion control language
[AD-A267213] p 1166 N94-16986
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088
Path planning for robotic truss assembly
[NASA-CR-194652] p 897 N94-17280
ROBOT DYNAMICS
An experimental comparison of CLOS and C(++) implementations of an object-oriented graphical simulation of walking robot kinematics
[AD-A267168] p 1165 N94-15855
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
Reference frames in vision
[AD-A266174] p 1132 N94-16925
An object-oriented program specification for a mobile robot motion control language
[AD-A267213] p 1166 N94-16986
ROBOT SENSORS
Panacea: An active sensor controller for the ALVINN autonomous driving system
[AD-A266964] p 864 N94-14972
Programmable Remapper project
[NASA-TM-109508] p 1164 N94-15515
ROBOTICS
Tactile sensing and control in humans and robotic/teleoperated systems
[AD-A267710] p 1163 N94-14937
Fuzzy control and fuzzy kinematic mapping for a redundant space robot
[AD-A266866] p 1163 N94-14950
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
Robotics for Space Station tape 2
[NASA-TM-109578] p 1045 N94-15263
Robotics in space
[NASA-TM-109584] p 1045 N94-15268
Robotics for Space Station, tape 1
[NASA-TM-109588] p 1045 N94-15272
Future of robotics
[NASA-TM-109592] p 1045 N94-15284
Plasma arc welding repair of space flight hardware
[TABES PAPER 93-603] p 1049 N94-16139
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725
A modular control architecture for real-time synchronous and asynchronous systems
[DE93-015439] p 1166 N94-16888
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088
Path planning for robotic truss assembly
[NASA-CR-194652] p 897 N94-17280
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
ROBOTS
Perception for outdoor navigation
[AD-A266867] p 863 N94-14919
Engineering Physics and Mathematics Division progress report, period ending 31 December 1992
[DE93-015118] p 1301 N94-14926
Hidden Markov model approach to skill learning and its application to telerobotics
[AD-A266989] p 1164 N94-15502
Opportunity for early science return by the Artemis Program p 1291 N94-16408
Exploiting world structure to efficiently search for objects
[TR-434] p 1231 N94-16576
Integrating reactive and deliberative planning for agents
[AD-A267631] p 1166 N94-17201
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517
ROBUSTNESS (MATHEMATICS)
Research in robust control for hypersonic aircraft
[NASA-CR-194106] p 870 N94-15416
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
The design and analysis of robust feedback systems
[AD-A267152] p 1165 N94-15778
ROCK INTRUSIONS
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5 p 1258 N94-16227
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
The monzonorite-anorthosite connection: The petrogenesis of terrestrial KREEP p 1104 N94-16365
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605
ROCKET ENGINE DESIGN
ALS engine controller system
[NASA-CR-194647] p 926 N94-16654
Development and analysis of startup strategies for particle bed nuclear rocket engine
[AD-A267949] p 927 N94-17053
Advanced transportation system studies technical area 3: Alternate propulsion system concepts. SSME upper stage use
[NASA-CR-193865] p 927 N94-17098
Computational analysis of Variable Thrust Engine (VTE) performance
[NASA-CR-193852] p 928 N94-17442
CPIA/M5 liquid propellant engine manual
[AD-A268062] p 929 N94-17589
ROCKET ENGINES
Coaxial airblast atomizers
[NASA-CR-193845] p 1016 N94-15109
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
ALS engine controller system
[NASA-CR-194647] p 926 N94-16654
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543
ROCKET EXHAUST
Rocket Motor Plume Technology
[AGARD-LS-188] p 923 N94-15217
Plume primary smoke p 923 N94-15218
Propulsion p 924 N94-15219
Secondary smoke p 924 N94-15220
Rocket motor plume flowfields: Phenomenology and simulation p 924 N94-15221
Microwave properties and systems overview p 924 N94-15222
Plume radiation p 924 N94-15223
Fundamental studies of rocket combustion chemistry and combustion instability
[AD-A266248] p 925 N94-16482
ROCKET LAUNCHERS
The launch of ELDO
[ESA-HSR-7] p 886 N94-16501
ROCKET LAUNCHING
The launch of ELDO
[ESA-HSR-7] p 886 N94-16501
ROCKET NOZZLES
ASRM nozzle thermal analysis
[NASA-CR-194672] p 928 N94-17277
Postflight hardware evaluation 360T026 (RSRM-26, STS-47)
[NASA-CR-192559] p 882 N94-17656
ROCKET SOUNDING
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17126
ROCKS
Temperature measurements p 1037 N94-15804
Stalking the LREE-enriched component in ureilites p 1241 N94-16190
Mars Analog Site Study (MASS) p 1252 N94-16200
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement p 1242 N94-16245
From minerals to rocks: Toward modeling lithologies with remote sensing p 1086 N94-16437
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods p 1073 N94-16703
ROCKWELL HARDNESS
Measurement and theory of the dependence of hardness on residual stress
[AD-A267553] p 1061 N94-17105
RODS
Attachment device
[NASA-CASE-MSC-21885-1] p 1047 N94-15925
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473
ROLL
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435
ROLLER BEARINGS
Mechanical Systems Technology Branch research summary, 1985 - 1992
[NASA-TM-106329] p 1049 N94-17583

ROLLERS
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
ROLLING MOMENTS
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462
ROOM TEMPERATURE
Technology transfers and reliable oxides
[AD-A266948] p 1175 N94-15758
ROOT-MEAN-SQUARE ERRORS
Sub-cm ranging and other improvements in Graz
p 919 N94-15603
ROSAT MISSION
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
Participation in the north ecliptic pole sky survey
[NASA-CR-191933] p 1059 N94-16815
The formation process of the He I lambda 10830 line in cool giant stars
[NASA-CR-194648] p 1240 N94-17094
Variability of the Seyfert galaxy MKN 766 in the Rosat all sky survey
[MPE-PREPRINT-221] p 1240 N94-17591
ROTARY ENGINES
Rotary engine performance computer program (RCEMAP and RCEMAPPC): User's guide
[NASA-CR-191192] p 869 N94-15192
ROTARY WING AIRCRAFT
Rotorcraft research
[NASA-TM-109452] p 871 N94-15325
Center for Rotorcraft Education and Research progress report, 1987 - 1992
[AD-A266760] p 857 N94-15824
ROTATING CYLINDERS
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
Numerical study of compressible boundary-level transition between two concentric cylinders
[NASA-CR-194622] p 1025 N94-16842
ROTATING ENVIRONMENTS
Apparatus and method for producing an artificial gravitational field
[NASA-CASE-MSC-22021-1] p 886 N94-15935
ROTATING SHAFTS
Rotary encoding device
[NASA-CASE-GSC-13543-1] p 1189 N94-15705
Rotary encoding device
[NASA-CASE-GSC-13556-1] p 1148 N94-15943
ROTATIONAL SPECTRA
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
ROTOR AERODYNAMICS
Center for Rotorcraft Education and Research progress report, 1987 - 1992
[AD-A266760] p 857 N94-15824
Jet engine performance enhancement through use of a wave-rotor topping cycle
[NASA-TM-4486] p 870 N94-17470
ROTOR BLADES (TURBOMACHINERY)
A rapid computational model for estimating the performance of compliant airfoils in cascades
[AD-A266275] p 857 N94-16471
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386
ROTOR DYNAMICS
Center for Rotorcraft Education and Research progress report, 1987 - 1992
[AD-A266760] p 857 N94-15824
ROTOR SYSTEMS RESEARCH AIRCRAFT
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509
ROTORCRAFT AIRCRAFT
Rotorcraft research
[NASA-TM-109452] p 871 N94-15325
Center for Rotorcraft Education and Research progress report, 1987 - 1992
[AD-A266760] p 857 N94-15824
ROTORS
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
Jet engine performance enhancement through use of a wave-rotor topping cycle
[NASA-TM-4486] p 870 N94-17470
ROUTES
Strategic planning for aircraft noise route impact analysis: A three dimensional approach
[NASA-CR-191484] p 1178 N94-17278
ROVING VEHICLES
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong
p 1007 N94-16197
International testing of a Mars rover prototype
p 1273 N94-16312
RUBBER
XPS analysis of Al/EPDM bondlines from IUS SRM-1 polar bosses
[AD-A266851] p 1056 N94-14945
RELMA: On-line quality control in the rubber mixing room using laser analysis p 984 N94-16005
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507
RULES
Automatic generation of production rules for integrity maintenance
[REPT-92-054] p 1156 N94-17501
RUNGE-KUTTA METHOD
Multigrid time-accurate integration of Navier-Stokes equations
[NASA-TM-106373] p 1028 N94-17258
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540
RUNWAYS
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417
RUSSIAN FEDERATION
Commonwealth of Independent States aerospace science and technology, 1992: A bibliography with indexes
[NASA-SP-7106] p 854 N94-16481

S

S GLASS
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124
S MATRIX THEORY
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
S WAVES
Shear wave measurements in shock-induced, high-pressure phases
[DE93-016461] p 1062 N94-17664
SAFETY
Americans with Disabilities Act considerations for the practice of occupational medicine p 1124 N94-16611
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
Industrial Hygiene Laboratory accreditation: The JSC experience p 1125 N94-16623
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
SAFETY DEVICES
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
Regulated emergency oxygen system
[AD-A266228] p 1138 N94-16983
SAFETY FACTORS
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
ASRM nozzle thermal analysis
[NASA-CR-194672] p 928 N94-17277
SAFETY MANAGEMENT
NASA directives master list and index
[NHB-1410.13L] p 1229 N94-15414
New health and safety initiatives at the Department of Energy (DOE) p 1124 N94-16610
SAMARIUM ISOTOPES
Nd-142/Nd-144 in bulk planetary reservoirs, the problem of incomplete mixing of interstellar components and significance of very high precision Nd-145/Nd-144 measurements p 1256 N94-16220
Constraints on the differentiation of the Earth from the coupled Sm-146,147-Nd-142,143 systematics
p 1103 N94-16271
SAMPLED DATA SYSTEMS
The design and analysis of robust feedback systems
[AD-A267152] p 1165 N94-15778
Discrete sliding mode control for nonlinear sampled data systems
[AD-A267500] p 1167 N94-17369
SAMPLERS
Methods to obtain blood samples periodically during exercise research studies while subjects are immersed in water or otherwise inaccessible
[AD-A268227] p 1130 N94-17562
SAMPLING
A mission concept of Phobos/Deimos exploration
p 1287 N94-16387
Exploring the remote sensing of foliar biochemical concentrations with AVIRIS data p 1069 N94-16683
Gas Analysis System
[DE93-014617] p 949 N94-16891
SAN MARCO SATELLITES
Mission San Marco
[NASA-TM-109442] p 878 N94-15341
SANDS
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555
SANDWICH STRUCTURES
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
Effect of Impact Damage and Open Hole on Compressive Strength of Hybrid Composite Laminates
[NASA-CR-194603] p 936 N94-16836
Research in textile composites at KU, Leuven
p 937 N94-16848
SAPPHIRE
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties
[AD-A266398] p 935 N94-16529
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
SARSAT
Life saving satellites
[NASA-TM-109616] p 862 N94-15426
SATELLITE ALTIMETRY
The depths of the largest impact craters on Venus
p 1264 N94-16261
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
SATELLITE ANTENNAS
Proceedings of the 1992 Antenna Applications Symposium, volume 2
[AD-A266916] p 986 N94-14998
Small satellite constellation system: Optimization criteria p 888 N94-17132
Proceedings of the 1992 Antenna Applications Symposium, volume 1
[AD-A268167] p 1005 N94-17431
SATELLITE ATTITUDE CONTROL
MINISAT programme p 896 N94-17182
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626
SATELLITE COMMUNICATION
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
TDRS video clip
[NASA-TM-109585] p 884 N94-15269
Activities of Canadian Satellite Communications, Inc.
[CTN-93-60864] p 994 N94-15959
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment
p 995 N94-16038
The ACTS propagation program p 995 N94-16039
Propagation measurements in Alaska using ACTS beacons p 995 N94-16040
Planned LMSS propagation experiment using ACTS: Preliminary antenna pointing results during mobile operations p 995 N94-16041

Propagation-related AMT design aspects and supporting experiments p 995 N94-16042
Propagation research in Japan p 996 N94-16043
Low-Complexity, High-Performance Bandwidth Efficient Coding and Coded Modulation Techniques for Satellite and Space Communications
[NASA-CR-194623] p 997 N94-16506
Satellite communications installation plan
[AD-A266303] p 1000 N94-16965
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
On-board B-ISDN fast packet switching architectures. Phase 1: Study
[NASA-CR-191143] p 883 N94-17111
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
Low Earth orbit constellations: Orbit control or not p 875 N94-17134
Data processing system for ARSENE ground station: A tool for small satellite control and development p 878 N94-17157
A study on an experimental communication system using microsatellites p 892 N94-17160
LEOCOM-SPES: Low cost message communications p 892 N94-17161
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
S 80/T: A micro satellite system combining high performances and limited resources p 893 N94-17166
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225
NASA Lewis Meshed VSAT Workshop meeting summary
[NASA-TM-106332] p 883 N94-17487
Satellite communications systems and technology. Executive summary
[NASA-TM-109346] p 1006 N94-17661

SATELLITE CONFIGURATIONS
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001

SATELLITE CONTROL
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Low Earth orbit constellations: Orbit control or not p 875 N94-17134
Impact of launching uncertainties on the visibility of communication satellite constellations without orbit control p 889 N94-17135
Data processing system for ARSENE ground station: A tool for small satellite control and development p 878 N94-17157
Satellite control: A comprehensive approach p 878 N94-17158
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
S 80/T: A micro satellite system combining high performances and limited resources p 893 N94-17166

SATELLITE DESIGN
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
Small missions for space science p 874 N94-17142
UoSAT: A decade of experience pioneering microsatellites p 894 N94-17169
A mini satellite called Arsene: The way to make it at a minimum cost p 895 N94-17179
The space technology research vehicle: Development status p 896 N94-17183
On-board spatial scientific experiment project on small satellites p 896 N94-17184
Big results with small space systems: What small systems are doing today p 896 N94-17187
Environment tests for mini satellites p 896 N94-17189
Cost drivers: Why do conventional satellites cost so much? p 897 N94-17190
A conceptual design study for a two-dimensional, electronically scanned thinned array radiometer
[NASA-TM-109051] p 1085 N94-17665

SATELLITE DOPPLER POSITIONING
STARSYS: A view after WARC-92 --- satellite position and messaging system p 893 N94-17168

SATELLITE GUIDANCE
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001

SATELLITE IMAGERY
Assessment of TDI operation of a frame transfer CCD for high resolution imaging from a fast spinning spacecraft p 910 N94-15097
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
Sea ice motions in the central arctic ice central arctic pack ice as inferred from AVHRR imagery
[NASA-CR-194572] p 1112 N94-15701
ERS-1: 18 months in orbit p 990 N94-15888
Almaz p 898 N94-15889
EUVE observations of the Moon p 1250 N94-16185
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267
Three dimensional visualization of GOES cloud data using OCTRESS
[AD-A268102] p 1109 N94-17572
An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595
The Central American cold surge: An observational analysis of the deep southward penetration of North American cold fronts
[AD-A268592] p 1110 N94-17607

SATELLITE INSTRUMENTS
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Eighth International Workshop on Laser Ranging Instrumentation
[NASA-CP-3214] p 911 N94-15552
Laser ranging application to time transfer using geodetic satellite and to other Japanese space programs p 911 N94-15555
Applications of SLR p 911 N94-15556
The precision of today's satellite laser ranging systems p 912 N94-15559
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Preliminary results from the portable standard satellite laser ranging intercomparison with MOBLAS-7 p 913 N94-15568
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586
Improvement of SLR accuracy, a possible new step p 917 N94-15588
Poisson filtering of laser ranging data p 917 N94-15593
Results of the MTLRS-1 upgrade p 877 N94-15610
Satellite laser station Helwan status 1992 p 877 N94-15621
Optical attenuation mechanism upgrades, MOBLAS, and TLRS systems p 922 N94-15622
The third generation SLR station Potsdam no. 7836 p 877 N94-15623
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
ENVISAT ASAR p 898 N94-15892
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
L-shell binning and display of sensor data from the CRRES spacecraft
[AD-A267256] p 888 N94-16990
Big results with small space systems: What small systems are doing today p 896 N94-17187

SATELLITE LIFETIME
Satellite situation report, volume 33, no. 3
[NASA-TM-109278] p 885 N94-15712
Satellite control: A comprehensive approach p 878 N94-17158

SATELLITE NAVIGATION SYSTEMS
BRIDGE: A small scientific satellite for geodesy p 890 N94-17146

SATELLITE NETWORKS
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
SATCOP mission planning software package p 912 N94-15562
ECS: Ninth year in orbit
[ESA-BR-91] p 987 N94-15644
On-board B-ISDN fast packet switching architectures. Phase 1: Study
[NASA-CR-191143] p 883 N94-17111
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
Small satellite constellation system: Optimization criteria p 888 N94-17132
AMIGAU: A prototype tool aimed at mission analysis for satellites and satellite constellations p 888 N94-17133
Low Earth orbit constellations: Orbit control or not p 875 N94-17134
Impact of launching uncertainties on the visibility of communication satellite constellations without orbit control p 889 N94-17135
Small satellite constellation deployment strategies p 878 N94-17138
Delta launch vehicle: Accommodations for small satellites p 878 N94-17139
Adequation of mini satellites to oceanic altimetry missions p 891 N94-17152
Regulation of low Earth orbit satellites p 892 N94-17159
LEOCOM-SPES: Low cost message communications p 892 N94-17161
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
The ORBCOMM system p 893 N94-17163
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage p 893 N94-17164
Feasibility study of a personal communications system IRIDIUM-like p 893 N94-17165
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167
STARSYS: A view after WARC-92 --- satellite position and messaging system p 893 N94-17168
S-80: A satellite for less than 50 MF p 894 N94-17172
Key trends of the small satellite market p 897 N94-17191
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225

SATELLITE OBSERVATION
Finding fish from above --- remote sensing
[NASA-TM-109602] p 1081 N94-15310
ATLAS-2 and UARS correlative measurement opportunities during Space Shuttle mission on April 8-17, 1993
[NASA-TM-109020] p 1105 N94-15480
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11
[NASA-TM-104566-VOL-12] p 1111 N94-15529
ERS-1: 18 months in orbit p 990 N94-15888
ENVISAT ASAR p 898 N94-15892
Some thoughts on future rain mapping missions (TRMM follow-on) p 992 N94-15906
EUVE observations of the Moon p 1250 N94-16185
Galileo photometry of Apollo landing sites p 1259 N94-16234
Big results with small space systems: What small systems are doing today p 896 N94-17187
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439
Optimization of satellite coverage in observing cause and effect changes in the ionosphere, magnetosphere, and solar wind
[AD-A267956] p 1102 N94-17493
An analysis of simulated and actual DMSP SSM/T-2 brightness temperatures
[AD-A268103] p 1109 N94-17573

SATELLITE ORBITS
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Satellite situation report, volume 33, no. 3
[NASA-TM-109278] p 885 N94-15712
ERS-1: 18 months in orbit p 990 N94-15888
On the delivery of planetesimals to a protoplanet in the solar nebula p 1245 N94-16379
Low Earth orbit constellations: Orbit control or not p 875 N94-17134
Impact of launching uncertainties on the visibility of communication satellite constellations without orbit control p 889 N94-17135
Delta launch vehicle: Accommodations for small satellites p 878 N94-17139
CERISE microsatellite system p 894 N94-17170

SATELLITE ORIENTATION
ETALON-1,-2 center of mass correction and array reflectivity p 915 N94-15576
SATELLITE SOUNDING
EOS Laser Atmosphere Wind Sounder (LAWS) investigation
[NASA-CR-193445] p 1109 N94-17525
SATELLITE SURFACES
Crustal structure and igneous processes in a chondritic Io p 1243 N94-16292
The rheology and composition of cryovolcanic flows on icy satellites p 1243 N94-16294
The spectrum of Phobos from Phobos 2 observations at 0.3-2.6 microns: Comparison to previous data and meteorite analogs p 1295 N94-16429
SATELLITE TRACKING
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Eighth International Workshop on Laser Ranging Instrumentation
[NASA-CP-3214] p 911 N94-15552
Laser ranging network performance and routine orbit determination at D-PAF p 911 N94-15554
Satellite signatures in SLR observations p 912 N94-15557
Work at Graz on satellite signatures p 898 N94-15558
The precision of today's satellite laser ranging systems p 912 N94-15559
SLR data screening; location of peak of data distribution p 912 N94-15560
Adaptive median filtering for preprocessing of time series measurements p 912 N94-15561
SATCOP mission planning software package p 912 N94-15562
Preliminary results from the portable standard satellite laser ranging intercomparison with MOBLAS-7 p 913 N94-15568
Tracking capabilities of SPADs for laser ranging p 914 N94-15570
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
The first satellite laser echoes recorded on the streak camera p 914 N94-15574
ETALON-1,-2 center of mass correction and array reflectivity p 915 N94-15576
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Measuring atmospheric dispersion with WLRS in multiple wavelength mode p 916 N94-15582
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
State-of-the-art satellite laser range modeling for geodetic and oceanographic applications p 916 N94-15586
Geometric analysis of satellite laser ranging data p 917 N94-15587
Improvement of SLR accuracy, a possible new step p 917 N94-15588
On the accuracy of ERS-1 orbit predictions p 874 N94-15589
Compensation for the distortion in satellite laser range predictions due to varying pulse travel times p 917 N94-15590
Timebias corrections to predictions p 875 N94-15591
Formation of on-site normal points p 917 N94-15592
Poisson filtering of laser ranging data p 917 N94-15593
Computer networking at SLR stations p 917 N94-15594
HP upgrade operational streamlining p 918 N94-15596
Application of the robust estimate in SLR data preprocessing p 918 N94-15597
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
LLR: Activities in Wettzell p 876 N94-15600
Upgrading of the Borowiec laser station p 877 N94-15604
Development of Shanghai satellite laser ranging station p 877 N94-15605
WLRS --- Wettzell Laser Ranging System (WLRS) p 877 N94-15606
Ground based laser ranging for satellite location p 919 N94-15607
New progress of ranging technology at Wuhan Satellite Laser Ranging Station p 877 N94-15608
Results of the MTLRS-1 upgrade p 877 N94-15610
The new MTLRS-1 receiving system p 877 N94-15611
The new MTLRS transmitting system p 877 N94-15612
Transputer based control system for MTLRS p 877 N94-15613
Optical attenuation mechanism upgrades, MOBLAS, and TLRS systems p 922 N94-15622
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
Satellite control: A comprehensive approach p 878 N94-17158
SATELLITE TRANSMISSION
Almaz p 898 N94-15889
BRIDGE: A small scientific satellite for geodesy p 890 N94-17146
SATELLITE-BORNE INSTRUMENTS
The XMM pn-CCD detector system: First results p 900 N94-15034
Prospects for high pressure imaging gas scintillation drift chambers p 901 N94-15040
Development of an ultra violet auroral imager for the Freja project p 904 N94-15060
The high pressure gas scintillation proportional counter for SAX p 906 N94-15076
A new detector concept for energetic auroral x ray imaging p 907 N94-15081
The laboratory performance of the short wavelength instrument for the Along Track Scanning Radiometer ATSR-2 (initial results) p 908 N94-15088
ENVISAT ASAR p 898 N94-15892
Transparent conductive coatings in the far ultraviolet
[NASA-CR-194632] p 1191 N94-16024
Strategy for a small satellite program and a proposal for a first mission p 874 N94-17143
Cosmic dust and space debris measurements on board the small satellites HITEN and BREM-SAT p 890 N94-17147
Environment tests for mini satellites p 896 N94-17189
SATELLITE-BORNE RADAR
Almaz p 898 N94-15889
SATURATION
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
SATURN (PLANET)
NASA images 12 --- Voyager encounters
[NASA-TM-109417] p 1247 N94-15511
Life and the solar system: The CRAF and Cassini missions
[NASA-TM-109422] p 1247 N94-15513
SATURN ATMOSPHERE
Vertical structure models of the 1990 equatorial disturbance on Saturn p 1277 N94-16333
SATURN RINGS
Voyager encounter highlights
[NASA-TM-109420] p 1246 N94-15239
Mass of Saturn's A ring p 1263 N94-16252
SAUDI ARABIA
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina p 1251 N94-16196
SCALARS
Scalar limitations of diffractive optical elements p 1194 N94-17336
SCALE (CORROSION)
Effects of alloying and temperature on the high-temperature oxidation of Cr-Cr2Nb
[DE93-015800] p 957 N94-16163
SCALE MODELS
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034
SCALING LAWS
Swept shock/boundary-layer interactions: Scaling laws, flowfield structure, and experimental methods p 1017 N94-15197
The size of complex craters p 1262 N94-16249
Evolution of hadron beams under intrabeam scattering
[DE93-014330] p 1184 N94-16826
SCANNERS
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933
Laser beam steering device p 1045 N94-17357
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
SCANNING
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
SCANNING ELECTRON MICROSCOPY
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials
[DE93-015333] p 947 N94-16014
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
SCANNING TUNNELING MICROSCOPY
Method and apparatus for performing scanning tunneling optical absorption spectroscopy
[AD-D015796] p 948 N94-16539
Methods of tunneling spectroscopy with the STM
[AD-A266507] p 948 N94-16787
SCATTERING
Effects of spin-orbit coupling on disordered mesoscopic systems
[ITN-93-85220] p 1180 N94-15288
Interfacial structure of lattice mismatched bcc(110)/bcc(110) transition metal superlattices
[DE93-015162] p 1208 N94-16058
Application of symmetry properties to polarimetric remote sensing with JPL AIRSAR data p 1079 N94-16752
External calibration of polarimetric radar images using distributed targets p 1079 N94-16753
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
Evolution of hadron beams under intrabeam scattering
[DE93-014330] p 1184 N94-16826
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
SCATTERING AMPLITUDE
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
Quark-loop effects in high energy spin-flip processes
[DE93-626692] p 1188 N94-17313
SCATTERING COEFFICIENTS
Radar response of vegetation: An overview p 991 N94-15898
Multifrequency observations p 992 N94-15902
Application of symmetry properties to polarimetric remote sensing with JPL AIRSAR data p 1079 N94-16752
SCATTERING CROSS SECTIONS
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283
SCHEDULES
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943
HSTS: Integrating planning and scheduling
[AD-A266991] p 1222 N94-15213
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396
SCHEDULING
HSTS: Integrating planning and scheduling
[AD-A266991] p 1222 N94-15213
Stochastic scheduling in in-forest networks
[INRIA-RR-1719] p 1164 N94-15695
Fast interrupt priority management in operating system kernels
[AD-A266638] p 1140 N94-15744
Processor capacity reserves for multimedia operating systems
[AD-A266639] p 1158 N94-15745
Efficient scheduling of real-time compute-intensive periodic graphs on large grain data flow multiprocessor
[AD-A267444] p 1141 N94-17030
Stochastic scheduling in a multiclass G/G/1 queue
[INRIA-RR-1746] p 1162 N94-17537
SCHLIEREN PHOTOGRAPHY
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
SCHOOLS
Developments in the Higher Technical Aerospace Education p 854 N94-15130

From the Moons of Jupiter to the Milky Way
[NASA-CR-194649] p 1240 N94-17059
SCHOTTKY DIODES
Schottky barrier focal plane arrays for SWIR and MWIR p 903 N94-15050
SCHROEDINGER EQUATION
Many-body quantum mechanical studies of molecular clusters
[AD-A266624] p 1180 N94-15727
SCHWASSMANN-WACHMANN COMET
Orbital evolution of dust from comet Schwassmann-Wachmann 1: A case of one-to-one resonance trapping p 1242 N94-16270
SCIENCE
From the Moons of Jupiter to the Milky Way
[NASA-CR-194649] p 1240 N94-17059
SCIENTIFIC SATELLITES
The definition of a scientific policy: ESRO's satellite programme in 1969-1973
[ESA-HSR-6] p 1303 N94-16500
Choosing ESRO's first scientific satellites
[ESA-HSR-3] p 887 N94-16523
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft
[AD-A266404] p 1101 N94-16551
SCIENTIFIC VISUALIZATION
The 1989 computational fluid dynamics highlights
[NASA-TM-109635] p 1018 N94-15246
The 1986 computational fluid dynamics highlights
[NASA-TM-109645] p 1019 N94-15431
Computing science and statistics. Volume 24: Graphics and visualization
[AD-A266571] p 1150 N94-16721
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319
TDNOVA interactive graphics
[AD-A268000] p 1156 N94-17530
SCIENTISTS
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17291
SCINTILLATION
Optical ionospheric instrumentation and research
[AD-A266403] p 1192 N94-16550
Scintillation mechanism in stoichiometric cerium compounds
[DE93-015499] p 948 N94-16771
SCINTILLATION COUNTERS
Prospects for high pressure imaging gas scintillation drift chambers p 901 N94-15040
The high pressure gas scintillation proportional counter for SAX p 906 N94-15076
A new detector concept for energetic auroral x ray imaging p 907 N94-15081
Applications for large area silicon drift detectors on x ray and gamma ray astronomy p 909 N94-15090
Scintillation mechanism in stoichiometric cerium compounds
[DE93-015499] p 948 N94-16771
SCORPIUS CONSTELLATION
Mass of Saturn's A ring p 1263 N94-16252
SEA ICE
Exploring the southern ocean response to climate change
[NASA-CR-194601] p 1112 N94-15680
Sea ice motions in the central arctic ice central arctic pack ice as inferred from AVHRR imagery
[NASA-CR-194572] p 1112 N94-15701
Imaging radar studies of polar ice p 991 N94-15899
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439
Arctic cyclones and Marginal Ice Zone (MIZ) variability
[AD-A268610] p 1109 N94-17465
SEA LEVEL
Atmospheric transmittance between 1.0 and 2.0 micrometers
[AD-A267076] p 1098 N94-15539
The Central American cold surge: An observational analysis of the deep southward penetration of North American cold fronts
[AD-A268592] p 1110 N94-17607
SEA SURFACE TEMPERATURE
The laboratory performance of the short wavelength instrument for the Along Track Scanning Radiometer ATSR-2 (initial results) p 908 N94-15088
SEA WATER
Earth's partial pressure of CO2 over the past 120 Ma: evidence from Ce anomalies in the deep (greater than 600 m) Pacific Ocean, 1 p 1104 N94-16358
Regulation of attached bacterial growth by adsorbed proteins
[AD-A267756] p 1118 N94-17275
Chemical tracer studies at IOSDL. 3: The measurement of silicate, nitrate and phosphate in seawater
[IOS-302-1992] p 1114 N94-17489
SEALING
High temperature hydraulic seals
[AD-A268257] p 1048 N94-17433
SEALS (STOPPERS)
Development of braided fiber seals for engine applications p 939 N94-16859
ASRM nozzle thermal analysis
[NASA-CR-194672] p 928 N94-17277
High temperature hydraulic seals
[AD-A268257] p 1048 N94-17433
SEAMS (JOINTS)
Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
SEARCH RADAR
Alternative optical architectures for multichannel adaptive optical processing
[AD-A267052] p 1189 N94-15664
SEARCHING
A browsing tool for the Internet Logical Library of the HPCC Software Exchange
[NASA-CR-194545] p 1143 N94-15189
SEAS
On the application and evaluation of the relocatable diecast ocean circulation model in coastal and semi-enclosed seas
[AD-A266626] p 1112 N94-15771
Field observations of infragravity, sea and swell directional spectra
[AD-A266439] p 1113 N94-16561
SEASONS
Global and regional/seasonal color mosaics of Mars p 1288 N94-16393
SEATS
Basic principles of helicopter crashworthiness
[AD-A267099] p 862 N94-15637
Ergonomics in the office environment p 1124 N94-16612
SECONDARY FLOW
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
SECONDARY RADAR
Diffraction of microwaves at rectangular facades of buildings with and without ground reflections (Fresnel-Kirchhoff-Approximation)
[DLR-FB-92-35] p 987 N94-15155
SECURITY
Classified information: Volume could be reduced by changing retention policy
[AD-A266938] p 1228 N94-15176
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306
SEDIMENT TRANSPORT
Louisiana delta study
[NASA-TM-109622] p 1095 N94-15408
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426
SEDIMENTARY ROCKS
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212
Geomorphic processes in the Argyre-Dorsa Argentea region of Mars p 1270 N94-16293
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378
SEDIMENTS
Efficacy of flocculating and other emergency water purification tablets
[AD-A266695] p 1148 N94-15840
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina p 1251 N94-16196
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426
SEGMENTS
Segmenting textured 3D surfaces using the space/frequency representation
[AD-A266960] p 1163 N94-14968
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 925 N94-15927
SEISMIC ENERGY
NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125
SEISMIC WAVES
Broadband teleseismic array recording in the Adirondack Mountains, New York State
[AD-A267290] p 1097 N94-14960
Generation of artificial helioseismic time-series
[NASA-CR-194612] p 1299 N94-15968
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009
NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125
A search for evidence of nonlinear elasticity in the earth
[DE93-015279] p 1102 N94-17252
Preliminary estimates of frequency-direction spectra derived from the SAMSON pressure gage array, November 1990 to May 1991
[AD-A267960] p 1114 N94-17497
SEISMOGRAMS
NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125
SEISMOGRAPHS
Broadband teleseismic array recording in the Adirondack Mountains, New York State
[AD-A267290] p 1097 N94-14960
SEISMOLOGY
Papers presented at the Eleventh International Symposium on Earth Tides
[COMMUNICATIONS-SER-B-158] p 1098 N94-15800
NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125
High-resolution seismic reflection survey at the Manson crater, Iowa p 1103 N94-16307
The seismic response of an aquifer to the propagation of an impact generated shock wave: A possible trigger of the Martian outflow channels? p 1281 N94-16354
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036
SELECTIVE DISSEMINATION OF INFORMATION
Classified information: Volume could be reduced by changing retention policy
[AD-A266938] p 1228 N94-15176
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937
NASA Electronic Library System (NELS): The system impact of security
[NASA-CR-194614] p 1231 N94-16499
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306
SELECTIVE SURFACES
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797
SELENOLOGY
Mixing model analysis of telescopic lunar spectra p 1284 N94-16371
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378
SELF ALIGNMENT
Neural-network-directed alignment of optical systems using the laser-beam spatial filter as an example
[NASA-TP-3372] p 1034 N94-15961
SELF CONSISTENT FIELDS
Continuum solvent models for computational chemistry
[DE93-016329] p 953 N94-17660
3D and r,z particle simulations of heavy ion fusion beams
[DE93-013417] p 1205 N94-17670
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674
SEMANTICS
Combinatorial semantics
[TR-444] p 1149 N94-16575
Monads and comonads in intensional semantics
[AD-A266522] p 1151 N94-16790
SEMICONDUCTING FILMS
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553

SEMICONDUCTOR DEVICES
Interface properties of wide bandgap semiconductor structures
[AD-A268269] p 1215 N94-17377
Smart Power: New power integrated circuit technologies and their applications
[VTT-TIED-1358] p 1015 N94-17546
Proceedings of the 6th International Conference on Narrow Gap Semiconductors
[AD-A268097] p 1015 N94-17570
SEMICONDUCTOR DIODES
Infrared detector annealing and calibration with IR-laser diodes p 909 N94-15092
SEMICONDUCTOR JUNCTIONS
A new approach to optical photon detection p 899 N94-15028
Superconductive x ray photon detectors p 900 N94-15031
Atomic layer epitaxy of boron nitride
[AD-A266260] p 1212 N94-16932
SEMICONDUCTOR LASERS
Infrared detector annealing and calibration with IR-laser diodes p 909 N94-15092
Nd:YLF laser for airborne/spaceborne laser ranging p 913 N94-15563
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 1038 N94-15932
Fundamental theory of light for applications: Notes for five informal lectures
[DE93-016463] p 1192 N94-16953
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
Nonintrusive fast response oxygen monitoring system for high temperature flows
[NASA-CR-4553] p 1036 N94-17655
SEMICONDUCTORS (MATERIALS)
Electronic and atomic structure of semiconductors and of high-temperature superconductors
[AD-A266805] p 1205 N94-14913
Transparent conductive coatings in the far ultraviolet
[NASA-CR-194632] p 1191 N94-16024
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
Apparatus for and a method of growing thin films of elemental semiconductors
[AD-D015813] p 1210 N94-16487
Properties of thin films for high temperature flow sensors
[NASA-CR-191526] p 967 N94-16541
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Ultrafast processes in tunneling microstructure devices
[AD-A266570] p 1210 N94-16720
Methods of tunneling spectroscopy with the STM
[AD-A266507] p 948 N94-16787
JSEP fellowship
[AD-A266568] p 1211 N94-16800
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
Activation and deactivation of high concentration arsenic with some evidence of precipitation
[DE93-016437] p 950 N94-16952
Vectorial electron transfer in spatially ordered arrays
[DE93-018150] p 1185 N94-16971
Surface flashover of semiconductors: A fundamental study
[AD-A267382] p 1012 N94-17023
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Photo-assisted epitaxial growth for III-V semiconductors
[AD-A267889] p 1213 N94-17042
Investigation of the optical, electronic, and structural properties of fiber optic glasses
[AD-A267645] p 971 N94-17204
A state-of-the-art plasma polymerization coater for ICF targets
[DE93-016452] p 1204 N94-17237
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307
Subwavelength structured surfaces and their applications p 1194 N94-17337
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349
OSA proceedings on Ultrafast Electronics and Optoelectronics, volume 14
[AD-A267972] p 1014 N94-17410
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422
Mechanical properties and crystal growth studies of semiconductor alloys
[AD-A268144] p 1216 N94-17454
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560
Proceedings of the 6th International Conference on Narrow Gap Semiconductors
[AD-A268097] p 1015 N94-17570
Rare earth doped III-V semiconductors for optoelectronics
[AD-A268279] p 1216 N94-17577
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651
SENSITIVITY
The role of constitutive and inducible processes in the response of human squamous cell carcinoma cell lines to ionizing radiation
[DE93-015150] p 1129 N94-16970
SENSORIMOTOR PERFORMANCE
Characteristics of aimed arm movements in humans under low gravity p 980 N94-16093
SENSORS
Passive tracking of a target using an array of sensors
[DE93-015870] p 997 N94-16169
Micro-optics technology and sensor systems applications p 1197 N94-17350
SENSORY STIMULATION
States of awareness 1: Subliminal perception relationship to situational awareness
[AD-A267249] p 1132 N94-16942
SENTENCES
The impact of report of investigation writing style on the assessment times, impressions, perceptions and preferences of adjudicators
[AD-A265748] p 1223 N94-15682
Segment-based acoustic models for continuous speech recognition
[AD-A267138] p 988 N94-15691
SEPARATED FLOW
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
Unsteady phenomena in shock wave/boundary layer interaction p 1017 N94-15200
Hypersonic shock wave boundary layer interactions over simplified deflected control surface configurations p 1018 N94-15203
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
SEPARATION
Electrophoresis visualisation p 944 N94-15163
SEPARATORS
The bootstrapped algorithm: Fast algorithm for blind signal separation
[AD-A266671] p 1147 N94-15772
SEQUENCING
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725
FSM test: A functional test generation system for sequential circuits
[REPT-93-017] p 1014 N94-17505
SEQUENTIAL CONTROL
Digital laser range finder emulator
[AD-D015811] p 1040 N94-16540
Temporal segmentation of tasks from human hand motion
[AD-A266596] p 1166 N94-16725
SERIES EXPANSION
Analysis of an electromagnetic field in the vicinity of a caustic by asymptotic methods
[IFTR-12/1991] p 998 N94-16653
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
SERVICE LIFE
Field investigation of the relationship between battery size and PV system performance
[DE93-016503] p 1016 N94-17671
SERVOMECHANISMS
Dynamic testbed laboratory and micro-optics p 1199 N94-14986
A complete study of differential wax-wane focus servo technique p 1199 N94-14996
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392
SET THEORY
Reductions to sets of low information content
[TR-417] p 1150 N94-16579
A fuzzy method for preliminary design random access memory failure rate prediction
[AD-A267948] p 1055 N94-17044
SEYFERT GALAXIES
Variability of the Seyfert galaxy MKN 766 in the Rosat all sky survey
[MPE-PREPRINT-221] p 1240 N94-17591
SH-3 HELICOPTER
Evaluation of Night Vision Goggles (NVG) for maritime search and rescue (HH-3/HH-60) comparison report
[AD-A266493] p 1138 N94-16793
SHADOWS
Cooperativity and 3-D representation
[AD-A267180] p 1131 N94-15694
A field measure of the shade fraction p 1068 N94-16677
Mapping the spectral variability in photosynthetic and non-photosynthetic vegetation, soils, and shade using AVIRIS p 1068 N94-16679
Multitemporal diurnal AVIRIS images of a forested ecosystem p 1074 N94-16709
SHAPE FUNCTIONS
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
SHAPES
Segmenting textured 3D surfaces using the space/frequency representation
[AD-A266960] p 1163 N94-14968
Process for shaping articles from electrosetting compositions
[AD-D015787] p 935 N94-16534
SHARP LEADING EDGES
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
SHEAR FLOW
The turbulent wall jet
[AD-A267675] p 855 N94-14963
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
Implementation of an anisotropic turbulence model in the COMMIX-1C/ATM computer code
[DE93-015541] p 1023 N94-16444
Search for chaos in free shear flows
[AD-A266245] p 1023 N94-16470
Investigation of high-speed free shear flows using improved pressure-strain correlated Reynolds stress turbulence model
[NASA-CR-194661] p 1027 N94-17127
A numerical investigation of energy transfer and subgrid-scale eddy-viscosity in homogeneous, isotropic, and shear turbulence
[AD-A267265] p 1029 N94-17363
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
SHEAR LAYERS
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Search for chaos in free shear flows
[AD-A266245] p 1023 N94-16470
Selected computations of transonic cavity flows p 858 N94-16511
Unsteady fluid and optical simulation of transonic aero-windows
[AIAA PAPER 93-3017] p 858 N94-16512
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
Investigation of high-speed free shear flows using improved pressure-strain correlated Reynolds stress turbulence model
[NASA-CR-194661] p 1027 N94-17127
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
Chemical reactions in turbulent mixing flows
[AD-A268287] p 861 N94-17580

SHEAR PROPERTIES
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Shear wave measurements in shock-induced, high-pressure phases
[DE93-016461] p 1062 N94-17664
SHEAR STRESS
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
Theoretical study of laminar film condensation on horizontal elliptical tubes under conditions of free and forced convection
[AD-A267161] p 1021 N94-15737
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
Evaluation of the interfacial mechanical properties in fiber-reinforced ceramic composites
[DE93-015494] p 935 N94-16461
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
SHEATHS
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
SHELL STABILITY
Comparison of level-1 and level-2 buckling and postbuckling solutions
[NASA-CR-194611] p 1057 N94-15154
SHELL THEORY
Sound radiation from infinite laminated composite shell with periodic rib stiffening
[DRA/TM(USGR)92326] p 933 N94-15699
SHELLS (STRUCTURAL FORMS)
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
Comparison of level-1 and level-2 buckling and postbuckling solutions
[NASA-CR-194611] p 1057 N94-15154
Progress in the modeling of the shock response and mitigation of thick composite shells
[AD-A267009] p 1057 N94-15524
SHERGOTTITES
Nitrates in SNCs: Implications for the nitrogen cycle on Mars p 1251 N94-16193
Potassium isotope cosmochemistry, volatile depletion and the origin of the Earth p 953 N94-16259
Os isotopes in SNC meteorites and their implications to the early evolution of Mars and Earth p 1242 N94-16272
Martian carbon dioxide: Clues from isotopes in SNC meteorites p 1270 N94-16295
The dregs of crystallization in Zagami p 1245 N94-16390
SHIPS
The free decay of coupled heave and pitch motions of a model frigate
[DRA/TM(AWMH)92340] p 1146 N94-15702
SHOCK (PHYSIOLOGY)
A review of the efficacy of 7.5 percent NaCl/6 percent Dextran-70 (HSD) in experimental animals and humans
[AD-A266633] p 1122 N94-15740
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Transcapillary exchange
[AD-A266427] p 1123 N94-16544
A mathematical model for the study of hemorrhagic shock and fluid resuscitation: Exchange of fluid and solutes between vascular, interstitial, and tissue cell compartments
[AD-A266426] p 1123 N94-16558
Increased vascular resistance with hemoglobin-based oxygen carriers
[AD-A266454] p 1123 N94-16565
SHOCK ABSORBERS
Mechanical energy absorber
[NASA-CASE-MSC-22111-1] p 1047 N94-15966
SHOCK FRONTS
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238
SHOCK LOADS
Progress in the modeling of the shock response and mitigation of thick composite shells
[AD-A267009] p 1057 N94-15524
Design of a cruciform bend specimen for determination of out-of-plane biaxial tensile stress effects on fracture toughness for shallow cracks
[DE93-015455] p 1059 N94-16104
Orientation of Planar Deformation Features (PDFs) in quartz p 1219 N94-16341
SHOCK MEASURING INSTRUMENTS
Determination of equivalent circuit for PVDF shock-pressure gauges
[DE93-016492] p 1034 N94-16452
SHOCK TESTS
CO2 production by impact in carbonates? An ATEM and stable isotope (C,O) study p 954 N94-16383
SHOCK TUBES
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
SHOCK WAVE INTERACTION
Laser Doppler velocimetry measurements across a normal shock in transonic flow
[AD-A267240] p 855 N94-14973
Special course on Shock-Wave/Boundary-Layer Interactions in Supersonic and Hypersonic Flows
[AGARD-R-792] p 1017 N94-15196
Swept shock/boundary-layer interactions: Scaling laws, flowfield structure, and experimental methods p 1017 N94-15197
Swept shock wave/laminar boundary layer interactions, experimental, and numerical results p 1017 N94-15198
Numerical simulation of 3-D shock wave turbulent boundary layer interactions p 1017 N94-15199
Unsteady phenomena in shock wave/boundary layer interaction p 1017 N94-15200
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling p 1018 N94-15201
Turbulence modelling for shock wave/boundary layer interactions specific issues and examples of applications p 1018 N94-15202
Hypersonic shock wave boundary layer interactions over simplified deflected control surface configurations p 1018 N94-15203
On the interaction between the shock wave attached to a wedge and freestream disturbances
[NASA-CR-191528] p 1019 N94-15478
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
An investigation of oblique shock/boundary layer interaction control
[AD-A268106] p 861 N94-17574
SHOCK WAVE PROPAGATION
Laser-shock damage of iron-based materials
[AD-A267196] p 1038 N94-15852
On possible Mn-53 heterogeneity in the early solar system p 1244 N94-16344
SHOCK WAVES
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
Gas-grain energy transfer in solar nebula shock waves: Implications for the origin of chondrules p 1262 N94-16251
Orientation of Planar Deformation Features (PDFs) in quartz p 1219 N94-16341
The seismic response of an aquifer to the propagation of an impact generated shock wave: A possible trigger of the Martian outflow channels? p 1281 N94-16354
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
The shock Hugoniot of 316 SS and sound velocity measurements
[DE93-016525] p 1178 N94-16955
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
Experimental studies on a gas dynamic laser with narrow throat and high area-ratio grid nozzles
[AD-A267818] p 1042 N94-17400
An experimental study of fluctuating wall pressures in a highly swept, sharp fin-induced, Mach 5 shock wave/turbulent boundary layer interaction
[AD-A268394] p 861 N94-17461
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630
Shear wave measurements in shock-induced, high-pressure phases
[DE93-016461] p 1062 N94-17664
SHORT CIRCUITS
A device for testing cables
[NASA-CASE-LAR-14093-1] p 1010 N94-15988
SHORT TAKEOFF AIRCRAFT
An experimental study of ASTOVL related jet flows to produce CFD code validation data. Phase 3: Results of experiments
[TT-9203] p 1020 N94-15645
SHROUDED PROPELLERS
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571
SHUTTLE ENGINEERING SIMULATOR
STS-32 LDEF approach in SES
[NASA-TM-109474] p 880 N94-15379
SHUTTLE IMAGING RADAR
Spaceborne Imaging Radar-C instrument p 990 N94-15890
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
Spaceborne radar for geoscientific applications in North China p 993 N94-15915
SIBERIA
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
SIDELOBES
Adaptive beamforming with imperfect arrays: Pattern effects and their partial correction
[AD-A267079] p 987 N94-15541
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
SIDESLIP
Experimental study of vortex and aerodynamic characteristics of stack wings with sideslip
[AD-A267722] p 860 N94-17274
SIDEWINDER MISSILES
Parametric study of a finite element model of the Sidewinder missile
[AD-A267245] p 865 N94-14976
SIGNAL ANALYSIS
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194577] p 1082 N94-15646
Automatic suppression of anomalous propagation clutter for noncoherent weather radars
[KNMI-WR-92-06] p 1004 N94-17407
SIGNAL DETECTION
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194577] p 1082 N94-15646
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
Search for Extraterrestrial Intelligence (SETI) p 1125 N94-16620
Efficient computational methods to study new and innovative signal detection techniques in SETI
[NASA-CR-193602] p 998 N94-16649
States of awareness 1: Subliminal perception relationship to situational awareness
[AD-A267249] p 1132 N94-16942
Signal detection in correlated Gaussian and non-Gaussian radar clutter
[AD-A267453] p 1001 N94-17033
SIGNAL DETECTORS
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Signal detection in correlated Gaussian and non-Gaussian radar clutter
[AD-A267453] p 1001 N94-17033
SIGNAL FADING
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372

SIGNAL GENERATORS
Synchronous sampling phase and amplitude detection method and apparatus
[NASA-CASE-LAR-14725-1] p 1050 N94-15870
Improvements to pulsed phase locked loop strain monitor
[NASA-CASE-LAR-14887-1] p 1033 N94-15877
SIGNAL PROCESSING
VLSI for high-speed digital signal processing
[AD-A267709] p 1007 N94-14936
Optical residue processing module
[AD-A267721] p 1188 N94-14940
Compact disk error measurements
p 1227 N94-14988
Broadband conventional beamforming incorporating adaptive equalization
[AD-A267090] p 987 N94-15544
New methods of generation of ultrashort laser pulses for ranging p 913 N94-15565
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Exploitation of cyclostationarity for signal-parameter estimation and system identification
[AD-A267137] p 988 N94-15690
Higher order statistics in signal processing
[FFI-92/2008] p 989 N94-15714
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
The bootstrapped algorithm: Fast algorithm for blind signal separation
[AD-A266671] p 1147 N94-15772
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
Synthetic aperture radar signal processing: Trends and technologies p 992 N94-15908
Windshear detection radar signal processing studies
[NASA-CR-194615] p 994 N94-16022
Passive tracking of a target using an array of sensors
[DE93-015870] p 997 N94-16169
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
Search for Extraterrestrial Intelligence (SETI)
p 1125 N94-16620
Efficient computational methods to study new and innovative signal detection techniques in SETI
[NASA-CR-193602] p 998 N94-16649
Reducing data dimension to lower signal processing computational requirements and maximize performance
[AD-A266606] p 999 N94-16728
Analysis of temporal symmetry in non-gaussian random fields
[AD-A266496] p 999 N94-16794
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919
Reference frames in vision
[AD-A266174] p 1132 N94-16925
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Intelligent use of CFAR algorithms
[AD-A267755] p 1003 N94-17206
Method and apparatus for spur-reduced digital sinusoid synthesis
[NASA-CASE-NPO-18789-1-CU] p 1154 N94-17326
Asymmetric three-beam binary optic grating
p 1195 N94-17340
Theory of dispersive microlenses
p 1198 N94-17361
Expansions of cumulative distribution functions directly from characteristic functions
[AD-A267727] p 1173 N94-17372
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651
SIGNAL TO NOISE RATIOS
Effects of window size and shape on accuracy of subpixel centroid estimation of target images
[NASA-TP-3331] p 1034 N94-15990
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124
The Clementine instrument complement
p 1086 N94-16370
Simulation of ASTER data using AVIRIS images
p 1071 N94-16693
Moving target indicator using higher order statistics
[AD-D015890] p 1000 N94-16917
High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918
Performance of coded coherent FSK lightwave system with noncoherent detection
[AD-A267442] p 1193 N94-17028
SYDONI: An intensified system for night observation
p 891 N94-17153
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549
SIGNAL TRANSMISSION
VDM specification of the MD4 message digest algorithm
[NPL-DITC-204/92] p 1142 N94-14944
RAISE specification of the MD4 message digest algorithm
[NPL-DITC-206/92] p 1142 N94-15010
Improvements to pulsed phase locked loop strain monitor
[NASA-CASE-LAR-14887-1] p 1033 N94-15877
An electroacoustic transducer for purposes of photoacoustic spectroscopy
[IFTR-7/1992] p 1013 N94-17071
Wide angle, single screen, gridded square-loop frequency selective surface for diplexing two closely separated frequency bands
[NASA-CASE-NPO-18664-1-CU] p 1237 N94-17438
A virtual acoustic orientation instrument
[AD-A268181] p 1134 N94-17510
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549
SIGNATURE ANALYSIS
Satellite signatures in SLR observations
p 912 N94-15557
SIGNATURES
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526
Satellite signatures in SLR observations
p 912 N94-15557
Work at Graz on satellite signatures
p 898 N94-15558
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
SIGNS AND SYMPTOMS
Flight simulator-induced sickness and visual displays evaluation
[AD-A267019] p 1122 N94-15845
Arsenic surveillance program p 1127 N94-16637
Predicting radiation induced performance decrements of AH-1 helicopter crews. Volume 1: Predicted veersus actual performance of AH-1 crews induced with symptoms simulating radiation sickness
[AD-A268376] p 1138 N94-17460
SILANES
Cathode sheath charge transfer effects
[AD-A268393] p 1186 N94-17536
SILICA GLASS
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
SILICATES
NMR and theoretical investigation of cation binding with sol-gel silicates
[AD-A266999] p 963 N94-15631
Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180
Iron oxide bands in the visible and near-infrared reflectance spectra of primitive asteroids
p 1242 N94-16274
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
Partitioning of Nb, Mo, Ba, Ce, Pb, Th and U between immiscible carbonate and silicate liquids: Evaluating the effects of P2O5,F, and carbonate composition
p 953 N94-16283
Experimental partitioning of Zr, Ti, and Nb between silicate liquid and a complex noble metal alloy and the partitioning of Ti between perovskite and platinum metal
p 962 N94-16287
Complex radiation-thermal history of Kaidun meteorite on data of track study of silicate minerals
p 1243 N94-16297
Catalytic crystallization of ices by small silicate smokes at temperatures less than 20K p 1219 N94-16420
Transformation toughening of composite ceramics
[AD-A267304] p 971 N94-16980
Chemical tracer studies at IOSDL. 3: The measurement of silicate, nitrate and phosphate in seawater
[IOS-302-1992] p 1114 N94-17489
SILICIDES
Schottky barrier focal plane arrays for SWIR and MWIR p 903 N94-15050
Environmental embrittlement in ordered intermetallic alloys
[DE93-015307] p 955 N94-15830
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon
[DE93-015449] p 1209 N94-16066
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
SILICON
BIB photodetectors based on antimony doped silicon
p 902 N94-15047
Gamma large area silicon telescope: Applying Si strip detector technology to the detection of gamma rays in space p 904 N94-15061
CCD's on high resistivity bulk silicon for x ray spectroscopy on XMM p 907 N94-15080
Silicon gallium doped photoconductor development for the AROME balloon borne instrument
p 908 N94-15087
Applications for large area silicon drift detectors on x ray and gamma ray astronomy p 909 N94-15090
Silicon radiation sensor systems for gamma and x ray detection at SI p 909 N94-15095
The epitaxial Si x ray bolometer an alternative to ion implanted devices p 911 N94-15103
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Thermal disorder in adsorbed Cl on Si(100)
[AD-A266295] p 1210 N94-16476
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
Structural characterization of epitaxial layers for infrared detectors
[AD-A267875] p 940 N94-17013
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing
[NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327
Low voltage electron beam lithography
[AD-A267865] p 1215 N94-17389
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649
SILICON CARBIDES
Improved composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 934 N94-15926
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite
[NASA-CASE-LEW-15263-2] p 934 N94-15929
NEXTEL(trademark)/SiC composites using forced chemical vapor infiltration
[DE93-013532] p 934 N94-16008
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites
[DE93-015688] p 934 N94-16158
Do SiC grains in Orgueil differ from those in Murchison? p 1242 N94-16260
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites
p 1244 N94-16343
Properties of thin films for high temperature flow sensors
[NASA-CR-191526] p 967 N94-16541
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
Diamond growth on carbide surfaces using a selective etching technique
[AD-A267989] p 973 N94-17413
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466

Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490

SILICON DIOXIDE

NMR and theoretical investigation of cation binding with sol-gel silicates
[AD-A266999] p 963 N94-15631
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses
[DE93-015304] p 965 N94-15828
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
Silica-bearing objects in the Dengli H3.8 and Gorlovka H3-4 chondrites p 1242 N94-16265
An investigation of the hydrolytic resistance of sodium-calcium plate glass with a layer of silica deposited on its surface
[IFTR-34/1991] p 971 N94-17120
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

SILICON FILMS

Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon
[DE93-015449] p 1209 N94-16066

SILICON ISOTOPES

Simulation studies for surfaces and materials strength
[NASA-CR-193387] p 1056 N94-15004
Do SiC grains in Orgueil differ from those in Murchison? p 1242 N94-16260

SILICON NITRIDES

Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
Multiaxial deformation and life prediction model and experimental data for advanced silicon nitride ceramics
[DE93-015450] p 967 N94-16067
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
Detection of subsurface defects in machined silicon nitride ceramics by optical scattering methods
[DE93-015554] p 968 N94-16658
Development of a constitutive model for creep and life prediction of advanced silicon nitride ceramics
[DE93-015894] p 968 N94-16813
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843
Processing of complex sintered reaction bonded silicon nitride parts by microwave heating
[DE93-015811] p 969 N94-16877

SILICON OXIDES

SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

SILICON RADIATION DETECTORS

Gamma large area silicon telescope: Applying Si strip detector technology to the detection of gamma rays in space p 904 N94-15061

SILICON TRANSISTORS

Technology transfers and reliable oxides
[AD-A266948] p 1175 N94-15758

SILX

Materials Research Society Symposium Proceedings, Volume 292: Biomolecular Materials
[AD-A265776] p 1116 N94-15138

SILOXANES

Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490

SILVER

Performance of silvered Teflon thermal control blankets on spacecraft
[AD-A266284] p 887 N94-16909
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676

SIM

STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452

SIMPLE HARMONIC MOTION

An asymptotic expansion of an electromagnetic field in the velocity of a caustic in the form of simple waves
[IFTR-14/1991] p 1002 N94-17048

SIMPLIFICATION

Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385

SIMULATION

Fuzzy control and fuzzy kinematic mapping for a redundant space robot
[AD-A266866] p 1163 N94-14950
STS-26 generic integrated IUS deploy simulation
[NASA-TM-109562] p 875 N94-15332
STS-32 LDEF approach in SES
[NASA-TM-109474] p 880 N94-15379
STS-31 HST deploy sim in SMS and MOCR
[NASA-TM-109482] p 876 N94-15449
STS-26 long duration simulation: Crew entering SMS
[NASA-TM-109560] p 876 N94-15474
A measurement station for study of Earth moving tools and ground cutting processes
[IFTR-10/1991] p 985 N94-17068

SIMULATORS

STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
The Spacelab IPS Star Simulator
[TABES PAPER 93-650] p 877 N94-16150

SINE WAVES

Method and apparatus for spur-reduced digital sinusoid synthesis
[NASA-CASE-NPO-18789-1-CU] p 1154 N94-17326

SINGLE CRYSTALS

Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization p 974 N94-14982
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
Orientation of Planar Deformation Features (PDFs) in quartz p 1219 N94-16341
Growth of single crystals of mercuric iodide on the ground and in space
[DE93-015523] p 1209 N94-16442
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Thermal disorder in adsorbed Cl on Si(100)
[AD-A266295] p 1210 N94-16476
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805
High temperature materials technology research for advanced thermionic systems
[DE93-018302] p 960 N94-16964
Growth and doping of Al(x)Ga(1-x)N films by electron cyclotron resonance assisted molecular beam epitaxy
[AD-A267305] p 1212 N94-16992
An alternative approach to the growth of single crystal gallium nitride
[AD-A267876] p 1213 N94-17037
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Investigation of the origin of hot spots in deformed crystals: Ammonium perchlorate studies
[AD-A267692] p 1214 N94-17270
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273
Buried porous silicon-germanium layers in monocrystalline silicon lattices and method of producing
[NASA-CASE-NPO-18836-1-CU] p 1215 N94-17327
Low voltage electron beam lithography
[AD-A267865] p 1215 N94-17389
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422
Investigations of YBaCuO materials with near-room-temperature resistivity transitions
[AD-A268016] p 1216 N94-17477
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553
Advanced thin-film deposition and physical properties of high-temperature and other novel superconducting materials
[AD-A268199] p 1216 N94-17561

SINGLE STAGE TO ORBIT VEHICLES

Space Propulsion Synergy Group ETO technology assessments
[TABES PAPER 93-641] p 929 N94-16149

SINGULAR INTEGRAL EQUATIONS

Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540

SINTERING

Finite element analytical techniques for ceramic production in microgravity: A hypoelastic model p 981 N94-16099
Chemical interactions between interconnect and electrode materials during sintering in solid oxide fuel cells
[DE93-015696] p 1092 N94-16160
Processing of complex sintered reaction bonded silicon nitride parts by microwave heating
[DE93-015811] p 969 N94-16877
Low-temperature sintering and phase changes in chromite interconnect materials
[DE93-015676] p 961 N94-17234

SIS (SUPERCONDUCTORS)

Submillimeterwave SIS mixer developments p 903 N94-15054
Preparation and properties of Nb/Al SIS and SIN junctions for millimeter and submillimeter radioastronomical receivers p 907 N94-15078

SITE SELECTION

Mars Analog Site Study (MASS) p 1252 N94-16200
Mars exobiology landing sites for future exploration p 1278 N94-16339
An electromagnetic interference study of potential transmitter sites for the HF Active Auroral Research Program (HAARP)
[AD-A267743] p 1004 N94-17373

SITES

Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934

SIZE DETERMINATION

Maximum likelihood techniques applied to quasi-elastic light scattering
[NASA-CR-193550] p 1192 N94-16718

SKIN (ANATOMY)

Wound healing after laser injury to skin: The effect of occlusion and vitamin E
[AD-A266473] p 1128 N94-16779

SKIN (STRUCTURAL MEMBER)

Remelting of Fe-C-Si-alloy in a ceramic mold skin p 945 N94-15169

SKIN FRICTION

The turbulent wall jet
[AD-A267675] p 855 N94-14963
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286

SKIRTS

SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124

SKY RADIATION

Determination of sunshine duration from radiation intensity pyranometric measurements of global and sky radiation
[BER-181] p 1105 N94-15302

SKY SURVEYS (ASTRONOMY)

EUVE observations of the Moon p 1250 N94-16185
Search for Extraterrestrial Intelligence (SETI) p 1125 N94-16620
Participation in the north ecliptic pole sky survey
[NASA-CR-191933] p 1059 N94-16815

SLEEP

Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943

SLEEP DEPRIVATION

Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943

Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site
[AD-A267038] p 1131 N94-15659

SLIDING
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483

SLIDING FRICTION
Integrated fundamental research on current collection
[AD-A266987] p 1008 N94-15494
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769
Continuing research on friction and wear of materials
[AD-A268291] p 1049 N94-17566

SLIP CASTING
Nonaqueous slip casting of high temperature ceramic superconductors using an investment casting technique
[NASA-CASE-LAR-14918-1] p 983 N94-15881
Finite element analytical techniques for ceramic production in microgravity: A hypoelastic model
p 981 N94-16099
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765

SLOPES
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus
p 1260 N94-16235

SLOTS
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797

SLURRIES
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite
[NASA-CASE-LEW-15263-2] p 934 N94-15929

SMALL SCIENTIFIC SATELLITES
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
Small satellite constellation system: Optimization criteria p 888 N94-17132
AMIGAU: A prototype tool aimed at mission analysis for satellites and satellite constellations
p 888 N94-17133
Small launchers (current and future projects in the world) p 878 N94-17137
Small satellite constellation deployment strategies
p 878 N94-17138
Delta launch vehicle: Accommodations for small satellites p 878 N94-17139
ARIANE 5 light derivatives p 878 N94-17140
NEXT launch system p 878 N94-17141
Small missions for space science p 874 N94-17142
Strategy for a small satellite program and a proposal for a first mission p 874 N94-17143
Small satellite missions to long-period comets
p 874 N94-17144
BRIDGE: A small scientific satellite for geodesy
p 890 N94-17146
Cosmic dust and space debris measurements on board the small satellites HITEN and BREM-SAT
p 890 N94-17147
SYNMOD: A low-resource, low-cost means of monitoring the near-Earth space debris environment
p 891 N94-17148
Role and development of small satellite missions in space plasma physics p 891 N94-17149
Earth observation from small satellites
p 891 N94-17150
Small imaging satellite for Earth observing system adjunct p 891 N94-17151
Adequation of mini satellites to oceanic altimetry missions p 891 N94-17152
SYDONI: An intensified system for night observation
p 891 N94-17153
A proposed ground segment design for small satellites
p 878 N94-17154
Ground segment definition for the Spanish small satellite program (MINISAT) p 878 N94-17155
OREMUS: Prototype of an orbit determination center dedicated to mini-satellite control p 878 N94-17156
Data processing system for ARSENE ground station: A tool for small satellite control and development
p 878 N94-17157
Satellite control: A comprehensive approach
p 878 N94-17158
Regulation of low Earth orbit satellites
p 892 N94-17159
A study on an experimental communication system using microsatellites p 892 N94-17160
LEOCOM-SPES: Low cost message communications
p 892 N94-17161
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
The ORBCOMM system p 893 N94-17163
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage
p 893 N94-17164
S 80/T: A micro satellite system combining high performances and limited resources
p 893 N94-17166
The ELLIPSO (tm) system: Elliptical low orbits for mobile communications p 893 N94-17167
UoSAT: A decade of experience pioneering microsatellites p 894 N94-17169
CERISE microsatellite system p 894 N94-17170
Impact of advances in technology on future spacecraft design p 894 N94-17171
S-80: A satellite for less than 50 MF
p 894 N94-17172
Small satellite modular design and application prospect p 894 N94-17173
Arsene GaAs solar array p 894 N94-17174
Small satellite nickel-hydrogen and nickel-metal hydride power applications p 895 N94-17175
A power system for a microsatellite
p 895 N94-17176
Data handling strategy for the Spanish small satellite program (MINISAT) p 895 N94-17177
The STRV On Board Data Handling (OBDH) system: An introduction p 895 N94-17178
A mini satellite called Arsene: The way to make it at a minimum cost p 895 N94-17179
TUBSAT: Low cost access to space technology
p 895 N94-17180
Standard platforms for small satellites
p 895 N94-17181
MINISAT programme p 896 N94-17182
The space technology research vehicle: Development status p 896 N94-17183
On-board spatial scientific experiment project on small satellites p 896 N94-17184
ALEXIS and HETE: Two small, low cost, scientific satellite systems p 896 N94-17185
TITUS: A micro-satellite for technology demonstration
p 896 N94-17186
Big results with small space systems: What small systems are doing today p 896 N94-17187
Small satellite product assurance p 896 N94-17188
Environment tests for mini satellites
p 896 N94-17189
Cost drivers: Why do conventional satellites cost so much? p 897 N94-17190
Key trends of the small satellite market
p 897 N94-17191

SMART STRUCTURES
Aeroelastic airfoil smart spar p 868 N94-16865

SMELTING
Fabrication of advanced design (grooved) cermet anodes
[DE93-014590] p 1012 N94-16765

SMOKE
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
Secondary smoke p 924 N94-15220

SNOW
Bibliography on snow and ice friction
[AD-A266868] p 1045 N94-14920
Atmospheric ionization by solar particles detected by nitrate measurement in antarctic snow
[AD-A267583] p 1299 N94-17208

SNOW COVER
A snow wetness retrieval algorithm for SAR
p 1075 N94-16732
Monitoring environmental state of Alaskan forests with AIRSAR p 1075 N94-16734

SOBOLEV SPACE
Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833

SOCIAL FACTORS
Predicted and real development in the aviation in the period 1961-1991 p 853 N94-15122

SODIUM
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929
Contained liquids in microgravity, part 2
p 979 N94-16085
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230

SODIUM CHLORIDES
Pressures of supercritical salt solutions
p 945 N94-15166

SODIUM HYDROXIDES
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928

SODIUM SILICATES
Thermochemistry of silicate speciation in aqueous sodium silicate solutions: Ionization and polymerization of small silicate ion
[AD-A266825] p 964 N94-15683

SOFIA (AIRBORNE OBSERVATORY)
Computation of the Fluid and Optical Fields About the Stratospheric Observatory for Infrared Astronomy (SOFIA) and the Coupling of Fluids, Dynamics, and Control Laws on Parallel Computers
[NASA-CR-193168] p 858 N94-16510
Selected computations of transonic cavity flows
p 858 N94-16511
Unsteady fluid and optical simulation of transonic aero-windows
[AIAA PAPER 93-3017] p 858 N94-16512

SOFTWARE ENGINEERING
Army Software Test and Evaluation Panel (STEP) software metrics initiatives report
[AD-A266889] p 1142 N94-14924
Lecture notes on engineering measurement for software engineers
[AD-A266959] p 1142 N94-14967
The value of reference implementations and prototyping in a formal design and testing methodology
[NPL-DITC-208/92] p 1142 N94-15011
The application of programming languages to the production of reference implementations
[NPL-DITC-209/92] p 1143 N94-15012
Testability of data security standards
[NPL-DITC-217/93] p 1143 N94-15022
SIMS: Single Interface to Multiple Systems
[AD-A266934] p 1143 N94-15175
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
Software architecture for shared information systems
[AD-A266995] p 1144 N94-15216
Open environments to support systems engineering tool integration: A study using the Portable Common Tool Environment (PCTE)
[NASA-TM-4489] p 1144 N94-15486
An analysis of SEI software process assessment results: 1987-1991
[AD-A266996] p 1145 N94-15629
Process-centered development environments: An exploration of issues
[AD-A266997] p 1145 N94-15630
Dependable software technology exchange
[AD-A267103] p 1146 N94-15638
Reengineering: An engineering problem
[AD-A267117] p 1146 N94-15653
Flight instrument software for the F/A-18 research simulator
[AD-A267170] p 872 N94-15856
Database for propagation models p 996 N94-16049
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656
Software for the derivation of scaled surface reflectances from AVIRIS data p 1072 N94-16700
KBSA concept demo
[AD-A267054] p 1166 N94-16770
Conflict Resolution (CORE) for software quality factors
[AD-A267248] p 1151 N94-16941
Development of dynamic, contex-driven help systems
[AD-A267409] p 1152 N94-16974
Design and implementation of an object-oriented interface for the multi-model/multi-lingual database system
[AD-A267413] p 1232 N94-16977
Sequential functions on indexed domains and full abstraction for a sub-language of PCF
[AD-A267838] p 1152 N94-17009
A proposed research program in strategic computing
[AD-A267516] p 1153 N94-17078
CALS test network handbook
[AD-A267587] p 1160 N94-17209
An object-oriented dynamic software process model
[AD-A267726] p 1154 N94-17371
Establishing a software measurement process
[AD-A267896] p 1154 N94-17396
An introduction to structural models
[AD-A268151] p 1155 N94-17429

A software process framework for the SEI capability maturity model: Repeatable level
[AD-A268059] p 1157 N94-17588
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626

SOFTWARE RELIABILITY
Army Software Test and Evaluation Panel (STEP) software metrics initiatives report
[AD-A266889] p 1142 N94-14924
Software reliability through fault-avoidance and fault-tolerance
[NASA-CR-194353] p 1143 N94-15114
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Concepts on measuring the benefits of software process improvements
[AD-A266994] p 1144 N94-15215
RAMCAD design methodology
[AD-A267010] p 1145 N94-15525
Process-centered development environments: An exploration of issues
[AD-A266997] p 1145 N94-15630
Dependable software technology exchange
[AD-A267103] p 1146 N94-15638
Software reliability management through metrics
[AD-A267129] p 1146 N94-15687
The design of self-checking reduced instruction set computers
[AD-A267012] p 1140 N94-15763
NASA trend analysis procedures
[NASA-RP-1290] p 1223 N94-15782
Performance Information Management System (PIMS) communication
[AD-A267040] p 1231 N94-16458
Consistent failure reporting in reliable communication systems
[AD-A266298] p 997 N94-16477
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656
Conflict Resolution (CORE) for software quality factors
[AD-A267248] p 1151 N94-16941
Fault-tolerant architectures for multiprocessor and VLSI-based systems
[AD-A267370] p 1140 N94-17005
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626

SOFTWARE REUSE
Open environments to support systems engineering tool integration: A study using the Portable Common Tool Environment (PCTE)
[NASA-TM-4489] p 1144 N94-15486
Intel NX to PVM 3.2 message passing conversion library
[NASA-TM-109038] p 1152 N94-17060

SOFTWARE TOOLS
Safety-critical software: Status report and annotated bibliography
[AD-A266993] p 1144 N94-15214
Open environments to support systems engineering tool integration: A study using the Portable Common Tool Environment (PCTE)
[NASA-TM-4489] p 1144 N94-15486
A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
Software Engineering Guidebook
[NASA-CR-177625] p 1150 N94-16656
The Spectral Image Processing System (SIPS): Software for integrated analysis of AVIRIS data
p 1067 N94-16674
Detailed example of using ACEC release 3.0 with the DEC VAX Ada compiler
[AD-A267880] p 1152 N94-17014
Theoretical crystallography with the Advanced Visualization System
[DE93-015692] p 1215 N94-17319
ACE: Lessons learned, volume 1
[AD-A267979] p 1155 N94-17411
Orpheus: A synthesis framework for regular architectures
[REPT-93-016] p 1156 N94-17504
Language-based document processing
[INRIA-RR-1731] p 1234 N94-17529
A protocol validator for the SCM and CFSM models
[AD-A268523] p 1156 N94-17541
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626

SOHO MISSION
The grazing incidence detectors for the SOHO coronal diagnostic spectrometer p 905 N94-15063
Data processing system for flight spectrometer
p 908 N94-15086

SOI (SEMICONDUCTORS)
Technology transfers and reliable oxides
[AD-A266948] p 1175 N94-15758
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243

SOIL MECHANICS
A measurement station for study of Earth moving tools and ground cutting processes
[IFTR-10/1991] p 985 N94-17068

SOIL MOISTURE
Mathematical model of frost heave and thaw settlement in pavements
[AD-A267037] p 983 N94-15676
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
Processing of polarimetric SAR data for soil moisture estimation over Mahantango watershed area
p 1079 N94-16754
Evaluation of polarimetric SAR parameters for soil moisture retrieval p 1079 N94-16755

SOILS
HyperVentilate: Decision-support software for soil vapor extraction technology application
[PB93-134880] p 1094 N94-15136
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
Radar response of vegetation: An overview
p 991 N94-15898
Mars Analog Site Study (MASS) p 1252 N94-16200
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system
p 1259 N94-16233
Suggestion for extended Viking magnetic properties experiment on future Mars missions
p 1285 N94-16375
Deucalionis Regio, Mars: Evidence for a unique mineralogic endmember and a crusted surface
p 1291 N94-16406
Bright soil units on Mars determined from ISM imaging spectrometer data p 1295 N94-16430
Variations in the Fe mineralogy of bright Martian soil
p 1295 N94-16431
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555
Mapping the spectral variability in photosynthetic and non-photosynthetic vegetation, soils, and shade using AVIRIS p 1068 N94-16679
Soil conservation applications with C-band SAR
p 1080 N94-16760

SOL-GEL PROCESSES
Preparation of homogeneous aluminosilicate gels by sol/gel techniques
[AD-A266823] p 962 N94-14914
Multinuclear NMR study of aluminosilicate sol-gel synthesis reasons for the homogeneous gelation using the prehydrolysis method
[AD-A266877] p 962 N94-14921
Self-diffusion coefficients of sol-gel intermediates
[AD-A266957] p 963 N94-15179
Intramolecular versus intermolecular condensation rates in the acidic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490
NMR and theoretical investigation of cation binding with sol-gel silicates
[AD-A266999] p 963 N94-15631
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Effects of aging time on V205 sol-gel coatings
[AD-A266824] p 965 N94-15843
Use of microgravity in the synthesis of ceramics using sol gel techniques p 979 N94-16088
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
Ceramic fiber coatings development and demonstration
[AD-A267286] p 972 N94-17242
Electrical properties of sol-gel PZT thin films for decoupling capacitor applications
[DE93-016491] p 1015 N94-17648

SOLAR ACTIVITY
Orbiting solar operations
[NASA-TM-109583] p 884 N94-15267
FNAS/solar flare energetics
[NASA-CR-193574] p 1299 N94-17089
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225

SOLAR ARRAYS
ERS-1: 18 months in orbit p 990 N94-15888
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Arsene GaAs solar array p 894 N94-17174
A power system for a microsatellite
p 895 N94-17176
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266

SOLAR ATMOSPHERE
ATLAS-2 and UARS correlative measurement opportunities during Space Shuttle mission on April 8-17, 1993
[NASA-TM-109020] p 1105 N94-15480

SOLAR CELLS
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857
Progress in the concentrator initiative program
[DE93-015006] p 1091 N94-15984
Monolithic, two-terminal InP/Ga(0.47)In(0.53)As tandem solar cells
[DE93-014037] p 1093 N94-16824
Lattice-mismatched In(0.40)Al(0.60)As window layers for indium phosphide solar cells
[NASA-TM-106255] p 1013 N94-17113
A ten year review of performance of photovoltaic systems
[DE93-015649] p 1093 N94-17217
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266

SOLAR COLLECTORS
Progress in the concentrator initiative program
[DE93-015006] p 1091 N94-15984
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993
Recent advances in outdoor performance evaluation of PV systems
[DE93-015031] p 1091 N94-15994
Proposed guidelines for reporting performance of a solar dish/Stirling electric generation system
[DE93-016493] p 1092 N94-16112
High heat flux engineering in solar energy applications
[DE93-016500] p 1093 N94-16954
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256

SOLAR CORONA
The grazing incidence detectors for the SOHO coronal diagnostic spectrometer p 905 N94-15063
The Solar Flare Myth in solar-terrestrial physics
[DE93-016487] p 1299 N94-16895

SOLAR COSMIC RAYS
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR
p 1248 N94-16177

SOLAR CYCLES
A correlative comparison of geomagnetic storms and auroral substorms using geomagnetic indeces
[AD-A268081] p 1102 N94-17512

SOLAR DYNAMIC POWER SYSTEMS
Futurepath 1 --- power systems
[NASA-TM-109431] p 925 N94-15503
Proposed guidelines for reporting performance of a solar dish/Stirling electric generation system
[DE93-016493] p 1092 N94-16112

Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256

SOLAR ECLIPSES
The 1970 highlights --- NASA programs and research
[NASA-TM-109628] p 1302 N94-15415
Total solar eclipse of 3 November 1994
[NASA-RP-1318] p 1236 N94-15481
C 141 KAO solar eclipse mission
[NASA-TM-109676] p 1298 N94-15522

SOLAR ENERGY
High heat flux engineering in solar energy applications
[DE93-016500] p 1093 N94-16954
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
Energy from the sun: Evolution of federal support for solar energy
[AD-A267944] p 1093 N94-17382

SOLAR ENERGY ABSORBERS
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857

SOLAR ENERGY CONVERSION
Space Station thermal storage/refrigeration system research and development
[NASA-CR-193841] p 879 N94-15191
Proposed guidelines for reporting performance of a solar dish/Stirling electric generation system
[DE93-016493] p 1092 N94-16112
High heat flux engineering in solar energy applications
[DE93-016500] p 1093 N94-16954
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
Energy from the sun: Evolution of federal support for solar energy
[AD-A267944] p 1093 N94-17382

SOLAR FLARES
The Solar Flare Myth in solar-terrestrial physics
[DE93-016487] p 1299 N94-16895
Solar vector magnetic field research
[AD-A267367] p 1299 N94-17004
FNAS/solar flare energetics
[NASA-CR-193574] p 1299 N94-17089

SOLAR FLUX
Revisiting the BCS, a measurement system for characterizing the optics of solar collectors
[DE93-015030] p 1091 N94-15993

SOLAR GENERATORS
High heat flux engineering in solar energy applications
[DE93-016500] p 1093 N94-16954

SOLAR HEATING
Heliocentric zoning of the asteroid belt by aluminum-26 heating p 1241 N94-16205

SOLAR INSTRUMENTS
Solar vector magnetic field research
[AD-A267367] p 1299 N94-17004

SOLAR INTERIOR
Possible dust contamination of the early solar system p 1244 N94-16352

SOLAR MAGNETIC FIELD
Solar vector magnetic field research
[AD-A267367] p 1299 N94-17004

SOLAR MAXIMUM MISSION
Ultraviolet spectrometer and polarimeter (UVSP) catalog of observations. Volume 1: Experiments 1-30719, February 1980 - April 1985
[NASA-CR-4529-VOL-1] p 1298 N94-15023
Ultraviolet spectrometer and polarimeter (UVSP) catalog of observations. Volume 2: Experiments 30720-63057, April 1985 - February 1988
[NASA-CR-4529-VOL-2] p 1298 N94-15024
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509

SOLAR NEUTRINOS
Neutrino mass and mixing: Summary of the neutrino sessions
[DE93-014342] p 1183 N94-16801
Neutral-current detection in the Sudbury Neutrino Observatory
[DE93-014481] p 1185 N94-16951

SOLAR OBSERVATORIES
Orbiting solar operations
[NASA-TM-109583] p 884 N94-15267
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225

SOLAR OSCILLATIONS
Generation of artificial helioseismic time-series
[NASA-CR-194612] p 1299 N94-15968

SOLAR PHYSICS
Unmasking the Sun
[NASA-TM-109595] p 1298 N94-15287
Possible dust contamination of the early solar system p 1244 N94-16352

SOLAR PLANETARY INTERACTIONS
Magnetic effects in Venus/solar wind interaction
[NASA-CR-194666] p 1299 N94-17281

SOLAR POSITION
Iron oxide bands in the visible and near-infrared reflectance spectra of primitive asteroids p 1242 N94-16274

SOLAR PROTONS
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821
The SCR Ne-21 and Ar-38 in lunar rock 68815: The solar proton energy spectrum over the past 2 MYR p 1248 N94-16177
Atmospheric ionization by solar particles detected by nitrate measurement in antarctic snow
[AD-A267583] p 1299 N94-17208

SOLAR RADIATION
Absolute Radiometric Measurements in Space: ARMS p 908 N94-15085
Determination of sunshine duration from radiation intensity pyranometric measurements of global and sky radiation
[BER-181] p 1105 N94-15302
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques
[AD-A267055] p 885 N94-15666
Absolute, Extreme-Ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A267045] p 1299 N94-15836
Dust grain resonant capture: A statistical study p 1245 N94-16384
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
Investigations into the recovery of waste sulfuric acid with concentrated solar radiation
[DLR-FB-93-11] p 952 N94-17594

SOLAR SENSORS
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240

SOLAR SIMULATORS
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857

SOLAR SPECTROMETERS
The grazing incidence detectors for the SOHO coronal diagnostic spectrometer p 905 N94-15063
Data processing system for flight spectrometer p 908 N94-15086

SOLAR SYSTEM
Do SiC grains in Orgueil differ from those in Murchison? p 1242 N94-16260
Chemical and isotopic compositions in acid residues from various meteorites p 1243 N94-16291

SOLAR SYSTEM EVOLUTION
Pioneer-Venus press clip --- Solar System formation and extraterrestrial life
[NASA-TM-109425] p 1239 N94-15495

SOLAR TERRESTRIAL INTERACTIONS
The Solar Flare Myth in solar-terrestrial physics
[DE93-016487] p 1299 N94-16895
FNAS/solar flare energetics
[NASA-CR-193574] p 1299 N94-17089
Optimization of satellite coverage in observing cause and effect changes in the ionosphere, magnetosphere, and solar wind
[AD-A267956] p 1102 N94-17493

SOLAR WIND
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821
Helium-3 inventory of lunar samples: A potential future energy resource for mankind? p 1295 N94-16428
Solar noble gases revealed by closed system stepped etching of a metal separate from Fayetteville p 954 N94-16432
Nitrogen and light noble gases in Parsa enstatite chondrite p 1246 N94-16435
Magnetic effects in Venus/solar wind interaction
[NASA-CR-194666] p 1299 N94-17281

SOLAR WIND VELOCITY
A comparison of solar wind parameters measured by IMP 8, Voyager 1 and Voyager 2
[AD-A266728] p 1298 N94-15821

SOLAR X-RAYS
FNAS/solar flare energetics
[NASA-CR-193574] p 1299 N94-17089

SOLDERED JOINTS
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194

SOLID ELECTROLYTES
Chemical interactions between interconnect and electrode materials during sintering in solid oxide fuel cells
[DE93-015696] p 1092 N94-16160
Thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18694-1-CU] p 1014 N94-17325

SOLID LUBRICANTS
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767

SOLID NITROGEN
A Pluto thermal model p 1256 N94-16216

SOLID PHASES
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
Slip, twinning and transformation in Laves phases
[DE93-018164] p 960 N94-16972

SOLID PROPELLANT COMBUSTION
Spectral studies of solid propellant combustion 4: Absorption and burn rate results for M43, XM39, and M10 propellants
[AD-A267119] p 946 N94-15685

SOLID PROPELLANT IGNITION
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538

SOLID PROPELLANT ROCKET ENGINES
Advanced Solid Rocket Motor
[NASA-TM-109658] p 924 N94-15229
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248
Postflight hardware evaluation 360T026 (RSRM-26, STS-47)
[NASA-CR-192559] p 882 N94-17656

SOLID PROPELLANTS
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17538

SOLID ROCKET PROPELLANTS
Fundamental studies of rocket combustion chemistry and combustion instability
[AD-A266248] p 925 N94-16482
Space Shuttle solid rocket motor exposure monitoring p 976 N94-16624

SOLID SOLUTIONS
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
Chemical interactions between interconnect and electrode materials during sintering in solid oxide fuel cells
[DE93-015696] p 1092 N94-16160
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by anomalous x ray scattering in Fe-Ni alloys
[DE93-015906] p 1209 N94-16171
Rheology of water and ammonia-water ices p 953 N94-16188
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108

SOLID STATE
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Detection and dosimetry of chemical contaminants in polymeric materials
[AD-A266605] p 968 N94-16727

SOLID STATE DEVICES
CdTe array detectors for high energy astronomy p 899 N94-15029
The solid state detector technology for picosecond laser ranging p 914 N94-15572

SOLID STATE LASERS
The solid state detector technology for picosecond laser ranging p 914 N94-15572
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
Multi-beam laser altimeter p 921 N94-15620

Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 1004 N94-17322

SOLID-SOLID INTERFACES
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Weibull analysis applied to the pull adhesion test and fracture of a metal-ceramic interface
[DE93-012913] p 1059 N94-15997
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490

SOLIDIFICATION
Partial melting experiment of Y-Ba-Cu oxide
p 945 N94-15168
Remelting of Fe-C-Si-alloy in a ceramic mold skin
p 945 N94-15169
Separation behaviour of monotectic alloys
p 945 N94-15170
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites
[DE93-015155] p 934 N94-16057
Particle Engulfment and Pushing by Solidifying Interfaces (PEPSI)
[NASA-CR-193856] p 960 N94-17079

SOLIDIFIED GASES
Modeling the reflectance of CO2 frost with new optical constants: Application to Martian south polar cap spectra p 1256 N94-16217

SOLIDS
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia
p 1103 N94-16214
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914

SOLIDS FLOW
Stability analysis for the flow of granular materials down an inclined plane using kinetic model
[DE93-016852] p 1026 N94-16958

SOLITARY WAVES
Dynamics of douple stimulated Brillouin scattering
p 1200 N94-15206
Soliton-like structures in double stimulated Brillouin scattering p 1200 N94-15207
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283
Search for far infrared radiation from optically pumped defect modes
[AD-A266744] p 1206 N94-15822
Pulse propagation in inhomogeneous optical waveguides
[DE93-013378] p 1191 N94-16007
Lattice relaxation theory of localized excitations in quasi-one-dimensional systems
[DE93-624947] p 1215 N94-17437

SOLUBILITY
Efficacy of flocculating and other emergency water purification tablets
[AD-A266695] p 1148 N94-15840
Siderophile elements in the upper mantle of the Earth: New clues from metal-silicate partition coefficients
p 1103 N94-16250
Partitioning of Nb, Mo, Ba, Ce, Pb, Th and U between immiscible carbonate and silicate liquids: Evaluating the effects of P2O5,F, and carbonate composition
p 953 N94-16283
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494

SOLVATION
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997
Solvational barriers to interfacial electron transfer: Minimization by way of valence delocalization
[AD-A267371] p 950 N94-17006
Continuum solvent models for computational chemistry
[DE93-016329] p 953 N94-17660

SOLVENTS
The photophysics of poly(methylphenylphosphazene)
[AD-A267321] p 970 N94-16949
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
Continuum solvent models for computational chemistry
[DE93-016329] p 953 N94-17660

SONAR
Signal processing in impulsive electromagnetic interference
[AD-A266425] p 998 N94-16557
Synthesis and evaluation of polymeric materials
[AD-A267809] p 973 N94-17408
Fabrication of a NAVMAP, a deep-sea mapping system
[AD-A268630] p 1085 N94-17467

SONIC ANEMOMETERS
Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137

SOOT
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532

SORPTION
Fibers and materials of medical application
p 938 N94-16855

SOS (SEMICONDUCTORS)
Porous silicon for pumping solid-state lasers
[AD-A266293] p 1039 N94-16474

SOUND PRESSURE
Vibro-acoustic analysis of an aircraft maintenance dock
[AD-A266778] p 871 N94-14908
Free-field sensitivity calibration of laboratory standard microphones by the reciprocity technique: Measurements for the 1991 EEC intercomparison
[NPL-RSA(EXT)-0043] p 1176 N94-15019
Cruise noise measurements of a scale model advanced ducted propulsor
[NASA-TM-105808] p 1176 N94-15115

SOUND PROPAGATION
Discrete models of the Boltzmann equation: Structure of the collision operator of sound propagation
[IFTR-2/1992] p 1178 N94-17051
Sound exposure level prediction for impulse sound sources above variable terrain
[AD-A267535] p 1178 N94-17119

SOUND TRANSMISSION
Ultrasound absorption in molten salts
p 944 N94-15161
Nonlinear acoustics: Periodic waveguide, scattering of sound by sound, three-layer fluid, finite amplitude sound in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A267145] p 1177 N94-15732

SOUND WAVES
Ultrasound absorption in molten salts
p 944 N94-15161
Dynamics of douple stimulated Brillouin scattering
p 1200 N94-15206
On the use of the noncentral chi-square density function for the distribution of helicopter spectral estimates
[NASA-CR-191546] p 1176 N94-15487
Sound radiation from infinite laminated composite shell with periodic rib stiffening
[DRA/TM(USGR)92326] p 933 N94-15699
Acousto-optical confirmation of the localized wave phenomena
[DE93-016425] p 1177 N94-16448
Cortical adaptive filtering in bioacoustic signal classification
[AD-A266229] p 1177 N94-16939
The shock Hugoniot of 316 SS and sound velocity measurements
[DE93-016525] p 1178 N94-16955
Acoustic waves in complicated geometries and their interactions with liquid-propellant droplet combustion
[AD-A267260] p 1178 N94-16991
An electroacoustic transducer for purposes of photoacoustic spectroscopy
[IFTR-7/1992] p 1013 N94-17071
Sound exposure level prediction for impulse sound sources above variable terrain
[AD-A267535] p 1178 N94-17119
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
Boundary conditions and the simulation of low Mach number flows
[NASA-TM-106374] p 1029 N94-17448
A virtual acoustic orientation instrument
[AD-A268181] p 1134 N94-17510

SOUND-SOUND INTERACTIONS
Nonlinear acoustics: Periodic waveguide, scattering of sound by sound, three-layer fluid, finite amplitude sound in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A267145] p 1177 N94-15732

SOUNDING ROCKETS
Sounding Rocket Experiments in Fluid Science and Materials Sciences: TEXUS 25 to 27 and MASER 4, volume 3
[ESA-SP-1132-VOL-3] p 943 N94-15157
Measurements of Interfacial Tension: MITE
p 943 N94-15158
Benard convection of magnetic colloids under microgravity p 943 N94-15159
Pool boiling: Single bubble experiment
p 944 N94-15160
Ultrasound absorption in molten salts
p 944 N94-15161
Orientation of DNA during free-solution electrophoresis p 944 N94-15162
Electrophoresis visualisation p 944 N94-15163
Temperature propagation in near-critical fluids prior to and during separation p 944 N94-15165
Separation behaviour of monotectic alloys
p 945 N94-15170
Heat storage module p 946 N94-15172
The 1973 highlights --- Pioneer and Mariner space probes and other advancements
[NASA-TM-109624] p 1302 N94-15410
The 1968 highlights --- NASA programs and research
[NASA-TM-109627] p 1302 N94-15413
The 1971 highlights --- NASA programs and research
[NASA-TM-109629] p 1302 N94-15417
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079

SOUNDS (TOPOGRAPHIC FEATURES)
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247

SOURCE PROGRAMS
Reductions to sets of low information content
[TR-417] p 1150 N94-16579
Estimating task execution delay in a real-time system via static source code analysis
[AD-A267496] p 1161 N94-17367

SOUTHERN HEMISPHERE
Southern and Northern Hemisphere total ozone as seen by TOMS
[NASA-TM-109591] p 1098 N94-15282

SOUTHERN OSCILLATION
IAI topic: El Nino. Southern oscillation and interannual climate variability
[INPE-5410-PRE/1757] p 1111 N94-15186

SOVIET SATELLITES
Almaz p 898 N94-15889

SOVIET SPACECRAFT
The fragmentation of Kosmos 2163
[NASA-CR-191643] p 887 N94-16503

SOYUZ SPACECRAFT
Soyuz/ACRV accommodation study
[NASA-TM-107733] p 888 N94-17072

SPACE ADAPTATION SYNDROME
Space adaptation
[NASA-TM-109601] p 1120 N94-15309

SPACE BASED RADAR
Proceedings of the Third Spaceborne Imaging Radar Symposium
[NASA-CR-194104] p 989 N94-15886
SIR-C/X-SAR free flyer concept p 898 N94-15903
EOS SAR: A new approach p 992 N94-15904

SPACE CHARGE
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
Polar 2 model of the wake shield experiment
[AD-A266243] p 882 N94-16468
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
A review of some dynamics models in six-dimensional phase space and their suitable conditions of motion equation
[DE93-623741] p 1175 N94-17317
Emittance growth in displaced, space-charge-dominated beams with energy spread
[DE93-016514] p 1188 N94-17672

SPACE COMMERCIALIZATION
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Commercial space opportunities advanced concepts and technology overview
[TABES PAPER 93-240] p 1050 N94-16132
The closing window of opportunity: Addressing the US space launch vehicle crisis
[TABES PAPER 93-640] p 878 N94-16148
Space commerce in a global economy: Comparison of US and Australian approaches
[NASA-TM-109341] p 1235 N94-17290

The impact of industry/university consortia programs on space education
[NASA-TM-109340] p 1222 N94-17441

SPACE COMMUNICATION
STS-29 mission highlights resource tape
[NASA-TM-109542] p 880 N94-15373
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
Low-Complexity, High-Performance Bandwidth Efficient Coding and Coded Modulation Techniques for Satellite and Space Communications
[NASA-CR-194623] p 997 N94-16506
Search for optimal distance spectrum convolutional codes p 998 N94-16509

SPACE DEBRIS
Satellite situation report, volume 33, no. 3
[NASA-TM-109278] p 885 N94-15712
Long Duration Exposure Facility experiment M0003 deintegration/findings and impacts
[AD-A267140] p 885 N94-15749
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
The effect of an on-orbit near encounter on the number flux density of micron sized particles p 899 N94-16374
Resolving LDEF's flux distribution: Orbital (debris?) and natural meteoroid populations p 1245 N94-16391
History of on-orbit satellite fragmentations
[NASA-CR-191644] p 887 N94-16502
Cosmic dust and space debris measurements on board the small satellites HITEN and BREM-SAT p 890 N94-17147
SYNMOD: A low-resource, low-cost means of monitoring the near-Earth space debris environment p 891 N94-17148
Detecting small debris using a ground-based photon counting detector
[DE93-012623] p 898 N94-17669

SPACE ENVIRONMENT SIMULATION
The 61-M long duration sim video highlights resource tape
[NASA-TM-109569] p 875 N94-15299
Richards, Dick: Training clip
[NASA-TM-109503] p 876 N94-15467

SPACE EXPLORATION
Robotics in space
[NASA-TM-109584] p 1045 N94-15268
NASA: The 25th year
[NASA-TM-109457] p 1302 N94-15352
First US Mars landing
[NASA-TM-109669] p 885 N94-15436
Mars laser altimeter based on a single photon ranging technique p 921 N94-15619
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Twenty-Fourth Lunar and Planetary Science Conference. Part 2: G-M
[NASA-CR-193174] p 1247 N94-16173
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong p 1007 N94-16197
Mars Analog Site Study (MASS) p 1252 N94-16200
Gamma ray spectrometer for Lunar Scout 2 p 1037 N94-16426
Chairmanship of the Neptune/Pluto outer planets science working group
[NASA-CR-194625] p 1297 N94-16832
Small spacecraft for planetary exploration p 874 N94-17145

SPACE FLIGHT TRAINING
STS-33 Carter and Thorton during WETF activities
[NASA-TM-109471] p 1136 N94-15402
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
STS-35 payload specialists Durrance and Parise: 70mm photo training and cabin familiarization
[NASA-TM-109499] p 1032 N94-15463

SPACE HABITATS
Living well in space: Monitoring environment
[NASA-TM-109537] p 1120 N94-15368
STS-38 crew training: Habitation equipment procedures, bailout in CCT, 70mm photo class, EVA prep and post, and firefighting
[NASA-TM-109494] p 1136 N94-15453
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154

SPACE LABORATORIES
Commitment to challenge
[NASA-TM-109523] p 876 N94-15473
Scientific use of Space Station Freedom p 977 N94-16072

SPACE LOGISTICS
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452

SPACE MANUFACTURING
TABES 1993: 9th Annual Technical and Business Exhibition and Symposium p 1050 N94-16129
Study of the National Science Foundation's South Pole Station as an analogous data base for the logistical support of a Moon laboratory
[NASA-TM-108429] p 1174 N94-17469

SPACE MISSIONS
The 1969 highlights
[NASA-TM-109630] p 1301 N94-15241
The 1972 highlights
[NASA-TM-109631] p 1301 N94-15242
The 1965 highlights --- NASA programs
[NASA-TM-109632] p 1301 N94-15243
The 1967 highlights
[NASA-TM-109633] p 1301 N94-15244
Return to Space Mission: The STS-26 crew report
[NASA-TM-109568] p 880 N94-15317
Apollo presentation for Astrodome
[NASA-TM-109535] p 1302 N94-15366
Mars laser altimeter based on a single photon ranging technique p 921 N94-15619
Approaching the new reality
[TABES PAPER 93-230] p 1050 N94-16131
Commercial space opportunities advanced concepts and technology overview
[TABES PAPER 93-240] p 1050 N94-16132
Role and development of small satellite missions in space plasma physics p 891 N94-17149
MINISAT programme p 896 N94-17182

SPACE NAVIGATION
Space flight: The application of orbital mechanics
[NASA-TM-109424] p 874 N94-15493
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368

SPACE PERCEPTION
Characteristics of aimed arm movements in humans under low gravity p 980 N94-16093
Neural basis of motion perception
[AD-A267267] p 1133 N94-17265
A virtual acoustic orientation instrument
[AD-A268181] p 1134 N94-17510

SPACE PLASMAS
Global auroral imaging: Dynamics of Explorer Miss ion
[NASA-CR-194284] p 1097 N94-15003
Polar 2 model of the wake shield experiment
[AD-A266243] p 882 N94-16468
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
Role and development of small satellite missions in space plasma physics p 891 N94-17149
Space systems environmental interaction studies
[AD-A267280] p 897 N94-17240
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266

SPACE PLATFORMS
ERS-1: 18 months in orbit p 990 N94-15888
Ground integrated ET-derived space platforms for onorbit applications
[TABES PAPER 93-652] p 899 N94-16152
Ground segment definition for the Spanish small satellite program (MINISAT) p 878 N94-17155
TAOS (S80): A (LEO-MSS) system for position reporting and telemanagement services p 893 N94-17162
TUBSAT: Low cost access to space technology p 895 N94-17180
Standard platforms for small satellites p 895 N94-17181
MINISAT programme p 896 N94-17182
ALEXIS and HETE: Two small, low cost, scientific satellite systems p 896 N94-17185
Military satellite communications: Opportunity to save billions of dollars. Report to the Chairman, Legislation, and National Security Subcommittee, Committee on Government Operations, House of Representatives
[AD-A267627] p 1002 N94-17199

SPACE PROBES
Search for optimal distance spectrum convolutional codes p 998 N94-16509

SPACE PROCESSING
Visualization of solidification front phenomena
[NASA-CR-193838] p 976 N94-15006
STS-26 protein growth (PCG) experiment
[NASA-TM-109533] p 976 N94-15395
Payloads for the processing of high temperature materials p 979 N94-16083
Materials processing in space: Issues for the third decade
[TABES PAPER 93-260] p 983 N94-16133
Growth of single crystals of mercuric iodide on the ground and in space
[DE93-015523] p 1209 N94-16442

SPACE PROGRAMS
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306
The impact of industry/university consortia programs on space education
[NASA-TM-109340] p 1222 N94-17441

SPACE RENDEZVOUS
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368

SPACE SHUTTLE BOOSTERS
Space Shuttle solid rocket motor exposure monitoring p 976 N94-16624
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124

SPACE SHUTTLE MAIN ENGINE
An assessment of finite-element modeling techniques for thick-solid/thin-shell joints analysis
[NASA-TM-108426] p 1058 N94-15534
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194577] p 1082 N94-15646
Plasma arc welding repair of space flight hardware
[TABES PAPER 93-603] p 1049 N94-16139
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 3
[NASA-CR-193864] p 927 N94-17097
Advanced transportation system studies technical area 3: Alternate propulsion system concepts. SSME upper stage use
[NASA-CR-193865] p 927 N94-17098

SPACE SHUTTLE MISSION 51-F
Gearing up for 1988
[NASA-TM-109617] p 880 N94-15346
Sights and sounds of space
[NASA-TM-109610] p 1302 N94-15424

SPACE SHUTTLE MISSIONS
STS-26 Post-Flight Press Conference
[NASA-TM-109557] p 879 N94-15261
STS-26 onboard 16mm photography quick release
[NASA-TM-109558] p 879 N94-15262
STS-30 Post-Flight Press Conference --- Space Shuttle Launch, Magellan/IUS deploy, Crew Activites, and Landing
[NASA-TM-109580] p 879 N94-15264
STS-30 suited ascent training in fixed base SMS
[NASA-TM-109581] p 875 N94-15265
STS-30 mission tape --- Space Shuttle Launch, Crew Activities, Landing, and Air-to-Ground Transmission
[NASA-TM-109582] p 879 N94-15266
STS-26 SSIP briefing --- Titanium Grain Formation Experiment and Crystal Membrane Experiment
[NASA-TM-109556] p 976 N94-15280
The 61-M long duration sim video highlights resource tape
[NASA-TM-109569] p 875 N94-15299
Text and graphics systems
[NASA-TM-109570] p 1229 N94-15300
STS-30 Magellan deploy Sim in SMS and MOCR
[NASA-TM-109571] p 875 N94-15301
STS-30 EVA prep in CCT: Grabe, Lee, and Thagard
[NASA-TM-109572] p 1135 N94-15303
STS-29 Post-Flight Press Conference --- Shuttle Launch, TDRS-D/IUS Deployment, Crew Activites, and Shuttle Landing
[NASA-TM-109575] p 880 N94-15306
STS-29 onboard 16mm photography quick release
[NASA-TM-109576] p 880 N94-15307
STS-26 through STS-34, deploy activities
[NASA-TM-109566] p 1301 N94-15315
STS-32 IMAX camera training
[NASA-TM-109567] p 1031 N94-15316
STS-26 generic integrated IUS deploy simulation
[NASA-TM-109562] p 875 N94-15332

STS-26 EVA rescue training
[NASA-TM-109563] p 875 N94-15333
STS-26 Shuttle Earth views, April 1990, part 1
[NASA-TM-109564] p 1082 N94-15334
STS-26 Shuttle Earth views, April 1990, part 2
[NASA-TM-109565] p 1082 N94-15335
STS-34 post-flight press conference
[NASA-TM-109459] p 880 N94-15354
STS-34 onboard 16mm photography quick release
[NASA-TM-109460] p 880 N94-15355
STS-34 mission highlights resource tape, part 1
[NASA-TM-109461] p 880 N94-15356
STS-34 Galileo integrated deploy sim
[NASA-TM-109463] p 880 N94-15358
STS-34 crew bailout exercise in CCT
[NASA-TM-109465] p 1135 N94-15360
STS-29 mission highlights resource tape
[NASA-TM-109542] p 880 N94-15373
STS-29 IMAX camera audio class FFT
[NASA-TM-109543] p 1031 N94-15374
STS-29 EVA prep in FFT
[NASA-TM-109544] p 1135 N94-15375
STS-32 onboard 16mm photography quick release
[NASA-TM-109472] p 880 N94-15376
STS-31 Post-Flight Conference
[NASA-TM-109477] p 881 N94-15384
STS-33 crew post flight film
[NASA-TM-109470] p 881 N94-15400
STS-27 crew presentation clip
[NASA-TM-109551] p 881 N94-15403
STS-27 crew post-insertion deorbit-prep in CCT
[NASA-TM-109552] p 1136 N94-15404
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
NASA report to education, volume 7
[NASA-TM-109435] p 1247 N94-15419
STS-31 onboard 16mm photography quick release --- Onboard Activities
[NASA-TM-109478] p 881 N94-15438
STS-31 mission highlights resource tape
[NASA-TM-109479] p 881 N94-15440
STS-31 Hubble space telescope deploy: Training at MDF with Hawley
[NASA-TM-109481] p 876 N94-15442
STS-31 crew training inflight maintenance and bailout exercises in CCT and WFTF
[NASA-TM-109483] p 876 N94-15450
STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452
STS-36 crew presentation clip
[NASA-TM-109497] p 881 N94-15461
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
STS-35 payload specialists Durrance and Parise: 70mm photo training and cabin familiarization
[NASA-TM-109499] p 1032 N94-15463
STS-35 onboard photography quick release
[NASA-TM-109500] p 881 N94-15464
STS-35 mission highlights resource tape
[NASA-TM-109501] p 881 N94-15465

SPACE SHUTTLE ORBITERS
Vertical-tail aerodynamic configuration of space shuttle orbiter
[AD-A267723] p 879 N94-14941
Views from space
[NASA-TM-109634] p 1081 N94-15245
STS-30 Post-Flight Press Conference --- Space Shuttle Launch, Magellan/IUS deploy, Crew Activites, and Landing
[NASA-TM-109580] p 879 N94-15264
STS-30 crew photo in building 4
[NASA-TM-109573] p 1031 N94-15304
STS-29 Post-Flight Press Conference --- Shuttle Launch, TDRS-D/IUS Deployment, Crew Activites, and Shuttle Landing
[NASA-TM-109575] p 880 N94-15306
STS-34 Space Shuttle Portable Onboard Computer (SPOC) briefing
[NASA-TM-109458] p 880 N94-15353
STS-34 final bench review
[NASA-TM-109464] p 1135 N94-15359
Crew escape certification test
[NASA-TM-109530] p 1136 N94-15392
STS-30 onboard 16mm photography quick release
[NASA-TM-109579] p 881 N94-15423
Space Station/Orbiter berthing dynamics during an assembly flight
[NASA-TM-109049] p 1062 N94-17451

SPACE SHUTTLE PAYLOADS
Serpentine manipulator planning and control for NASA Space-Shuttle payload servicing
[AD-A266961] p 879 N94-14969
STS-29 mission highlights resource tape
[NASA-TM-109542] p 880 N94-15373
STS-32 onboard 16mm photography quick release
[NASA-TM-109472] p 880 N94-15376
STS-35 onboard photography quick release
[NASA-TM-109500] p 881 N94-15464
Science operation in space: Lessons
[NASA-TM-109502] p 881 N94-15466
Long Duration Exposure Facility
[NASA-TM-109427] p 885 N94-15497
The Canadian Space Station user development program. Where do we go from here? p 898 N94-16084
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
Looking at science on board Eureca
[ESA-BR-80] p 874 N94-16584

SPACE SHUTTLES
Vertical-tail aerodynamic configuration of space shuttle orbiter
[AD-A267723] p 879 N94-14941
STS-29 pre-launch and post-landing egress
[NASA-TM-109574] p 1135 N94-15305
GAS highlights, 1988 --- Get Away Specials
[NASA-TM-109600] p 873 N94-15308
Space Shuttle highlights
[NASA-TM-109606] p 880 N94-15314
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342
STS-34 Space Shuttle Portable Onboard Computer (SPOC) briefing
[NASA-TM-109458] p 880 N94-15353
STS-34 McCully and Baker during IFM training
[NASA-TM-109462] p 880 N94-15357
STS-29 crew IMAX camera training
[NASA-TM-109546] p 1031 N94-15380
The 1978 highlights
[NASA-TM-109625] p 1302 N94-15411
The 1977 highlights
[NASA-TM-109626] p 1302 N94-15412
Spacework 16 --- Simulated Space Shuttle Program
[NASA-TM-109436] p 1221 N94-15420
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509
The Marshall Automated Weld System (MAWS)
[TABES PAPER 93-602] p 1049 N94-16138
Plasma arc welding repair of space flight hardware
[TABES PAPER 93-603] p 1049 N94-16139
Ground integrated ET-derived space platforms for onorbit applications
[TABES PAPER 93-652] p 899 N94-16152
Power Reactant Storage Assembly (PRSA) (Space Shuttle). PRSA hydrogen and oxygen DVT tank refurbishment
[NASA-CR-188262] p 926 N94-16922
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936

SPACE STATION FREEDOM
Space Station Freedom
[NASA-TM-109636] p 1031 N94-15247
Robotics for Space Station, tape 1
[NASA-TM-109588] p 1045 N94-15272
Space Station: The link to America's future
[NASA-TM-109653] p 884 N94-15274
Futurepath 1
[NASA-TM-109439] p 869 N94-15338
Dare to dream --- The Space Station Freedom development
[NASA-TM-109512] p 885 N94-15458
Space Station Facility government estimating
[NASA-TM-109324] p 1223 N94-15545
Estimating and bidding for the Space Station Processing Facility
[NASA-TM-109323] p 1223 N94-15546
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
A feasibility study of a microgravity enhancement system for Space Station Freedom
[NASA-CR-191550] p 886 N94-15864
Scientific use of Space Station Freedom p 977 N94-16072
The Canadian Space Station user development program. Where do we go from here? p 898 N94-16084
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
Soyuz/ACRV accommodation study
[NASA-TM-107733] p 888 N94-17072
Space Station/Orbiter berthing dynamics during an assembly flight
[NASA-TM-109049] p 1062 N94-17451
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452
Space Station Freedom electrical performance model
[NASA-TM-106395] p 929 N94-17483

SPACE STATION POWER SUPPLIES
Futurepath 1
[NASA-TM-109439] p 869 N94-15338
Futurepath 1 --- power systems
[NASA-TM-109431] p 925 N94-15503
Space Station Freedom electrical performance model
[NASA-TM-106395] p 929 N94-17483

SPACE STATION STRUCTURES
STS-37 CETA evaluation with Ross
[NASA-TM-109495] p 1135 N94-15330
STS-37 astronauts Ross and Apt during CETA hardware checkout
[NASA-TM-109496] p 1137 N94-15460
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1046 N94-15871

SPACE STATIONS
Space Station thermal storage/refrigeration system research and development
[NASA-CR-193841] p 879 N94-15191
Robotics for Space Station tape 2
[NASA-TM-109578] p 1045 N94-15263
Living well in space: Clinical care challenge
[NASA-TM-109539] p 1120 N94-15370
Answering the space medicine challenge
[NASA-TM-109511] p 1120 N94-15457
Space Station resource reel
[NASA-TM-109673] p 885 N94-15510
The Japanese Space Station utilization plan p 977 N94-16074
ALEXIS and HETE: Two small, low cost, scientific satellite systems p 896 N94-17185

SPACE SUITS
Ancient skills: Modern use
[NASA-TM-109594] p 1135 N94-15286
STS-30 EVA prep in CCT: Grabe, Lee, and Thagard
[NASA-TM-109572] p 1135 N94-15303
STS-27 crew fire training and glove molding
[NASA-TM-109554] p 1136 N94-15406
STS-31 Hubble space telescope contingency training in WETF with McCandless and Sullivan
[NASA-TM-109480] p 1136 N94-15441
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
STS-26 crew clothing, glove molding, and personal hygiene
[NASA-TM-109520] p 1137 N94-15470
Space suit design
[NASA-TM-109670] p 1137 N94-15507
Mark 111 suit test evaluation in WETF with Jerry Ross
[NASA-TM-109504] p 1137 N94-15514

SPACE SURVEILLANCE (SPACEBORNE)
Space countersurveillance: A requisite for theater defense planning
[AD-A266871] p 884 N94-15147

SPACE TECHNOLOGY EXPERIMENTS
STS-37 CETA evaluation with Ross
[NASA-TM-109495] p 1135 N94-15330
STS-37 astronauts Ross and Apt during CETA hardware checkout
[NASA-TM-109496] p 1137 N94-15460
The Clementine instrument complement p 1086 N94-16370
The space technology research vehicle: Development status p 896 N94-17183

SPACE TOOLS
STS-37 CETA evaluation with Ross
[NASA-TM-109495] p 1135 N94-15330
STS-37 astronauts Ross and Apt during CETA hardware checkout
[NASA-TM-109496] p 1137 N94-15460

SPACE TRANSPORTATION
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 2
[NASA-CR-193863] p 927 N94-17096
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 3
[NASA-CR-193864] p 927 N94-17097
Human Transportation System (HTS) study, volume 2
[NASA-TM-104779-VOL-2] p 882 N94-17320

SPACE TRANSPORTATION SYSTEM
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508
Advanced transportation system studies technical area 3: Alternate propulsion system concepts. SSME upper stage use
[NASA-CR-193865] p 927 N94-17098

Flight 20 (STS-45) polysulfide gas path investigation
[NASA-CR-193861] p 928 N94-17213
SPACE TRANSPORTATION SYSTEM FLIGHTS
Space Shuttle highlights
[NASA-TM-109606] p 880 N94-15314
Return to Space Mission: The STS-26 crew report
[NASA-TM-109568] p 880 N94-15317
STS-29 mission highlights resource tape
[NASA-TM-109542] p 880 N94-15373
STS-29 EVA prep in FFT
[NASA-TM-109544] p 1135 N94-15375
STS-27 crew presentation clip
[NASA-TM-109551] p 881 N94-15403
STS-27 crew post-insertion deorbit-prep in CCT
[NASA-TM-109552] p 1136 N94-15404
STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452
STS-36 crew presentation clip
[NASA-TM-109497] p 881 N94-15461
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
STS-35 payload specialists Durrance and Parise: 70mm photo training and cabin familiarization

[ESA-BR-80] p 874 N94-16584
Design of an experiment hardware for the ESA space facility BIOPAN
[DLR-FB-93-06] p 876 N94-17548
SPACEBORNE LASERS
Nd:YLF laser for airborne/spaceborne laser ranging p 913 N94-15563
GLRS-R 2-colour retroreflector target design and predicted performance p 921 N94-15615
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
Multi-beam laser altimeter p 921 N94-15620
Satellite laser station Helwan status 1992 p 877 N94-15621
SPACEBORNE PHOTOGRAPHY
STS-30 crew photo in building 4
[NASA-TM-109573] p 1031 N94-15304
STS-34 Arriflex and IMAX camera training
[NASA-TM-109467] p 1031 N94-15397
STS-35 onboard photography quick release
[NASA-TM-109500] p 881 N94-15464
SPACEBORNE TELESCOPES
Gamma large area silicon telescope: Applying Si strip detector technology to the detection of gamma rays in space p 904 N94-15061
The STIS MAMA status: Current detector performance p 905 N94-15069
SPACECRAFT
The 1972 highlights
[NASA-TM-109631] p 1301 N94-15242
The 1965 highlights --- NASA programs
[NASA-TM-109632] p 1301 N94-15243
The 1967 highlights
[NASA-TM-109633] p 1301 N94-15244
SPACECRAFT BREAKUP
History of on-orbit satellite fragmentations
[NASA-CR-191644] p 887 N94-16502
The fragmentation of Kosmos 2163
[NASA-CR-191643] p 887 N94-16503
The fragmentation of the Nimbus 6 rocket body
[NASA-CR-191645] p 926 N94-16504
SPACECRAFT CHARGING
Polar 2 model of the wake shield experiment
[AD-A266243] p 882 N94-16468
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
SPACECRAFT COMMUNICATION
STS-35 mission highlights resource tape
[NASA-TM-109501] p 881 N94-15465
Computer networking at SLR stations p 917 N94-15594
Bandwidth characteristics of multimedia data traffic on a local area network
[NASA-TM-104026] p 883 N94-15648
SPACECRAFT COMPONENTS
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Galileo probe ready to go
[NASA-TM-109648] p 1247 N94-15432
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266
SPACECRAFT CONFIGURATIONS
Small spacecraft for planetary exploration p 874 N94-17145
A conceptual design study for a two-dimensional, electronically scanned thinned array radiometer
[NASA-TM-109051] p 1085 N94-17665
SPACECRAFT CONSTRUCTION MATERIALS
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
Aluminum-lithium technology
[TABES PAPER 93-601] p 962 N94-16137
Third LDEF Post-Retrieval Symposium Abstracts
[NASA-CP-10120] p 1303 N94-16495
Performance of silvered Teflon thermal control blankets on spacecraft
[AD-A266284] p 887 N94-16909
SPACECRAFT CONTAMINATION
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques
[AD-A267055] p 885 N94-15666
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207
SPACECRAFT CONTROL
Pulse response based control for minimum time maneuver of flexible spacecraft
[AD-A266186] p 886 N94-16455
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368
SPACECRAFT DESIGN
Vertical-tail aerodynamic configuration of space shuttle orbiter
[AD-A267723] p 879 N94-14941
Space Station resource reel
[NASA-TM-109673] p 885 N94-15510
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
Flight testing of airbreathing hypersonic vehicles
[NASA-TM-4524] p 886 N94-15753
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Apparatus and method for producing an artificial gravitational field
[NASA-CASE-MSC-22021-1] p 886 N94-15935
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
ALS engine propellant effector system
[NASA-CR-194650] p 926 N94-16590
Small spacecraft for planetary exploration p 874 N94-17145
Feasibility study of a personal communications system IRIDIUM-like p 893 N94-17165
Impact of advances in technology on future spacecraft design p 894 N94-17171
Small satellite modular design and application prospect p 894 N94-17173
SPACECRAFT DOCKING
A mission concept of Phobos/Deimos exploration p 1287 N94-16387
Space Station/Orbiter berthing dynamics during an assembly flight
[NASA-TM-109049] p 1062 N94-17451
SPACECRAFT ENVIRONMENTS
Living well in space: Monitoring environment
[NASA-TM-109537] p 1120 N94-15368
Precise measurement and utilization of acceleration data p 923 N94-16100
SPACECRAFT EQUIPMENT
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
SPACECRAFT GUIDANCE
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010

A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368
SPACECRAFT INSTRUMENTS
Pre-phase a study report of lunar polar orbiter
[NASDA-TK-SS0440] p 873 N94-15000
Proceedings of an ESA Symposium on Photon Detectors for Space Instrumentation
[ESA-SP-356] p 899 N94-15025
Background suppression techniques in germanium detectors p 899 N94-15026
Discrete CMT infrared detectors for space application, from ISSR to second generation Meteosat and MIPAS p 905 N94-15065
An adiabatic demagnetisation refrigerator with a mechanical pre-cooler for space applications p 906 N94-15070
Extrinsic photoconductor detectors for the wavelength range 2 microns to 240 microns p 906 N94-15073
The detector assemblies of ISOPHOT and the spectrometers ISO-SWS and ISO-LWS p 906 N94-15074
Ionising radiation-induced effects in doped germanium FIR photoconductors p 907 N94-15077
In orbit adiabatic demagnetization refrigeration for bolometric and microcalorimetric detectors p 907 N94-15079
CCD's on high resistivity bulk silicon for x ray spectroscopy on XMM p 907 N94-15080
Characterization of detectors and calibration of the ISOPHOT experiment p 907 N94-15082
Characteristics of the ISO short wavelength spectrometer detectors p 908 N94-15084
Absolute Radiometric Measurements in Space: ARMS p 908 N94-15085
IR detectors and subsystems for space applications p 909 N94-15091
Infrared detector annealing and calibration with IR-laser diodes p 909 N94-15092
Performance of the position-sensitive proportional counters of the Yohkoh Bragg crystal spectrometer p 909 N94-15094
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797
Precise measurement and utilization of acceleration data p 923 N94-16100
The Clementine instrument complement p 1086 N94-16370
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17126
Pioneer Venus data analysis for the retarding potential analyzer
[NASA-CR-194673] p 1297 N94-17292
SPACECRAFT LANDING
Return to Space Mission: The STS-26 crew report
[NASA-TM-109568] p 880 N94-15317
STS-27 crew presentation clip
[NASA-TM-109551] p 881 N94-15403
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
STS-35 mission highlights resource tape
[NASA-TM-109501] p 881 N94-15465
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 886 N94-15951
A mission concept of Phobos/Deimos exploration p 1287 N94-16387
SPACECRAFT LAUNCHING
COBE video news
[NASA-TM-109598] p 987 N94-15292
Return to Space Mission: The STS-26 crew report
[NASA-TM-109568] p 880 N94-15317
Mission San Marco
[NASA-TM-109442] p 878 N94-15341

[NASA-TM-109542] p 880 N94-15373
STS-27 crew presentation clip
[NASA-TM-109551] p 881 N94-15403
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
Long Duration Exposure Facility
[NASA-TM-109427] p 885 N94-15497
RADARSAT program p 898 N94-15893
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
The closing window of opportunity: Addressing the US space launch vehicle crisis
[TABES PAPER 93-640] p 878 N94-16148
Space Propulsion Synergy Group ETO technology assessments
[TABES PAPER 93-641] p 929 N94-16149
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
Small Satellites Systems and Services
[ISBN-2-85-428327-9] p 888 N94-17131
Impact of launching uncertainties on the visibility of communication satellite constellations without orbit control p 889 N94-17135
Small launchers (current and future projects in the world) p 878 N94-17137
Small satellite constellation deployment strategies p 878 N94-17138
NEXT launch system p 878 N94-17141
Role and development of small satellite missions in space plasma physics p 891 N94-17149
Satellite situation report, volume 31, number 1
[NASA-TM-105088] p 898 N94-17584
SPACECRAFT MAINTENANCE
STS-31 crew training: firefighting, food tasting, EVA prep and post
[NASA-TM-109484] p 876 N94-15451
Plasma arc welding repair of space flight hardware
[TABES PAPER 93-603] p 1049 N94-16139
SPACECRAFT MODELS
Space Station Freedom
[NASA-TM-109636] p 1031 N94-15247
Cost-effective test methods for Shuttle payloads
[TABES PAPER 93-651] p 883 N94-16151
SPACECRAFT MODULES
The Japanese Space Station utilization plan p 977 N94-16074
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
Small satellite modular design and application prospect p 894 N94-17173
SPACECRAFT PERFORMANCE
International testing of a Mars rover prototype p 1273 N94-16312
SPACECRAFT POWER SUPPLIES
Results of an electrical power system fault study (CDDF)
[NASA-TP-3413] p 884 N94-15007
SPDE/SPRE final summary report
[NASA-CR-187086] p 924 N94-15482
The 1987 Goddard Space Flight Center Battery Workshop
[NASA-CP-3236] p 1012 N94-17062
Lattice-mismatched In(0.40)Al(0.60)As window layers for indium phosphide solar cells
[NASA-TM-106255] p 1013 N94-17113
Arsene GaAs solar array p 894 N94-17174
Small satellite nickel-hydrogen and nickel-metal hydride power applications p 895 N94-17175
A power system for a microsatellite p 895 N94-17176
The space technology research vehicle: Development status p 896 N94-17183
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266
SPACECRAFT PROPULSION
Space transfer concepts and analyses for exploration missions, phase 4
[NASA-CR-193849] p 882 N94-15831
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 3: Programmer's reference
[NASA-TM-106341] p 1022 N94-15865
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 3: Programmer's reference
[NASA-TM-106339] p 1022 N94-15867
Liquid hydrogen and liquid oxygen feedline passive recirculation analysis
[TABES PAPER 93-620] p 1031 N94-16145
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Space Propulsion Synergy Group ETO technology assessments
[TABES PAPER 93-641] p 929 N94-16149
Comparisons of selected laser beam power missions to conventionally powered missions
[NASA-TM-106110] p 1040 N94-16522
Power Reactant Storage Assembly (PRSA) (Space Shuttle). PRSA hydrogen and oxygen DVT tank refurbishment
[NASA-CR-188262] p 926 N94-16922
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 2
[NASA-CR-193863] p 927 N94-17096
Advanced transportation system studies technical area 3: Alternate propulsion subsystem concepts, volume 3
[NASA-CR-193864] p 927 N94-17097
Application of a NEPTUNE propulsion concept to a manned Mars excursion
[AD-A268053] p 929 N94-17587
SPACECRAFT RADIATORS
Geometrical vapor blocker for parallel condensation tubes requiring cooling
[NASA-CASE-MSC-22090-1] p 1022 N94-15962
SPACECRAFT RECOVERY
Long Duration Exposure Facility retrieval animation
[NASA-TM-109426] p 885 N94-15496
Long Duration Exposure Facility
[NASA-TM-109427] p 885 N94-15497
SPACECRAFT RELIABILITY
Gearing up for 1988
[NASA-TM-109617] p 880 N94-15346
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
SPACECRAFT SHIELDING
Exposure fluctuations of astronauts due to orientation
[NASA-TP-3364] p 1300 N94-15816
Calculations of cosmic-ray helium transport in shielding materials
[NASA-TP-3354] p 1301 N94-17666
SPACECRAFT STRUCTURES
An analysis of the dynamic response of the Space Station Freedom due to a module perforation by an orbital debris particle impact
[TABES PAPER 93-653] p 899 N94-16154
Solid lubricants for space structures, phase 2
[AD-A266653] p 968 N94-16767
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17126
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462
Structural mechanics division research and technology accomplishments for CY 1992 and plans for CY 1993
[NASA-TM-107752] p 1062 N94-17479
SPACECRAFT TEMPERATURE
Gravity dependent condensation pressure drop and heat transfer in ammonia two-phase heat transport systems
[NLR-TP-92121-U] p 1031 N94-17615
SPACECRAFT TRAJECTORIES
Neptune encounter highlights
[NASA-TM-109421] p 1246 N94-15240
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010
Soyuz/ACRV accommodation study
[NASA-TM-107733] p 888 N94-17072
SPACECREWS
Astro smile
[NASA-TM-109506] p 879 N94-15225

[NASA-TM-109575] p 880 N94-15306
STS-26 IUS and latch contingency training
[NASA-TM-109561] p 875 N94-15331
STS-26 generic integrated IUS deploy simulation
[NASA-TM-109562] p 875 N94-15332
STS-34 post-flight press conference
[NASA-TM-109459] p 880 N94-15354
STS-34 mission highlights resource tape, part 1
[NASA-TM-109461] p 880 N94-15356
STS-34 McCully and Baker during IFM training
[NASA-TM-109462] p 880 N94-15357
STS-34 final bench review
[NASA-TM-109464] p 1135 N94-15359
STS-29 mission highlights resource tape
[NASA-TM-109542] p 880 N94-15373
STS-32 LDEF EVA training in WETF with Low and Dunbar
[NASA-TM-109473] p 1135 N94-15377
STS-29 crew IMAX camera training
[NASA-TM-109546] p 1031 N94-15380
STS-32 crew training for lower body negative pressure unit and AFE
[NASA-TM-109475] p 1120 N94-15381
STS-29 crew food tasting in building 45
[NASA-TM-109547] p 1136 N94-15382
STS-29 crew bailout in WETF
[NASA-TM-109548] p 1136 N94-15385
STS-28 Adamson and Brown EMU walk through
[NASA-TM-109549] p 1136 N94-15387
STS-34 Arriflex and IMAX camera training
[NASA-TM-109467] p 1031 N94-15397
STS-33 EVA prep and post with Gregory, Blaha, Carter, Thorton, and Musgrave in FFT
[NASA-TM-109469] p 881 N94-15398
ASTP 15th anniversary clip-media release
[NASA-TM-109534] p 1302 N94-15399
STS-33 crew post flight film
[NASA-TM-109470] p 881 N94-15400

STS-27 EMU and RMS contingency training
[NASA-TM-109550] p 1136 N94-15401
STS-33 Carter and Thorton during WETF activities
[NASA-TM-109471] p 1136 N94-15402
STS-27 crew post-insertion deorbit-prep in CCT
[NASA-TM-109552] p 1136 N94-15404
STS-27 crew fire training and glove molding
[NASA-TM-109554] p 1136 N94-15406
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
STS-38 crew training: Habitation equipment procedures, bailout in CCT, 70mm photo class, EVA prep and post, and firefighting
[NASA-TM-109494] p 1136 N94-15453
Answering the space medicine challenge
[NASA-TM-109511] p 1120 N94-15457
STS-36 crew presentation clip
[NASA-TM-109497] p 881 N94-15461
STS-36 crew EVA prep and post-training, bailout exercises, final bench review
[NASA-TM-109498] p 1137 N94-15462
STS-27 crew deorbit prep in SMS with Gibson, Shepard, Mullane, Ross, and G. Gardner
[NASA-TM-109518] p 882 N94-15468
STS-26 crew participation in meetings
[NASA-TM-109519] p 873 N94-15469
STS-26 crew clothing, glove molding, and personal hygiene
[NASA-TM-109520] p 1137 N94-15470
STS-41 onboard 16mm photography quick release
[NASA-TM-109515] p 882 N94-15518
STS-41 mission highlights resource tape
[NASA-TM-109516] p 882 N94-15521

SPACELAB
The 1977 highlights
[NASA-TM-109626] p 1302 N94-15412
STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452
The Japanese Space Station utilization plan
p 977 N94-16074
The Spacelab IPS Star Simulator
[TABES PAPER 93-650] p 877 N94-16150

SPACELAB PAYLOADS
STS-40 crew during spacelab Sim
[NASA-TM-109493] p 876 N94-15452

SPACERS
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709

SPALLATION
A calibration of the production rate ratio P-21/P-26 by low energy secondry neutrons: Identification of Ne spallation components at the 10(exp 6) atoms/g level in terrestrial samples p 1187 N94-16194

SPANISH SPACE PROGRAM
Ground segment definition for the Spanish small satellite program (MINISAT) p 878 N94-17155
Data handling strategy for the Spanish small satellite program (MINISAT) p 895 N94-17177

SPARK IGNITION
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635

SPARKS
An electronic imaging system for the Aeroballistic Research Facility
[AD-A267157] p 1033 N94-15826

SPATIAL DISTRIBUTION
Broadband conventional beamforming incorporating adaptive equalization
[AD-A267090] p 987 N94-15544
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226
Reference frames in vision
[AD-A266174] p 1132 N94-16925
Biofilm structure and diversity
[AD-A267254] p 1118 N94-16989
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511

SPATIAL FILTERING
Exploitation of cyclostationarity for signal-parameter estimation and system identification
[AD-A267137] p 988 N94-15690
Spatial filters for optical correlation
[AD-A267199] p 1189 N94-15791
Neural-network-directed alignment of optical systems using the laser-beam spatial filter as an example
[NASA-TP-3372] p 1034 N94-15961

SPATIAL RESOLUTION
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
High resolution SAR applications and instrument design p 993 N94-15913
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices
p 1248 N94-16178
Multi-resolution processing for fractal analysis of airborne remotely sensed data p 1065 N94-16604
Spatial resolution and cloud optical thickness retrievals p 1066 N94-16671
Tip-tilt compensation: Resolution limits for ground-based telescopes using laser guide star adaptive optics
[DE93-016426] p 1237 N94-16872

SPECIFIC HEAT
Measurement of the specific heat capacity of the electron-beam graphite calorimeter
[NPL-RSA(EXT)-40] p 1031 N94-15018
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387

SPECIFICATIONS
VDM specification of the MD4 message digest algorithm
[NPL-DITC-204/92] p 1142 N94-14944
RAISE specification of the MD4 message digest algorithm
[NPL-DITC-206/92] p 1142 N94-15010
TITUS: A micro-satellite for technology demonstration
p 896 N94-17186
CALS test network handbook
[AD-A267587] p 1160 N94-17209

SPECKLE INTERFEROMETRY
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012

SPECKLE PATTERNS
Spatial and frequency diversity in lidar systems
[AD-A266192] p 1039 N94-16124

SPECTRA
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Why is the Moon dark? p 1256 N94-16219
Field observations of infragravity, sea and swell directional spectra
[AD-A266439] p 1113 N94-16561
Efficient computational methods to study new and innovative signal detection techniques in SETI
[NASA-CR-193602] p 998 N94-16649
In-flight calibration of the spectral and radiometric characteristics of AVIRIS in 1991 p 1037 N94-16667

SPECTRAL BANDS
BIB photodetectors based on antimony doped silicon
p 902 N94-15047
Atmospheric transmittance between 1.0 and 2.0 micrometers
[AD-A267076] p 1098 N94-15539
Seasonal and spatial variations in phytoplanktonic chlorophyll in eutrophic Mono Lake, California, measured with the Airborne Visible and Infrared Imaging Spectrometer (AVIRIS) p 1069 N94-16684
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694
Spectroscopic investigations of nonambient systems with millimeter and submillimeter probes
[AD-A266537] p 968 N94-16796
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214

SPECTRAL EMISSION
Plume radiation p 924 N94-15223
Preliminary analysis of thermal-infrared multispectral scanner data of the Iron Hill, Colorado carbonatite-alkalic rock complex p 1065 N94-16605

SPECTRAL METHODS
Numerical simulation of three-dimensional self-gravitating flow
[NASA-TM-109021] p 1021 N94-15768

SPECTRAL REFLECTANCE
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
Spectral evidence of size dependent space weathering processes on asteroid surfaces p 1241 N94-16174
Comparison of reflectance spectra of C asteroids and unique C chondrites Y86720, Y82162, and B7904
p 1242 N94-16246
Iron oxide bands in the visible and near-infrared reflectance spectra of primitive asteroids
p 1242 N94-16274
Mixing model analysis of telescopic lunar spectra
p 1284 N94-16371
Galileo SSI lunar observations: Copernican craters and soils p 1288 N94-16395
Analysis of pyroxene absorptions observed in Martian dark regions p 1292 N94-16411
Optical effects of regolith processes on S asteroids as simulated by laser impulse alteration of ordinary chondrite p 1246 N94-16422
Terrestrial impact melts as analogues for the hematization of Martian surface materials
p 1104 N94-16424
The spectrum of Phobos from Phobos 2 observations at 0.3-2.6 microns: Comparison to previous data and meteorite analogs p 1295 N94-16429
Variations in the Fe mineralogy of bright Martian soil
p 1295 N94-16431
Composition of weakly altered Martian crust
p 1296 N94-16436
From minerals to rocks: Toward modeling lithologies with remote sensing p 1086 N94-16437
The 1991 AVIRIS/POLDER experiment in Camargue, France p 1070 N94-16691
Tracking photosynthetic efficiency with narrow-band spectroradiometry
[CIW-PUBL-1133] p 1072 N94-16698
Oregon transect: Comparison of leaf-level reflectance with canopy-level and modelled reflectance
p 1073 N94-16702
Discussion of band selection and methodologies for the estimation of precipitable water vapour from AVIRIS data p 1074 N94-16707

SPECTRAL RESOLUTION
Spatial resolution and cloud optical thickness retrievals p 1066 N94-16671
Primary studies of trace quantities of green vegetation in Mono Lake area using 1990 AVIRIS data
p 1071 N94-16695
AVIRIS as a tool for carbonatite exploration: Comparison of SPAM and Mbandmap data analysis methods
p 1073 N94-16703
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214

SPECTRAL SIGNATURES
Spectral evidence of size dependent space weathering processes on asteroid surfaces p 1241 N94-16174
Terrestrial impact melts as analogues for the hematization of Martian surface materials
p 1104 N94-16424
Mapping vegetation types with the multiple spectral feature mapping algorithm in both emission and absorption p 1069 N94-16686
Atmospheric correction of AVIRIS data in ocean waters p 1070 N94-16690
Use of AVIRIS data to the definition of optimised specifications for land applications with future spaceborne imaging spectrometers p 1071 N94-16694

SPECTRAL THEORY
Phillips Laboratory global spectral numerical weather prediction model
[AD-A267293] p 1107 N94-17244

SPECTROMETERS
CdTe array detectors for high energy astronomy
p 899 N94-15029
The development of back-illuminated CCD's for XMM
p 900 N94-15035
Optimisation of FIR photoconductors for atmospheric spectroscopy p 902 N94-15048
Applications for large area silicon drift detectors on x ray and gamma ray astronomy p 909 N94-15090
Performance of the position-sensitive proportional counters of the Yohkoh Bragg crystal spectrometer
p 909 N94-15094
Preliminary results from bubble detector measurements aboard Biocosmos-2044 p 981 N94-16097
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system
p 1259 N94-16233
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549
Comparison of computer predictions and magnetic field measurements for an iron spectrometer magnet
[DE93-016164] p 1176 N94-17658

SPECTROPHOTOMETRY
Heliocentric zoning of the asteroid belt by aluminum-26 heating p 1241 N94-16205
Evaluation of hemoglobin-oxygen equilibrium binding by rapid-scanning spectrophotometry and singular-value decomposition
[AD-A266453] p 1123 N94-16564
SPECTRORADIOMETERS
Almaz p 898 N94-15889
SPECTROSCOPIC ANALYSIS
Effects of aging time on V205 sol-gel coatings
[AD-A266824] p 965 N94-15843
A high flux radical beam diamond growth
[AD-A266754] p 1207 N94-15955
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials
[DE93-015333] p 947 N94-16014
Space Shuttle solid rocket motor exposure monitoring p 976 N94-16624
Electron spectroscopy analysis
[NASA-CR-193591] p 951 N94-17039
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243
SPECTROSCOPY
Theoretical studies relating to the interaction of radiation with matter
[AD-A266894] p 1179 N94-14949
BIB photodetectors based on antimony doped silicon p 902 N94-15047
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions p 954 N94-16372
Methods of tunneling spectroscopy with the STM
[AD-A266507] p 948 N94-16787
Spectroscopic investigations of nonambient systems with millimeter and submillimeter probes
[AD-A266537] p 968 N94-16796
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation
[DE93-015406] p 1212 N94-16887
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243
SPECTRUM ANALYSIS
On the use of the noncentral chi-square density function for the distribution of helicopter spectral estimates
[NASA-CR-191546] p 1176 N94-15487
Spectral studies of solid propellant combustion 4: Absorption and burn rate results for M43, XM39, and M10 propellants
[AD-A267119] p 946 N94-15685
Higher order statistics in signal processing
[FFI-92/2008] p 989 N94-15714
Why is the Moon dark? p 1256 N94-16219
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Spectral study of Venus global topography and geoid from Magellan and PVO data p 1276 N94-16332
Lunar phase function effects on spectral ratios used for resource assessment p 1278 N94-16342
Mixing model analysis of telescopic lunar spectra p 1284 N94-16371
Optical effects of regolith processes on S asteroids as simulated by laser impulse alteration of ordinary chondrite p 1246 N94-16422
Search for Extraterrestrial Intelligence (SETI) p 1125 N94-16620
A field measure of the shade fraction p 1068 N94-16677
Mapping the spectral variability in photosynthetic and non-photosynthetic vegetation, soils, and shade using AVIRIS p 1068 N94-16679
Using endmembers in AVIRIS images to estimate changes in vegetative biomass p 1070 N94-16689
Separation of cirrus cloud from clear surface from AVIRIS data using the 1.38 micron water vapor band p 1072 N94-16699
Expert system-based mineral mapping using AVIRIS p 1073 N94-16704
Multitemporal diurnal AVIRIS images of a forested ecosystem p 1074 N94-16709
A comparison of LOWTRAN-7 corrected Airborne Visible/Infrared Imaging Spectrometer (AVIRIS) data with ground spectral measurements p 1074 N94-16710
Femtosecond growth dynamics of an underdense ionization front measured by spectral blueshifting
[DE93-013582] p 1183 N94-16818
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035
Chemical tracer studies at IOSDL. 3: The measurement of silicate, nitrate and phosphate in seawater
[IOS-302-1992] p 1114 N94-17489
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549
SPECULAR REFLECTION
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031
Hazard calculations of diffuse reflected laser radiation for the SELENE program
[NASA-TM-4520] p 1042 N94-17285
SPEECH RECOGNITION
Call sign intelligibility improvement using a spatial auditory display
[NASA-TM-104014] p 1177 N94-15549
Segment-based acoustic models for continuous speech recognition
[AD-A267138] p 988 N94-15691
A multilevel-multiresolution method for image processing. A Bayesian framework for reconstructing and representing shapes
[AD-A266772] p 1082 N94-15842
The influence of the level formants on the perception of synthetic vowel sounds
[IFTR-41/1991] p 1002 N94-17064
SPHERES
Metastable superconductors as photon detectors p 900 N94-15032
Use of microgravity in the synthesis of ceramics using sol gel techniques p 979 N94-16088
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903
Stability analysis for the flow of granular materials down an inclined plane using kinetic model
[DE93-016852] p 1026 N94-16958
SPHERICAL COORDINATES
A review of some dynamics models in six-dimensional phase space and their suitable conditions of motion equation
[DE93-623741] p 1175 N94-17317
SPHERULES
Cretaceous-tertiary boundary spherules and Cenozoic microtektites: Similarities and differences p 1241 N94-16186
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388
Siderophile element fractionation in meteor crater impact glasses and metallic spherules p 1246 N94-16414
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936
SPIN
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642
SPIN DYNAMICS
Relativistic dynamics of spin in strong external fields
[NIKHEF-H/93-06] p 1240 N94-17604
SPIN TESTS
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
SPIN-ORBIT INTERACTIONS
Effects of spin-orbit coupling on disordered mesoscopic systems
[ITN-93-85220] p 1180 N94-15288
SPINEL
Limited subsolidus diffusion in type B1 CAI: Evidence from Ti distribution in spinel p 954 N94-16401
SPLINE FUNCTIONS
Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833
Three-dimensional analysis of anisotropic spatially reinforced structures p 939 N94-16863
Aeroelastic airfoil smart spar p 868 N94-16865
SPLINES
Spline screw payload fastening system
[NASA-CASE-GSC-13454-1] p 1046 N94-15871
SPOOLS
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
SPRAY CHARACTERISTICS
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446
SPRAY NOZZLES
Coaxial airblast atomizers
[NASA-CR-193845] p 1016 N94-15109
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
SPRAYED COATINGS
Application of thermal spray and ceramic coatings and reinforced epoxy for cavitation damage repair of hydroelectric turbines and pumps
[AD-A267624] p 971 N94-17198
SPRAYERS
Thermal spray forming of refractory sample ampoule cartridges for single crystal growth space furnaces
[TABES PAPER 93-605] p 1051 N94-16141
SPREAD SPECTRUM TRANSMISSION
Four Frequency-Shift Keying (4-FSK) spread spectrum modulator and demodulator
[AD-A267433] p 1000 N94-16979
SPREADING
Electrostatic fiber spreader including a corona discharge device
[AD-D015793] p 936 N94-16537
SPRINGS (ELASTIC)
Mechanical energy absorber
[NASA-CASE-MSC-22111-1] p 1047 N94-15966
SPUTTERING
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Interfacial structure of lattice mismatched bcc(110)/bcc(110) transition metal superlattices
[DE93-015162] p 1208 N94-16058
Sputtered ferroelectric thin films of KTN for electro-optic devices
[AD-A266573] p 968 N94-16723
Epitaxial iron films
[AD-A268286] p 1217 N94-17579
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606
SQUALLS
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
SQUID (DETECTORS)
Future development in cryogenic techniques for space p 901 N94-15042
STABILITY
Finding stable orientations of assemblies with linear programming
[AD-A266990] p 1143 N94-15212
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
Confinement and stability of a Crystal Beam
[DE93-015400] p 1181 N94-16020
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
The stability of ions in a storage ring in the presence of small gap insertion devices
[DE93-015387] p 1184 N94-16828
Reference frames in vision
[AD-A266174] p 1132 N94-16925
Advanced transport systems for electron beams in high brightness accelerators and FELs
[AD-A267322] p 1041 N94-17001
STABILITY TESTS
Stability of flows in fluidized beds
[DE93-000245] p 1024 N94-16763
Stability analysis for the flow of granular materials down an inclined plane using kinetic model
[DE93-016852] p 1026 N94-16958
STABILIZATION
Densifying and stabilizing ingredient
[AD-D015751] p 975 N94-16934
TITUS: A micro-satellite for technology demonstration p 896 N94-17186
STABILIZERS (FLUID DYNAMICS)
Vertical-tail aerodynamic configuration of space shuttle orbiter
[AD-A267723] p 879 N94-14941
STAINLESS STEELS
The effect of aging at 343 C on the mechanical properties and microstructure of type 308 stainless steel weldments
[DE93-015454] p 957 N94-16103
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122
Stress corrosion cracking of 316 SS and Incoloy-800 in high temperature aqueous containing sulfate and chloride
[DE93-623325] p 952 N94-17302

STANDARDIZATION
The development of flexible software for the Italian/Dutch satellite SAX: Advantages and disadvantages of the use of CASE tools
[NLR-TP-91288-U] p 1157 N94-17626
STANDARDS
The use of formal methods in data security standards
[NPL-DITC-205/92] p 1142 N94-15008
The value of reference implementations and prototyping in a formal design and testing methodology
[NPL-DITC-208/92] p 1142 N94-15011
The application of programming languages to the production of reference implementations
[NPL-DITC-209/92] p 1143 N94-15012
Standards and conformance testing in data security: Results of initial programme of investigation
[NPL-DITC-218/92] p 1143 N94-15014
Testability of data security standards
[NPL-DITC-217/93] p 1143 N94-15022
Development of a proposed international standard for certification of aircraft to High Intensity Radiated Fields (HIRF)
[NASA-TM-106357] p 863 N94-16520
CALS test network handbook
[AD-A267587] p 1160 N94-17209
Radar transmitter procedures
[AD-A268274] p 1005 N94-17523
STAR CLUSTERS
Statistical analysis of trigonometric parallaxes
[NASA-CR-194558] p 1172 N94-15641
STAR FORMATION
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648
STAR TRACKERS
The Spacelab IPS Star Simulator
[TABES PAPER 93-650] p 877 N94-16150
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
STATIC CHARACTERISTICS
Static and dynamic investigations of brittle elasto-optical material
[IFTR-3/1992] p 1061 N94-17086
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
STATIC PRESSURE
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681
STATIC STABILITY
Development of a prototype kinestatic platform for application to space and ground servicing tasks. Phase 1: Concept Modeling
[NASA-CR-194036] p 887 N94-16905
STATIC TESTS
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 2: Static wind tunnel tests
[NASA-CR-177626-VOL-2] p 856 N94-15677
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
STATISTICAL ANALYSIS
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
US civil airmen statistics: Calendar year 1992
[AD-A267708] p 853 N94-14965
Statistical computation of tolerance limits
[NASA-TM-108424] p 1172 N94-15535
Poisson filtering of laser ranging data
p 917 N94-15593
Statistical analysis of trigonometric parallaxes
[NASA-CR-194558] p 1172 N94-15641
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710
Higher order statistics in signal processing
[FFI-92/2008] p 989 N94-15714
Brightness temperature and attenuation statistics at 20.6 and 31.65 GHz p 996 N94-16045
Statistical techniques for study design of microgravity life sciences experiments p 980 N94-16094
Dust grain resonant capture: A statistical study
p 1245 N94-16384
Moving target indicator using higher order statistics
[AD-D015890] p 1000 N94-16917
The use of the Air Force Academy high wind alert system in forecasting moderate intensity wind events for military bases in the Colorado Springs area
[AD-A267648] p 1107 N94-17245
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426
Statistics and physical oceanography
[AD-A268565] p 1115 N94-17598
STATISTICAL CORRELATION
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
STATISTICAL DISTRIBUTIONS
The MADONA experiments (Meteorology and Diffusion Over Non-uniform Areas): High-resolution in-plume concentration fluctuations measurements using lidar remote sensing technique
[AD-A267711] p 1105 N94-14938
Moments in statistics: Approximations to densities and goodness-of-fit
[AD-A266600] p 1173 N94-16726
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
STATISTICAL TESTS
Formation of on-site normal points
p 917 N94-15592
Bounds on inconsistent inferences for sequences of trials with varying probabilities
[AD-A267146] p 1172 N94-15733
Moments in statistics: Approximations to densities and goodness-of-fit
[AD-A266600] p 1173 N94-16726
STATORS
Circle diagram approach for self excited induction generators
[DE93-010031] p 1010 N94-15971
STEADY FLOW
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
STEADY STATE
Logarithmic asymptotics for steady-state tail probabilities in a single-server queue
[AD-A266746] p 1165 N94-15775
Fast simulation of steady-state availability in non-Markovian highly dependable systems
[AD-A266747] p 1174 N94-15823
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
High power steady state MPD thrusters
[AD-A267277] p 928 N94-17308
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
STEELS
The corrosion protection of metals by ion vapor deposited aluminum
[NASA-TM-108425] p 955 N94-15832
Measurement and theory of the dependence of hardness on residual stress
[AD-A267553] p 1061 N94-17105
Influence of grain size on the energy storing ability during uniaxial stretching of austenite steel
[IFTR-22/1992] p 961 N94-17121
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638
STEEPEST DESCENT METHOD
Steepest descent approximations for accretive operator equations
[DE93-628586] p 1171 N94-17667
STEERING
Laser beam steering device p 1045 N94-17357
STELLAR ENVELOPES
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
The chromosphere of VV cephei and the distribution of circumstellar dust around red giants and supergiants
[NASA-CR-193594] p 1297 N94-16866
STELLAR EVOLUTION
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
STELLAR MASS ACCRETION
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
Variability of the Seyfert galaxy MKN 766 in the Rosat all sky survey
[MPE-PREPRINT-221] p 1240 N94-17591
STELLAR PARALLAX
Statistical analysis of trigonometric parallaxes
[NASA-CR-194558] p 1172 N94-15641
STELLAR RADIATION
A comparison of calculated and observed monochromatic type Ia supernova light curves
[MPA-709] p 1237 N94-17629
STELLAR SYSTEMS
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
STELLAR WINDS
The astrophysical interpretation of isotope anomalies in graphite and SiC grains of chondrites
p 1244 N94-16343
STELLARATORS
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869
STEPPING MOTORS
Tilt mechanism
[AD-D015780] p 1047 N94-16548
STEREOSCOPIC VISION
ARPA unmanned ground vehicle stereo vision program at Teleos Research
[AD-A267632] p 1167 N94-17202
Neural basis of motion perception
[AD-A267267] p 1133 N94-17265
STIRLING CYCLE
Proposed guidelines for reporting performance of a solar dish/Stirling electric generation system
[DE93-016493] p 1092 N94-16112
STIRLING ENGINES
SPDE/SPRE final summary report
[NASA-CR-187086] p 924 N94-15482
Proposed guidelines for reporting performance of a solar dish/Stirling electric generation system
[DE93-016493] p 1092 N94-16112
STOCHASTIC PROCESSES
Looking at Fokker-Planck dynamics with a noisy instrument
[AD-A267049] p 1117 N94-15662
Theoretical studies relating to the interaction of radiation with matter
[AD-A267134] p 1180 N94-15689
Segment-based acoustic models for continuous speech recognition
[AD-A267138] p 988 N94-15691
Stochastic scheduling in in-forest networks
[INRIA-RR-1719] p 1164 N94-15695
Efficient algorithmic techniques for combinatorial problems
[AD-A267151] p 1172 N94-15777
Generation of artificial helioseismic time-series
[NASA-CR-194612] p 1299 N94-15968
A novel approach for structural mechanics problems with stochasticity
[AD-A266189] p 1059 N94-16123
Interferometric GPS attitude: A stochastic error model, DREO report
[AD-A266411] p 864 N94-16457
Stochastic damage evolution in textile laminates
p 939 N94-16861
Nonlinear analysis of mechanical systems under combined harmonic and stochastic excitation
[AD-A266217] p 1173 N94-16937
Stochastic chaos: An analog of quantum chaos
[DE93-016619] p 1220 N94-16956
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
An approximation for computing reduction in bandwidth requirements using intelligent multiplexers
[AD-A267434] p 1001 N94-17026
Energy deposition fluctuations induced by ions in microvolumes and nanovolumes: An analytic approach. 1: Theory
[AD-A267959] p 1173 N94-17495
Stochastic scheduling in a multiclass G/G/1 queue
[INRIA-RR-1746] p 1162 N94-17537
State space partitioning methods for solving a class of stochastic network problems
[AD-A267494] p 1173 N94-17585
STOICHIOMETRY
MeV ion-beam analysis of optical data storage films
p 1226 N94-14984
Scintillation mechanism in stoichiometric cerium compounds
[DE93-015499] p 948 N94-16771
Transient phenomena following precipitation and re-solution anneals in a NiTi alloy
[AD-A267557] p 961 N94-17106
STONY METEORITES
Size distribution of interplanetary iron and stony particles related with deep-sea spherules p 1245 N94-16388

STONY-IRON METEORITES
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
STORAGE BATTERIES
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery [DE93-015238] p 1010 N94-16061
Field investigation of the relationship between battery size and PV system performance [DE93-016503] p 1016 N94-17671
STORAGE RINGS (PARTICLE ACCELERATORS)
Fundamental-mode RF design in e(+)e(-) storage ring factories [DE93-015249] p 1183 N94-16809
The stability of ions in a storage ring in the presence of small gap insertion devices [DE93-015387] p 1184 N94-16828
STORAGE STABILITY
Efficacy of flocculating and other emergency water purification tablets [AD-A266695] p 1148 N94-15840
Lithium D-cell study [NASA-CR-192705] p 1011 N94-16505
STORAGE TANKS
Ground testing for the no-vent fill of cryogenic tanks: Results of tests for a 71 cubic foot tank [NASA-TM-106293] p 1030 N94-17486
Environmental use of a Laser Range Finder and the Advanced Visualization System [DE93-016163] p 1043 N94-17677
STORMS
Orographic microbursts in a severe winter windstorm [AD-A267651] p 1108 N94-17247
Propagation characteristics of mesoscale convective systems [AD-A268130] p 1109 N94-17522
STOVL AIRCRAFT
The lift-fan powered-lift aircraft concept: Lessons learned [NASA-CR-177616] p 866 N94-15718
Lift-fan aircraft: Lessons learned-the pilot's perspective [NASA-CR-177620] p 867 N94-15950
STRAIN DISTRIBUTION
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen [AD-A267879] p 960 N94-17041
Damage evolution in filled elastomers [AD-A268067] p 1062 N94-17507
STRAIN ENERGY RELEASE RATE
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen [AD-A267879] p 960 N94-17041
STRAIN GAGE BALANCES
Monopiece strain gauge sting mounted wind tunnel balance [CA-PATENT-1-311-626] p 1032 N94-15697
STRAIN GAGES
Use of photostress and strain gages to analyze behavior of weldments and use of photostress and strain gages to analyze behavior of an aft skirt test specimen [NASA-CR-194575] p 1058 N94-15716
Simultaneous measurement of temperature and strain using four connecting wires [NASA-TM-104271] p 1032 N94-15754
Automated strain gauge plethysmograph [AD-A267323] p 1035 N94-17002
STRAIN HARDENING
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum [DE93-011251] p 959 N94-16764
Fatigue life program using strain-life methods [AD-A267310] p 1060 N94-16943
STRAIN MEASUREMENT
Report of the International Center for Earth Tides for the period 1985-1989 p 1099 N94-15801
Cooperative projects in geodynamical instrumentation between the State Seismological Bureau (China) and the Royal Observatory of Belgium p 1037 N94-15806
Earth tides results obtained with gravimeters, clinometers, and strainmeters in Belgium and in Grand Duchy of Luxembourg p 1100 N94-15809
Damage evolution in filled elastomers [AD-A268067] p 1062 N94-17507
The photonical, pure grid method [NLR-TP-91478-U] p 1062 N94-17600
STRAIN RATE
Rheology of water and ammonia-water ices p 953 N94-16188
Experimental study of nonassociated flow and instability of frictional materials [AD-A266421] p 1024 N94-16555
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum [DE93-011251] p 959 N94-16764
Creep ductility of iron at very low strain rates: The effects of sulfur [DE93-015490] p 959 N94-16890
Time dependent turbulence modeling and analytical theories of turbulence [NASA-TM-106379] p 1029 N94-17385
Tensiie and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires [NASA-TM-106350] p 962 N94-17652
Shear wave measurements in shock-induced, high-pressure phases [DE93-016461] p 1062 N94-17664
STRAKES
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds [NASA-TP-3360] p 859 N94-16573
STRANGENESS
Fast pulsars, compact stars, and the strange matter hypothesis [DE93-015039] p 1239 N94-16052
STRAPDOWN INERTIAL GUIDANCE
Analysis of the accuracy of strapdown inertial surveying systems [SER-C-391] p 1081 N94-15156
STRATIFICATION
Subwavelength structured surfaces and their applications p 1194 N94-17337
STRATIFIED FLOW
Surface and internal signatures of organized vortex motions in stratified fluid [AD-A267015] p 1020 N94-15526
STRATIGRAPHY
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong p 1007 N94-16197
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Geochemical evidences for two chondritic-like cometary or asteroidal impacts before and at the K/T boundary p 1244 N94-16359
STRATOSPHERE
Middle atmospheric electric fields over thunderstorms [NASA-CR-194619] p 1106 N94-16493
STRATOSPHERIC WARMING
Investigate wave-mean flow interaction and transport in the extratropical winter stratosphere [NASA-CR-194555] p 1098 N94-15639
STREAK CAMERAS
Streak camera based SLR receiver for two color atmospheric measurements p 914 N94-15573
The first satellite laser echoes recorded on the streak camera p 914 N94-15574
Test results from LAGEOS-2 optical characterization using pulsed lasers p 915 N94-15577
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Two wavelength satellite laser ranging using SPAD p 916 N94-15584
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
STRESS (BIOLOGY)
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
STRESS (PHYSIOLOGY)
Sleep management user's guide for special operations personnel [AD-A267746] p 1119 N94-14943
Activity/rest patterns of instructor and rates student pilots during rapid transitions from daytime to nighttime duty hours at the Eastern Army Aviation Training site [AD-A267038] p 1131 N94-15659
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
STRESS (PSYCHOLOGY)
Scuba-diving, anxiety and task performance p 1132 N94-15938
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
STRESS ANALYSIS
Construction and calculation p 931 N94-15256
High temperature advanced structural composites. Volume 3: Mechanics [AD-A267024] p 933 N94-15626
A simplistic look at limit stresses from random loading [NASA-TM-108427] p 1058 N94-15710
Continuous fabrication of SiC fiber tows by chemical vapor deposition [AD-A266460] p 936 N94-16569
Programs and resources for control of job stress in the Federal workplace p 1124 N94-16617
Elastooptical brittle materials in experimental studies of the state of stress and deformation [IFTR-22/1991] p 1059 N94-16651
Stress analysis of laminated composites with preformed holes. Part 1: Single plies with embedded material discontinuities [AD-A266524] p 936 N94-16795
Creep ductility of iron at very low strain rates: The effects of sulfur [DE93-015490] p 959 N94-16890
Static analysis of beams on an elastic base as stated by generalized functions [IFTR-27/1991] p 1060 N94-16923
Mean strain effects on the strain life fatigue curve [AD-A267211] p 960 N94-16984
Surface waves in an inhomogeneous, isotropic, elastic half-space [IFTR-18/1991] p 1060 N94-17047
Analysis of the strengthening of aluminum alloy undergoing plastic deformation under conditions of a compound state of stress [IFTR-21/1991] p 960 N94-17093
A review of Australian and New Zealand investigations on aeronautical fatigue during the period April 1991 to March 1993 [AD-A267532] p 868 N94-17117
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading [AD-A267666] p 1061 N94-17269
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method [NASA-CR-194267] p 1062 N94-17445
STRESS CONCENTRATION
ITER-HARD Toroidal Field coil structural analysis [DE93-014834] p 1201 N94-15981
Fatigue life program using strain-life methods [AD-A267310] p 1060 N94-16943
STRESS CORROSION CRACKING
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites [DE93-015688] p 934 N94-16158
Stress corrosion cracking of 316 SS and Incoloy-800 in high temperature aqueous containing sulfate and chloride [DE93-623325] p 952 N94-17302
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models [NASA-CR-191538] p 942 N94-17638
STRESS DISTRIBUTION
Thermal stresses of a trimaterial medium in a nonuniform temperature field [AD-A267243] p 930 N94-14975
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments [AD-A266465] p 1059 N94-16587
Static analysis of beams on an elastic base as stated by generalized functions [IFTR-27/1991] p 1060 N94-16923
High temperature materials technology research for advanced thermionic systems [DE93-018302] p 960 N94-16964
Measurement and theory of the dependence of hardness on residual stress [AD-A267553] p 1061 N94-17105
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading [AD-A267666] p 1061 N94-17269
STRESS INTENSITY FACTORS
Environmental effects on elevated temperature subcritical crack growth of SiC/SiC composites [DE93-015688] p 934 N94-16158
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models [NASA-CR-191538] p 942 N94-17638
STRESS MEASUREMENT
Thermal stress effects in intermetallic matrix composites [NASA-CR-191191] p 1054 N94-16518
The processing and mechanical properties of high temperature/high performance composites. Book 5: Processing and miscellaneous properties [AD-A266398] p 935 N94-16529
Shear wave measurements in shock-induced, high-pressure phases [DE93-016461] p 1062 N94-17664
STRESS RELAXATION
On the design of structural components using materials with time-dependent properties [NASA-TM-108428] p 1059 N94-16519

STRESS TENSORS
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642

STRESS-STRAIN RELATIONSHIPS
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
Systematology for elastic-plastic material equations by large deformations on the basis of the Cosserat-continuum model
[SCHRIFTENR-PHYSIKAL-ING-BD] p 1058 N94-15642
Experimental study of nonassociated flow and instability of frictional materials
[AD-A266421] p 1024 N94-16555
Effect of tow alignment on the mechanical performance of 3D woven textile composites p 937 N94-16851
Fatigue life program using strain-life methods
[AD-A267310] p 1060 N94-16943
Mean strain effects on the strain life fatigue curve
[AD-A267211] p 960 N94-16984
Quantitative assessment of the accuracy of constitutive laws for plasticity with an emphasis on cyclic deformation
[AD-A267562] p 961 N94-17109
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507

STRESSES
A model for non-linear creep and physical ageing in PVC
[NPL-DMM(A)-91] p 1057 N94-15016
Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825

STRETCHING
Influence of grain size on the energy storing ability during uniaxial stretching of austenite steel
[IFTR-22/1992] p 961 N94-17121

STRING THEORY
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Particle physics and cosmology, Task C
[DE93-016865] p 1239 N94-16118

STRINGS
Testing string superprimitivity in parallel
[AD-A267814] p 1155 N94-17399

STRIP TRANSMISSION LINES
Determination of equivalent circuit for PVDF shock-pressure gauges
[DE93-016492] p 1034 N94-16452

STROBOSCOPES
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931

STRONG INTERACTIONS (FIELD THEORY)
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283

STRONTIUM COMPOUNDS
An improved light source for laser ranging p 913 N94-15567

STRONTIUM OXIDES
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite
[NASA-CASE-LEW-15263-2] p 934 N94-15929

STRUCTURAL ANALYSIS
An assessment of finite-element modeling techniques for thick-solid/thin-shell joints analysis
[NASA-TM-108426] p 1058 N94-15534
Structural investigation of electrochemically etched silicon
[DE93-015300] p 1207 N94-15827
Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
ITER-HARD Toroidal Field coil structural analysis
[DE93-014834] p 1201 N94-15981
The design and analysis of a modular microgravity test platform for use aboard the NASA KC-135 aircraft p 899 N94-16101
A novel approach for structural mechanics problems with stochasticity
[AD-A266189] p 1059 N94-16123
On the design of structural components using materials with time-dependent properties
[NASA-TM-108428] p 1059 N94-16519
Evaluation of hemoglobin-oxygen equilibrium binding by rapid-scanning spectrophotometry and singular-value decomposition
[AD-A266453] p 1123 N94-16564
ASTROS enhancements. Volume 1: ASTRO user's manual
[AD-A266818] p 1151 N94-16768
ASTROS enhancements. Volume 2: ASTRO programmer's manual
[AD-A266819] p 1151 N94-16769
Quantification of processing artifacts in textile composites p 939 N94-16860
Three-dimensional analysis of anisotropic spatially reinforced structures p 939 N94-16863
Finite element analysis of structural engineering problems using a viscoplastic model incorporating two back stresses
[NASA-TM-106046] p 1060 N94-16881
Static analysis of beams on an elastic base as stated by generalized functions
[IFTR-27/1991] p 1060 N94-16923
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
Modeling, estimation and control of distributed parameter systems
[AD-A267325] p 1026 N94-17003
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246
Structural mechanics division research and technology accomplishments for CY 1992 and plans for CY 1993
[NASA-TM-107752] p 1062 N94-17479

STRUCTURAL BASINS
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
Martian crater degradation by eolian processes: Analogy with the Rio Cuarto Crater Field, Argentina p 1251 N94-16196
Lunar impact basins: New data for the nearside northern high latitudes and eastern limb from the second Galileo flyby p 1258 N94-16228
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
Hellas basin, Mars: Formation by oblique impact p 1280 N94-16350

STRUCTURAL DESIGN
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
Minimum accommodation for aerobrake assembly. Phase 2: Structural concepts for a lunar transfer vehicle aerobrake which can be assembled on orbit
[NASA-TM-107610] p 885 N94-15446
Helicopter structures: A review of loads, fatigue design techniques, and usage monitoring
[AD-A267115] p 866 N94-15651
Recent advances in ordered intermetallics
[DE93-015308] p 955 N94-15862
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392
The effect of electric discharge machined notches on the fracture toughness of several structural alloys
[AD-A268605] p 962 N94-17464
Structural mechanics division research and technology accomplishments for CY 1992 and plans for CY 1993
[NASA-TM-107752] p 1062 N94-17479
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596
Nonlinear random response prediction using MSC/NASTRAN
[NASA-TM-109029] p 1179 N94-17650

STRUCTURAL ENGINEERING
Design Quality Task Force survey comments
[AD-A266283] p 1225 N94-16473
Finite element analysis of structural engineering problems using a viscoplastic model incorporating two back stresses
[NASA-TM-106046] p 1060 N94-16881

STRUCTURAL FAILURE
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052

STRUCTURAL PROPERTIES (GEOLOGY)
Importance of expansion and contraction in the formation of tectonic features on the Moon p 1250 N94-16189
Structural mapping of Maxwell Montes p 1271 N94-16304
Was Martian mantle wet? A possible consequence of rapid core formation p 1277 N94-16335

STRUCTURAL RELIABILITY
The Ceramic Technology Project: Ten years of progress
[DE93-015991] p 968 N94-16843
Overview of the FAA/DCA/NLR programs related to ageing aircraft
[NLR-TR-92119-U] p 854 N94-17614

STRUCTURAL STABILITY
The stability and dynamics of elastic structures and fluid flows
[AD-A267990] p 1029 N94-17414

STRUCTURAL STRAIN
A review of Australian and New Zealand investigations on aeronautical fatigue during the period April 1991 to March 1993
[AD-A267532] p 868 N94-17117

STRUCTURAL VIBRATION
Vibro-acoustic analysis of an aircraft maintenance dock
[AD-A266778] p 871 N94-14908
Forced harmonic vibration of the generally orthotropic cylindrical shell with inner and outer fluid loading
[AD-A266985] p 1057 N94-15150
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

STUDENTS
US civil airmen statistics: Calendar year 1992
[AD-A267708] p 853 N94-14965
Developments in the Higher Technical Aerospace Education p 854 N94-15130
Student researchers
[NASA-TM-109441] p 1221 N94-15340
STS-29 crew with student experiment
[NASA-TM-109545] p 1116 N94-15378
Questioning mechanisms during tutoring, conversation, and human-computer interaction
[AD-A266199] p 1137 N94-16108
Spaceship Earth: A partnership in curriculum writing p 1222 N94-16356
From the Moons of Jupiter to the Milky Way
[NASA-CR-194649] p 1240 N94-17059

SUBDUCTION (GEOLOGY)
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
Estimates of lithospheric thickness on Venus p 1267 N94-16277
Models of thermal/chemical boundary layer convection: Potential application to Venus p 1279 N94-16348

SUBLETHAL DOSAGE
The relationship of metallothionein induction to the heat shock response
[AD-A266634] p 1122 N94-15741

SUBLIMATION
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates p 1260 N94-16238
Equatorial ground ice on Mars: Steady-state stability p 1290 N94-16403

SUBLIMINAL STIMULI
States of awareness 1: Subliminal perception relationship to situational awareness
[AD-A267249] p 1132 N94-16942

SUBMERGED BODIES
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526

SUBMILLIMETER WAVES
Submillimeterwave SIS mixer developments p 903 N94-15054
Hot electron mixers, the potential competition p 903 N94-15055
Submm/FIR bolometers p 904 N94-15056
Optically-switched submillimeter-wave oscillator and radiator
[NASA-CASE-NPO-18547-1-CU] p 1014 N94-17324

SUBORBITAL FLIGHT
Astronauts number 2
[NASA-TM-109429] p 873 N94-15500

SUBROUTINE LIBRARIES (COMPUTERS)
Intel NX to PVM 3.2 message passing conversion library
[NASA-TM-109038] p 1152 N94-17060
SUBROUTINES
Mobile and replicated alignment of arrays in data-parallel programs
[NASA-CR-194294] p 1158 N94-15113
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Intel NX to PVM 3.2 message passing conversion library
[NASA-TM-109038] p 1152 N94-17060
SUBSONIC AIRCRAFT
Subsonic aerodynamic characteristics of the HL-20 lifting-body configuration
[NASA-TM-4515] p 861 N94-17284
SUBSONIC FLOW
Effect of wind tunnel acoustic modes on linear oscillating cascade aerodynamics
[NASA-TM-106367] p 869 N94-15866
On solving the compressible Navier-Stokes equations for unsteady flows at very low Mach numbers
[NASA-TM-106380] p 1027 N94-17128
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
SUBSONIC SPEED
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681
Flow analysis for the nacelle of an advanced ducted propeller at high angle-of-attack and at cruise with boundary layer control
[NASA-TM-106371] p 858 N94-16571
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line
[NASA-TP-3359] p 859 N94-16574
SUBSONIC WIND TUNNELS
Determining the effect of endwall boundary layer suction in a large scale subsonic compressor cascade
[AD-A267208] p 859 N94-16913
User's manual for the Langley Research Center 14- by 22- foot subsonic tunnel static data acquisition system
[NASA-TM-109027] p 861 N94-17639
SUBSTITUTES
Prioritization methodology for chemical replacement
[NASA-TP-3421] p 976 N94-15723
SUBSTRATES
Substrate effects in superconducting tunnel junction detectors p 908 N94-15083
Selective formation of porous silicon
[NASA-CASE-NPO-18735-1-CU] p 966 N94-15960
Polished substrate surface and cleaning study for coated optic quality
[DE93-014116] p 1190 N94-15975
Ablation, surface activation, and electroless metallization of insulating materials by pulsed excimer laser irradiation
[DE93-015808] p 1040 N94-16664
Materials processing and manufacturing technologies for diamond substrate multichip modules (DSMCM)
[AD-A267316] p 969 N94-16946
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553
SUCROSE
Contained liquids in microgravity, part 2
p 979 N94-16085
SUCTION
Determining the effect of endwall boundary layer suction in a large scale subsonic compressor cascade
[AD-A267208] p 859 N94-16913
SUITS
Cool suit
[NASA-TM-109639] p 1120 N94-15250
SULFATES
Stress corrosion cracking of 316 SS and Incoloy-800 in high temperature aqueous containing sulfate and chloride
[DE93-623325] p 952 N94-17302
SULFIDATION
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
Vanadium corrosion studies
[AD-A266489] p 959 N94-16781
SULFUR
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
SULFUR DIOXIDES
The use of TIMS data to estimate the SO2 concentrations of volcanic plumes: A case study at Mount Etna, Sicily p 1065 N94-16608
SULFUR HEXAFLUORIDE
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526
SULFURIC ACID
Investigations into the recovery of waste sulfuric acid with concentrated solar radiation
[DLR-FB-93-11] p 952 N94-17594
SUN
Unmasking the Sun
[NASA-TM-109595] p 1298 N94-15287
SUNLIGHT
Effects of levitated dust on astronomical observations from the lunar surface p 1239 N94-16433
SUPERCOMPUTERS
Parallel processing and scientific applications
[AD-A267179] p 1159 N94-15849
Requirements for supercomputing in energy research: The transition to massively parallel computing
[DE93-012376] p 1160 N94-16774
ONRASIA scientific information bulletin, volume 18, number 2
[AD-A267798] p 1304 N94-17305
Benchmarking massively parallel architectures
[DE93-016486] p 1162 N94-17646
SUPERCONDUCTING DEVICES
Substrate effects in superconducting tunnel junction detectors p 908 N94-15083
A multilayered approach to superconducting tunnel junction x ray detectors p 908 N94-15089
Nontidal gravity changes observed with a superconducting gravimeter p 1100 N94-15808
SUPERCONDUCTING FILMS
High temperature superconductivity
[AD-A267006] p 1008 N94-15635
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS
[DE93-016218] p 1209 N94-16447
Advanced thin-film deposition and physical properties of high-temperature and other novel superconducting materials
[AD-A268199] p 1216 N94-17561
SUPERCONDUCTING MAGNETS
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875
Engineering design of a high-temperature superconductor current lead
[DE93-015156] p 1013 N94-17226
The inverse problem to the evaluation of magnetic fields
[DE93-015239] p 1175 N94-17288
SUPERCONDUCTING SUPER COLLIDER
The (delta)f algorithm for beam dynamics
[DE93-015632] p 1187 N94-16660
Statistics of the half-integer stopband
[DE93-016101] p 1173 N94-17236
SUPERCONDUCTIVITY
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868
Superconducting ceramics: Selected properties and methods of production
[IFTR-23/1991] p 969 N94-16924
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104
Basic optical studies of high T(c) oxide superconductors
[AD-A268148] p 1014 N94-17428
High temperature deformation behavior of YBa2Cu3O(6+x) superconducting ceramic materials
[AD-A268164] p 973 N94-17430
SUPERCONDUCTORS
A new approach to optical photon detection
p 899 N94-15028
Superconductive x ray photon detectors
p 900 N94-15031
Metastable superconductors as photon detectors
p 900 N94-15032
Hot electron mixers, the potential competition
p 903 N94-15055
Quasiparticle trapping in distributed superconducting three-terminal tunnel junction devices
p 910 N94-15101
Fullerene superconductors
[AD-A266749] p 1010 N94-15954
Density of states and tunneling characteristics of layered superconductors
[DE93-015898] p 1211 N94-16839
SUPERCRITICAL FLUIDS
Extraction and isotopic analysis of medium molecular weight hydrocarbons from Murchison using supercritical carbon dioxide p 1241 N94-16184
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997
SUPERCRITICAL PRESSURES
Removal of carbonaceous contaminants from silica aerogel p 953 N94-16256
SUPERCRITICAL WINGS
Physical properties of the benchmark models program supercritical wing
[NASA-TM-4457] p 866 N94-15722
SUPERGIANT STARS
The chromosphere of VV cephei and the distribution of circumstellar dust around red giants and supergiants
[NASA-CR-193594] p 1297 N94-16866
SUPERHEATING
Explosive boiling at very low heat fluxes: A microgravity phenomenon
[NASA-TM-106325] p 1046 N94-15817
SUPERHIGH FREQUENCIES
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 1: Theory and numerical results
[AD-A267105] p 988 N94-15649
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
High resolution SAR applications and instrument design p 993 N94-15913
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment
p 995 N94-16038
The ACTS propagation program p 995 N94-16039
SUPERLATTICES
Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization
p 974 N94-14982
A multilayered approach to superconducting tunnel junction x ray detectors p 908 N94-15089
Design, synthesis and characterization of novel nonlinear optical polymers
[AD-A267035] p 964 N94-15675
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
The growth of InAs(1-x)Sb(x)/InAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE93-015028] p 1208 N94-16012
Interfacial structure of lattice mismatched bcc(110)/bcc(110) transition metal superlattices
[DE93-015162] p 1208 N94-16058
Rational design, construction, and processing of high-performance nonlinear optical materials
[AD-A266185] p 1191 N94-16454
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers
[DE93-015809] p 1184 N94-16838
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282

Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

SUPERNOVA REMNANTS
A comparison of calculated and observed monochromatic type Ia supernova light curves
[MPA-709] p 1237 N94-17629

SUPERNOVAE
A comparison of calculated and observed monochromatic type Ia supernova light curves
[MPA-709] p 1237 N94-17629

SUPERPLASTICITY
High temperature deformation behavior of YBa2Cu3O(6+x) superconducting ceramic materials
[AD-A268164] p 973 N94-17430

SUPERSONIC BOUNDARY LAYERS
Incorporation of boundary layer heating predictive methodology into NSWCDD aeroprediction code
[AD-A267000] p 1020 N94-15632
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A268240] p 1026 N94-16929

SUPERSONIC COMBUSTION
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215
Chemical reactions in turbulent mixing flows
[AD-A268287] p 861 N94-17580

SUPERSONIC COMBUSTION RAMJET ENGINES
Flight testing of airbreathing hypersonic vehicles
[NASA-TM-4524] p 886 N94-15753

SUPERSONIC FLOW
Advanced methods for cascade testing
[AGARD-AG-328] p 1016 N94-15119
Special course on Shock-Wave/Boundary-Layer Interactions in Supersonic and Hypersonic Flows
[AGARD-R-792] p 1017 N94-15196
Swept shock wave/laminar boundary layer interactions, experimental, and numerical results
p 1017 N94-15198
Unsteady phenomena in shock wave/boundary layer interaction p 1017 N94-15200
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling
p 1018 N94-15201
On the interaction between the shock wave attached to a wedge and freestream disturbances
[NASA-CR-191528] p 1019 N94-15478
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551
Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
Single block three-dimensional volume grids about complex aerodynamic vehicles
[NASA-TM-108986] p 1030 N94-17476
Thin-layer and full Navier-Stokes calculations for turbulent supersonic flow over a cone at an angle of attack
[NASA-CR-189103] p 861 N94-17558
An investigation of oblique shock/boundary layer interaction control
[AD-A268106] p 861 N94-17574
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609

SUPERSONIC FLUTTER
Aerothermoelastic analysis of a NASP demonstrator model
[NASA-TM-109007] p 867 N94-17055

SUPERSONIC INLETS
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551

SUPERSONIC NOZZLES
Shock-free supersonic elliptic nozzles and method of forming same
[NASA-CASE-LAR-14054-1] p 925 N94-15947
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215

SUPERSONIC SPEED
Development of a quiet supersonic wind tunnel with a cryogenic adaptive nozzle
[NASA-CR-194548] p 871 N94-15117

SUPERSONIC WIND TUNNELS
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
Development of a quiet supersonic wind tunnel with a cryogenic adaptive nozzle
[NASA-CR-194548] p 871 N94-15117

SUPERSYMMETRY
Supersymmetry of gauge equations and geometric nonadiabatic phases
[DE93-626671] p 1219 N94-14935
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Existence of a new instanton in constrained Yang-Mills-Higgs theory
[NIKHEF-H/93-02] p 1186 N94-17601
The universality of the shift of the Chern-Simons parameter for a general class of BRS invariant regularizations
[NIKHEF-H/93-03] p 1220 N94-17602
SUSY in the sky
[NIKHEF-H/93-04] p 1240 N94-17603
Derivation of the Verlinde formula from Chern-Simons theory and the G/G model
[DE93-628620] p 1221 N94-17632

SUPPORT SYSTEMS
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819

SUPPORTS
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194

SURFACE DEFECTS
Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals
[DE93-012510] p 1207 N94-15973

SURFACE DIFFUSION
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532

SURFACE EMITTING LASERS
JSEP fellowship
[AD-A266568] p 1211 N94-16800
Curved grating fabrication techniques for concentric-circle grating, surface-emitting semiconductor lasers p 1045 N94-17349

SURFACE ENERGY
Simulation studies for surfaces and materials strength
[NASA-CR-193387] p 1056 N94-15004
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250
Regulation of attached bacterial growth by adsorbed proteins
[AD-A267756] p 1118 N94-17275
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610
Surface energy balance modeling at mesoscale: The contribution of the future Earth observing system
[BCRS-91-04] p 1085 N94-17616

SURFACE FINISHING
Assessment of chromate and non-chromate conversion coatings for Al alloys using electrochemical impedance spectroscopy
[AD-A267205] p 965 N94-15859
The effect of process parameters on the surface finish of plasma polymers
[DE93-014112] p 966 N94-15924
The role of carbon and temperature in determining electrical conductivity of basins, crust and mantle
[DE93-015936] p 1101 N94-16840
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122

SURFACE IONIZATION
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649

SURFACE LAYERS
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061
Spectral evidence of size dependent space weathering processes on asteroid surfaces p 1241 N94-16174
Kinetics of silica-phase transitions
[DE93-016231] p 1217 N94-17659

SURFACE NAVIGATION
Perception for outdoor navigation
[AD-A266867] p 863 N94-14919

SURFACE PROPERTIES
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam
[NASA-CR-193851] p 946 N94-15766
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy
[DE93-014056] p 1207 N94-15923
Spectral evidence of size dependent space weathering processes on asteroid surfaces p 1241 N94-16174
Discussion of band selection and methodologies for the estimation of precipitable water vapour from AVIRIS data p 1074 N94-16707
Electron spectroscopy analysis
[NASA-CR-193591] p 951 N94-17039
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104
Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654

SURFACE REACTIONS
The thermal dissociation of NH2CHO(ND2CHO) on Si(100)-2x1
[AD-A266903] p 942 N94-14956
The role of interfacial chemistry in surface nucleation and growth of calcium oxalate
[DE93-015689] p 1209 N94-16159
An investigation of the hydrolytic resistance of sodium-calcium plate glass with a layer of silica deposited on its surface
[IFTR-34/1991] p 971 N94-17120
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422
Surface reactivity of combustion generated soot particles
[AD-A268017] p 952 N94-17532

SURFACE ROUGHNESS
On the receptivity problem for O(1) wavelength Goertler vortices
[NASA-CR-191519] p 1016 N94-15005
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 1: Theory and numerical results
[AD-A267105] p 988 N94-15649
Method and apparatus for non-destructive evaluation of composite materials with cloth surface impressions
[NASA-CASE-LAR-14535-1] p 933 N94-15878
The effect of process parameters on the surface finish of plasma polymers
[DE93-014112] p 966 N94-15924
Polished substrate surface and cleaning study for coated optic quality
[DE93-014116] p 1190 N94-15975
The processing and mechanical properties of high temperature/high performance composites. Book 1: Coonstituent properties of composites
[AD-A266394] p 935 N94-16483
Scattering from binary optics p 1195 N94-17341
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654

SURFACE ROUGHNESS EFFECTS
Preliminary results of polarization signatures for glacial moraines in the Mono Basin, Eastern Sierra Nevada
p 1078 N94-16746
Detecting surface roughness effects on the atmospheric boundary layer via AIRSAR data: A field experiment in Death Valley, California p 1078 N94-16747

SURFACE TEMPERATURE
Testing the waters from space --- Thermal mapping
[NASA-TM-109623] p 1082 N94-15409
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194599] p 856 N94-15678
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery
[DE93-015238] p 1010 N94-16061
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle
p 1293 N94-16421
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540

SURFACE TREATMENT
Studies of changes in the energy stored in metals as a result of subjecting them to a surface type technological process
[IFTR-25/1991] p 960 N94-17063

Atomic layer epitaxy group IV materials: Surface processes, thin films, devices and their characterization [AD-A267527] p 1213 N94-17116
Dry stripping as a surface treatment method [VTT-TIED-1348] p 985 N94-17544
Influence of the granular surface on the oxygen uptake in YBa2Cu3O(6+delta) ceramics [DE93-629162] p 974 N94-17634

SURFACE WATER
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030

SURFACE WAVES
Fine scale measurements of microwave backscatter from the ocean surface [AD-A264516] p 1111 N94-15134
Determination of the electromagnetic fields radiated from the ARES EMP simulator [AD-A267069] p 988 N94-15668
Observations and modelling of winds and waves during the Surface Wave Dynamics Experiment. Report 1: Intensive observation period IOP-1, 20-31 October 1990 [AD-A266384] p 1113 N94-16517
Surface waves in an inhomogeneous, isotropic, elastic half-space [IFTR-18/1991] p 1060 N94-17047

SURGERY
Laser artery repair [NASA-TM-109604] p 1120 N94-15312

SURGES
Potential transients, transmission and electrochemical corrosion detection [DE93-014055] p 956 N94-15922
OSA proceedings on Ultrafast Electronics and Optoelectronics, volume 14 [AD-A267972] p 1014 N94-17410
The Central American cold surge: An observational analysis of the deep southward penetration of North American cold fronts [AD-A268592] p 1110 N94-17607

SURVEILLANCE
Alternative optical architectures for multichannel adaptive optical processing [AD-A267052] p 1189 N94-15664
Decomposition of large sparse symmetric systems for parallel computation. Part 1: Theoretical foundations [AD-A267144] p 1159 N94-15750

SURVEYOR PROJECT
The 1968 highlights --- NASA programs and research [NASA-TM-109627] p 1302 N94-15413

SURVEYS
Design Quality Task Force survey comments [AD-A266283] p 1225 N94-16473
Identifying and responding to customer needs at the Kennedy Space Center p 1056 N94-16626
What is the radar tracking Glint problem and can it be solved? [AD-A266509] p 999 N94-16789
Maximizing participation of women in collegiate aviation education [NIAR-93-14] p 1222 N94-17261

SURVIVAL
STS-29 crew bailout in WETF [NASA-TM-109548] p 1136 N94-15385
1990 ASCAN land survival training [NASA-TM-109527] p 1136 N94-15390
On predicting the person-in-water drift for search and rescue [AD-A268083] p 1055 N94-17514

SUSPENSION SYSTEMS (VEHICLES)
Electrodynamic forces of the cross-connected figure-eight null-flux coil suspension system [DE93-015139] p 1048 N94-16969

SWEAT
Cool suit [NASA-TM-109639] p 1120 N94-15250

SWELLING
Swelling equilibria for temperature-sensitive ampholytic hydrogels [DE93-015264] p 966 N94-15996

SWEPT FORWARD WINGS
X-29: Experiment in flight [NASA-TM-109454] p 865 N94-15327

SWEPT WINGS
Special course on Shock-Wave/Boundary-Layer Interactions in Supersonic and Hypersonic Flows [AGARD-R-792] p 1017 N94-15196
Aerodynamic control of NASP-type vehicles through vortex manipulation. Volume 3: Wing rock experiments [NASA-CR-177626] p 857 N94-15780

SWINE
Increased vascular resistance with hemoglobin-based oxygen carriers [AD-A266454] p 1123 N94-16565

SWITCHES
Plasma flow switch and foil implosion experiments on Pegasus 2 [DE93-016464] p 1013 N94-17318
Isochronets: A high-speed network switching architecture [AD-A267811] p 1161 N94-17409

SWITCHING CIRCUITS
Stray insensitive switched capacitor composite operational amplifiers [AD-A267412] p 1012 N94-16976
Design of broadband wire antennas for frequency hopping applications [AD-A267405] p 1001 N94-17025
Non-blocking crossbar permutation engine with constant routing latency [NASA-CASE-NPO-18864-1-CU] p 1161 N94-17328
A scalable wrap-around shuffle exchange network with deflection routing [NASA-CASE-NPO-18983-1-CU] p 1161 N94-17330

SYMBIOSIS
Biofilm structure and diversity [AD-A267254] p 1118 N94-16989

SYMBIOTIC STARS
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations [NASA-CR-194616] p 1236 N94-16492

SYMBOLIC PROGRAMMING
Visual parallel programming with determinacy: A language specification, an analysis technique, and a programming tool [AD-A267560] p 1153 N94-17107

SYMBOLS
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11 [NASA-TM-104566-VOL-12] p 1111 N94-15529
Testing string superprimitivity in parallel [AD-A267814] p 1155 N94-17399

SYMMETRY
Application of symmetry properties to polarimetric remote sensing with JPL AIRSAR data p 1079 N94-16752
Analysis of temporal symmetry in non-gaussian random fields [AD-A266496] p 999 N94-16794

SYMPATHETIC NERVOUS SYSTEM
Melatonin, the pineal gland, and circadian rhythms [AD-A268200] p 1129 N94-17478

SYMPTOMOLOGY
Flight simulator-induced sickness and visual displays evaluation [AD-A267019] p 1122 N94-15845

SYNAPSES
Theoretical and experimental research into biological mechanisms underlying learning and memory [AD-A267441] p 1133 N94-17022
Synaptic plasticity and memory formation [AD-A267988] p 1133 N94-17453

SYNCHRONISM
Complexity analysis of real-time reinforcement learning applied to finding shortest paths in deterministic domains [AD-A266636] p 1131 N94-15742
Digital laser range finder emulator [AD-D015811] p 1040 N94-16540
Hydraulic pump with integral electric motor [AD-D015782] p 1011 N94-16549
Asynchronous design for parallel processing architectures [AD-A266523] p 1160 N94-16791
Verification of fault-tolerant clock synchronization systems [NASA-TP-3349] p 1161 N94-17449

SYNCHRONOUS MOTORS
Circuits and control processes for combining direct converters and inverter motors [ETN-93-94399] p 1008 N94-15448

SYNCHRONOUS SATELLITES
AMIGAU: A prototype tool aimed at mission analysis for satellites and satellite constellations p 888 N94-17133
ARIANE 5 light derivatives p 878 N94-17140
Small imaging satellite for Earth observing system adjunct p 891 N94-17151
Adequation of mini satellites to oceanic altimetry missions p 891 N94-17152
A study on an experimental communication system using microsatellites p 892 N94-17160

SYNCHROTRON RADIATION
Powder diffraction studies using anomalous dispersion [DE93-012531] p 1210 N94-16775
Application of cylindrical distribution functions to anisotropic scattering from amorphous films [DE93-015256] p 1183 N94-16811
Suppression of charge scattering in Moessbauer experiments using synchrotron radiation [DE93-015406] p 1212 N94-16887
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation [DE93-016161] p 974 N94-17676

SYNCHROTRONS
Study of the rare decays K(sub L)(sup 0) yields (mu)e, K(sub L)(sup 0) yields ee, and K(sub L)(sup 0) yields (mu)(mu) at KEK [DE93-753247] p 1180 N94-15135
The (delta)f algorithm for beam dynamics [DE93-015632] p 1187 N94-16660
Fundamental-mode RF design in e(+)e(-) storage ring factories [DE93-015249] p 1183 N94-16809
ARIES tokamak reactor study [DE93-017059] p 1203 N94-16901

SYNCOM 4 SATELLITE
STS-32 onboard 16mm photography quick release [NASA-TM-109472] p 880 N94-15376

SYNTHESIS (CHEMISTRY)
Synthesis and chemistry of novel cyclic fluorocarbons [AD-A267148] p 929 N94-15734
High temperature advanced structural composites. Volume 1: Executive summary and intermetallic compounds [AD-A267022] p 933 N94-15835
Ion doped quantum well lasers [AD-A267198] p 1038 N94-15853
Synthesis of ceramic oxide powders in a microwave plasma device [DE93-012741] p 965 N94-15920
Use of microgravity in the synthesis of ceramics using sol gel techniques p 979 N94-16088
High octane ethers from synthesis gas-derived alcohols [DE93-016861] p 975 N94-16898
Amide and tetrazene complexes of transition and main group elements as precursors for the low temperature synthesis of elemental nitrides [AD-A266246] p 950 N94-16931
Photodegradation of MDI based polyurethane/urea elastomers [AD-A267308] p 971 N94-16994
Theoretical studies of nonlinear optical properties of conjugated polymers [AD-A267390] p 1193 N94-17024
Synthesis of potential high-energy fuels [AD-A267508] p 975 N94-17073
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands [AD-A267592] p 930 N94-17192
Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups [AD-A267717] p 972 N94-17273
Synthesis and characterization of new low-dimensional metal complex conductors [AD-A268251] p 952 N94-17416

SYNTHETIC APERTURE RADAR
Overview of Enhanced Data Stream Array Processor (EDSAP) [AD-A266986] p 1158 N94-15492
Proceedings of the Third Spaceborne Imaging Radar Symposium [NASA-CR-194104] p 989 N94-15886
Almaz p 898 N94-15889
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
ENVISAT ASAR p 898 N94-15892
RADARSAT program p 898 N94-15893
Recent scientific advances in the use of radar in scientific hydrology p 991 N94-15895
Recent advances in radar remote sensing of forest p 991 N94-15897
Multifrequency observations p 992 N94-15902
SIR-C/X-SAR free flyer concept p 898 N94-15903
EOS SAR: A new approach p 992 N94-15904
TOPSAT: Global space topographic mission p 992 N94-15905
Calibration: Practical experience with ERS-1 p 992 N94-15907
Synthetic aperture radar signal processing: Trends and technologies p 992 N94-15908
Recent advances and plans in processing and geocoding of SAR data at the DFD p 992 N94-15909
Data distribution p 993 N94-15910
SAR sensor electronics: T/R modules p 993 N94-15911
Advanced antennas for SAR spacecraft p 993 N94-15912
High resolution SAR applications and instrument design p 993 N94-15913

Primary studies of Chinese spaceborne SAR p 993 N94-15916
International collaboration in SAR ground data systems p 993 N94-15917
AIRSAR South American deployment: Operation plan, version 3.0 p 994 N94-15919
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 1: AVIRIS Workshop [NASA-CR-194540] p 1066 N94-16666
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
Summaries of the Third Annual JPL Airborne Geoscience Workshop. Volume 3: AIRSAR Workshop [NASA-CR-194542] p 1075 N94-16731
A snow wetness retrieval algorithm for SAR p 1075 N94-16732
Comparison of JPL-AIRSAR and DLR E-SAR images from the MAC Europe 1991 campaign over testsite Oberpfaffenhofen: Frequency and polarization dependent backscatter variations from agricultural fields p 1075 N94-16733
Monitoring environmental state of Alaskan forests with AIRSAR p 1075 N94-16734
Comparison of modeled backscatter with SAR data at P-band p 1076 N94-16735
SAR backscatter from coniferous forest gaps p 1076 N94-16736
Retrieval of pine forest biomass using JPL AIRSAR data p 1076 N94-16737
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR) p 1076 N94-16738
Strategies for detection of floodplain inundation with multi-frequency polarimetric SAR p 1076 N94-16739
Supervised fully polarimetric classification of the Black Forest test site: From MAESTROI to MAC Europe p 1076 N94-16740
Relating multifrequency radar backscattering to forest biomass: Modeling and AIRSAR measurement p 1077 N94-16741
SAR observations in the Gulf of Mexico p 1077 N94-16742
Investigation of AIRSAR signatures of the Gulf Stream p 1077 N94-16743
Mapping of sea bottom topography p 1077 N94-16744
Sea bottom topography imaging with SAR p 1077 N94-16745
Preliminary results of polarization signatures for glacial moraines in the Mono Basin, Eastern Sierra Nevada p 1078 N94-16746
Extraction of quantitative surface characteristics from AIRSAR data for Death Valley, California p 1078 N94-16748
The TOPSAR interferometric radar topographic mapping instrument p 1078 N94-16749
Evaluation of the TOPSAR performance by using passive and active calibrators p 1078 N94-16750
Fitting a three-component scattering model to polarimetric SAR data p 1079 N94-16751
Application of symmetry properties to polarimetric remote sensing with JPL AIRSAR data p 1079 N94-16752
External calibration of polarimetric radar images using distributed targets p 1079 N94-16753
Processing of polarimetric SAR data for soil moisture estimation over Mahantango watershed area p 1079 N94-16754
Evaluation of polarimetric SAR parameters for soil moisture retrieval p 1079 N94-16755
Interaction types and their like-polarization phase-angle difference signatures p 1079 N94-16756
Application of modified ViCAR/IBIS GIS to analysis of July 1991 Flevoland AIRSAR data p 1080 N94-16757
Radar Analysis and Visualization Environment (RAVEN): Software for polarimetric radar analysis p 1080 N94-16758
Measuring ocean coherence time with dual-baseline interferometry p 1080 N94-16759
Soil conservation applications with C-band SAR p 1080 N94-16760
Comparison of edges detected at different polarisations in MAESTRO data p 1080 N94-16761
Lithological and textural controls on radar and diurnal thermal signatures of weathered volcanic deposits, Lunar Crater region, Nevada p 1080 N94-16762
Measurements of the radar cross section and Inverse Synthetic Aperture Radar (ISAR) images of a Piper Navajo at 9.5 GHz and 49 GHz [AD-A267570] p 1002 N94-17110
Arctic cyclones and Marginal Ice Zone (MIZ) variability [AD-A268610] p 1108 N94-17465

SYNTHETIC APERTURES
Spaceborne Imaging Radar-C instrument p 990 N94-15890
A conceptual design study for a two-dimensional, electronically scanned thinned array radiometer [NASA-TM-109051] p 1085 N94-17665

SYSTEM FAILURES
Concurrent garbage collection of persistent heaps [AD-A266831] p 1141 N94-14915
The distributed database dynamic reconfiguration project [AD-A267116] p 1229 N94-15652
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method [AD-A267053] p 1008 N94-15665
Fast simulation of steady-state availability in non-Markovian highly dependable systems [AD-A266747] p 1174 N94-15823
Consistent failure reporting in reliable communication systems [AD-A266298] p 997 N94-16477
Disconnected operation in a distributed file system [AD-A266461] p 1231 N94-16570
Understanding partitions and the no partition assumption [AD-A266296] p 1000 N94-16911

SYSTEM IDENTIFICATION
Exploitation of cyclostationarity for signal-parameter estimation and system identification [AD-A267137] p 988 N94-15690
The design and analysis of robust feedback systems [AD-A267152] p 1165 N94-15778
Development and analysis of ARMA parameter estimation schemes in the presence of noise [AD-A267184] p 989 N94-15786
Heat transfer parametric system identification [AD-A268525] p 929 N94-17543

SYSTEMS ANALYSIS
Integrated trusted systems development environment [AD-A267029] p 1146 N94-15674
A handbook of cost risk analysis methods [AD-A267253] p 1235 N94-16988
Soyuz/ACRV accommodation study [NASA-TM-107733] p 888 N94-17072
Small Satellites Systems and Services [ISBN-2-85-428327-9] p 888 N94-17131

SYSTEMS ENGINEERING
The detector assemblies of ISOPHOT and the spectrometers ISO-SWS and ISO-LWS p 906 N94-15074
RAMCAD design methodology [AD-A267010] p 1145 N94-15525
ECS: Ninth year in orbit [ESA-BR-91] p 987 N94-15644
Integrated trusted systems development environment [AD-A267029] p 1146 N94-15674
Department of Defense technical architecture framework for information management. Volume 3: Architecture concepts and design guidance, version 2.0 [AD-A267195] p 1230 N94-15789
Remote diagnosis as used for mechanized parking systems p 984 N94-16004
Center of Excellence in Laser Medicine [DE93-016541] p 1122 N94-16113
Microwave reflectometer ionization sensor [NASA-CR-191464] p 922 N94-17083
Human Transportation System (HTS) study, volume 2 [NASA-TM-104779-VOL-2] p 882 N94-17320
Design and diagnosis problem solving with multifunctional technical knowledge bases [AD-A268375] p 1234 N94-17419
Gravity dependent condensation pressure drop and heat transfer in ammonia two-phase heat transport systems [NLR-TP-92121-U] p 1031 N94-17615

SYSTEMS INTEGRATION
SIMS: Single Interface to Multiple Systems [AD-A266934] p 1143 N94-15175
Software architecture for shared information systems [AD-A266995] p 1144 N94-15216
Integration ToolKit and Methods (ITKM) manufacturing methods and prototype toolkit. A combined modeling method using IDEFO, IDEF1x and XSpec [AD-A266176] p 984 N94-16981
Soyuz/ACRV accommodation study [NASA-TM-107733] p 888 N94-17072
Integration of several computer systems within a heterogeneous environment [AD-A267978] p 1155 N94-17500

SYSTEMS SIMULATION
Fast simulation of steady-state availability in non-Markovian highly dependable systems [AD-A266747] p 1174 N94-15823
Space Station Freedom electrical performance model [NASA-TM-106395] p 929 N94-17483

SYSTEMS STABILITY
Nonlinear analysis of mechanical systems under combined harmonic and stochastic excitation [AD-A266217] p 1173 N94-16937

T

T-38 AIRCRAFT
Static aeroelastic response of an aircraft with asymmetric wing planforms representative of combat damage [AD-A266890] p 865 N94-14951
Adamson, Jim --- ASCAN training programs [NASA-TM-109507] p 1137 N94-15454

TABLES (DATA)
Module interconnection frameworks for a real-time spreadsheet [AD-A267317] p 1153 N94-17220
Human central nervous system oxygen toxicity data from 1945 to 1986 [AD-A268225] p 1130 N94-17556
Satellite situation report, volume 31, number 1 [NASA-TM-105088] p 898 N94-17584

TABLETS
Efficacy of flocculating and other emergency water purification tablets [AD-A266695] p 1148 N94-15840

TACTILE SENSORS (ROBOTICS)
Tactile sensing and control in humans and robotic/teleoperated systems [AD-A267710] p 1163 N94-14937

TAIL ASSEMBLIES
Vertical-tail aerodynamic configuration of space shuttle orbiter [AD-A267723] p 879 N94-14941

TANTALUM
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum [DE93-011251] p 959 N94-16764
Laser weld repair of tantalum sheet [DE93-016417] p 1041 N94-16871

TANTALUM ALLOYS
Processing and protection of high temperature structural materials [AD-A267292] p 954 N94-14961

TANTALUM OXIDES
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum [DE93-011251] p 959 N94-16764

TAPE RECORDERS
Laser weld repair of tantalum sheet [DE93-016417] p 1041 N94-16871

TARGET ACQUISITION
EVA retriever demonstration [NASA-TM-109510] p 1046 N94-15456
Airborne 2 color ranging experiment p 920 N94-15614
Pixel-level fusion using interest images [AD-A266640] p 1164 N94-15746
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements [AD-A267192] p 1106 N94-15851
Exploiting world structure to efficiently search for objects [TR-434] p 1231 N94-16576
Enhanced down-range profiles of complex targets using wideband radar echo returns [AD-A266508] p 999 N94-16788
Target detection by way of Kalman filtering [AD-A267314] p 1000 N94-16945
Signal detection in correlated Gaussian and non-Gaussian radar clutter [AD-A267453] p 1001 N94-17033
A virtual acoustic orientation instrument [AD-A268181] p 1134 N94-17510

TARGET RECOGNITION
Pixel-level fusion using interest images [AD-A266640] p 1164 N94-15746
Development and analysis of ARMA parameter estimation schemes in the presence of noise [AD-A267184] p 989 N94-15786
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements [AD-A267192] p 1106 N94-15851
Enhanced down-range profiles of complex targets using wideband radar echo returns [AD-A266508] p 999 N94-16788

TARGETS
Effects of window size and shape on accuracy of subpixel centroid estimation of target images [NASA-TP-3331] p 1034 N94-15990
Passive tracking of a target using an array of sensors [DE93-015870] p 997 N94-16169
An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603

TASK COMPLEXITY
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 15: Technical uncertainty and project complexity as correlates of information use by US industry-affiliated aerospace engineers and scientists: Results of an exploratory investigation
[NASA-TM-107693] p 1233 N94-17291
Theoretical implications and empirical findings on instructional control and part-whole-task training
[AD-A267826] p 872 N94-17403
TASKS
Preliminary validation of the task analysis/workload methodology
[AD-A267514] p 1138 N94-17077
TASTE
STS-29 crew food tasting in building 45
[NASA-TM-109547] p 1136 N94-15382
TAYLOR INSTABILITY
Mechanism of intermittent atomization
[AD-A266625] p 1021 N94-15770
TAYLOR SERIES
Automatic differentiation of limit functions
[DE93-016376] p 1168 N94-14928
A handbook of cost risk analysis methods
[AD-A267253] p 1235 N94-16988
TDR SATELLITES
STS-26 Post-Flight Press Conference
[NASA-TM-109557] p 879 N94-15261
STS-26 onboard 16mm photography quick release
[NASA-TM-109558] p 879 N94-15262
TDRS video clip
[NASA-TM-109585] p 884 N94-15269
STS-26 through STS-34, deploy activities
[NASA-TM-109566] p 1301 N94-15315
STS-26 generic integrated IUS deploy simulation
[NASA-TM-109562] p 875 N94-15332
STS-29 mission highlights resource tape
[NASA-TM-109542] p 880 N94-15373
STS-26 missions highlight resource tape
[NASA-TM-109559] p 881 N94-15407
TEARING
Crack-tip-opening angle measurements and crack tunneling under stable tearing in thin sheet 2024-T3 aluminum alloy
[NASA-CR-191523] p 931 N94-15184
Prediction of stable tearing of 2024-T3 aluminum alloy using the crack-tip opening angle approach
[NASA-TM-109023] p 955 N94-15708
Measurement and analysis of critical CTOA for an aluminum alloy sheet
[NASA-TM-109024] p 956 N94-15948
TECHNICAL WRITING
The impact of report of investigation writing style on the assessment times, impressions, perceptions and preferences of adjudicators
[AD-A265748] p 1223 N94-15682
TECHNOLOGICAL FORECASTING
Aviation and the KLM: Past and future
p 853 N94-15126
Expectations for the future of Fokker
p 854 N94-15127
Expectations for the future of military aviation
p 854 N94-15128
Expectations for the future of the National Aerospace Laboratory p 854 N94-15129
Expectations for the future of the Faculty of Aeronautics and Astronautics of the Technical University of Delft
p 854 N94-15131
TECHNOLOGY ASSESSMENT
X ray microcalorimeters: Principles and performance
p 899 N94-15027
Superconductive x ray photon detectors
p 900 N94-15031
Metastable superconductors as photon detectors
p 900 N94-15032
Development of x ray CCDs p 900 N94-15033
Large scientific 2-D arrays for the 1-5 micron region
p 902 N94-15044
Submm/FIR bolometers p 904 N94-15056
NASA's Ultraviolet Astrophysics Branch: Present and future detector program p 910 N94-15102
Expectations for the future of the National Aerospace Laboratory p 854 N94-15129
Information Technology Resources Assessment
[DE93-013899] p 1230 N94-16010
Space Propulsion Synergy Group ETO technology assessments
[TABES PAPER 93-641] p 929 N94-16149
Space Nuclear Facility test capability at the Baikal-1 and IGR sites Semipalatinsk-21, Kazakhstan
[DE93-011662] p 926 N94-16773
An overview of the NASA textile composites program
p 937 N94-16846
Plasma Science Committee (PLSC) and the Panel on Opportunities in Plasma Science and Technology (OPST)
[DE93-018142] p 1204 N94-16995
Key trends of the small satellite market
p 897 N94-17191
Binary optics: Trends and limitations
p 1194 N94-17333
Satellite communications systems and technology. Executive summary
[NASA-TM-109346] p 1006 N94-17661
TECHNOLOGY TRANSFER
From space to Earth
[NASA-TM-109638] p 1235 N94-15249
Medical imaging
[NASA-TM-109675] p 1229 N94-15520
NASA Space Engineering Research Center for VLSI System Design
[NASA-CR-194587] p 1008 N94-15547
Dependable software technology exchange
[AD-A267103] p 1146 N94-15638
Technology transfers and reliable oxides
[AD-A266948] p 1175 N94-15758
KBSA concept demo
[AD-A267054] p 1166 N94-16770
Earth observational research using multistage EOS-like data
[NASA-CR-194626] p 1084 N94-16831
Technology transfer. Determining industry needs: A guide for communities
[NASA-CR-194676] p 1235 N94-17293
Technology in action
[NASA-TM-109345] p 1235 N94-17294
TECHNOLOGY UTILIZATION
From space to Earth
[NASA-TM-109638] p 1235 N94-15249
Monitoring history
[NASA-TM-109640] p 1229 N94-15251
Saving Yellowstone
[NASA-TM-109596] p 1094 N94-15289
Finding fish from above --- remote sensing
[NASA-TM-109602] p 1081 N94-15310
NASA images 7
[NASA-TM-109438] p 1235 N94-15337
NASA images 16
[NASA-TM-109440] p 1235 N94-15339
Unistick vehicle controller
[NASA-TM-109618] p 1046 N94-15347
Improved mapping system
[NASA-TM-109643] p 1082 N94-15428
Workshop on advanced technologies for planetary instruments
[NASA-CR-194585] p 1032 N94-15797
The strategic environmental research and development program: A new paradigm for space, the environment, and national security
[AD-A266222] p 1174 N94-16109
Commercial space opportunities advanced concepts and technology overview
[TABES PAPER 93-240] p 1050 N94-16132
A Moessbauer spectrometer for the mineralogical analysis of the Mars surface: First temperature dependent tests of the detector and drive system
p 1259 N94-16233
Techno-economic requirements for automotive composites p 937 N94-16847
Technology in action
[NASA-TM-109345] p 1235 N94-17294
Micro-optics technology and sensor systems applications p 1197 N94-17350
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517
Smart Power: New power integrated circuit technologies and their applications
[VTT-TIED-1358] p 1015 N94-17546
TECTONICS
Laser tracking for vertical control p 911 N94-15553
Experience and results of the 1991 MTLRS-1 USSR campaign p 914 N94-15575
Papers presented at the Eleventh International Symposium on Earth Tides
[COMMUNICATIONS-SER-B-158] p 1098 N94-15800
Tidal gravity anomalies and tectonics
p 1101 N94-15814
Magellan: Principal Venus science findings
p 989 N94-15887
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021
Pargo Chasma and its relationship to global tectonics
p 1249 N94-16181
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Rheology of water and ammonia-water ices
p 953 N94-16188
Importance of expansion and contraction in the formation of tectonic features on the Moon
p 1250 N94-16189
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
The three ages of Venus: A hypothesis based on the cratering record p 1261 N94-16239
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
Density of impact craters on tessera, Venus
p 1264 N94-16263
Estimates of lithospheric thickness on Venus
p 1267 N94-16277
Tectonics of Neyterkob corona on Venus
p 1270 N94-16299
On the relationship between tectonic plates and thermal mantle plume morphology p 1104 N94-16349
Tectonic resurfacing of Venus p 1285 N94-16380
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 1104 N94-16396
Guide to Magellan image interpretation
[NASA-CR-194340] p 1298 N94-17654
TEFLON (TRADEMARK)
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
Performance of silvered Teflon thermal control blankets on spacecraft
[AD-A266284] p 887 N94-16909
TEKTITES
Cretaceous-tertiary boundary spherules and Cenozoic microtektites: Similarities and differences
p 1241 N94-16186
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement
p 1242 N94-16245
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion
p 1244 N94-16321
TELECOMMUNICATION
Computer Science and Telecommunications Board activities
[DE93-018141] p 1000 N94-17000
Nonlinear methods for communications
[AD-A267376] p 1001 N94-17019
An approximation for computing reduction in bandwidth requirements using intelligent multiplexers
[AD-A267434] p 1001 N94-17026
Feasibility study of a personal communications system IRIDIUM-like p 893 N94-17165
TUBSAT: Low cost access to space technology
p 895 N94-17180
Big results with small space systems: What small systems are doing today p 896 N94-17187
Ground wave emergency network final operational capability: Environmental assessment for central Utah relay node, site number RN 8C920UT
[AD-A267628] p 1003 N94-17211
Activities of the Research Laboratory of Electronics
[AD-A266730] p 1304 N94-17651
TELEMETRY
Evaluation of midband analog fiber optic telemetry links
[DE93-015128] p 883 N94-16056
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17126
Satellite control: A comprehensive approach
p 878 N94-17158
TELEOPERATORS
Tactile sensing and control in humans and robotic/teleoperated systems
[AD-A267710] p 1163 N94-14937
The ESA telescience program p 977 N94-16073
MAXUS: The new sounding rocket program for long duration microgravity flight p 978 N94-16079
Contextually dependent control strategies for manipulation
[TR-416] p 1165 N94-16580
TELEROBOTICS
Tactile sensing and control in humans and robotic/teleoperated systems
[AD-A267710] p 1163 N94-14937
Hidden Markov model approach to skill learning and its application to telerobotics
[AD-A266989] p 1164 N94-15502
Ground integrated ET-derived space platforms for onorbit applications
[TABES PAPER 93-652] p 899 N94-16152
A computer-based training system combining virtual reality and multimedia
[DE93-013768] p 1132 N94-16819

TELESCOPES
Design of pulse stretching cell for a sodium guide star optical system
[DE93-016436] p 1236 N94-14929
Fault management for data systems
[NASA-TM-103953] p 1116 N94-15548
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
A computer-controlled x-y offset guiding stage for the MLRS p 918 N94-15598
Matera Laser Ranging Observatory (MLRO): An overview p 877 N94-15601
Performance of the upgraded Orroral laser ranging system p 877 N94-15602
Transputer based control system for MTLRS p 877 N94-15613
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
Tip-tilt compensation: Resolution limits for ground-based telescopes using laser guide star adaptive optics
[DE93-016426] p 1237 N94-16872
Optical displays: A tutorial on images and image formation
[AD-A266230] p 1192 N94-16926
Conically scanned holographic lidar telescope
[NASA-CASE-GSC-13462-1] p 1194 N94-17321
Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338
Test methods for acceptance testing of telescopes
[AD-A268316] p 1237 N94-17568

TELEVISION SYSTEMS
International testing of a Mars rover prototype p 1273 N94-16312

TEMPERATURE COMPENSATION
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417

TEMPERATURE CONTROL
Development of Japanese Earth Resources Satellite-1 (JERS-1; FUYO-1) and it's operational results
[NASDA-SPP-930001] p 884 N94-15001
Cool suit
[NASA-TM-109639] p 1120 N94-15250
Advanced cooling for high power electric actuators
[AD-A266984] p 866 N94-15761
Solar absorptance of optical surfaces contaminated with spacecraft material outgassing products
[AD-A267202] p 886 N94-15857
Performance of silvered Teflon thermal control blankets on spacecraft
[AD-A266284] p 887 N94-16909
Variational principles of heat exchange and their applications in construction physics, part 2
[IFTR-19/1991] p 1061 N94-17069
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256

TEMPERATURE DEPENDENCE
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
Density of states and tunneling characteristics of layered superconductors
[DE93-015898] p 1211 N94-16839
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
Transient studies of low temperature catalysts for methane conversion
[DE93-017710] p 950 N94-16962
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

TEMPERATURE DISTRIBUTION
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
Volcanic thermal features observed by AVIRIS p 1068 N94-16680
Aerothermoelastic analysis of a NASP demonstrator model
[NASA-TM-109007] p 867 N94-17055
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540

TEMPERATURE EFFECTS
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
The influence of thermal aging on the microstructure and fatigue properties of modified 9Cr-1Mo steel
[DE93-015489] p 957 N94-16106
Effects of alloying and temperature on the high-temperature oxidation of Cr-Cr2Nb
[DE93-015800] p 957 N94-16163
Rheology of water and ammonia-water ices p 953 N94-16188
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle p 1293 N94-16421
A hydrogen isotope study of CO3 type carbonaceous chondrites; comparison with type 3 ordinary chondrites p 1246 N94-16425
Temperature and pressure effects on capacitance probe cryogenic liquid level measurement accuracy
[NASA-CR-190763] p 1034 N94-16521
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
Creep ductility of iron at very low strain rates: The effects of sulfur
[DE93-015490] p 959 N94-16890
Studies on nonequilibrium phenomena in supersonic chemically reacting flows
[NASA-CR-194662] p 1027 N94-17215
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295
Mesons at finite temperature in the NJL model with gluon condensate
[DE93-626697] p 1185 N94-17310
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417
High temperature deformation behavior of YBa2Cu3O(6+x) superconducting ceramic materials
[AD-A268164] p 973 N94-17430
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543
Design, development and characterization studies of a large aperture high power Nd: Glass rod amplifier stage
[DE93-624944] p 1042 N94-17630

TEMPERATURE GRADIENTS
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
Experimental segregation of iron-nickel metal, iron-sulfide, and olivine in a thermal gradient: Preliminary results p 1243 N94-16288
Implementation of an anisotropic turbulence model in the COMMIX-1C/ATM computer code
[DE93-015541] p 1023 N94-16444
Numerical modeling of the temperature gradients and spectra of the plasma armature on Thunderbolt
[AD-A266414] p 878 N94-16552
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610

TEMPERATURE MEASUREMENT
Description of cooling water calorimetry and wall thermometry diagnostic at tokamak ASDEX-Upgrade
[IPP-5/46] p 1200 N94-14966
Measurement of the specific heat capacity of the electron-beam graphite calorimeter
[NPL-RSA(EXT)-40] p 1031 N94-15018
Temperature propagation in near-critical fluids prior to and during separation p 944 N94-15165
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
Temperature measurements p 1037 N94-15804
Pyroxene equilibration temperatures in metamorphosed ordinary chondrites p 1242 N94-16224
The cooling rates of pahoehoe flows: The importance of lava porosity p 1103 N94-16282
Analysis of TIMS performance subjected to simulated wind blast p 1063 N94-16598
Sensitivity of blackbody reference panels to wind blast p 1063 N94-16599
An algorithm for the estimation of bounds on the emissivity and temperatures from thermal multispectral airborne remotely sensed data p 1064 N94-16603

TEMPERATURE PROFILES
Pool boiling: Single bubble experiment p 944 N94-15160
Static characteristics of a conduction and radiation dominated electric arc in nitrogen
[DE93-627106] p 1204 N94-17311
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503
A surface energy budget model modifying heat flow by foliage effects
[AD-A268598] p 1085 N94-17610
Dynamic behavior of an electric arc gas discharge
[DE93-630197] p 1205 N94-17635

TEMPERATURE RATIO
The effects of radiation transport on line ratios used as temperature and density diagnostic
[DE93-016424] p 1205 N94-17663

TEMPERATURE SENSORS
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
Properties of thin films for high temperature flow sensors
[NASA-CR-191526] p 967 N94-16541

TEMPORAL DISTRIBUTION
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
A decade's overview of Io's volcanic activity p 1245 N94-16386
Temporal variation in spectral detection thresholds of substrate and vegetation in AVIRIS images p 1073 N94-16706
Arctic and Antarctic sea ice, 1978-1987: Satellite passive-microwave observations and analysis
[NASA-SP-511] p 1114 N94-17439

TEMPORAL RESOLUTION
How to squeeze high quantum efficiency and high time resolution out of a SPAD p 914 N94-15571

TENSILE PROPERTIES
A reexamination of grain boundary fracture in Ni3Al: Environmental and alloying effects
[DE93-015431] p 1208 N94-16063
The effect of long-term aging on the impact properties of modified 9Cr-1Mo steel
[DE93-015453] p 957 N94-16068
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
The processing and mechanical properties of high temperature/high performance composites. Book 2: Coonstituent properties and macroscopic performance
[AD-A266395] p 935 N94-16484

TENSILE STRENGTH
The processing and mechanical properties of high temperature/high performance composites. Book 3: Coonstituent properties and macroscopic performance
[AD-A266396] p 935 N94-16485
The processing and mechanical properties of high temperature/high performance composites. Book 4: Coonstitutive laws and design
[AD-A266397] p 935 N94-16528
Weaving multi-layer fabrics for reinforcement of engineering components p 937 N94-16850
Effect of tow alignment on the mechanical performance of 3D woven textile composites p 937 N94-16851
New textile composite materials development, production, application p 938 N94-16853
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052
Fiber strength utilization in carbon/carbon composites
[AD-A267713] p 940 N94-17271
Tensile and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires
[NASA-TM-106350] p 962 N94-17652

TENSILE STRESS
Simulation studies for surfaces and materials strength
[NASA-CR-193387] p 1056 N94-15004
A model for non-linear creep and physical ageing in PVC
[NPL-DMM(A)-91] p 1057 N94-15016
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
Influence of the loading rate on the endurance and deformability of cement matrix composites
[IFTR-1/1992] p 1060 N94-17052

TENSILE TESTS
The effect of aging at 343 C on the mechanical properties and microstructure of type 308 stainless steel weldments
[DE93-015454] p 957 N94-16103
Development of test methods for textile composites p 939 N94-16862
RSRM nozzle actuator bracket/lug fracture mechanics qualification test
[NASA-CR-193859] p 927 N94-17080

Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473
TERMINAL FACILITIES
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage
p 893 N94-17164
TERMINAL GUIDANCE
Hypervelocity orbital intercept guidance using certainty control
[AD-A267297] p 1174 N94-17219
TERMINOLOGY
NASA's online machine aided indexing system
[NASA-CR-4518] p 1228 N94-15009
Illustrated glossary of textile terms for composites
[NASA-CR-191539] p 933 N94-15484
Definitions of terms relating to aircraft windscreens, canopies, and transparencies
[AD-A268403] p 868 N94-17425
TERMS
Definitions of terms relating to aircraft windscreens, canopies, and transparencies
[AD-A268403] p 868 N94-17425
TERNARY ALLOYS
Ternary alloying effects in polycrystalline (beta)-NiAl
[DE93-012675] p 955 N94-15885
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Slip, twinning and transformation in Laves phases
[DE93-018164] p 960 N94-16972
TERRAIN
Improved mapping system
[NASA-TM-109643] p 1082 N94-15428
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 1: Theory and numerical results
[AD-A267105] p 988 N94-15649
Environmental characterization for target acquisition. Report 1: Site descriptions and measurements
[AD-A267192] p 1106 N94-15851
Multifrequency observations p 992 N94-15902
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
Density of impact craters on tessera, Venus
p 1264 N94-16263
Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
Fitting a three-component scattering model to polarimetric SAR data p 1079 N94-16751
Sound exposure level prediction for impulse sound sources above variable terrain
[AD-A267535] p 1178 N94-17119
An automated approach for classifying generic terrain features using digital elevation data
[AD-A268385] p 1084 N94-17421
TERRESTRIAL DUST BELT
The effect of an on-orbit near encounter on the number flux density of micron sized particles
p 899 N94-16374
TERRESTRIAL PLANETS
Rover mounted ground penetrating radar as a tool for investigating the near-surface of Mars and beyong
p 1007 N94-16197
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 1104 N94-16396
TESSERAL HARMONICS
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103
TEST CHAMBERS
Unitary plan wind tunnel landmark dedication and revitalization
[NASA-TM-109649] p 1302 N94-15434
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions
p 954 N94-16372
TEST EQUIPMENT
Bench checkout equipment for spaceborne laser altimeter systems p 921 N94-15618
The Spacelab IPS Star Simulator
[TABES PAPER 93-650] p 877 N94-16150
TEST FACILITIES
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
A test facility to calibrate EUV detectors
p 873 N94-15062
GFSC-TV demo tape
[NASA-TM-109586] p 875 N94-15270
Facilities maintenance handbook
[NHB-8831.2] p 1224 N94-15934
The ESA telescience program p 977 N94-16073
Payloads for the processing of high temperature materials p 979 N94-16083
The design and analysis of a modular microgravity test platform for use aboard the NASA KC-135 aircraft
p 899 N94-16101
Structured finite volume modeling of US Navy aircraft engine test cells task 2: Turboprop engine, volume 1
[AD-A267833] p 872 N94-17405
Structured finite volume modeling of US Navy aircraft engine test cells. Task 2: Turboprop engine. Volume 2: Code documentation and listings
[AD-A268386] p 873 N94-17569
TEST STANDS
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
TETHERED BALLOONS
Middle atmospheric electric fields over thunderstorms
[NASA-CR-194619] p 1106 N94-16493
TETHERED SATELLITES
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
TETHERLINES
Prototype instrumentation and design studies
[AD-A266402] p 882 N94-16530
TETRAHEDRONS
Tetrahedral lander
[NASA-CASE-MSC-22082-1] p 886 N94-15951
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472
TEXTBOOKS
Processes involved in the integration of pictures and discourse
[AD-A268150] p 1134 N94-17468
TEXTILES
Processing, properties and applications of composites using powder-coated epoxy towpreg technology
p 933 N94-15277
Illustrated glossary of textile terms for composites
[NASA-CR-191539] p 933 N94-15484
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
FIBER-TEX 1992: The Sixth Conference on Advanced Engineering Fibers and Textile Structures for Composites
[NASA-CP-3211] p 936 N94-16845
An overview of the NASA textile composites program
p 937 N94-16846
Research in textile composites at KU, Leuven
p 937 N94-16848
Effect of tow alignment on the mechanical performance of 3D woven textile composites p 937 N94-16851
An engineering approach for the application of textile composites to a structural component
p 938 N94-16852
New textile composite materials development, production, application p 938 N94-16853
Production and application of chemical fibers with special properties for manufacturing composite materials and goods of different usage p 938 N94-16854
Textile composite processing science
p 938 N94-16856
Development of braided fiber seals for engine applications p 939 N94-16859
Quantification of processing artifacts in textile composites p 939 N94-16860
Stochastic damage evolution in textile laminates
p 939 N94-16861
Development of test methods for textile composites
p 939 N94-16862
TEXTURES
Segmenting textured 3D surfaces using the space/frequency representation
[AD-A266960] p 1163 N94-14968
THALLIUM
Characterization of InTISb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922
THALLIUM COMPOUNDS
Characterization of InTISb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922
THEMATIC MAPPERS (LANDSAT)
Volcanic thermal features observed by AVIRIS
p 1068 N94-16680
Integrating remote sensing techniques at Cuprite, Nevada: AVIRIS, Thematic Mapper, and field spectroscopy p 1072 N94-16701
THEMATIC MAPPING
Do it yourself remote sensing: Generating an inexpensive, high tech, real science lake mapping project for the classroom p 1086 N94-16407
Mapping vegetation types with the multiple spectral feature mapping algorithm in both emission and absorption p 1069 N94-16686
THEOREM PROVING
An elementary tutorial on formal specification and verification using PVS
[NASA-TM-108991] p 1158 N94-15536
Global solutions to a system of strongly coupled reaction-diffusion equations
[DE93-628587] p 1171 N94-17640
Distributively generated matrix near rings
[DE93-628588] p 1175 N94-17641
THEOREMS
Fixed point iterations for strictly hemi-contractive maps in uniformly smooth Banach spaces
[DE93-628591] p 1175 N94-17644
THEORETICAL PHYSICS
Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Experimental study of weak interactions by precision measurement by rare kaon decay
[DE93-016864] p 1182 N94-16117
Theoretical high energy physics
[DE93-015884] p 1187 N94-16170
Neutrino mass and mixing: Summary of the neutrino sessions
[DE93-014342] p 1183 N94-16801
Heavy ion physics research at Creighton University
[DE93-016809] p 1185 N94-16957
Derivation of the Verlinde formula from Chern-Simons theory and the G/G model
[DE93-628620] p 1221 N94-17632
THERAPY
Center of Excellence in Laser Medicine
[DE93-016541] p 1122 N94-16113
THERMAL ANALYSIS
A novel solid-state optical temporal analyzer with picosecond resolution and picowatt sensitivity
[AD-A266804] p 986 N94-14912
High temperature advanced structural composites. Volume 2: Ceramic matrix composites, fiber processiing and properties, and interfaces
[AD-A267023] p 933 N94-15528
A Pluto thermal model p 1256 N94-16216
Comparative magnetic and thermoanalytical study of two enstatite chondrites: Adhi Kot and Atlanta
p 1244 N94-16329
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124
Overview of the solar dynamic ground test demonstration program
[NASA-TM-106296] p 928 N94-17256
ASRM nozzle thermal analysis
[NASA-CR-194672] p 928 N94-17277
Structural mechanics division research and technology accomplishments for CY 1992 and plans for CY 1993
[NASA-TM-107752] p 1062 N94-17479
THERMAL BOUNDARY LAYER
Models of thermal/chemical boundary layer convection: Potential application to Venus p 1279 N94-16348
On the relationship between tectonic plates and thermal mantle plume morphology p 1104 N94-16349
THERMAL CONDUCTIVITY
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Modeling the thermal conductivity of fiber-reinforced ceramic composites
[DE93-015340] p 934 N94-16017
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124
Low dielectric constant insulators and gold metallization for GHz multi-chip modules, part 2
[AD-A268590] p 1176 N94-17605
Coefficients for calculating thermodynamic and transport properties of individual species
[NASA-TM-4513] p 1220 N94-17624
THERMAL CYCLING TESTS
Density and temperature relaxation near the critical point of carbon dioxide under reduced gravity
p 944 N94-15164
Hollow cathode heater development for the Space Station plasma contactor
[NASA-CR-191131] p 926 N94-16880
Reliability analysis of Surface Mount Technology (SMT)
[AD-A267598] p 1055 N94-17194
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295

THERMAL DEGRADATION
Advanced thermally stable jet fuels
[DE93-017711] p 975 N94-16996
THERMAL DIFFUSIVITY
Investigation of radiative interaction in laminar flows using Monte Carlo simulation
[NASA-CR-194604] p 1021 N94-15795
THERMAL DISSOCIATION
The thermal dissociation of NH2CHO(ND2CHO) on Si(100)-2x1
[AD-A266903] p 942 N94-14956
THERMAL EMISSION
Thermal inertia and radar reflectivity of the Martian north polar ERG: Low-density aggregates
p 1260 N94-16238
A decade's overview of Io's volcanic activity
p 1245 N94-16386
Comparison of preliminary results from Airborne Aster Simulator (AAS) with TIMS data p 1064 N94-16600
Ejecta patterns of Meteor Crater, Arizona derived from the linear un-mixing of TIMS data and laboratory thermal emission spectra p 1065 N94-16607
Simulation of ASTER data using AVIRIS images
p 1071 N94-16693
THERMAL ENERGY
Optical and infrared spectra of thermally annealed Pb implanted SiO2 glasses
[DE93-015304] p 965 N94-15828
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980
High heat flux engineering in solar energy applications
[DE93-016500] p 1093 N94-16954
Emittance growth in displaced, space-charge-dominated beams with energy spread
[DE93-016514] p 1188 N94-17672
THERMAL ENVIRONMENTS
First results from a laboratory facility for measurement of emission spectra under simulated planetary conditions
p 954 N94-16372
Diffractive optics in adverse environments
p 1197 N94-17352
THERMAL EXPANSION
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
High temperature advanced structural composites. Volume 3: Mechanics
[AD-A267024] p 933 N94-15626
Carbon-carbon grid for ion engines
[NASA-CASE-NPO-19174-1-CU] p 925 N94-15876
THERMAL FATIGUE
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
Hollow cathode heater development for the Space Station plasma contactor
[NASA-CR-191131] p 926 N94-16880
Prediction of thermal cycling induced cracking in polymer matrix composites
[NASA-CR-194677] p 941 N94-17295
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
THERMAL INSULATION
Improved composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 934 N94-15926
Impact penetration experiments in teflon targets of variable thickness p 1063 N94-16253
SRB thermal curtain design support
[NASA-CR-193857] p 927 N94-17123
SRB thermal curtain design support
[NASA-CR-193858] p 928 N94-17124
THERMAL MAPPING
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
Testing the waters from space — Thermal mapping
[NASA-TM-109623] p 1082 N94-15409
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Clementine: Anticipated scientific datasets from the Moon and Geographos p 1288 N94-16392
Thermogeologic mapping of the Moon from lunar orbit
p 1290 N94-16405
TIMS performance evaluation summary
p 1063 N94-16596
Atmospheric propagation analysis program
[AD-A268231] p 1006 N94-17565
THERMAL NOISE
Cryogenic measurements of aerojet GaAs n-JFETs
[NASA-TM-103972] p 1009 N94-15765
Thermally-sustained structure in convectively unstable systems
[NASA-TM-106375] p 1027 N94-17112
THERMAL PROTECTION
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
THERMAL RADIATION
Near-surface temperature gradients and their effects on thermal-infrared emission spectra of particulate planetary surfaces p 1260 N94-16236
A decade's overview of Io's volcanic activity
p 1245 N94-16386
Altitude profile of aerosols on Mars from measurements of its thermal radiation on limb p 1294 N94-16423
THERMAL RESISTANCE
Crystallization of grain boundary phases in silicon nitride with low additive contents by microwave annealing
[DE93-015801] p 1209 N94-16164
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
THERMAL SHOCK
The relationship of metallothionein induction to the heat shock response
[AD-A266634] p 1122 N94-15741
Design of a cruciform bend specimen for determination of out-of-plane biaxial tensile stress effects on fracture toughness for shallow cracks
[DE93-015455] p 1059 N94-16104
Heat shock protein induction in human cells by CO2 laser irradiation
[AD-A266430] p 1117 N94-16545
THERMAL SIMULATION
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling
p 1286 N94-16381
THERMAL STABILITY
Scholarly research program in fuel analysis and combustion research
[AD-A266789] p 942 N94-14911
Compounds containing meta-biphenylenedioxy moieties and polymers therefrom
[NASA-CASE-LAR-14517-1] p 965 N94-15879
Isolation of thermostable enzyme mutants by cloning and selection in thermophilic bacteria
[AD-A266378] p 1117 N94-16514
Electrical conductivity of ion implanted ladder and semi-ladder polymers
[AD-A267432] p 970 N94-16978
Advanced thermally stable jet fuels
[DE93-017711] p 975 N94-16996
Diffractive optics in adverse environments
p 1197 N94-17352
THERMAL STRESSES
Scholarly research program in fuel analysis and combustion research
[AD-A266789] p 942 N94-14911
XPS analysis of Al/EPDM bondlines from IUS SRM-1 polar bosses
[AD-A266851] p 1056 N94-14945
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
High temperature advanced structural composites. Volume 3: Mechanics
[AD-A267024] p 933 N94-15626
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269
Fiber strength utilization in carbon/carbon composites
[AD-A267713] p 940 N94-17271
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379
THERMIONIC CONVERTERS
High temperature materials technology research for advanced thermionic systems
[DE93-018302] p 960 N94-16964
THERMIONIC EMITTERS
High temperature materials technology research for advanced thermionic systems
[DE93-018302] p 960 N94-16964
THERMISTORS
Analysis of TIMS performance subjected to simulated wind blast p 1063 N94-16598
THERMOCHEMICAL PROPERTIES
Laser ignition of solid propellants: 1. Ignition delays
[AD-A268454] p 976 N94-17536
THERMOCHEMISTRY
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
Rocket motor plume flowfields: Phenomenology and simulation p 924 N94-15221
Thermochemistry of silicate speciation in aqueous sodium silicate solutions: Ionization and polymerization of small silicate ion
[AD-A266825] p 964 N94-15683
Particle simulation of hypersonic flow
[AD-A267185] p 857 N94-15787
Ceramic fiber coatings development and demonstration
[AD-A267286] p 972 N94-17242
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466
THERMOCOUPLES
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754
Dual active surface, miniature, plug-type heat flux gauge
[NASA-CASE-LEW-15643-1] p 1033 N94-15928
Wind tunnel investigation with an operational turbojet engine
[TABES PAPER 93-662] p 870 N94-16157
THERMODYNAMIC CYCLES
Some single-piston closed-cycle machines and Peter Tailer's thermal lag engine
[DE93-015983] p 1049 N94-17675
THERMODYNAMIC EFFICIENCY
Jet engine performance enhancement through use of a wave-rotor topping cycle
[NASA-TM-4486] p 870 N94-17470
THERMODYNAMIC EQUILIBRIUM
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
THERMODYNAMIC PROPERTIES
Processing and protection of high temperature structural materials
[AD-A267292] p 954 N94-14961
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
Cation ordering in orthopyroxenes and cooling rates of meteorites: Low temperature cooling rates of Estherville, Bondoc and Shaw p 1241 N94-16176
Thermal disorder in adsorbed Cl on Si(100)
[AD-A266295] p 1210 N94-16476
On-line gas chromatographic studies of Rutherfordium (element 104), hahnium (element 105), and homologs
[DE93-013890] p 948 N94-16821
Modeling study to evaluate the ionic mechanism of soot formation in flames
[AD-A266242] p 950 N94-16930
Mechanistic models of soot formation
[AD-A267806] p 950 N94-17008
Convection effects on radial segregation and crystal melt interface in vertical Bridgman growth
[NASA-CR-191541] p 1029 N94-17387
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
Soluble precursor route to polyanilines
[AD-A268015] p 973 N94-17494
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540
THERMODYNAMICS
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
High temperature advanced structural composites. Volume 1: Executive summary and intermetallic compounds
[AD-A267022] p 933 N94-15835
Implementation of an anisotropic turbulence model in the COMMIX-1C/ATM computer code
[DE93-015541] p 1023 N94-16444
Supercritical thermodynamics of sulfur and nitrogen species
[DE93-017727] p 1220 N94-16997
Thermo-mechanical analysis of oxidation protected carbon-carbon composites
[AD-A268191] p 941 N94-17597
THERMOELASTICITY
Thermal stresses of a trimaterial medium in a nonuniform temperature field
[AD-A267243] p 930 N94-14975
THERMOELECTRICITY
Simultaneous measurement of temperature and strain using four connecting wires
[NASA-TM-104271] p 1032 N94-15754

THERMOGRAVIMETRY
Direct catalytic decomposition of nitric oxide
[DE93-016689] p 949 N94-16896
THERMOLUMINESCENCE
Optical fiber spectroscopy: A study of the luminescent properties of the europium ion for thermal sensors
[NASA-CR-194576] p 1189 N94-15647
Induced thermoluminescence study of experimentally shock-loaded oligoclase p 953 N94-16266
Shock-thermal history of Kapoeta howardite matter on data of thermoluminescence analysis of individual mineral grains p 953 N94-16267
THERMOMECHANICAL TREATMENT
Development and commercialization status of Fe3Al-based intermetallic alloys
[DE93-015802] p 957 N94-16165
Elastic-plastic finite-difference analysis of unidirectional composites subjected to thermomechanical cyclic loading
[AD-A267666] p 1061 N94-17269
THERMOMETERS
Temperature measurements p 1037 N94-15804
THERMONUCLEAR REACTIONS
Nuclear fusion of protons with ions of boron
[DE93-015399] p 1202 N94-16019
THERMOPHILES
Isolation of thermostable enzyme mutants by cloning and selection in thermophilic bacteria
[AD-A266378] p 1117 N94-16514
THERMOPHYSICAL PROPERTIES
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100
THERMOPLASTIC RESINS
A new NASA LaRC Multi-Purpose Prepregging Unit p 932 N94-15276
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
THERMOPLASTICITY
Machine development p 932 N94-15258
THERMOREGULATION
Melatonin, the pineal gland, and circadian rhythms
[AD-A268200] p 1129 N94-17478
THERMOSETTING RESINS
A new NASA LaRC Multi-Purpose Prepregging Unit p 932 N94-15276
THESAURI
A browsing tool for the Internet Logical Library of the HPCC Software Exchange
[NASA-CR-194545] p 1143 N94-15189
THICK FILMS
Mechanical properties and crystal growth studies of semiconductor alloys
[AD-A268144] p 1216 N94-17454
THICKNESS
Experimental investigations into the deflagration to detonation transition at TNO/PML
[AD-A266753] p 1021 N94-15755
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness p 1103 N94-16211
Estimates of lithospheric thickness on Venus p 1267 N94-16277
On the a-posteriori estimation of the modelling error for the heat conduction in a plate and its use for adaptive hierarchic modelling
[AD-A267965] p 1029 N94-17384
THIN FILMS
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Preparation and investigation of improved low voltage electron excitable phosphors
[AD-A266852] p 963 N94-14948
Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization p 974 N94-14982
A new NASA LaRC Multi-Purpose Prepregging Unit p 932 N94-15276
Photochemistry in thin polymeric films
[AD-A266716] p 964 N94-15729
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
Absolute, Extreme-Ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A267045] p 1299 N94-15836
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
Cyanoresin, cyanoresin/cellulose triacetate blends for thin film, dielectric capacitors
[NASA-CASE-NPO-18913-1-CU] p 966 N94-15930
Cellulose triacetate, thin film dielectric capacitor
[NASA-CASE-NPO-18935-1-CU] p 1010 N94-15952
Modification of fluoropolymer surfaces with electronically conductive polymers
[AD-A266294] p 967 N94-16475
Apparatus for and a method of growing thin films of elemental semiconductors
[AD-D015813] p 1210 N94-16487
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494
Properties of thin films for high temperature flow sensors
[NASA-CR-191526] p 967 N94-16541
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Sputtered ferroelectric thin films of KTN for electro-optic devices
[AD-A266573] p 968 N94-16723
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers
[DE93-015809] p 1184 N94-16838
Performance of silvered Teflon thermal control blankets on spacecraft
[AD-A266284] p 887 N94-16909
A simple chemical procedure for extending the conductive state of polypyrrole to more negative potentials
[AD-A266235] p 969 N94-16928
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961
Nitride semiconductors for ultraviolet detection
[AD-A267877] p 1012 N94-17040
Atomic layer epitaxy group IV materials: Surface processes, thin films, devices and their characterization
[AD-A267527] p 1213 N94-17116
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282
Thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18694-1-CU] p 1014 N94-17325
Low temperature deposition and characterization of n- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A267966] p 973 N94-17490
Advanced thin-film deposition and physical properties of high-temperature and other novel superconducting materials
[AD-A268199] p 1216 N94-17561
Epitaxial iron films
[AD-A268286] p 1217 N94-17579
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606
A new method of designing multilayer optical thin film coatings
[DE93-624683] p 974 N94-17611
Electrical properties of sol-gel PZT thin films for decoupling capacitor applications
[DE93-016491] p 1015 N94-17648
Growth of dielectric thin films by irradiation of condensed molecular precursors with synchrotron radiation
[DE93-016161] p 974 N94-17676
THIN PLATES
Analysis of electromagnetic scattering from irregularly shaped, thin, metallic flat plates
[NASA-TP-3361] p 998 N94-16655
THREAT EVALUATION
NASA security handbook
[NHB-1620.3C] p 1224 N94-15937
THREE AXIS STABILIZATION
Standard platforms for small satellites p 895 N94-17181
THREE BODY PROBLEM
Energy potential analysis of zero velocity curves in the restricted three-body problem
[AD-A267512] p 1170 N94-17076
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368
THREE DIMENSIONAL BOUNDARY LAYER
Three-dimensional turbulent boundary layer
[AD-A266261] p 1025 N94-16908
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
Multigrid direct numerical simulation of the whole process of flow transition in 3-D boundary layers
[NASA-TM-106369] p 1030 N94-17557
THREE DIMENSIONAL FLOW
Numerical simulation of 3-D shock wave turbulent boundary layer interactions p 1017 N94-15199
Numerical investigations in three-dimensional internal flows
[NASA-CR-194594] p 1020 N94-15551
Numerical simulation of three-dimensional self-gravitating flow
[NASA-TM-109021] p 1021 N94-15768
On the stability analysis of approximate factorization methods for 3D Euler and Navier-Stokes equations
[NASA-TM-106314] p 1169 N94-15818
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 1: Analysis description
[NASA-TM-106337] p 1024 N94-16527
Adaptive Cartesian grid methods for representing geometry in inviscid compressible flow
[DE93-016430] p 1025 N94-16894
Computational aerodynamics with icing effects
[AD-A267509] p 860 N94-17074
THREE DIMENSIONAL MODELS
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526
Cooperativity and 3-D representation
[AD-A267180] p 1131 N94-15694
Display of dynamic, volume graphic images by holographic voxel projection: Initial investigation
[AD-A267622] p 1035 N94-17197
Strategic planning for aircraft noise route impact analysis: A three dimensional approach
[NASA-CR-191484] p 1178 N94-17278
Single block three-dimensional volume grids about complex aerodynamic vehicles
[NASA-TM-108986] p 1030 N94-17476
Three dimensional visualization of GOES cloud data using OCTRESS
[AD-A268102] p 1109 N94-17572
THROATS
Experimental studies on a gas dynamic laser with narrow throat and high area-ratio grid nozzles
[AD-A267818] p 1042 N94-17400
THRUST VECTOR CONTROL
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
Equations of motion of a hinged body over a spherical earth
[AD-A268408] p 868 N94-17435
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543
THRUSTORS
Segmented ion thruster
[NASA-CASE-NPO-18192-1-CU] p 925 N94-15927
THULIUM
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
THUNDERSTORMS
Sensitivity testing of a single-Doppler temperature retrieval and forecast system
[AD-A267278] p 1105 N94-14958
Venus lightning
[NASA-TM-109644] p 1105 N94-15430
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465
Middle atmospheric electric fields over thunderstorms
[NASA-CR-194619] p 1106 N94-16493
Remote sensing of precipitation and electrification with a dual-polarization, coherent, wideband radar system
[AD-A267479] p 1004 N94-17364
TIDES
Characterization of spatial and temporal variability of phytoplankton blooms in coastal waters
[AD-A267102] p 1116 N94-15633
Tidal interaction: A possible explanation for geysers and other fluid phenomena in the Neptune-Triton system p 1272 N94-16311
TILT ROTOR AIRCRAFT
XV-15: Tiltrotor
[NASA-TM-109455] p 865 N94-15328
TILT ROTOR RESEARCH AIRCRAFT PROGRAM
XV-15: Tiltrotor
[NASA-TM-109455] p 865 N94-15328
TILTING ROTORS
XV-15: Tiltrotor
[NASA-TM-109455] p 865 N94-15328
TILTMETERS
Long baseline watertubes p 1037 N94-15803
Cooperative projects in geodynamical instrumentation between the State Seismological Bureau (China) and the Royal Observatory of Belgium p 1037 N94-15806
Earth tides results obtained with gravimeters, clinometers, and strainmeters in Belgium and in Grand Duchy of Luxembourg p 1100 N94-15809

TIME DEPENDENCE
Timebias corrections to predictions p 875 N94-15591
Formation of on-site normal points p 917 N94-15592
Reliability characterization of digital microcircuits: Investigation of an in-process oxide reliability screening method
[AD-A267053] p 1008 N94-15665
On the design of structural components using materials with time-dependent properties
[NASA-TM-108428] p 1059 N94-16519
The use of General Circulation Models in detecting climate change induced by greenhouse gases
[DE93-014369] p 1096 N94-16802
Finite difference time domain analysis of chirped dielectric gratings p 1195 N94-17339
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450
A physical model for one-dimension and time-dependent ionosphere. Part 2: Results and discussions
[DE93-627959] p 1103 N94-17631

TIME LAG
Assessment of TDI operation of a frame transfer CCD for high resolution imaging from a fast spinning spacecraft p 910 N94-15097
System architecture of optically controlled phased array radar
[AD-A267056] p 988 N94-15667
Passive tracking of a target using an array of sensors
[DE93-015870] p 997 N94-16169
Pulse response based control for minimum time maneuver of flexible spacecraft
[AD-A266186] p 886 N94-16455
Measuring ocean coherence time with dual-baseline interferometry p 1080 N94-16759
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228

TIME MARCHING
Multigrid time-accurate integration of Navier-Stokes equations
[NASA-TM-106373] p 1028 N94-17258

TIME MEASUREMENT
Adaptive median filtering for preprocessing of time series measurements p 912 N94-15561
Measuring ocean coherence time with dual-baseline interferometry p 1080 N94-16759
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919
Target detection by way of Kalman filtering
[AD-A267314] p 1000 N94-16945
Quartz crystal resonators and oscillators for frequency control and timing applications: A tutorial, revision 6.1
[AD-A268205] p 1216 N94-17480

TIME OF FLIGHT SPECTROMETERS
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520

TIME RESPONSE
Target detection by way of Kalman filtering
[AD-A267314] p 1000 N94-16945

TIME SERIES ANALYSIS
Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139
Adaptive median filtering for preprocessing of time series measurements p 912 N94-15561
Generation of artificial helioseismic time-series
[NASA-CR-194612] p 1299 N94-15968

TIME SHARING
Processor capacity reserves for multimedia operating systems
[AD-A266639] p 1158 N94-15745

TIME SIGNALS
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519

TIMING DEVICES
Development of the OMPAT neuropsychological/psychomotor performance evaluation and OMPAT data and timing support programs
[AD-A266954] p 1122 N94-15759

TIRES
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884

TISSUES (BIOLOGY)
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916
Cultured normal mammalian tissue and process
[NASA-CASE-MSC-21984-1] p 1117 N94-15969

TITANIUM
STS-26 SSIP briefing --- Titanium Grain Formation Experiment and Crystal Membrane Experiment
[NASA-TM-109556] p 976 N94-15280
Limited subsolidus diffusion in type B1 CAI: Evidence from Ti distribution in spinel p 954 N94-16401
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100
Aspects of high temperature damage in fiber reinforced titanium metal matrix composites
[AD-A267907] p 941 N94-17379

TITANIUM ALLOYS
The corrosion protection of metals by ion vapor deposited aluminum
[NASA-TM-108425] p 955 N94-15832
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873
Transient phenomena following precipitation and re-solution anneals in a NiTi alloy
[AD-A267557] p 961 N94-17106
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282

TITANIUM BORIDES
Production and evaluation of dense ceramic compounds by combustion synthesis and dynamic compaction
[AD-A266742] p 965 N94-15773
Dynamic testing and characterization of pre-fractured ceramic
[DE93-016457] p 972 N94-17238

TITANIUM CARBIDES
Wear resistant titanium material development
[AD-A266474] p 959 N94-16780

TITANIUM COMPOUNDS
Structural studies of sol-gel glasses
[AD-A266277] p 967 N94-16472

TITANIUM OXIDES
Searching for neuKREEP: An EMP study of Apollo 11 Group A basalts p 1266 N94-16275
Lunar phase function effects on spectral ratios used for resource assessment p 1278 N94-16342

TOCOPHEROL
Wound healing after laser injury to skin: The effect of occlusion and vitamin E
[AD-A266473] p 1128 N94-16779

TOKAMAK DEVICES
Description of cooling water calorimetry and wall thermometry diagnostic at tokamak ASDEX-Upgrade
[IPP-5/46] p 1200 N94-14966
Studies on the parametric decay of waves in fusion plasmas
[VTT-PUBS-110] p 1200 N94-15204
Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209
ITER-HARD Toroidal Field coil structural analysis
[DE93-014834] p 1201 N94-15981
High beta and confinement studies of TFTR
[DE93-016204] p 1202 N94-16446
Inductive effects during second harmonic current drive experiments on T-10
[DE93-014411] p 1202 N94-16803
Recent results from the 60 GHz inside launch ECH system on the D3-D tokamak
[DE93-013027] p 1203 N94-16816
Simulation of enhanced tokamak performance on D3-D using fast wave current drive
[DE93-014009] p 1203 N94-16823
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869
ARIES tokamak reactor study
[DE93-017059] p 1203 N94-16901

TOLERANCES (MECHANICS)
Geometric tolerance assessment
[NPL-DITC-210/92] p 1049 N94-15013
A review of Australian and New Zealand investigations on aeronautical fatigue during the period April 1991 to March 1993
[AD-A267532] p 868 N94-17117

TOLLMIEN-SCHLICHTING WAVES
Tollmien-Schlichting/vortex interactions in compressible boundary layer flows
[NASA-CR-191515] p 1017 N94-15183
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Higher-order accurate Osher schemes with application to compressible boundary layer stability
[NASA-TM-106355] p 1026 N94-17056
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450

TOMOGRAPHY
Requirements on CCD-detectors for ground-based auroral imaging p 909 N94-15093

TOPEX
Analysis of TOPEX laser retroreflector array characteristics p 915 N94-15578

TOPOGRAPHY
Improved mapping system
[NASA-TM-109643] p 1082 N94-15428
Multi-beam laser altimeter p 921 N94-15620
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
A multilevel-multiresolution method for image processing. A Bayesian framework for reconstructing and representing shapes
[AD-A266772] p 1082 N94-15842
Ray tracing on topographic Rossby waves
[AD-A267014] p 1112 N94-15844
Magellan: Principal Venus science findings p 989 N94-15887
TOPSAT: Global space topographic mission p 992 N94-15905
Research into the influence of spatial variability and scale on the parameterization of hydrological processes
[NASA-CR-194610] p 1082 N94-16026
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028
Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Confirmation of saturation equilibrium conditions in crater populations p 1103 N94-16222
Megaplumes on Venus p 1271 N94-16301
An inversion of geoid and topography for mantle and crustal structure on Mars p 1273 N94-16315
Separation of topographic and intrinsic backscatter variations in biscopic radar images: A magic airbrush p 1086 N94-16318
The cartography of Venus with Magellan data p 1274 N94-16320
Meander properties of Venusian channels p 1275 N94-16324
Spectral study of Venus global topography and geoid from Magellan and PVO data p 1276 N94-16332
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes p 1283 N94-16368
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle p 1293 N94-16421
Dust-dynamic feedbacks in the Martian atmosphere: Surface dust lifting p 1296 N94-16434
Mapping of sea bottom topography p 1077 N94-16744
Sea bottom topography imaging with SAR p 1077 N94-16745
Detecting surface roughness effects on the atmospheric boundary layer via AIRSAR data: A field experiment in Death Valley, California p 1078 N94-16747
The TOPSAR interferometric radar topographic mapping instrument p 1078 N94-16749
A geological and geophysical information system for Eurasia
[AD-A267841] p 1232 N94-17036

TORNADOES
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465

TOROIDAL PLASMAS
ITER-HARD Toroidal Field coil structural analysis
[DE93-014834] p 1201 N94-15981
Structure and damping of toroidal drift waves (and their implications for anomalous transport)
[DE93-014005] p 1203 N94-16822
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869

TOTAL OZONE MAPPING SPECTROMETER
Southern and Northern Hemisphere total ozone as seen by TOMS
[NASA-TM-109591] p 1098 N94-15282
TOMS computer graphics
[NASA-TM-109597] p 1094 N94-15290
Atlas of TOMS ozone, 1978-1988
[NASA-TM-109456] p 1094 N94-15329
TOTAL QUALITY MANAGEMENT
Army Software Test and Evaluation Panel (STEP) software metrics initiatives report
[AD-A266889] p 1142 N94-14924
Creating and maintaining a visionary quality program
[DE93-015122] p 1050 N94-16055
Impact of TQM concepts on inspection of aerospace systems
[TABES PAPER 93-350] p 1050 N94-16130
Total quality environmental management leadership through quality
[TABES PAPER 93-540] p 1050 N94-16135
Identifying and responding to customer needs at the Kennedy Space Center p 1056 N94-16626
TOUGHNESS
Transformation toughening of composite ceramics
[AD-A267304] p 971 N94-16980
Micromechanisms of monotonic and cyclic subcritical crack growth in advanced high melting point low-ductility intermetallics
[AD-A267764] p 961 N94-17223
TOWED BODIES
A microprocessor controller for a towing tank drive and flow visualisation system
[AD-A267087] p 872 N94-15543
TOWING
A microprocessor controller for a towing tank drive and flow visualisation system
[AD-A267087] p 872 N94-15543
TOXIC DISEASES
Fibers and materials of medical application p 938 N94-16855
TOXIC HAZARDS
Toxic substances registry system: Index of material safety data sheets
[NASA-TM-109332] p 1121 N94-15658
Proceedings of the 1992 Annual Meeting NASA Occupational Health Program
[NASA-CR-193462] p 1123 N94-16609
Emergency preparedness and planning p 1124 N94-16613
Lead poisoning: An overview p 1124 N94-16614
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
Education and training of professional industrial hygienists for 2020 p 1125 N94-16618
Arsenic surveillance program p 1127 N94-16637
Lead Surveillance Program p 1127 N94-16640
Respiratory Protection Program medical clearance for respirator use p 1127 N94-16642
General Medical Surveillance Program p 1127 N94-16643
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
TOXICITY
Toxic substances registry system: Index of material safety data sheets
[NASA-TM-109332] p 1121 N94-15658
Neurotoxicity of hemoglobin in cortical cell culture
[AD-A266506] p 1128 N94-16786
TOXICITY AND SAFETY HAZARD
Emergency preparedness and planning p 1124 N94-16613
Medical surveillance and biological monitoring of lead exposed employees p 1124 N94-16615
TOXICOLOGY
Development of pattern recognition techniques for the evaluation of toxicant impacts to multispecies systems
[AD-A267197] p 1095 N94-15790
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
TRACE CONTAMINANTS
Gas separations using ceramic membranes
[DE93-000278] p 947 N94-15861
Application of non-thermal plasmas to pollution control
[DE93-016432] p 1096 N94-16449
Trace analysis of chemical warfare agents in air: Sampling in porous polymers followed with thermal desorption analysis
[FOA-C-40302-4.6] p 1097 N94-17625
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649
TRACE ELEMENTS
A proposed mechanism for the pyrolysis of diborane
[DE93-014275] p 947 N94-15977
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
Trace-element composition of Chicxulub crater melt rock, K/T tektites and Yucatan basement p 1242 N94-16245
Searching for neuKREEP: An EMP study of Apollo 11 Group A basalts p 1266 N94-16275
On the composition of neuKREEP: QMD contamination at Apollo 11? p 1266 N94-16276
Partitioning of Nb, Mo, Ba, Ce, Pb, Th and U between immiscible carbonate and silicate liquids: Evaluating the effects of P2O5,F, and carbonate composition p 953 N94-16283
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
An experimental study of trace element partitioning between perovskite, hibonite and melt: Equilibrium values p 954 N94-16313
Noble gases in twenty Yamato H-chondrites: Comparison with Allan Hills chondrites and modern falls p 1244 N94-16361
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Electron reversal ionizer for detection of trace species using a spherical cathode
[NASA-CASE-NPO-18870-1-CU] p 1185 N94-17329
Chemical tracer studies at IOSDL. 3: The measurement of silicate, nitrate and phosphate in seawater
[IOS-302-1992] p 1114 N94-17489
TRACKING (POSITION)
Programmable Remapper project
[NASA-TM-109508] p 1164 N94-15515
Effects of window size and shape on accuracy of subpixel centroid estimation of target images
[NASA-TP-3331] p 1034 N94-15990
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581
TRACKING NETWORKS
On the accuracy of ERS-1 orbit predictions p 874 N94-15589
TRACKING PROBLEM
What is the radar tracking Glint problem and can it be solved?
[AD-A266509] p 999 N94-16789
TRACKING RADAR
Infrared spot tracker
[AD-D015778] p 1191 N94-16547
TRACKING STATIONS
New perspectives for high accuracy SLR with second generation geodesic satellites p 916 N94-15585
Computer networking at SLR stations p 917 N94-15594
LLR: Activities in Wettzell p 876 N94-15600
Upgrading of the Borowiec laser station p 877 N94-15604
WLRS --- Wettzell Laser Ranging System (WLRS) p 877 N94-15606
Ground based laser ranging for satellite location p 919 N94-15607
The third generation SLR station Potsdam no. 7836 p 877 N94-15623
Station report on the Goddard Space Flight Center (GSFC) 1.2 meter telescope facility p 922 N94-15625
TRADEOFFS
Lunar lander and return propulsion system trade study
[NASA-TP-3388] p 925 N94-16496
TRAILING EDGES
The effect of the nose shape and wing location toward the wing vortex breakdown
[AD-A267724] p 855 N94-14942
TRAINING AIRCRAFT
STS-26 STA training (Hauck)
[NASA-TM-109555] p 870 N94-15279
TRAINING ANALYSIS
An information processing classification of beyond-visual-range air intercepts
[AD-A266927] p 1131 N94-15108
TRAINING DEVICES
Defense RDT&E online system (DROLS) handbook
[AD-A267546] p 1232 N94-17101
TRAINING SIMULATORS
Space adaptation
[NASA-TM-109601] p 1120 N94-15309
Richards, Dick: Training clip
[NASA-TM-109503] p 876 N94-15467
Infrared spot tracker
[AD-D015778] p 1191 N94-16547
An introduction to structural models
[AD-A268151] p 1155 N94-17429
TRAJECTORY ANALYSIS
Simulation reduction using the Taguchi method
[NASA-CR-4542] p 1055 N94-17082
TRAJECTORY CONTROL
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010
TRAJECTORY OPTIMIZATION
Trajectory optimization for the National Aerospace Plane
[NASA-CR-194618] p 867 N94-16498
TRAJECTORY PLANNING
An object-oriented program specification for a mobile robot motion control language
[AD-A267213] p 1166 N94-16986
Path planning for robotic truss assembly
[NASA-CR-194652] p 897 N94-17280
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
TRANSCONDUCTANCE
DLTS and dynamic transconductance analysis of deep-submicron fully-depleted SOI MOSFET's
[AD-A267291] p 1214 N94-17243
TRANSDUCERS
Long baseline watertubes p 1037 N94-15803
Cooperative projects in geodynamical instrumentation between the State Seismological Bureau (China) and the Royal Observatory of Belgium p 1037 N94-15806
TRANSFER FUNCTIONS
Report of the working group on theoretical tidal model p 1101 N94-15815
TRANSFORMATIONS (MATHEMATICS)
On the nature of mirror particles
[DE93-626670] p 1179 N94-14934
TRANSFORMERS
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 1010 N94-15874
A 27 channels, 1 MHz fibre-optic measuring system
[AD-A266943] p 1003 N94-17307
TRANSGRANULAR CORROSION
Stress corrosion cracking of 316 SS and Incoloy-800 in high temperature aqueous containing sulfate and chloride
[DE93-623325] p 952 N94-17302
TRANSIENT HEATING
Gas-grain energy transfer in solar nebula shock waves: Implications for the origin of chondrules p 1262 N94-16251
TRANSIENT LOADS
Development and comparison of advanced reduced-basis methods for the transient structural analysis of unconstrained structures
[NASA-TM-109015] p 1061 N94-17259
TRANSIENT RESPONSE
Nonstationary behaviour of low background photon detectors p 902 N94-15049
Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143
Pulse response based control for minimum time maneuver of flexible spacecraft
[AD-A266186] p 886 N94-16455
Development and comparison of advanced reduced-basis methods for the transient structural analysis of unconstrained structures
[NASA-TM-109015] p 1061 N94-17259
Precise flux control for lattice matched superlattice materials
[AD-A268254] p 1215 N94-17417
Heat transfer parametric system identification
[AD-A268525] p 929 N94-17543
TRANSISTORS
Large signal characterization and modeling of heterojunction bipolar transistors
[AD-A266184] p 1012 N94-16935
TRANSITION FLOW
Parallel spatial direct numerical simulations on the Intel iPSC/860 hypercube
[NASA-CR-191513] p 1144 N94-15483
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
TRANSITION METALS
Magneto-optic superlattice thin films: Fabrication, structural and magnetic characterization p 974 N94-14982
Photochemistry in thin polymeric films
[AD-A266716] p 964 N94-15729
Interfacial structure of lattice mismatched bcc(110)/bcc(110) transition metal superlattices
[DE93-015162] p 1208 N94-16058
Transition metals in superheat melts p 962 N94-16273

Heat shock protein induction in human cells by CO2 laser irradiation
[AD-A266430] p 1117 N94-16545
Synthetic and mechanistic investigation of olefin polymerization catalyzed by early transition metal compounds
[DE93-018301] p 970 N94-16963
Synthesis and characterization of new low-dimensional metal complex conductors
[AD-A268251] p 952 N94-17416

TRANSITION TEMPERATURE
High temperature superconductivity
[AD-A267006] p 1008 N94-15635
Roles of oxygen defects in copper-oxide superconductors
[DE93-014875] p 1208 N94-15982
The effect of long-term aging on the impact properties of modified 9Cr-1Mo steel
[DE93-015453] p 957 N94-16068
Density of states and tunneling characteristics of layered superconductors
[DE93-015898] p 1211 N94-16839
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868

TRANSLATIONAL MOTION
Linear encoding device
[NASA-CASE-GSC-13562-1] p 1147 N94-15703

TRANSMISSION EFFICIENCY
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance
[NPL-DMM(A)-101] p 1006 N94-17549

TRANSMISSION ELECTRON MICROSCOPY
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials
[DE93-015333] p 947 N94-16014
Insights into semiconducting materials and growth phenomena through Z-contrast STEM
[DE93-015964] p 1212 N94-16841
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961

TRANSMISSION LINES
Determination of the electromagnetic fields radiated from the ARES EMP simulator
[AD-A267069] p 988 N94-15668

TRANSMISSION LOSS
Antenna gain loss and pattern degradation due to transmission through dielectric radomes
[AD-A267242] p 986 N94-14974
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 2: Appendices
[AD-A267021] p 987 N94-15527
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 1: Theory and numerical results
[AD-A267105] p 988 N94-15649
OETC optical backplane bus testbed. IBM tasks: Receiver OEIC and link simulation tools and analysis
[AD-A266198] p 1191 N94-16128

TRANSMISSION RATE (COMMUNICATIONS)
Causality-preserving timestamps in distributed programs
[AD-A267534] p 1153 N94-17118

TRANSMISSIONS (MACHINE ELEMENTS)
Mechanical Systems Technology Branch research summary, 1985 - 1992
[NASA-TM-106329] p 1049 N94-17583

TRANSMITTANCE
Characterization of InTISb grown by low pressure metalorganic chemical vapor deposition on GaAs substrate
[AD-A266878] p 1206 N94-14922
Atmospheric transmittance between 1.0 and 2.0 micrometers
[AD-A267076] p 1098 N94-15539
Filters for the International Solar Terrestrial Physics (ISTP) mission far ultraviolet imager
[NASA-CR-194633] p 1190 N94-15868
Multilayer thin film design for far ultraviolet polarizers using an induced transmission and absorption technique
[NASA-CR-194631] p 1190 N94-15869
VUV thin films, chapter 7
[NASA-CR-194634] p 967 N94-16494
A comparison of LOWTRAN-7 corrected Airborne Visible/Infrared Imaging Spectrometer (AVIRIS) data with ground spectral measurements p 1074 N94-16710
Atmospheric propagation analysis program
[AD-A268231] p 1006 N94-17565

TRANSMITTER RECEIVERS
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
SAR sensor electronics: T/R modules
p 993 N94-15911
Microwave reflectometer ionization sensor
[NASA-CR-191464] p 922 N94-17083

TRANSMITTERS
Infrared remote activity transceiver universal model
[AD-A266965] p 1188 N94-15144
The new MTLRS transmitting system
p 877 N94-15612
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
Multi-beam laser altimeter p 921 N94-15620
OETC optical backplane bus testbed. IBM tasks: Receiver OEIC and link simulation tools and analysis
[AD-A266198] p 1191 N94-16128
Evaluation of site effects on a high frequency direction finding single site location system
[AD-A267465] p 1001 N94-17035
True time delay optically controlled dual band transmitter
[AD-A267663] p 1003 N94-17228

TRANSONIC FLOW
Laser Doppler velocimetry measurements across a normal shock in transonic flow
[AD-A267240] p 855 N94-14973
Advanced methods for cascade testing
[AGARD-AG-328] p 1016 N94-15119
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling
p 1018 N94-15201
Computation of the Fluid and Optical Fields About the Stratospheric Observatory for Infrared Astronomy (SOFIA) and the Coupling of Fluids, Dynamics, and Control Laws on Parallel Computers
[NASA-CR-193168] p 858 N94-16510
Selected computations of transonic cavity flows
p 858 N94-16511
Unsteady fluid and optical simulation of transonic aero-windows
[AIAA PAPER 93-3017] p 858 N94-16512

TRANSONIC SPEED
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
Highly transient elastodynamic crack growth in a bimaterial interface: Higher order asymptotic analysis and optical experiments
[AD-A266465] p 1059 N94-16587

TRANSONIC WIND TUNNELS
A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
Physical properties of the benchmark models program supercritical wing
[NASA-TM-4457] p 866 N94-15722
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
Wind tunnel investigation with an operational turbojet engine
[TABES PAPER 93-662] p 870 N94-16157

TRANSPARENCE
Aberration correction of unstable resonators
[NASA-CASE-NPO-18791-1-CU] p 1034 N94-15987

TRANSPIRATION
Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029

TRANSPONDERS
Calibration: Practical experience with ERS-1
p 992 N94-15907
Planned LMSS propagation experiment using ACTS: Preliminary antenna pointing results during mobile operations p 995 N94-16041

TRANSPORT AIRCRAFT
Embedded computer systems: Status of C-17 software
[AD-A267307] p 1160 N94-16993

TRANSPORT PROPERTIES
Effects of spin-orbit coupling on disordered mesoscopic systems
[ITN-93-85220] p 1180 N94-15288
X ray laser program
[AD-A267075] p 1038 N94-15628
High temperature superconductivity
[AD-A267006] p 1008 N94-15635
Optoelectronics based on SiGe/Si heterostructures
[AD-A267178] p 1190 N94-15848
Gas bubble generation and transport in microgravity
p 980 N94-16089
General order characteristic methods for solving neutron transport problems
[DE93-015824] p 1170 N94-16167
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Pulsed laser deposition of metastable Ca(1-x)Sr(x)CuO2 thin films
[DE93-015804] p 1040 N94-16663
Factors determining the release of nitric oxide --- Calcium/cadmium transport by renal cortical collectin duct cells
[AD-A266232] p 1118 N94-17224
Plasma instabilities and transport in the MPD thruster
[AD-A268268] p 1204 N94-17575
Coefficients for calculating thermodynamic and transport properties of individual species
[NASA-TM-4513] p 1220 N94-17624
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674

TRANSPORT THEORY
Turbulence modelling for shock wave/boundary layer interactions specific issues and examples of applications
p 1018 N94-15202
Shielding from space radiations
[NASA-CR-194578] p 1180 N94-15715
General order characteristic methods for solving neutron transport problems
[DE93-015824] p 1170 N94-16167
Shielding from space radiations
[NASA-CR-194664] p 1301 N94-17255
Linear characteristic spatial quadrature for discrete ordinates neutral particle transport on arbitrary triangles
[AD-A267485] p 1185 N94-17365

TRANSPUTERS
Data processing system for flight spectrometer
p 908 N94-15086
Reactive system verification case study: Fault-tolerant transputer communication
[NASA-TM-108784] p 1145 N94-15538
Transputer based control system for MTLRS
p 877 N94-15613

TRANSVERSE WAVES
Acoustic waves in complicated geometries and their interactions with liquid-propellant droplet combustion
[AD-A267260] p 1178 N94-16991

TRAPPED PARTICLES
Quasiparticle trapping in distributed superconducting three-terminal tunnel junction devices
p 910 N94-15101
Nitrogen and light noble gases in Parsa enstatite chondrite p 1246 N94-16435
Kinetic plasma processes occurring in the outer plasmasphere
[NASA-CR-193452] p 1300 N94-17524

TRAPPING
Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180
Orbital evolution of dust from comet Schwassmann-Wachmann 1: A case of one-to-one resonance trapping p 1242 N94-16270

TRAVELING WAVES
Velocity matched millimeterwave electro-optic modulator
[AD-A267264] p 1188 N94-14957

TRAYS
Long duration exposure facility experiment m0003 deintegration observation database
[AD-A267579] p 951 N94-17207

TREES (MATHEMATICS)
Construction of d-dimensional hyperoctrees on a hypercube multiprocessor
[INRIA-RR-1752] p 1162 N94-17539

TRELLIS CODING
Low-Complexity, High-Performance Bandwidth Efficient Coding and Coded Modulation Techniques for Satellite and Space Communications
[NASA-CR-194623] p 997 N94-16506

TREND ANALYSIS
NASA trend analysis procedures
[NASA-RP-1290] p 1223 N94-15782

TRIANGLES
Linear characteristic spatial quadrature for discrete ordinates neutral particle transport on arbitrary triangles
[AD-A267485] p 1185 N94-17365

TRIANGULATION
The cartography of Venus with Magellan data
p 1274 N94-16320

TRIAXIAL STRESSES
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041

TRIBOLOGY
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533

Continuing research on friction and wear of materials
[AD-A268291] p 1049 N94-17566

TRIGGER CIRCUITS
The 3D-Flow processor for a programmable level-1 trigger (feasibility study)
[DE93-016045] p 1159 N94-16172

TRIGONOMETRIC FUNCTIONS
Statistical analysis of trigonometric parallaxes
[NASA-CR-194558] p 1172 N94-15641

TRIMERS
Intramolecular versus intermolecular condensation rates in the acrilic polymerization of octaethoxytrisiloxane
[AD-A266982] p 963 N94-15490

TRIODES
RF vacuum microelectronics
[AD-A268399] p 1014 N94-17423

TRITIUM
An apparatus for measuring the biological oxidation of hydrogen gas under hyperbaric conditions
[AD-A266834] p 1119 N94-14916
Tritium diffusion and desorption in single crystal LiAlO2
[DE93-015140] p 1211 N94-16805

TRITON
Neptune encounter highlights
[NASA-TM-109421] p 1246 N94-15240
Tidal interaction: A possible explanation for geysers and other fluid phenomena in the Neptune-Triton system
p 1272 N94-16311
Evolution of Triton's volatile budget
p 1284 N94-16373

TROPICAL METEOROLOGY
TRMM radar p 990 N94-15894

TROPICAL REGIONS
IAI topic: El Nino. Southern oscillation and interannual climate variability
[INPE-5410-PRE/1757] p 1111 N94-15186
Validation and analysis of microwave-derived rainfall over the tropics
[AD-A267785] p 1108 N94-17303
Meridional circulation in the tropical north atlantic
[AD-A268222] p 1114 N94-17555
An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595

TROPOSPHERE
Hyperspectral modeling for extracting aerosols from aircraft/satellite data p 1067 N94-16673
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503

TROPOSPHERIC SCATTERING
Johnson-Gierhart program predictions of excess propagation loss for super-high frequency air-to-ground paths. Volume 1: Theory and numerical results
[AD-A267105] p 988 N94-15649

TROUGHS
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography
p 1283 N94-16369

TRUSSES
Preliminary analysis and design optimization of the short spacer truss of Space Station Freedom
[NASA-TM-4470] p 1058 N94-15709
End-effector: Joint conjugates for robotic assembly of large truss structures in space: Extended concepts
[NASA-CR-193576] p 1048 N94-17088
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412

TUBERCULOSIS
Tuberculosis: A case for increased screening
p 1126 N94-16627
Summary of follow-up results from potential tuberculosis exposures p 1126 N94-16628

TUMORS
Quantitative method of measuring cancer cell urokinase and metastatic potential
[NASA-CASE-MSC-21715-1] p 1117 N94-15967
The role of constitutive and inducible processes in the response of human squamous cell carcinoma cell lines to ionizing radiation
[DE93-015150] p 1129 N94-16970

TUNERS
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933

TUNGSTEN
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition
p 945 N94-15171

TUNGSTEN ALLOYS
Tensile and stress-rupture behavior of hafnium carbide dispersed molybdenum and tungsten base alloy wires
[NASA-TM-106350] p 962 N94-17652

TUNGSTEN CARBIDES
Diamond growth on carbide surfaces using a selective etching technique
[AD-A267989] p 973 N94-17413

TUNGSTEN FLUORIDES
Multiphoton ionization studies of WF6 and UF6
[DE93-016232] p 1181 N94-15863

TUNING
Fabrication and phase tuning of an optical waveguide device
[AD-D015815] p 1191 N94-16489
Design of broadband wire antennas for frequency hopping applications
[AD-A267405] p 1001 N94-17025
Optimal tuning of heavy equipment motion controllers
[AD-A267873] p 1167 N94-17392

TUNNEL DIODES
Submillimeterwave SIS mixer developments
p 903 N94-15054
Substrate effects in superconducting tunnel junction detectors p 908 N94-15083
A multilayered approach to superconducting tunnel junction x ray detectors p 908 N94-15089
Quasiparticle trapping in distributed superconducting three-terminal tunnel junction devices
p 910 N94-15101

TUNNEL JUNCTIONS
Monolithic, two-terminal InP/Ga(0.47)In(0.53)As tandem solar cells
[DE93-014037] p 1093 N94-16824

TURBINE BLADES
Turbine blade tip film cooling measurements
[AD-A267686] p 868 N94-14964
Slidesurfaces with adaptive new definitions (SAND) for transient analysis
[DE93-014909] p 1059 N94-15983
Effects of rotation on coolant passage heat transfer. Volume 2: Coolant passages with trips normal and skewed to the flow
[NASA-CR-4396-VOL-2] p 1023 N94-15991

TURBINE PUMPS
Liquid Oxygen (LO2) propellant conditioning concept testing
[TABES PAPER 93-621] p 976 N94-16146
Space Shuttle main engine. NASA has not evaluated the alternate fuel turbopump costs and benefits. Report to the Administrator of the National Aeronautics and Space Administration
[GAO/NSIAD-94-54] p 926 N94-16834
ALS liquid hydrogen turbopump
[NASA-CR-194646] p 927 N94-17016

TURBINES
Heat transfer and aerodynamics of a 3D design nozzle guide vane tested in the Pyestock isentropic light piston facility
[RAE-TM-AERO/PROP-19] p 856 N94-15696
ALS liquid hydrogen turbopump
[NASA-CR-194646] p 927 N94-17016
Application of thermal spray and ceramic coatings and reinforced epoxy for cavitation damage repair of hydroelectric turbines and pumps
[AD-A267624] p 971 N94-17198

TURBOJET ENGINES
Wind tunnel investigation with an operational turbojet engine
[TABES PAPER 93-662] p 870 N94-16157

TURBOMACHINERY
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

TURBOPROP AIRCRAFT
Futurepath 1 --- power systems
[NASA-TM-109431] p 925 N94-15503

TURBOPROP ENGINES
Futurepath 1
[NASA-TM-109439] p 869 N94-15338
Structured finite volume modeling of US Navy aircraft engine test cells task 2: Turboprop engine, volume 1
[AD-A267833] p 872 N94-17405
Structured finite volume modeling of US Navy aircraft engine test cells. Task 2: Turboprop engine. Volume 2: Code documentation and listings
[AD-A268386] p 873 N94-17569

TURBOSHAFTS
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine, volume 1
[AD-A268176] p 873 N94-17432
Structured finite volume modeling of US Navy aircraft engine test cells. Task 1: Turboshaft engine-code documentation and listings, volume 2
[AD-A268177] p 873 N94-17508

TURBULENCE
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows
[NASA-CR-193131] p 1018 N94-15427
An experimental study of ASTOVL related jet flows to produce CFD code validation data. Phase 3: Results of experiments
[TT-9203] p 1020 N94-15645
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Detecting surface roughness effects on the atmospheric boundary layer via AIRSAR data: A field experiment in Death Valley, California p 1078 N94-16747
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511

TURBULENCE EFFECTS
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Plasma instabilities and transport in the MPD thruster
[AD-A268268] p 1204 N94-17575

TURBULENCE MODELS
Mesoscale modeling of the atmosphere
[AD-A263236] p 1098 N94-15132
Numerical simulation of 3-D shock wave turbulent boundary layer interactions p 1017 N94-15199
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling
p 1018 N94-15201
Turbulence modelling for shock wave/boundary layer interactions specific issues and examples of applications
p 1018 N94-15202
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 2: User's guide
[NASA-TM-106338-VOL-2] p 1019 N94-15475
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 1: Analysis description
[NASA-TM-106336-VOL-1] p 1019 N94-15485
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 2: User's guide
[NASA-TM-106340-VOL-2] p 1020 N94-15488
Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
Selected computations of transonic cavity flows
p 858 N94-16511
Computation of confined coflow jets with three turbulence models
[NASA-TM-106378] p 1025 N94-16879
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
Investigation of high-speed free shear flows using improved pressure-strain correlated Reynolds stress turbulence model
[NASA-CR-194661] p 1027 N94-17127
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385

TURBULENT BOUNDARY LAYER
Numerical simulation of 3-D shock wave turbulent boundary layer interactions p 1017 N94-15199
Contribution of laser Doppler velocimetry to the physical description of shock wave/turbulent boundary layer interactions with incidence on turbulence modelling
p 1018 N94-15201

Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
Three-dimensional turbulent boundary layer
[AD-A266261] p 1025 N94-16908
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286
An experimental study of fluctuating wall pressures in a highly swept, sharp fin-induced, Mach 5 shock wave/turbulent boundary layer interaction
[AD-A268394] p 861 N94-17461
An investigation of oblique shock/boundary layer interaction control
[AD-A268106] p 861 N94-17574

TURBULENT COMBUSTION
Reaction and diffusion in turbulent combustion
[DE93-017085] p 943 N94-15146

TURBULENT FLOW
Large-Eddy Simulations (LES) of flows and turbulence distribution
[AD-A267182] p 1016 N94-15151
Turbulence modelling for shock wave/boundary layer interactions specific issues and examples of applications
p 1018 N94-15202
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows
[NASA-CR-193131] p 1018 N94-15427
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
Turbulence and transition modeling for high-speed flows
[AD-A266748] p 1022 N94-15953
Implementation of an anisotropic turbulence model in the COMMIX-1C/ATM computer code
[DE93-015541] p 1023 N94-16444
Search for chaos in free shear flows
[AD-A266245] p 1023 N94-16470
Selected computations of transonic cavity flows
p 858 N94-16511
Computation of confined coflow jets with three turbulence models
[NASA-TM-106378] p 1025 N94-16879
Three-dimensional turbulent boundary layer
[AD-A266261] p 1025 N94-16908
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
Thin-layer and full Navier-Stokes calculations for turbulent supersonic flow over a cone at an angle of attack
[NASA-CR-189103] p 861 N94-17558
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609

TURBULENT HEAT TRANSFER
Investigation of two-phase flow and boiling heat transfer during quenching of a tube under microgravity
p 979 N94-16087

TURBULENT JETS
The turbulent wall jet
[AD-A267675] p 855 N94-14963
Lifted turbulent jet flames
[AD-A267911] p 952 N94-17381

TURBULENT MIXING
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526
Three dimensional hydrodynamic calculations with adaptive mesh refinement of the evolution of Rayleigh Taylor and Richtmyer Meshkov instabilities in converging geometry: Multi-mode perturbations
[DE93-017155] p 1025 N94-16903
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264
Chemical reactions in turbulent mixing flows
[AD-A268287] p 861 N94-17580

TURBULENT WAKES
The 1970 highlights --- NASA programs and research
[NASA-TM-109628] p 1302 N94-15415

TURING MACHINES
FSM test: A functional test generation system for sequential circuits
[REPT-93-017] p 1014 N94-17505

TWO BODY PROBLEM
Tidal regime of intact planetoid capture model for the Earth-Moon system: Does it relate to the archean sedimentary rock record? p 1245 N94-16378

TWO DIMENSIONAL FLOW
Modal element method for potential flow in non-uniform ducts: Combining closed form analysis with CFD
[NASA-TM-106347] p 1169 N94-15799
Inviscid instability of streamwise corner flow
[NASA-CR-191514] p 1021 N94-15834
A rapid computational model for estimating the performance of compliant airfoils in cascades
[AD-A266275] p 857 N94-16471
Determining the effect of endwall boundary layer suction in a large scale subsonic compressor cascade
[AD-A267208] p 859 N94-16913
An upwind multigrid method for solving viscous flows on unstructured triangular meshes
[NASA-TM-109343] p 1027 N94-17061
Investigation of high-speed free shear flows using improved pressure-strain correlated Reynolds stress turbulence model
[NASA-CR-194661] p 1027 N94-17127
Development of iterative techniques for the solution of unsteady compressible viscous flows
[NASA-CR-194657] p 1027 N94-17129
Two-dimensional, high flow, precisely controlled monodisperse drop source
[AD-A267660] p 1028 N94-17250

TWO DIMENSIONAL MODELS
A posteriori error estimation for hierarchic models of elliptic boundary value problems on thin domains
[AD-A267714] p 1168 N94-14939
Crack-tip-opening angle measurements and crack tunneling under stable tearing in thin sheet 2024-T3 aluminum alloy
[NASA-CR-191523] p 931 N94-15184

TWO FLUID MODELS
Boundary layer flow of air over water on a flat plate
[NASA-CR-191517] p 1019 N94-15479
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104

TWO PHASE FLOW
Investigation of two-phase flow and boiling heat transfer during quenching of a tube under microgravity
p 979 N94-16087
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446
Gravity dependent condensation pressure drop and heat transfer in ammonia two-phase heat transport systems
[NLR-TP-92121-U] p 1031 N94-17615

TWO-WAVELENGTH LASERS
An improved light source for laser ranging
p 913 N94-15567

TYROSINE
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111

U

U.S.S.R.
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 32: A new era in international technical communication: American-Russian collaboration
[NASA-TM-109336] p 1230 N94-15838

UH-60A HELICOPTER
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793

ULTRAHIGH FREQUENCIES
An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048

ULTRAHIGH VACUUM
UHV-stem studies on nucleation and growth of thin metal silicide films on silicon
[DE93-017604] p 1212 N94-16961

ULTRASONIC FLAW DETECTION
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
Component testing and quality assurance
p 932 N94-15259

ULTRASONIC RADIATION
Method and apparatus to characterize ultrasonically reflective contrast agents
[NASA-CASE-LAR-14969-1] p 1129 N94-17085
An automated system for ultrasound measurements of liquids by the resonance (Eggers) method
[IFTR-17/1992] p 1178 N94-17087
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248

ULTRASONIC SCANNERS
Method and apparatus to characterize ultrasonically reflective contrast agents
[NASA-CASE-LAR-14969-1] p 1129 N94-17085

ULTRASONIC TESTS
Characterization of the cyclic plasticity of polycrystalline aluminum in the 90-300K domain: Use of the ultrasonic wave coupling technique - low frequency restraint
[ISAL-92-0083] p 954 N94-14930
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
Transcranial Doppler ultrasound studies of cerebral blood-flow in microgravity p 981 N94-16095

ULTRASONICS
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248

ULTRAVIOLET ASTRONOMY
NASA's Ultraviolet Astrophysics Branch: Present and future detector program p 910 N94-15102
The spectrum of Phobos from Phobos 2 observations at 0.3-2.6 microns: Comparison to previous data and meteorite analogs p 1295 N94-16429

ULTRAVIOLET DETECTORS
A new approach to optical photon detection
p 899 N94-15028
Microchannel plate imaging detectors for the ultraviolet p 901 N94-15037
Microchannel plate detectors for space astronomy
p 901 N94-15038
Development of an ultra violet auroral imager for the Freja project p 904 N94-15060
A test facility to calibrate EUV detectors
p 873 N94-15062
The grazing incidence detectors for the SOHO coronal diagnostic spectrometer p 905 N94-15063
The TAUVEX experiment p 905 N94-15064
The Rutherford Appleton Laboratory photon counting detector p 910 N94-15096
NASA's Ultraviolet Astrophysics Branch: Present and future detector program p 910 N94-15102

ULTRAVIOLET FILTERS
Filters for the International Solar Terrestrial Physics (ISTP) mission far ultraviolet imager
[NASA-CR-194633] p 1190 N94-15868

ULTRAVIOLET LASERS
Modification of fluoropolymer surfaces with electronically conductive polymers
[AD-A266294] p 967 N94-16475

ULTRAVIOLET RADIATION
Quantifying lifetime exposure to ultraviolet radiation in the epidemiology of cutaneous malignant melanoma: A pilot study
[DE93-015274] p 1128 N94-16812
The feasibility of tropospheric and total ozone determination using a Fabry-Perot interferometer as a satellite-based nadir-viewing atmospheric sensor
[NASA-TM-109342] p 1102 N94-17214

ULTRAVIOLET REFLECTION
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
ULTRAVIOLET SPECTRA
Theoretical prediction of the UV adsorption and fluorescence spectra of tyrosine and phenylalanine
[AD-A266970] p 943 N94-15111
ULTRAVIOLET SPECTROMETERS
Ultraviolet spectrometer and polarimeter (UVSP) catalog of observations. Volume 1: Experiments 1-30719, February 1980 - April 1985
[NASA-CR-4529-VOL-1] p 1298 N94-15023
Ultraviolet spectrometer and polarimeter (UVSP) catalog of observations. Volume 2: Experiments 30720-63057, April 1985 - February 1988
[NASA-CR-4529-VOL-2] p 1298 N94-15024
The spectrum of Phobos from Phobos 2 observations at 0.3-2.6 microns: Comparison to previous data and meteorite analogs p 1295 N94-16429
ULTRAVIOLET SPECTROSCOPY
The STIS MAMA status: Current detector performance p 905 N94-15069
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17126
ULTRAVIOLET TELESCOPES
The TAUVEX experiment p 905 N94-15064
ULYSSES MISSION
STS-41 post-flight press presentation
[NASA-TM-109514] p 882 N94-15516
STS-41 onboard 16mm photography quick release
[NASA-TM-109515] p 882 N94-15518
STS-41 mission highlights resource tape
[NASA-TM-109516] p 882 N94-15521
Strategy for a small satellite program and a proposal for a first mission p 874 N94-17143
UNDAMPED OSCILLATIONS
Flutter analysis using transversality theory
[NASA-TM-106382] p 1062 N94-17481
UNDERGROUND STORAGE
Environmental use of a Laser Range Finder and the Advanced Visualization System
[DE93-016163] p 1043 N94-17677
UNITED STATES
The closing window of opportunity: Addressing the US space launch vehicle crisis
[TABES PAPER 93-640] p 878 N94-16148
The standardized precipitation index and its use in the western contiguous United States
[AD-A267547] p 1107 N94-17102
Space commerce in a global economy: Comparison of US and Australian approaches
[NASA-TM-109341] p 1235 N94-17290
UNIVERSITIES
Maximizing participation of women in collegiate aviation education
[NIAR-93-14] p 1222 N94-17261
The impact of industry/university consortia programs on space education
[NASA-TM-109340] p 1222 N94-17441
UNIVERSITY PROGRAM
Symposium on the Future of Aeronautics in the Netherlands
[ETN-93-93780] p 853 N94-15120
University Joint Venture: JOVE
[NASA-TM-109660] p 1229 N94-15231
The impact of industry/university consortia programs on space education
[NASA-TM-109340] p 1222 N94-17441
UNIX (OPERATING SYSTEM)
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
HP upgrade operational streamlining p 918 N94-15596
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
User manual and program description of the data acquisition system of PML-pulse physics
[AD-A266752] p 1147 N94-15776
Department of Defense technical architecture framework for information management. Volume 2: Technical reference model and standards profile, version 2.0
[AD-A267194] p 1229 N94-15788
UNSTEADY AERODYNAMICS
Effect of wind tunnel acoustic modes on linear oscillating cascade aerodynamics
[NASA-TM-106367] p 869 N94-15866
Aerodynamic/dynamic/control interaction
[AD-A266187] p 871 N94-16107
Aeroelastic airfoil smart spar p 866 N94-16865
Progress in computational unsteady aerodynamics
[NASA-CR-177630] p 860 N94-17081
UNSTEADY FLOW
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
Computation of the Fluid and Optical Fields About the Stratospheric Observatory for Infrared Astronomy (SOFIA) and the Coupling of Fluids, Dynamics, and Control Laws on Parallel Computers
[NASA-CR-193168] p 858 N94-16510
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 1: Analysis description
[NASA-TM-106337] p 1024 N94-16527
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
On solving the compressible Navier-Stokes equations for unsteady flows at very low Mach numbers
[NASA-TM-106380] p 1027 N94-17128
Development of iterative techniques for the solution of unsteady compressible viscous flows
[NASA-CR-194657] p 1027 N94-17129
Multigrid time-accurate integration of Navier-Stokes equations
[NASA-TM-106373] p 1028 N94-17258
On the stability of a time dependent boundary layer
[NASA-CR-191542] p 1030 N94-17450
An investigation of oblique shock/boundary layer interaction control
[AD-A268106] p 861 N94-17574
UPPER ATMOSPHERE
Southern and Northern Hemisphere total ozone as seen by TOMS
[NASA-TM-109591] p 1098 N94-15282
Optical measurements of NASA/USAF CRRES high altitude rocket borne chemical release experiments in conjunction with the USAF airborne ionospheric observatory aircraft
[AD-A266404] p 1101 N94-16551
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
Second flight of the Spacelab grille spectrometer during the Atlas-1 mission
[AERONAUTICA-ACTA-A-367-199] p 923 N94-17592
The Central American cold surge: An observational analysis of the deep southward penetration of North American cold fronts
[AD-A268592] p 1110 N94-17607
UPPER ATMOSPHERE RESEARCH SATELLITE (UARS)
ATLAS-2 and UARS correlative measurement opportunities during Space Shuttle mission on April 8-17, 1993
[NASA-TM-109020] p 1105 N94-15480
UPSTREAM
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
UPWIND SCHEMES (MATHEMATICS)
Accurate upwind methods for the Euler equations
[NASA-TM-106388] p 1170 N94-16882
An upwind multigrid method for solving viscous flows on unstructured triangular meshes
[NASA-TM-109343] p 1027 N94-17061
URANIUM FLUORIDES
Multiphoton ionization studies of WF6 and UF6
[DE93-016232] p 1181 N94-15863
URANUS (PLANET)
Voyager encounters Uranus
[NASA-TM-109619] p 1247 N94-15348
NASA images 12 --- Voyager encounters
[NASA-TM-109417] p 1247 N94-15511
NASA images 13
[NASA-TM-109418] p 1247 N94-15512
Mapping the stability region of the 3:2 Neptune-Pluto resonance p 1280 N94-16351
URBAN DEVELOPMENT
AVIRIS data and neural networks applied to an urban ecosystem p 1073 N94-16705
UREAS
Photodegradation of MDI based polyurethane/urea elastomers
[AD-A267308] p 971 N94-16994
UREILITES
Stalking the LREE-enriched component in ureilites p 1241 N94-16190
Euromet Ureilite Consortium: A preliminary report on carbon and nitrogen geochemistry p 1241 N94-16192
URINE
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452
USER MANUALS (COMPUTER PROGRAMS)
The CAML numbers reference manual
[INRIA-RT-141] p 1142 N94-14979
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 2: User's guide
[NASA-TM-106338-VOL-2] p 1019 N94-15475
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 2: User's guide
[NASA-TM-106340-VOL-2] p 1020 N94-15488
TAFVER 2 users manual
[AD-A266850] p 1106 N94-15757
User manual and program description of the data acquisition system of PML-pulse physics
[AD-A266752] p 1147 N94-15776
User's manual for the HYPGEN hyperbolic grid generator and the HGUI graphical user interface
[NASA-TM-108791] p 1148 N94-15784
ASTROS enhancements. Volume 1: ASTRO user's manual
[AD-A266818] p 1151 N94-16768
ASTROS enhancements. Volume 2: ASTRO programmer's manual
[AD-A266819] p 1151 N94-16769
Missile datcom user's manual
[AD-A267447] p 1152 N94-17032
Defense RDT&E online system (DROLS) handbook
[AD-A267546] p 1232 N94-17101
BACKSCAT lidar simulation version 3.0: Technical documentation and users guide
[AD-A267296] p 1003 N94-17268
User's manual for the Langley Research Center 14- by 22- foot subsonic tunnel static data acquisition system
[NASA-TM-109027] p 861 N94-17639
USER REQUIREMENTS
Computer-human interface issues: Theory and application
[AD-A268013] p 1138 N94-17475
UTILITIES
Utility emissions associated with electric and hybrid vehicle (EHV) charging
[DE93-013734] p 1011 N94-16459

V

V/STOL AIRCRAFT
Lift-fan aircraft: Lessons learned-the pilot's perspective
[NASA-CR-177620] p 867 N94-15950
VACANCIES (CRYSTAL DEFECTS)
Vacancy condensation as the precursor to passivity breakdown
[DE93-012925] p 956 N94-15998
VACUUM APPARATUS
Investigation of onset of plasma formation at anode of fast-pulsed high-voltage vacuum diode
[AD-A267214] p 1204 N94-16987
Field-emitter arrays for RF vacuum microelectronics
[AD-A268397] p 1015 N94-17526
VACUUM SPECTROSCOPY
Structural and dynamical aspects of electrodeposition
[AD-A266786] p 942 N94-14909
VACUUM TUBES
RF vacuum microelectronics
[AD-A268399] p 1014 N94-17423
VALLEYS
Fluvial erosion on Mars: Implications for paleoclimatic change p 1241 N94-16210
VAN DER WAALS FORCES
Electronic spectroscopy of the gas-phase OH-Kr van der Waals complex
[AD-A266891] p 942 N94-14946
The roles of fluid motion and other transport phenomena in the morphology of materials
[NASA-CR-194665] p 1028 N94-17298
VANADIUM
The corrosion protection of metals by ion vapor deposited aluminum
[NASA-TM-108425] p 955 N94-15832
Effects of aging time on V205 sol-gel coatings
[AD-A266824] p 965 N94-15843
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE93-016850] p 949 N94-16897
VANADIUM ALLOYS
The corrosion protection of metals by ion vapor deposited aluminum
[NASA-TM-108425] p 955 N94-15832
VANADIUM OXIDES
Vanadium corrosion studies
[AD-A266489] p 959 N94-16781
VANELESS DIFFUSERS
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386

VANES
In-flight investigation of a rotating cylinder-based structural excitation system for flutter testing
[NASA-TM-4512] p 867 N94-15783
VAPOR DEPOSITION
Diamond epitaxy and diamondlike coatings
[AD-A266657] p 1206 N94-15747
Laser assisted CVD growth of AlN and GaN
[AD-A267150] p 1206 N94-15764
The corrosion protection of metals by ion vapor deposited aluminum
[NASA-TM-108425] p 955 N94-15832
Method of producing a silicon carbide fiber reinforced strontium aluminosilicate glass-ceramic matrix composite
[NASA-CASE-LEW-15263-2] p 934 N94-15929
A high flux radical beam diamond growth
[AD-A266754] p 1207 N94-15955
Continuous fabrication of SiC fiber tows by chemical vapor deposition
[AD-A266460] p 936 N94-16569
Chemical vapor deposition of Ta2O5 corrosion resistant coatings
[DE93-015488] p 969 N94-16889
Single crystal diamond thin films
[AD-A266457] p 1214 N94-17216
Anisotropic phase separation in amorphous Fe-Ge alloys
[DE93-015255] p 961 N94-17251
Diamond growth on carbide surfaces using a selective etching technique
[AD-A267989] p 973 N94-17413
Growth, characterization and device development in monocrystalline diamond films
[AD-A268206] p 1216 N94-17553
VAPOR PHASE EPITAXY
Mechanical properties and crystal growth studies of semiconductor alloys
[AD-A268144] p 1216 N94-17454
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519
VAPOR PHASES
Electronic spectroscopy of the gas-phase OH-Kr van der Waals complex
[AD-A266891] p 942 N94-14946
Fundamental studies of rocket combustion chemistry and combustion instability
[AD-A266248] p 925 N94-16482
Sensitive detection of gas-phase nitro-containing energetic materials employing 226-nm radiation
[AD-A267633] p 951 N94-17203
Ceramic fiber coatings development and demonstration
[AD-A267286] p 972 N94-17242
Laser probing of the kinetics and dynamics of 3-5 semiconductor growth
[AD-A268388] p 1215 N94-17422
A basic principles description of liquid vapor phase transitions
[AD-A268331] p 1176 N94-17581
VAPOR PRESSURE
The pressure broadening of HDO by O2, N2, H2, and He between 100 K and 600 K
[AD-A267118] p 946 N94-15684
Effects of RVP, T(50), and oxygenates on hot-start and driveability performance at high and low altitude
[AD-A266382] p 869 N94-16516
Method for doping GaAs with high vapor pressure elements
[AD-D015794] p 1210 N94-16538
Sodium-mercury excimer laser, phase 1
[AD-A267728] p 1042 N94-17230
VAPORIZING
Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180
Cryogenic spray vaporization in high-velocity helium, argon and nitrogen gasflows
[NASA-TM-106363] p 1035 N94-17446
VAPORS
HyperVentilate: Decision-support software for soil vapor extraction technology application
[PB93-134880] p 1094 N94-15136
Geometrical vapor blocker for parallel condensation tubes requiring cooling
[NASA-CASE-MSC-22090-1] p 1022 N94-15962
Lasing dye sensor for chemical vapors
[AD-D015786] p 1040 N94-16533
VARIABILITY
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
Reliability of autonomic responses and malaise across multiple motion sickness stimulation tests
[NASA-TM-108787] p 1121 N94-15711
The use of General Circulation Models in detecting climate change induced by greenhouse gases
[DE93-014369] p 1096 N94-16802
Variability of the Seyfert galaxy MKN 766 in the Rosat all sky survey
[MPE-PREPRINT-221] p 1240 N94-17591
VARIABLE AMPLITUDE LOADING
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710
VARIABLE THRUST
Computational analysis of Variable Thrust Engine (VTE) performance
[NASA-CR-193852] p 928 N94-17442
VARIANCE (STATISTICS)
Bounds on inconsistent inferences for sequences of trials with varying probabilities
[AD-A267146] p 1172 N94-15733
Speckles statistics and decorrelation effects in complex ABCD optical systems
[AD-A267843] p 1193 N94-17012
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503
VARIATIONAL PRINCIPLES
Three-dimensional analysis of anisotropic spatially reinforced structures p 939 N94-16863
VARIATIONS
Water-levels fluctuations in a borehole at the Royal Observatory of Belgium: Effects on local gravity, Earth tidal, and barometric responses p 1100 N94-15812
VAX COMPUTERS
Detailed example of using ACEC release 3.0 with the DEC VAX Ada compiler
[AD-A267880] p 1152 N94-17014
VECTOR MESONS
PHENIX Conceptual Design Report
[DE93-015759] p 1182 N94-16161
VECTOR SPACES
Development and comparison of advanced reduced-basis methods for the transient structural analysis of unconstrained structures
[NASA-TM-109015] p 1061 N94-17259
VEGA PROJECT
Comet Halley returns
[NASA-TM-109608] p 885 N94-15296
VEGETATION
An expert system shell for inferring vegetation characteristics: Atmospheric techniques (Task G)
[NASA-CR-194570] p 1082 N94-15531
X-SAR: The X-band synthetic aperture radar on board the Space Shuttle p 990 N94-15891
Radar response of vegetation: An overview p 991 N94-15898
Application of Cloude's target decomposition theorem to polarimetric imaging radar data p 991 N94-15901
Multifrequency observations p 992 N94-15902
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030
Unmixing AVIRIS data to provide a method for vegetation fraction subtraction p 1066 N94-16669
Mapping the spectral variability in photosynthetic and non-photosynthetic vegetation, soils, and shade using AVIRIS p 1068 N94-16679
Retrieval of biophysical parameters with AVIRIS and ISM: The Landes Forest, south west France p 1068 N94-16681
Mapping vegetation types with the multiple spectral feature mapping algorithm in both emission and absorption p 1069 N94-16686
MAC Europe 1991: Evaluation of AVIRIS, GER imaging spectrometry data for the land application testsite Oberpfaffenhofen p 1070 N94-16688
Using endmembers in AVIRIS images to estimate changes in vegetative biomass p 1070 N94-16689
Primary studies of trace quantities of green vegetation in Mono Lake area using 1990 AVIRIS data p 1071 N94-16695
Temporal variation in spectral detection thresholds of substrate and vegetation in AVIRIS images p 1073 N94-16706
The dynamics of hydroponic crops for simulation studies of the CELSS initial reference configurations
[NASA-CR-194654] p 1118 N94-17279
VEGETATION GROWTH
Driving terrestrial ecosystem models from space p 991 N94-15896
VELOCITY DISTRIBUTION
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Studies of combustion reactions at the state-resolved differential cross section level
[DE93-017605] p 948 N94-16462
The structure of turbulent boundary layers and shock wave boundary layer interactions
[AD-A266240] p 1026 N94-16929
To extend the thirteen-moment theory and its application to problems in rarefied hypersonic flow
[AD-A267384] p 859 N94-17021
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511
Kinetic plasma processes occurring in the outer plasmasphere
[NASA-CR-193452] p 1300 N94-17524
VELOCITY MEASUREMENT
An experimental study of ASTOVL related jet flows to produce CFD code validation data. Phase 3: Results of experiments
[TT-9203] p 1020 N94-15645
Evaporation from a meniscus within a capillary tube in microgravity
[NASA-CR-194593] p 976 N94-15654
The shock Hugoniot of 316 SS and sound velocity measurements
[DE93-016525] p 1178 N94-16955
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609
VENTILATION
Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110
VENTING
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936
VENUS (PLANET)
Venus lightning
[NASA-TM-109644] p 1105 N94-15430
NASA images 13
[NASA-TM-109418] p 1247 N94-15512
Magellan: Principal Venus science findings p 989 N94-15887
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices p 1248 N94-16178
Pargo Chasma and its relationship to global tectonics p 1249 N94-16181
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226
Lava flow-field morphological classification and interpretation: Examples from Venus p 1259 N94-16230
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
The three ages of Venus: A hypothesis based on the cratering record p 1261 N94-16239
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
Density of impact craters on tessera, Venus p 1264 N94-16263
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling p 1286 N94-16381
Geophysical models of Western Aphrodite-Niobe region: Venus p 1286 N94-16382
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle p 1293 N94-16421
VENUS ATMOSPHERE
A global traveling wave on Venus
[NASA-CR-194356] p 1246 N94-15182
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
Principal investigators data package for Project Initiation Conference (PIC): EUVS sounding rocket no. 36.117CL. Target: Venus
[NASA-CR-194663] p 923 N94-17125

Magnetic effects in Venus/solar wind interaction
[NASA-CR-194666] p 1299 N94-17281
Pioneer Venus data analysis for the retarding potential analyzer
[NASA-CR-194673] p 1297 N94-17292

VENUS CLOUDS
A global traveling wave on Venus
[NASA-CR-194356] p 1246 N94-15182
Venus lightning
[NASA-TM-109644] p 1105 N94-15430

VENUS RADAR ECHOES
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368

VENUS SURFACE
Magellan: Principal Venus science findings
p 989 N94-15887
Pargo Chasma and its relationship to global tectonics
p 1249 N94-16181
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Spatially extensive uniform stress fields on Venus inferred from radial dike swarm geometries: The Aphrodite Terra example p 1254 N94-16207
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Ishtar deformed belts: Evidence for deformation from below? p 1256 N94-16218
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226
Lava flow-field morphological classification and interpretation: Examples from Venus
p 1259 N94-16230
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
Emplacement of multiple flow units on very shallow slopes, east Kawelu Planitia flow field, Venus
p 1260 N94-16235
The three ages of Venus: A hypothesis based on the cratering record p 1261 N94-16239
The depths of the largest impact craters on Venus
p 1264 N94-16261
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
Density of impact craters on tessera, Venus
p 1264 N94-16263
A first-order model for impact crater degradation on Venus p 1265 N94-16268
Estimates of lithospheric thickness on Venus
p 1267 N94-16277
Radar properties of several fluidized ejecta blankets on Venus p 1267 N94-16278
Tectonics of Neyterkob corona on Venus
p 1270 N94-16299
Implications of crater distributions on Venus
p 1270 N94-16300
Megaplumes on Venus p 1271 N94-16301
Preliminary analysis of Dione Regio, Venus: The final Magellan regional imaging gap p 1271 N94-16302
The distribution of large volcanoes on Venus as a function of height and altitude p 1271 N94-16303
Structural mapping of Maxwell Montes
p 1271 N94-16304
Global Magellan-image map of Venus at full resolution
p 1274 N94-16319
The cartography of Venus with Magellan data
p 1274 N94-16320
Meander properties of Venusian channels
p 1275 N94-16324
Spectral study of Venus global topography and geoid from Magellan and PVO data p 1276 N94-16332
Sheet flow fields on Venus p 1278 N94-16338
Models of thermal/chemical boundary layer convection: Potential application to Venus p 1279 N94-16348
Resolving topographic detail on Venus by modeling complex Magellan altimetry echoes
p 1283 N94-16368
Large-scale volcanism associated with coronae on Venus p 1285 N94-16376
Tectonic resurfacing of Venus p 1285 N94-16380
Relief of some small landforms on Venus
p 1293 N94-16418

VERBAL COMMUNICATION
Complex information coordination performance: Differential changes in working memory contributions following training
[AD-A267007] p 1132 N94-15762

VERTICAL DISTRIBUTION
Vertical structure models of the 1990 equatorial disturbance on Saturn p 1277 N94-16333
Altitude profile of aerosols on Mars from measurements of its thermal radiation on limb p 1294 N94-16423
Second flight of the Spacelab grille spectrometer during the Atlas-1 mission
[AERONAUTICA-ACTA-A-367-199] p 923 N94-17592
A surface energy budget model modifying heat flow by foliage effects
[AD-A266598] p 1085 N94-17610

VERTICAL MOTION
The free decay of coupled heave and pitch motions of a model frigate
[DRA/TM(AWMH)92340] p 1146 N94-15702

VERTICAL MOTION SIMULATORS
Fidelity assessment of a UH-60A simulation on the NASA Ames vertical motion simulator
[NASA-TM-104016] p 870 N94-15793

VERY LARGE SCALE INTEGRATION
VLSI for high-speed digital signal processing
[AD-A267709] p 1007 N94-14936
NASA Space Engineering Research Center for VLSI System Design
[NASA-CR-194587] p 1008 N94-15547
Fault handling schemes in electronic systems with specific application to radiation tolerance and VLSI design
[NASA-CR-194559] p 1008 N94-15640
Technology transfers and reliable oxides
[AD-A266948] p 1175 N94-15758
Leak detection utilizing analog binaural (VLSI) techniques
[NASA-CASE-NPO-18399-1-CU] p 1014 N94-17323
Fabricating binary optics: An overview of binary optics process technology p 1195 N94-17343
Applications of advanced diffractive optical elements
p 1197 N94-17356
Femtosecond carrier processes in compound semiconductors and real time signal processing
[AD-A268122] p 1005 N94-17519

VERY LONG BASE INTERFEROMETRY
Applications of SLR p 911 N94-15556
Tectonic deformation in southern California
[NASA-CR-194621] p 1101 N94-16021

VESTA ASTEROID
Petrologic constraints on the surface processes on asteroid 4 Vesta and on excavation depths of diogenite fragments p 1241 N94-16208

VESTS
STS-29 crew bailout in WETF
[NASA-TM-109548] p 1136 N94-15385

VIBRATION
Dynamics, stability, and control of maglev systems
[DE93-015163] p 1047 N94-16806
In-situ electron and optical spectroscopies of translational and vibrational activated bond breaking and formation on semiconductors
[AD-A268192] p 1015 N94-17560
Mechanical properties of interfaces and superlattices
[AD-A268591] p 1217 N94-17606

VIBRATION DAMPING
Superconductive material and magnetic field for damping and levitation support and damping of cryogenic instruments
[NASA-CASE-NPO-18458-1-CU] p 1033 N94-15875
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Digital reverberation time measurement system
[AD-D015892] p 1177 N94-16919
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

VIBRATION EFFECTS
Parametric study of a finite element model of the Sidewinder missile
[AD-A267245] p 865 N94-14976

VIBRATION ISOLATORS
A feasibility study of a microgravity enhancement system for Space Station Freedom
[NASA-CR-191550] p 886 N94-15864

VIBRATION MEASUREMENT
Remote tire pressure sensing technique
[NASA-CASE-LAR-14160-1] p 1033 N94-15884

VIBRATION MODE
Parametric study of a finite element model of the Sidewinder missile
[AD-A267245] p 865 N94-14976
A simplistic look at limit stresses from random loading
[NASA-TM-108427] p 1058 N94-15710
Development and comparison of advanced reduced-basis methods for the transient structural analysis of unconstrained structures
[NASA-TM-109015] p 1061 N94-17259

VIBRATION TESTS
Parametric study of a finite element model of the Sidewinder missile
[AD-A267245] p 865 N94-14976

VIBRATIONAL SPECTRA
Molecular processes in comets
[NASA-CR-194148] p 1239 N94-15188
The quantum mass shift of the soliton in Skyrme model
[ITN-93-85219] p 1180 N94-15283

VIBRATORY LOADS
Vibro-acoustic analysis of an aircraft maintenance dock
[AD-A266778] p 871 N94-14908

VIDEO COMMUNICATION
Application of modified VICAR/IBIS GIS to analysis of July 1991 Flevoland AIRSAR data p 1080 N94-16757

VIDEO COMPRESSION
Bandwidth characteristics of multimedia data traffic on a local area network
[NASA-TM-104026] p 883 N94-15648

VIDEO DATA
Massively parallel, adaptive, color image processing for autonomous road following
[AD-A266988] p 864 N94-15498

VIDEO EQUIPMENT
Video applications development platform
[AD-A266966] p 1163 N94-14953

VIDEO SIGNALS
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 1190 N94-15933

VIKING MARS PROGRAM
First US Mars landing
[NASA-TM-109669] p 885 N94-15436

VIKING SPACECRAFT
A mineralized zone in Western Candor Chasma, Mars
p 1248 N94-16179

VINYL POLYMERS
A study of relaxation transitions in the polymers under the influence of magnetic fields
[AD-A263878] p 963 N94-15133
Interpenetrating polymer network acoustic damping material
[AD-D015889] p 969 N94-16916

VIOLENCE
Criminal acts against civil aviation, fiscal year 1992
[AD-A268014] p 863 N94-17586

VIRTUAL REALITY
Future of robotics
[NASA-TM-109592] p 1045 N94-15284
A computer-based training system combining virtual reality and multimedia
[DE93-013768] p 1132 N94-16819

VISCOELASTICITY
On the design of structural components using materials with time-dependent properties
[NASA-TM-108428] p 1059 N94-16519
An analysis of ways of determining the material constants for viscoelastic materials
[IFTR-28/91] p 951 N94-17050
Electrorheological (ER) fluids: A research needs assessment
[AD-A267588] p 951 N94-17210
Damage evolution in filled elastomers
[AD-A268067] p 1062 N94-17507

VISCOPLASTICITY
Finite element analysis of structural engineering problems using a viscoplastic model incorporating two back stresses
[NASA-TM-106046] p 1060 N94-16881

VISCOSITY
Effects of aging time on V205 sol-gel coatings
[AD-A266824] p 965 N94-15843
Physical and chemical properties of some new perfluoropolyalkylether lubricants prepared by direct fluorination
[NASA-TM-106299] p 967 N94-16543
Coefficients for calculating thermodynamic and transport properties of individual species
[NASA-TM-4513] p 1220 N94-17624

VISCOUS DAMPING
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
A mechanical system damping measurement technique using a one-degree-of-freedom (1DOF) cylindrical gas bearing
[AD-A268402] p 1048 N94-17462

VISCOUS FLOW
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 2: User's guide
[NASA-TM-106338-VOL-2] p 1019 N94-15475
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 1: Analysis description
[NASA-TM-106336-VOL-1] p 1019 N94-15485
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 2: User's guide
[NASA-TM-106340-VOL-2] p 1020 N94-15488

Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 3: Programmer's reference
[NASA-TM-106341] p 1022 N94-15865
Proteus two-dimensional Navier-Stokes computer code, version 2.0. Volume 3: Programmer's reference
[NASA-TM-106339] p 1022 N94-15867
Effective elastic thickness of the Venusian lithosphere with lateral viscosity variations in the mantle
p 1293 N94-16421
Proteus three-dimensional Navier-Stokes computer code, version 1.0. Volume 1: Analysis description
[NASA-TM-106337] p 1024 N94-16527
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Process of shaping an electrorheological solid
[AD-D015885] p 1012 N94-16914
An upwind multigrid method for solving viscous flows on unstructured triangular meshes
[NASA-TM-109343] p 1027 N94-17061
Computational aerodynamics with icing effects
[AD-A267509] p 860 N94-17074
Development of iterative techniques for the solution of unsteady compressible viscous flows
[NASA-CR-194657] p 1027 N94-17129
Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222
Multigrid time-accurate integration of Navier-Stokes equations
[NASA-TM-106373] p 1028 N94-17258
Experimental and computational investigation of the NASA low-speed centrifugal compressor flow field
[NASA-TM-4481] p 869 N94-17386

VISCOUS FLUIDS
Stability of flows in fluidized beds
[DE93-000245] p 1024 N94-16763

VISIBILITY
Low Earth orbit constellations: Orbit control or not
p 875 N94-17134
Impact of launching uncertainties on the visibility of communication satellite constellations without orbit control p 889 N94-17135
A comparison of ceiling and visibility observation for NWS manned observation sites and ASOS sites
[AD-A268356] p 1108 N94-17459

VISIBLE SPECTRUM
New K type asteroids p 1241 N94-16195

VISION
Enhancing sight
[NASA-TM-109637] p 1221 N94-15248

VISUAL ACUITY
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820

VISUAL AIDS
Processes involved in the integration of pictures and discourse
[AD-A268150] p 1134 N94-17468

VISUAL CONTROL
Visually guided touching and manual tracking
[TR-412] p 1166 N94-16581

VISUAL PERCEPTION
YARF: An open-ended framework for robot road following
[AD-A266788] p 1163 N94-14910
Enhancing sight
[NASA-TM-109637] p 1221 N94-15248
Cooperativity and 3-D representation
[AD-A267180] p 1131 N94-15694
Reference frames in vision
[AD-A266174] p 1132 N94-16925
Localizing visual function in the brain
[AD-A267381] p 1133 N94-17020
ARPA unmanned ground vehicle stereo vision program at Teleos Research
[AD-A267632] p 1167 N94-17202
Neural basis of motion perception
[AD-A267267] p 1133 N94-17265
The effects of luminance boundaries on color perception
[AD-A268398] p 1133 N94-17397
A virtual acoustic orientation instrument
[AD-A268181] p 1134 N94-17510
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513

VISUAL STIMULI
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513

VISUAL TASKS
Enhancing sight
[NASA-TM-109637] p 1221 N94-15248
Perception of lightness and brightness in complex patterns
[AD-A268435] p 1134 N94-17513

VLASOV EQUATIONS
Linear stability of stationary solutions of the Vlasov-Poisson system in three dimensions
[DE93-013873] p 1174 N94-16820

VOICE COMMUNICATION
Call sign intelligibility improvement using a spatial auditory display
[NASA-TM-104014] p 1177 N94-15549
A study on an experimental communication system using microsatellites p 892 N94-17160
MAGSS-14: Medium Altitude Global Mobile Satellite System with enhanced regional coverage
p 893 N94-17164

VOICE CONTROL
STS-41 VCS training with mission specialist Bruce Melnick and Bill Shepard
[NASA-TM-109513] p 1046 N94-15459

VOID RATIO
Characterization of voids formed during liquid impregnation of nonwoven multifilament glass networks as related to composite processing p 939 N94-16858

VOIDS
Characterization of voids formed during liquid impregnation of nonwoven multifilament glass networks as related to composite processing p 939 N94-16858
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248
Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511

VOLATILITY
On-line gas chromatographic studies of Rutherfordium (element 104), hahnium (element 105), and homologs
[DE93-013890] p 948 N94-16821

VOLCANOES
Ground truth spectrometry and imagery of eruption clouds to maximize utility of satellite imagery
[NASA-CR-194358] p 1081 N94-15181
Magellan: Principal Venus science findings
p 989 N94-15887
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices
p 1248 N94-16178
Pargo Chasma and its relationship to global tectonics
p 1249 N94-16181
Explosive mafic volcanism on Earth and Mars
p 1253 N94-16204
Morphology and models for the evolution of eastern Hecate Chasma, Venus p 1256 N94-16215
Tessera terrain on Venus: Implications of tessera flooding models and boundary characteristics for global distribution and mode of formation p 1258 N94-16226
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5
p 1258 N94-16227
Modes of formation of lunar light plains and the detection of cryptomaria deposits p 1259 N94-16231
Chemical differentiation, thermal evolution, and catastrophic overturn on Venus: Predictions and geologic observations p 1259 N94-16232
Tessera terrain on Venus: Global characterization from Magellan data p 1264 N94-16262
Preliminary analysis of Dione Regio, Venus: The final Magellan regional imaging gap p 1271 N94-16302
The distribution of large volcanoes on Venus as a function of height and altitude p 1271 N94-16303
Large-scale volcanism associated with coronae on Venus p 1285 N94-16376
A decade's overview of Io's volcanic activity
p 1245 N94-16386
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 1104 N94-16396
Relief of some small landforms on Venus
p 1293 N94-16418
The use of TIMS data to estimate the SO2 concentrations of volcanic plumes: A case study at Mount Etna, Sicily p 1065 N94-16608
Volcanic thermal features observed by AVIRIS
p 1068 N94-16680

VOLCANOLOGY
Morphometric comparison of Icelandic lava shield volcanoes versus selected Venusian edifices
p 1248 N94-16178
Pargo Chasma and its relationship to global tectonics
p 1249 N94-16181
The formation and evolution of Alpha and Tellus tesserae on Venus p 1249 N94-16183
Explosive mafic volcanism on Earth and Mars
p 1253 N94-16204
Remote sensing studies of the northeastern portion of the lunar nearside p 1258 N94-16225
Mode of emplacement of lunar mare volcanic deposits: Graben formation due to near surface deformation accompanying dike emplacement at Rima Parry 5
p 1258 N94-16227
Bubble coalescence in magmas p 1103 N94-16237
The history of mare volcanism in the Orientale Basin: Mare deposit ages, compositions and morphologies
p 1269 N94-16289
The rheology and composition of cryovolcanic flows on icy satellites p 1243 N94-16294
Explosive volcanism and the compositions of the cores of differentiated asteroids p 1243 N94-16306
Martian lavas: Three complementary remote sensing techniques to derive flow properties
p 1283 N94-16366
Venusian pancake domes: Insights from terrestrial voluminous silicic lavas and thermal modeling
p 1286 N94-16381
Grain surface features of Apollo 17 orange and black glass p 1289 N94-16397

VOLT-AMPERE CHARACTERISTICS
Polar 2 model of the wake shield experiment
[AD-A266243] p 882 N94-16468

VOLTAGE CONVERTERS (DC TO DC)
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 1010 N94-15874

VOLTERRA EQUATIONS
Numerically solving a transient heat conduction problem with convection and radiation
[AD-A268521] p 1220 N94-17540

VOMITING
Evaluation of putative neurochemical intermediaries in space/motion sickness
[NASA-CR-193607] p 1118 N94-17090

VORTEX BREAKDOWN
The effect of the nose shape and wing location toward the wing vortex breakdown
[AD-A267724] p 855 N94-14942
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966
Experimental study of vortex and aerodynamic characteristics of stack wings with sideslip
[AD-A267722] p 860 N94-17274

VORTEX SHEDDING
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959

VORTICES
Unsteady separated flows: Empirical model and control
[AD-A267282] p 855 N94-14959
The turbulent wall jet
[AD-A267675] p 855 N94-14963
On the receptivity problem for O(1) wavelength Goertler vortices
[NASA-CR-191519] p 1016 N94-15005
Large-Eddy Simulations (LES) of flows and turbulence distribution
[AD-A267182] p 1016 N94-15151
Tollmien-Schlichting/vortex interactions in compressible boundary layer flows
[NASA-CR-191515] p 1017 N94-15183
Large eddy simulation and direct numerical simulation of high speed turbulent reacting flows
[NASA-CR-193131] p 1018 N94-15427
Surface and internal signatures of organized vortex motions in stratified fluid
[AD-A267015] p 1020 N94-15526
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 1: Static water tunnel tests
[NASA-CR-177626-VOL-1] p 855 N94-15655
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 2: Static wind tunnel tests
[NASA-CR-177626-VOL-2] p 856 N94-15677
Aerodynamic control of NASP-type vehicles through vortex manipulation, volume 4
[NASA-CR-177626-VOL-4] p 857 N94-15720
Parametric resonant triad interactions in a free shear layer
[NASA-TM-106365] p 1021 N94-15751
Aerodynamic control of NASP-type vehicles through vortex manipulation. Volume 3: Wing rock experiments
[NASA-CR-177626] p 857 N94-15780
Nuclear rocket plume studies
[AD-A267154] p 925 N94-15837
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Adaptive algorithm for aircraft configuration in turbulent flow
[AD-A266188] p 867 N94-16122
Search for chaos in free shear flows
[AD-A266245] p 1023 N94-16470
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573

Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966
Structure of turbulence in three-dimensional boundary layers
[NASA-CR-194655] p 1027 N94-17130
Transmission of light through a turbulent mixing layer
[AD-A267266] p 1193 N94-17264
Experimental study of vortex and aerodynamic characteristics of stack wings with sideslip
[AD-A267722] p 860 N94-17274
Time dependent turbulence modeling and analytical theories of turbulence
[NASA-TM-106379] p 1029 N94-17385
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609
Study into the limits of an Euler equation method applied to leading-edge vortex flow
[NLR-TP-91350-U] p 1031 N94-17627
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674

VORTICITY
Mesoscale frontogenesis: An analysis of two cold front case studies
[AD-A267950] p 1107 N94-17054
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674

VORTICITY EQUATIONS
Nonlinear gyrofluid models of shear Alfven instabilities in ignited and beam heated toroidal plasmas
[DE93-016235] p 1203 N94-16869

VOYAGER PROJECT
NASA report to education, volume 7
[NASA-TM-109435] p 1247 N94-15419
NASA images 12 --- Voyager encounters
[NASA-TM-109417] p 1247 N94-15511

VOYAGER 1 SPACECRAFT
Voyager encounter highlights
[NASA-TM-109420] p 1246 N94-15239
The 1980 highlights
[NASA-TM-109672] p 1303 N94-15509

VOYAGER 2 SPACECRAFT
Voyager encounter highlights
[NASA-TM-109420] p 1246 N94-15239
Neptune encounter highlights
[NASA-TM-109421] p 1246 N94-15240
Voyager encounters Uranus
[NASA-TM-109619] p 1247 N94-15348
Voyager 2: Neptune encounter
[NASA-TM-109423] p 1247 N94-15491
Mass of Saturn's A ring p 1263 N94-16252

VSAT (NETWORK)
The ACTS propagation program p 995 N94-16039
NASA Lewis Meshed VSAT Workshop meeting summary
[NASA-TM-106332] p 883 N94-17487
On-board packet switch architectures for communication satellites
[NASA-TM-106326] p 883 N94-17488

W

WAFERS
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device deployment
[AD-A267561] p 1213 N94-17108

WAKES
Receptivity of boundary layers to convected gusts
[AD-A267206] p 1022 N94-15860
Search for chaos in free shear flows
[AD-A266245] p 1023 N94-16470

WALL FLOW
On the receptivity problem for 0(1) wavelength Goertler vortices
[NASA-CR-191519] p 1016 N94-15005
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
Determination of the effect of the walls of a wind-tunnel from the parameters of flow near them
[RAE-UB-TRANS-2201] p 859 N94-16583
Transition induced by fixed and freely convecting spherical particles in laminar boundary layers
[AD-A267757] p 1028 N94-17276
Active turbulence control in wall bounded flows using direct numerical simulation
[AD-A267261] p 1028 N94-17286

WALL JETS
The turbulent wall jet
[AD-A267675] p 855 N94-14963

WALL PRESSURE
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
An experimental study of fluctuating wall pressures in a highly swept, sharp fin-induced, Mach 5 shock wave/turbulent boundary layer interaction
[AD-A268394] p 861 N94-17461

WALL TEMPERATURE
Description of cooling water calorimetry and wall thermometry diagnostic at tokamak ASDEX-Upgrade
[IPP-5/46] p 1200 N94-14966

WALLS
Experimental investigations into the deflagration to detonation transition at TNO/PML
[AD-A266753] p 1021 N94-15755

WARFARE
Sleep management user's guide for special operations personnel
[AD-A267746] p 1119 N94-14943
An information processing classification of beyond-visual-range air intercepts
[AD-A266927] p 1131 N94-15108
Not ready for the first space war. What about the second?
[AD-A266557] p 1174 N94-16665

WARNING SYSTEMS
Test plan for the evaluation of the initial capability of the National Satellite Test Bed: Phase 1D
[DOT/FAA/RD-93/20] p 876 N94-16025
The use of the Air Force Academy high wind alert system in forecasting moderate intensity wind events for military bases in the Colorado Springs area
[AD-A267648] p 1107 N94-17245

WASTE DISPOSAL
Nuclear rocket plume studies
[AD-A267154] p 925 N94-15837
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766

WASTE WATER
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687

WATER
STS-29 crew bailout in WETF
[NASA-TM-109548] p 1136 N94-15385
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
Global Energy and Water Cycle Experiment (GEWEX) and the Continental-scale International Project (GCIP) p 994 N94-15918
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077
Contained liquids in microgravity, part 2 p 979 N94-16085
A mineralized zone in Western Candor Chasma, Mars p 1248 N94-16179
Evolutionary implications of a steady-state water abundance on Venus p 1254 N94-16206
Experimental constraints on CO2 and H2O in the Martian mantle and primary magmas p 1262 N94-16248
Catalytic crystallization of ices by small silicate smokes at temperatures less than 20K p 1219 N94-16420
Water adsorption on diamond (110) studied by multiple internal reflection infrared spectroscopy
[AD-A266415] p 948 N94-16553
Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936
Natural convection above a horizontal heat source
[AD-A267212] p 1026 N94-16985
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
The standardized precipitation index and its use in the western contiguous United States
[AD-A267547] p 1107 N94-17102
Strategy for the reduction of total integrated fluid logistics to the Space Station Freedom
[NASA-TM-107744] p 1138 N94-17452
Continuum solvent models for computational chemistry
[DE93-016329] p 953 N94-17660

WATER BALANCE
Research into the influence of spatial variability and scale on the parameterization of hydrological processes
[NASA-CR-194610] p 1082 N94-16026
Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029
Heterogeneity and scaling land-atmospheric water and energy fluxes in climate systems p 1083 N94-16030
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032
Effects of spatial variability and scale on areal -average evapotranspiration p 1084 N94-16033
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034

WATER CIRCULATION
Meridional circulation in the tropical north atlantic
[AD-A268222] p 1114 N94-17555

WATER COLOR
Coastal zone color scanner: Nimbus 7
[NASA-TM-109590] p 1111 N94-15281
SeaWiFS technical report series. Volume 12, SeaWiFS technical report series cumulative index: Volumes 1-11
[NASA-TM-104566-VOL-12] p 1111 N94-15529
Optical properties of the Red Sea
[AD-A266466] p 1113 N94-16588

WATER CONSUMPTION
Optimization of two-stage hot water exchange points p 1029 N94-17440

WATER DEPTH
Water-levels fluctuations in a borehole at the Royal Observatory of Belgium: Effects on local gravity, Earth tidal, and barometric responses p 1100 N94-15812

WATER EROSION
Sedimentation, volcanism, and ancestral lakes in the Valles Marineris: Clues from topography p 1283 N94-16369

WATER FLOW
Boundary layer flow of air over water on a flat plate
[NASA-CR-191517] p 1019 N94-15479
A detailed model for simulation of catchment scale subsurface hydrologic processes
[PAPER-92WR02333] p 1084 N94-16032

WATER HEATING
Numerical modelling of an active direct nonpotable hot water heating system making use of the energy of solar radiation
[IFTR-38/1991] p 1093 N94-17070
Optimization of two-stage hot water exchange points p 1029 N94-17440

WATER LANDING
STS-32 bailout training in WETF
[NASA-TM-109476] p 1136 N94-15383

WATER QUALITY
Multiple dataset water-quality analyses in the vicinity of an ocean wastewater plume p 1069 N94-16687
A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426

WATER RUNOFF
On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027
Similarity and scale in catchment storm response
[PAPER-89RG01615] p 1083 N94-16028
Evapotranspiration and runoff from large land areas: Land surface hydrology for atmospheric general circulation models p 1083 N94-16029
Scaling, soil moisture and evapotranspiration in runoff models p 1084 N94-16034

WATER TABLES
Water-levels fluctuations in a borehole at the Royal Observatory of Belgium: Effects on local gravity, Earth tidal, and barometric responses p 1100 N94-15812
Evaluation of a distributed catchment scale water balance model
[PAPER-93WR00398] p 1083 N94-16031

WATER TEMPERATURE
Temperature measurements p 1037 N94-15804
Efficacy of flocculating and other emergency water purification tablets
[AD-A266695] p 1148 N94-15840
Optimization of two-stage hot water exchange points p 1029 N94-17440

WATER TREATMENT
Plant research
[NASA-TM-109664] p 1116 N94-15235
Efficacy of flocculating and other emergency water purification tablets
[AD-A266695] p 1148 N94-15840

WATER TUNNEL TESTS
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 1: Static water tunnel tests
[NASA-CR-177626-VOL-1] p 855 N94-15655

Aerodynamic control of NASP-type vehicles through vortex manipulation. Volume 3: Wing rock experiments
[NASA-CR-177626] p 857 N94-15780

WATER VAPOR

Corrosion kinetics and mechanisms for nuclear grade graphites
[DE93-015462] p 947 N94-16105

Trapping of water vapor from an atmosphere by condensed silicate matter formed by high-temperature pulse vaporization p 1248 N94-16180

Possible sources of H2 to H2O enrichment at evaporation of parent chondritic material
p 1244 N94-16377

A linear spectral matching technique for retrieving equivalent water thickness and biochemical constituents of green vegetation p 1068 N94-16678

Separation of cirrus cloud from clear surface from AVIRIS data using the 1.38 micron water vapor band
p 1072 N94-16699

Discussion of band selection and methodologies for the estimation of precipitable water vapour from AVIRIS data p 1074 N94-16707

Empirical relationships among atmospheric variables from rawinsonde and field data as surrogates for AVIRIS measurements: Estimation of regional land surface evapotranspiration p 1074 N94-16712

Optical properties of water released in low Earth orbit
[AD-A266197] p 1192 N94-16936

Atmospheric propagation analysis program
[AD-A268231] p 1006 N94-17565

An analysis of simulated and actual DMSP SSM/T-2 brightness temperatures
[AD-A268103] p 1109 N94-17573

An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595

WATER WAVES

Arctic internal waves (CEAREX)
[AD-A265822] p 1111 N94-15139

Ocean wave study
[NASA-TM-109620] p 1111 N94-15349

Ventilated oscillatory boundary layers
[AD-A266226] p 1023 N94-16110

Observations and modelling of winds and waves during the Surface Wave Dynamics Experiment. Report 1: Intensive observation period IOP-1, 20-31 October 1990
[AD-A266384] p 1113 N94-16517

Field observations of infragravity, sea and swell directional spectra
[AD-A266439] p 1113 N94-16561

Preliminary estimates of frequency-direction spectra derived from the SAMSON pressure gage array, November 1990 to May 1991
[AD-A267960] p 1114 N94-17497

Measurement of the velocity field and void fraction in a planar plunging jet
[AD-A268183] p 1030 N94-17511

WATERSHEDS

On hydrologic similarity: A dimensionless flood frequency model using a generalized geomorphologic unit hydrograph and partial area runoff generation
[PAPER-89WR01579] p 1083 N94-16027

Effects of spatial variability and scale on areal -average evapotranspiration p 1084 N94-16033

A Geographic Information System approach to modeling nutrient and sediment transport
[DE93-013747] p 1097 N94-17426

WAVE ATTENUATION

Optical attenuation mechanism upgrades, MOBLAS, and TLRS systems p 922 N94-15622

WAVE DIFFRACTION

Diffraction of microwaves at rectangular facades of buildings with and without ground reflections (Fresnel-Kirchhoff-Approximation)
[DLR-FB-92-35] p 987 N94-15155

The exact solution of the problem of diffraction of an electromagnetic plane wave by a conductive half-plane situated at an interface
[IFTR-3/91] p 1002 N94-17057

Two-dimensional acousto-optical interaction theory and experimental analysis
[AD-A267761] p 1193 N94-17254

Review of rigorous coupled-wave analysis and of homogeneous effective medium approximations for high spatial-frequency surface-relief gratings
p 1194 N94-17335

WAVE DISPERSION

Nonlinear acoustics: Periodic waveguide, scattering of sound by sound, three-layer fluid, finite amplitude sound in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A267145] p 1177 N94-15732

Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978

WAVE EQUATIONS

Soliton-like structures in double stimulated Brillouin scattering p 1200 N94-15207

Nonlinear problems in fluid dynamics and inverse scattering
[AD-A266234] p 1026 N94-16927

Elastic waves in discretely continuous mechanical systems
[IFTR-21/1992] p 1061 N94-17091

Two-dimensional acousto-optical interaction theory and experimental analysis
[AD-A267761] p 1193 N94-17254

WAVE FRONTS

Fabrication techniques for very fast diffractive lenses
p 1196 N94-17345

Test methods for acceptance testing of telescopes
[AD-A268316] p 1237 N94-17568

WAVE FUNCTIONS

Supersymmetry of gauge equations and geometric nonadiabatic phases
[DE93-626671] p 1219 N94-14935

The fractional quantum Hall effect and the rotation group
[DE93-010348] p 1207 N94-15972

Quark-loop effects in high energy spin-flip processes
[DE93-626692] p 1188 N94-17313

Continuum solvent models for computational chemistry
[DE93-016329] p 953 N94-17660

WAVE GENERATION

Field observations of infragravity, sea and swell directional spectra
[AD-A266439] p 1113 N94-16561

WAVE INTERACTION

Current drive with free electron lasers in high and low temperature tokamaks p 1201 N94-15209

On the decay of a dipole pump wave to half-harmonics p 1201 N94-15211

Investigate wave-mean flow interaction and transport in the extratropical winter stratosphere
[NASA-CR-194555] p 1098 N94-15639

The exact solution of the problem of diffraction of an electromagnetic plane wave by a conductive half-plane situated at an interface
[IFTR-3/91] p 1002 N94-17057

An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221

WAVE PROPAGATION

Dynamic behavior of fiber and particle reinforced composites
[AD-A266905] p 930 N94-15143

Improvement of SLR accuracy, a possible new step
p 917 N94-15588

Pulse propagation in inhomogeneous optical waveguides
[DE93-013378] p 1191 N94-16007

Proceedings of the Fifteenth NASA Propagation Experimenters Meeting (NAPEX 15) and the Advanced Communications Technology Satellite (ACTS) Propagation Studies Miniworkshop
[NASA-CR-194539] p 994 N94-16035

A review of OPEX activities and measurement results
p 994 N94-16036

Propagation measurements in Alaska using ACTS beacons p 995 N94-16040

Planned LMSS propagation experiment using ACTS: Preliminary antenna pointing results during mobile operations p 995 N94-16041

Propagation-related AMT design aspects and supporting experiments p 995 N94-16042

A comparison of cloud attenuation models using measured cloud data p 996 N94-16044

Comparison of OLYMPUS beacon and radiometric attenuation measurements at Blacksburg, Virginia
p 996 N94-16046

Satellite sound broadcast propagation measurements
p 996 N94-16047

An overview of the text propagation effects for land-mobile-satellite systems: Experimental and modeling results p 996 N94-16048

Database for propagation models p 996 N94-16049

A CCIR-based prediction model for Earth-Space propagation p 997 N94-16050

A study of land mobile satellite service multipath effects using SATLAB software p 997 N94-16051

NORSAR basic seismological research
[AD-A266193] p 1101 N94-16125

Acousto-optical confirmation of the localized wave phenomena
[DE93-016425] p 1177 N94-16448

A ray trace model for propagation loss
[AD-A266314] p 997 N94-16467

Surface waves in an inhomogeneous, isotropic, elastic half-space
[IFTR-18/1991] p 1060 N94-17047

Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248

A search for evidence of nonlinear elasticity in the earth
[DE93-015279] p 1102 N94-17252

WAVE REFLECTION

Diffraction of microwaves at rectangular facades of buildings with and without ground reflections (Fresnel-Kirchhoff-Approximation)
[DLR-FB-92-35] p 987 N94-15155

Nonlinear acoustics: Periodic waveguide, scattering of sound by sound, three-layer fluid, finite amplitude sound in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A267145] p 1177 N94-15732

Regular and irregular reflection of a wave from a slanting flat wall
[IFTR-13/1991] p 1193 N94-17049

Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222

WAVE SCATTERING

Double stimulated Brillouin scattering
p 1200 N94-15205

Dynamics of douple stimulated Brillouin scattering
p 1200 N94-15206

Soliton-like structures in double stimulated Brillouin scattering p 1200 N94-15207

Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772

Spectral inverse scattering theory for dielectric media: Application to optical devices
[AD-A268635] p 1199 N94-17427

WAVE-PARTICLE INTERACTIONS

Simulations of wave-particle interactions in stimulated Raman forward scattering in a magnetized plasma
[TKK-F-A704] p 1201 N94-15210

WAVEFORMS

High resolution radar profiling using higher-order statistics
[AD-D015891] p 1000 N94-16918

An asymptotic expansion of an electromagnetic field in the velocity of a caustic in the form of simple waves
[IFTR-14/1991] p 1002 N94-17048

WAVEGUIDE ANTENNAS

Experimental evaluation of an adaptive focusing algorithm for a microwave planar phased-array hyperthermia system at UCSF
[AD-A267004] p 1121 N94-15634

WAVEGUIDES

Gratings and waveguides p 1226 N94-14987

Nonlinear acoustics: Periodic waveguide, scattering of sound by sound, three-layer fluid, finite amplitude sound in a medium having a distribution of relaxation processes, and production of an isolated negative pulse in water
[AD-A267145] p 1177 N94-15732

Stress sensitivity of dielectric resonators
[AD-A266767] p 1009 N94-15825

WAVELENGTHS

Alternative wavelengths for laser ranging
p 913 N94-15564

Optimum wavelengths for two color ranging
p 915 N94-15580

WAVELET ANALYSIS

Adaptive wavelet collocation methods for initial value boundary problems of nonlinear PDE's
[NASA-CR-191507] p 1169 N94-15833

Nonlinear problems in fluid dynamics and inverse scattering
[AD-A266234] p 1026 N94-16927

Applications of the phi-transform
[AD-A266247] p 1170 N94-16940

Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950

Diffractive optical elements for generating arbitrary line foci p 1195 N94-17338

WEAK ENERGY INTERACTIONS

A high sensitivity search for CP violating rare K(sub L) decays and precision measurement of the direct CP violation parameter (epsilon)(prime)/(epsilon) via the four K (yields) 2(pi) decay modes
[DE93-016866] p 1184 N94-16899

Existence of a new instanton in constrained Yang-Mills-Higgs theory
[NIKHEF-H/93-02] p 1186 N94-17601

Properties of nuclei in astrophysical environments: Binding energies, weak-interaction rates
[MPA-706] p 1240 N94-17628

WEAK INTERACTIONS (FIELD THEORY)

Electroweak physics from D0
[DE93-015041] p 1181 N94-16053

Theoretical high energy physics research at the University of Chicago
[DE93-016863] p 1187 N94-16116
Electroweak results from D0
[DE93-014926] p 1185 N94-16968

WEAPON SYSTEMS
Army P/M research and development overview
[AD-A266921] p 954 N94-15104
RAMCAD design methodology
[AD-A267010] p 1145 N94-15525
Infrared spot tracker
[AD-D015778] p 1191 N94-16547
Preliminary validation of the task analysis/workload methodology
[AD-A267514] p 1138 N94-17077

WEAR
The friction and wear of ceramic/ceramic and ceramic/metal combinations in sliding contact
[NASA-TM-106348] p 930 N94-15769
Ion implantation effects on surface-mechanical properties of metals and polymers
[DE93-014661] p 958 N94-16453
Atomic-scale friction measurements using friction force microscopy. Part 1: General principles and new measurement techniques
[AD-A268391] p 1048 N94-17533
Continuing research on friction and wear of materials
[AD-A268291] p 1049 N94-17566

WEAR RESISTANCE
Vacuum plasma spraying p 975 N94-16002
Wear resistant titanium material development
[AD-A266474] p 959 N94-16780
Application of hard coatings to substrates at low temperatures
[NASA-CR-193867] p 971 N94-17122

WEAR TESTS
Wear resistant titanium material development
[AD-A266474] p 959 N94-16780

WEATHER
Venus lightning
[NASA-TM-109644] p 1105 N94-15430
Boundary layer structure over areas of heterogeneous heat fluxes
[DE93-010657] p 1110 N94-17673

WEATHER FORECASTING
Mesoscale modeling of the atmosphere
[AD-A263236] p 1098 N94-15132
Short term weather forecasting in real time in a base weather station setting
[AD-A266872] p 1105 N94-15142
The Next Generation Weather Radar (NEXRAD)/Air Route Surveillance Radar (ARSR) operational comparison
[REPT-93W0000145] p 987 N94-15439
Radar diagnostic parameters as indicators of severe weather in central Florida
[PB93-183507] p 1106 N94-16465
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568
A snow wetness retrieval algorithm for SAR
p 1075 N94-16732
The standardized precipitation index and its use in the western contiguous United States
[AD-A267547] p 1107 N94-17102
Solar Electro-Optical Network (SEON) upgrade/replacement program. Phase 1: Qualification operational test and evaluation plan
[AD-A266364] p 1237 N94-17225
Developing automated analysis methods for sea ice imagery: A status report with recommendations
[AD-A267284] p 1113 N94-17241
The use of the Air Force Academy high wind alert system in forecasting moderate intensity wind events for military bases in the Colorado Springs area
[AD-A267648] p 1107 N94-17245
Nowcasting methods for satellite imagery
[AD-A267294] p 1108 N94-17267
Propagation characteristics of mesoscale convective systems
[AD-A268130] p 1109 N94-17522
Micro- and meso-scale simulations of magnetospheric processes related to the aurora and substorm morphology
[NASA-CR-193437] p 1102 N94-17527

WEATHER STATIONS
Short term weather forecasting in real time in a base weather station setting
[AD-A266872] p 1105 N94-15142
TAFVER 2 users manual
[AD-A266850] p 1106 N94-15757
The multivariate optimum interpolation analysis of meteorological data at the Fleet Numerical Oceanography Center
[AD-A266459] p 1106 N94-16568

WEATHERING
Spectral evidence of size dependent space weathering processes on asteroid surfaces p 1241 N94-16174
Variations in the Fe mineralogy of bright Martian soil
p 1295 N94-16431
Lithological and textural controls on radar and diurnal thermal signatures of weathered volcanic deposits, Lunar Crater region, Nevada p 1080 N94-16762

WEAVING
Processing, properties and applications of composites using powder-coated epoxy towpreg technology
p 933 N94-15277
Research in textile composites at KU, Leuven
p 937 N94-16848
Weaving multi-layer fabrics for reinforcement of engineering components p 937 N94-16850

WEDGE FLOW
On the interaction between the shock wave attached to a wedge and freestream disturbances
[NASA-CR-191528] p 1019 N94-15478

WEDGES
Translating wedge heat sink
[AD-D015814] p 1011 N94-16488

WEIBULL DENSITY FUNCTIONS
Weibull analysis applied to the pull adhesion test and fracture of a metal-ceramic interface
[DE93-012913] p 1059 N94-15997

WEIGHTING FUNCTIONS
Adaptive beamforming with imperfect arrays: Pattern effects and their partial correction
[AD-A267079] p 987 N94-15541
Nonparametric statistics: Weighted rankings analysis
[AD-A266607] p 1173 N94-16657

WEIGHTLESSNESS
Movement in microgravity
[NASA-TM-109526] p 881 N94-15389

WEIGHTLESSNESS SIMULATION
STS-35 Crew training: Bailout in CCT, firefighting, TAGS class and bailout in WFTF
[NASA-TM-109489] p 1135 N94-15195
STS-26 IUS and latch contingency training
[NASA-TM-109561] p 875 N94-15331
STS-34 Chang-Diaz and E. Baker during Galileo contingency training in WFTF
[NASA-TM-109466] p 1135 N94-15361
STS-32 LDEF EVA training in WETF with Low and Dunbar
[NASA-TM-109473] p 1135 N94-15377
STS-32 crew training for lower body negative pressure unit and AFE
[NASA-TM-109475] p 1120 N94-15381
STS-33 Carter and Thorton during WETF activities
[NASA-TM-109471] p 1136 N94-15402
STS-31 Hubble space telescope contingency training in WETF with McCandless and Sullivan
[NASA-TM-109480] p 1136 N94-15441
STS-31 crew training inflight maintenance and bailout exercises in CCT and WFTF
[NASA-TM-109483] p 876 N94-15450
Richards, Dick: Training clip
[NASA-TM-109503] p 876 N94-15467

WELD STRENGTH
The Marshall Automated Weld System (MAWS)
[TABES PAPER 93-602] p 1049 N94-16138

WELD TESTS
The Marshall Automated Weld System (MAWS)
[TABES PAPER 93-602] p 1049 N94-16138

WELDED JOINTS
Use of photostress and strain gages to analyze behavior of weldments and use of photostress and strain gages to analyze behavior of an aft skirt test specimen
[NASA-CR-194575] p 1058 N94-15716
The effect of aging at 343 C on the mechanical properties and microstructure of type 308 stainless steel weldments
[DE93-015454] p 957 N94-16103
The Marshall Automated Weld System (MAWS)
[TABES PAPER 93-602] p 1049 N94-16138
Adaptive weld control for high-integrity welding applications
[TABES PAPER 93-604] p 1049 N94-16140

WELDING
Krupp technical reports no. 2, English edition, October 1992
[ETN-93-94631] p 984 N94-16000
Expert system for welding engineering
p 984 N94-16003

WELDING MACHINES
Welding nozzle position manipulator
[NASA-CASE-MFS-29837-1] p 1047 N94-15882

WENTZEL-KRAMER-BRILLOUIN METHOD
The three-dimensional ray trajectories of the WKB optical fiber modes
[AD-A267167] p 1189 N94-15739

WETLANDS
Characterization of wetland, forest, and agricultural ecosystems in Belize with airborne radar (AIRSAR)
p 1076 N94-16738

WETTING
Separation behaviour of monotectic alloys
p 945 N94-15170

WHISKER COMPOSITES
The influence of microstructure on the mechanical behavior of silicon nitride ceramics
[DE93-015363] p 966 N94-16018
Interface chemistry in ceramic matrix composites
[AD-A268629] p 973 N94-17466

WHISPERING GALLERY MODES
Full-wave simulation of the thumbtack laser
[DE93-015110] p 1039 N94-16054

WHITE NOISE
Analysis of temporal symmetry in non-gaussian random fields
[AD-A266496] p 999 N94-16794
High order nonlinear estimation with signal processing applications
[AD-A268407] p 1005 N94-17463

WIND (METEOROLOGY)
The use of the Air Force Academy high wind alert system in forecasting moderate intensity wind events for military bases in the Colorado Springs area
[AD-A267648] p 1107 N94-17245
Boundary layer structure over areas of heterogeneous heat fluxes
[DE93-010657] p 1110 N94-17673

WIND DIRECTION
Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137
Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
Analysis of TIMS performance subjected to simulated wind blast p 1063 N94-16598

WIND EFFECTS
Sand transport on Mars: Preliminary results from models p 1252 N94-16198
Dust-dynamic feedbacks in the Martian atmosphere: Surface dust lifting p 1296 N94-16434
Detecting surface roughness effects on the atmospheric boundary layer via AIRSAR data: A field experiment in Death Valley, California p 1078 N94-16747

WIND MEASUREMENT
Observations and modelling of winds and waves during the Surface Wave Dynamics Experiment. Report 1: Intensive observation period IOP-1, 20-31 October 1990
[AD-A266384] p 1113 N94-16517
EOS Laser Atmosphere Wind Sounder (LAWS) investigation
[NASA-CR-193445] p 1109 N94-17525

WIND PROFILES
Investigate wave-mean flow interaction and transport in the extratropical winter stratosphere
[NASA-CR-194555] p 1098 N94-15639

WIND SHEAR
Windshear radar calibration, 1992 flights: Transmitter power and receiver gain stability
[NASA-TM-108997] p 986 N94-15140
Wind shear and heavy rain --- effects on flight stability
[NASA-TM-109453] p 1105 N94-15326
Windshear detection radar signal processing studies
[NASA-CR-194615] p 994 N94-16022
Windshear database for forward-looking systems certification
[NASA-TM-109012] p 1108 N94-17283

WIND TUNNEL APPARATUS
Monopiece strain gauge sting mounted wind tunnel balance
[CA-PATENT-1-311-626] p 1032 N94-15697
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819

WIND TUNNEL MODELS
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847

WIND TUNNEL NOZZLES
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847

WIND TUNNEL TESTS
An uncertainty analysis of inlet dynamic flow distortion using an analog/digital hybrid editing system
[AD-A266924] p 855 N94-15105
Rotorcraft research
[NASA-TM-109452] p 871 N94-15325
Spacework 16 --- Simulated Space Shuttle Program
[NASA-TM-109436] p 1221 N94-15420

A software interface for the ARL wind tunnel data acquisition system
[AD-A267114] p 1146 N94-15650
Aerodynamic control of NASP-type vehicles through Vortex manipulation. Volume 2: Static wind tunnel tests
[NASA-CR-177626-VOL-2] p 856 N94-15677
Wind tunnel investigation of three axisymmetric cowls of different lengths at Mach numbers from 0.60 to 0.92
[NASA-TM-4488] p 856 N94-15681
Physical properties of the benchmark models program supercritical wing
[NASA-TM-4457] p 866 N94-15722
Aerodynamic control of NASP-type vehicles through vortex manipulation. Volume 3: Wing rock experiments
[NASA-CR-177626] p 857 N94-15780
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
NASA Lewis 9- by 15-foot low-speed wind tunnel user manual
[NASA-TM-106247] p 872 N94-15819
Wind tunnel investigation with an operational turbojet engine
[TABES PAPER 93-662] p 870 N94-16157
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line
[NASA-TP-3359] p 859 N94-16574
Determining the effect of endwall boundary layer suction in a large scale subsonic compressor cascade
[AD-A267208] p 859 N94-16913
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
Subsonic aerodynamic characteristics of the HL-20 lifting-body configuration
[NASA-TM-4515] p 861 N94-17284
User's manual for the Langley Research Center 14- by 22- foot subsonic tunnel static data acquisition system
[NASA-TM-109027] p 861 N94-17639

WIND TUNNEL WALLS
Wall interference and boundary simulation in a transonic wind tunnel with a discretely slotted test section
[NASA-TP-3334] p 872 N94-15794
Determination of the effect of the walls of a wind-tunnel from the parameters of flow near them
[RAE-LIB-TRANS-2201] p 859 N94-16583

WIND TUNNELS
Spacework 16 --- Simulated Space Shuttle Program
[NASA-TM-109436] p 1221 N94-15420
Unitary plan wind tunnel landmark dedication and revitalization
[NASA-TM-109649] p 1302 N94-15434
Determination of the effect of the walls of a wind-tunnel from the parameters of flow near them
[RAE-LIB-TRANS-2201] p 859 N94-16583

WIND TURBINES
DOE/NREL Advanced Wind Turbine Development Program
[DE93-010028] p 1093 N94-17668

WIND VELOCITY
Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137
Complex terrain wind model evaluation
[AD-A266467] p 1096 N94-16589
Analysis of TIMS performance subjected to simulated wind blast p 1063 N94-16598
The use of the Air Force Academy high wind alert system in forecasting moderate intensity wind events for military bases in the Colorado Springs area
[AD-A267648] p 1107 N94-17245
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247
On predicting the person-in-water drift for search and rescue
[AD-A268083] p 1055 N94-17514

WINDOWS (COMPUTER PROGRAMS)
Upgrading NASA/DOSE laser ranging system control computers p 918 N94-15595
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
Radar Analysis and Visualization Environment (RAVEN): Software for polarimetric radar analysis p 1080 N94-16758

WINDPOWER UTILIZATION
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508
DOE/NREL Advanced Wind Turbine Development Program
[DE93-010028] p 1093 N94-17668

WINDSHIELDS
Comparative night vision goggle visual acuity measurements performed in the A-10 aircraft in an operational setting
[AD-A266721] p 1137 N94-15820
Definitions of terms relating to aircraft windscreens, canopies, and transparencies
[AD-A268403] p 868 N94-17425

WING CAMBER
Mission adaptive wing
[NASA-TM-109448] p 865 N94-15321

WING NACELLE CONFIGURATIONS
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260

WING PLANFORMS
Static aeroelastic response of an aircraft with asymmetric wing planforms representative of combat damage
[AD-A266890] p 865 N94-14951
Experimental study of vortex and aerodynamic characteristics of stack wings with sideslip
[AD-A267722] p 860 N94-17274

WING PROFILES
Mission adaptive wing
[NASA-TM-109448] p 865 N94-15321

WING SLOTS
Fluid flow and heat convection studies for actively cooled airframes
[NASA-CR-194624] p 1024 N94-16491

WINGS
Better airplane wings
[NASA-TM-109446] p 933 N94-15345
Wind-tunnel investigation of aerodynamic efficiency of three planar elliptical wings with curvature of quarter-chord line
[NASA-TP-3359] p 859 N94-16574
Adaptive Navier-Stokes calculations for vortical flow
[AD-A266236] p 1026 N94-16966
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
Experimental study of vortex and aerodynamic characteristics of stack wings with sideslip
[AD-A267722] p 860 N94-17274

WINTER
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247

WIRELESS COMMUNICATION
Infra Link: A data transmission system for microgravity research p 980 N94-16091

WIRING
Operation of digital systems in severe electromagnetic environments
[AD-A267176] p 988 N94-15693

WOLF-RAYET STARS
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533

WOOD
Biomass energy: State of the technology present obstacles and future potential
[DE93-016295] p 1092 N94-16766
Automated image analysis method for the detection of cracks on wood surface
[VTT-JULK-755] p 1056 N94-17542

WORDS (LANGUAGE)
Discovering sequence similarity by the algorithmic significance method
[DE93-015556] p 1150 N94-16659

WORK FUNCTIONS
High voltage conductors in spacecraft
[AD-A267268] p 897 N94-17266

WORK HARDENING
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764

WORKING FLUIDS
Geometrical vapor blocker for parallel condensation tubes requiring cooling
[NASA-CASE-MSC-22090-1] p 1022 N94-15962

WORKLOADS (PSYCHOPHYSIOLOGY)
Preliminary validation of the task analysis/workload methodology
[AD-A267514] p 1138 N94-17077
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551

WORKSTATIONS
HP upgrade operational streamlining p 918 N94-15596
Lunar laser ranging data processing in a Unix/X windows environment p 918 N94-15599
Distributed computing feasibility in a non-dedicated homogeneous distributed system
[NASA-CR-191532] p 1149 N94-15989
Ergonomics in the office environment p 1124 N94-16612
Networked workstations and parallel processing utilizing functional languages
[AD-A267464] p 1160 N94-17034

WOUND HEALING
Wound healing after laser injury to skin: The effect of occlusion and vitamin E
[AD-A266473] p 1128 N94-16779

WOVEN COMPOSITES
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
Processing, properties and applications of composites using powder-coated epoxy towpreg technology p 933 N94-15277
Carbon-carbon grid for ion engines
[NASA-CASE-NPO-19174-1-CU] p 925 N94-15876
FIBER-TEX 1992: The Sixth Conference on Advanced Engineering Fibers and Textile Structures for Composites
[NASA-CP-3211] p 936 N94-16845
Research in textile composites at KU, Leuven p 937 N94-16848
Weaving multi-layer fabrics for reinforcement of engineering components p 937 N94-16850
Effect of tow alignment on the mechanical performance of 3D woven textile composites p 937 N94-16851
An engineering approach for the application of textile composites to a structural component p 938 N94-16852
New textile composite materials development, production, application p 938 N94-16853
Quantification of processing artifacts in textile composites p 939 N94-16860
Stochastic damage evolution in textile laminates p 939 N94-16861
Three-dimensional analysis of anisotropic spatially reinforced structures p 939 N94-16863

WROUGHT ALLOYS
The effect of oxygen, grain size, and strain rate on the mechanical behavior of forged P/M tantalum
[DE93-011251] p 959 N94-16764

X

X RAY ABSORPTION
In situ studies of passive film chemistry using x ray absorption spectroscopy
[DE93-014023] p 947 N94-16011

X RAY ANALYSIS
Solution behaviour in microgravity: Considerations for protein crystal growth p 982 N94-16102
X ray computed tomography for failure analysis investigations
[AD-A268086] p 1055 N94-17515
X ray computed tomography for geometry acquisition
[AD-A268085] p 1157 N94-17590
X ray computed tomography for casting demonstration
[AD-A268084] p 1056 N94-17596

X RAY ASTRONOMY
X ray microcalorimeters: Principles and performance p 899 N94-15027
A new approach to optical photon detection p 899 N94-15028
The imaging microstrip proportional counter: Features of a practical design p 900 N94-15030
Development of x ray CCDs p 900 N94-15033
The XMM pn-CCD detector system: First results p 900 N94-15034
The development of back-illuminated CCD's for XMM p 900 N94-15035
Microchannel plate detectors for space astronomy p 901 N94-15038
Prospects for high pressure imaging gas scintillation drift chambers p 901 N94-15040
Outlook for hard x ray and gamma ray astronomy p 904 N94-15057
The high pressure gas scintillation proportional counter for SAX p 906 N94-15076

X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
ROSAT-IUE observations of symbiotic stars. The x ray morphology of high latitude associations
[NASA-CR-194616] p 1236 N94-16492
Participation in the north ecliptic pole sky survey
[NASA-CR-191933] p 1059 N94-16815
The formation process of the He I lambda 10830 line in cool giant stars
[NASA-CR-194648] p 1240 N94-17094

X RAY DETECTORS
Outlook for hard x ray and gamma ray astronomy p 904 N94-15057
Developments in extreme ultraviolet and x ray instrumentation p 904 N94-15058
A new detector concept for energetic auroral x ray imaging p 907 N94-15081
A multilayered approach to superconducting tunnel junction x ray detectors p 908 N94-15089
Applications for large area silicon drift detectors on x ray and gamma ray astronomy p 909 N94-15090
Silicon radiation sensor systems for gamma and x ray detection at SI p 909 N94-15095
The epitaxial Si x ray bolometer an alternative to ion implanted devices p 911 N94-15103

X RAY DIFFRACTION
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Interfacial structure of lattice mismatched bcc(110)/bcc(110) transition metal superlattices
[DE93-015162] p 1208 N94-16058
Thermal stress effects in intermetallic matrix composites
[NASA-CR-191191] p 1054 N94-16518
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282

X RAY FLUORESCENCE
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
Complex QSO absorbers: High-redshift clusters of galaxies?
[NASA-CR-194617] p 1237 N94-16833
Characterization of Ni on Si wafers: Comparison of surface analysis techniques
[DE93-016501] p 953 N94-17649

X RAY IMAGERY
The XMM pn-CCD detector system: First results p 900 N94-15034
The Rutherford Appleton Laboratory photon counting detector p 910 N94-15096

X RAY INSPECTION
Component testing and quality assurance p 932 N94-15259

X RAY LASERS
X ray laser program
[AD-A267075] p 1038 N94-15628

X RAY SCATTERING
Thomson backscattered x rays from an intense laser beam
[AD-A267125] p 1038 N94-15686
Laboratory for x ray optics
[AD-A267149] p 1189 N94-15735
Magnetic effects in anomalous dispersion
[DE93-014291] p 1175 N94-15978
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by anomalous x ray scattering in Fe-Ni alloys
[DE93-015906] p 1209 N94-16171
Application of cylindrical distribution functions to anisotropic scattering from amorphous films
[DE93-015256] p 1183 N94-16811
Neutron and x ray scattering studies of (FeF2)(sub m)(CoF2)(sub n) multilayers
[DE93-015809] p 1184 N94-16838
Anisotropic phase separation in amorphous Fe-Ge alloys
[DE93-015255] p 961 N94-17251

X RAY SOURCES
Direct drive foil implosion experiments on Pegasus 2
[DE93-012666] p 1202 N94-16776
Participation in the north ecliptic pole sky survey
[NASA-CR-191933] p 1059 N94-16815
Resist performance in soft x ray projection lithography
[DE93-016490] p 1036 N94-17647

X RAY SPECTRA
X ray emission from Wolf-Rayet stars with recurrent dust formation
[NASA-CR-194567] p 1300 N94-15533
Variability of the Seyfert galaxy MKN 766 in the Rosat all sky survey
[MPE-PREPRINT-221] p 1240 N94-17591

X RAY SPECTROSCOPY
Structural and dynamical aspects of electrodeposition
[AD-A266786] p 942 N94-14909
X ray microcalorimeters: Principles and performance p 899 N94-15027
The imaging microstrip proportional counter: Features of a practical design p 900 N94-15030
Development of x ray CCDs p 900 N94-15033
The XMM pn-CCD detector system: First results p 900 N94-15034
The development of back-illuminated CCD's for XMM p 900 N94-15035
X-ray spectroscopy with silicon pin and avalanche photo diodes p 906 N94-15072
CCD's on high resistivity bulk silicon for x ray spectroscopy on XMM p 907 N94-15080
Substrate effects in superconducting tunnel junction detectors p 908 N94-15083
Performance of the position-sensitive proportional counters of the Yohkoh Bragg crystal spectrometer p 909 N94-15094
Application of in situ scanning x ray fluorescence to study the concentration of metal ions in simulated pits
[DE93-014054] p 956 N94-15921
A sulfur segregation study of PWA 1480, NiCrAl, and NiAl alloys
[NASA-TM-106289] p 956 N94-15992
In situ studies of passive film chemistry using x ray absorption spectroscopy
[DE93-014023] p 947 N94-16011
Design and fabrication of a reflection far ultraviolet polarizer and retarder
[NASA-CR-194630] p 1191 N94-16023
The interaction of HCN(DCN) with Si(111)-7x7 studied with HREELS, UPS, and XPS
[AD-A266237] p 1182 N94-16111
Electron spectroscopy analysis
[NASA-CR-193591] p 951 N94-17039
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy
[DE93-015683] p 940 N94-17235
Soft x ray emission from Alexandrite laser-matter-interaction
[AD-A267905] p 1042 N94-17378

X RAYS
Thomson backscattered x rays from an intense laser beam
[AD-A267125] p 1038 N94-15686
Direct drive foil implosion experiments on Pegasus 2
[DE93-012666] p 1202 N94-16776
Multi-frame x ray imaging with a large area 40ps camera
[DE93-017179] p 1035 N94-16960
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248
Review of rigorous coupled-wave analysis and of homogeneous effective medium approximations for high spatial-frequency surface-relief gratings p 1194 N94-17335
Soft x ray emission from Alexandrite laser-matter-interaction
[AD-A267905] p 1042 N94-17378
Resist performance in soft x ray projection lithography
[DE93-016490] p 1036 N94-17647

X-14 AIRCRAFT
Lift-fan aircraft: Lessons learned-the pilot's perspective
[NASA-CR-177620] p 867 N94-15950

X-15 AIRCRAFT
The 1966 highlights --- NASA research programs
[NASA-TM-109444] p 1302 N94-15343

X-29 AIRCRAFT
X-29: Experiment in flight
[NASA-TM-109454] p 865 N94-15327

XENON
Prospects for high pressure imaging gas scintillation drift chambers p 901 N94-15040

XV-15 AIRCRAFT
XV-15: Tiltrotor
[NASA-TM-109455] p 865 N94-15328
The 1979 highlights
[NASA-TM-109443] p 1247 N94-15342
The 1982 highlights
[NASA-TM-109671] p 1303 N94-15508

XV-5 AIRCRAFT
Lift-fan aircraft: Lessons learned-the pilot's perspective
[NASA-CR-177620] p 867 N94-15950

Y

YAG LASERS
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
An improved light source for laser ranging p 913 N94-15567
Two color satellite laser ranging upgrades at Goddard's 1.2m telescope facility p 915 N94-15581
Measuring atmospheric dispersion with WLRS in multiple wavelength mode p 916 N94-15582
Upgrading of the Borowiec laser station p 877 N94-15604
Results of the MTLRS-1 upgrade p 877 N94-15610
Effects of turbulence on the geodynamic laser ranging system p 921 N94-15616
Development of the Mars Observer Laser Altimeter (MOLA) p 921 N94-15617
The third generation SLR station Potsdam no. 7836 p 877 N94-15623

YANG-MILLS THEORY
Existence of a new instanton in constrained Yang-Mills-Higgs theory
[NIKHEF-H/93-02] p 1186 N94-17601
Derivation of the Verlinde formula from Chern-Simons theory and the G/G model
[DE93-628620] p 1221 N94-17632

YAW
Effects of internal yaw-vectoring devices on the static performance of a pitch-vectoring nonaxisymmetric convergent-divergent nozzle
[NASA-TP-3369] p 858 N94-16572
Wind tunnel investigations of forebody strakes for yaw control on F/A-18 model at subsonic and transonic speeds
[NASA-TP-3360] p 859 N94-16573

YBCO SUPERCONDUCTORS
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers
[DE93-015306] p 1207 N94-15829
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials
[DE93-015333] p 947 N94-16014
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS
[DE93-016218] p 1209 N94-16447
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBC
[DE93-015491] p 1210 N94-16460
Powder diffraction studies using anomalous dispersion
[DE93-012531] p 1210 N94-16775
Diffuse scattering and image contrast of tweed in superconducting oxides: A simulation and interpretation
[DE93-016131] p 1212 N94-16844
Structural phase transition and superconductivity in La(2-x)Ba(x)CuO4
[DE93-015812] p 1212 N94-16868
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104
Basic optical studies of high T(c) oxide superconductors
[AD-A268148] p 1014 N94-17428
High temperature deformation behavior of YBa2Cu3O(6+x) superconducting ceramic materials
[AD-A268164] p 973 N94-17430
Advanced thin-film deposition and physical properties of high-temperature and other novel superconducting materials
[AD-A268199] p 1216 N94-17561
Oxygen diffusion in YBa2Cu3O(6+delta) ceramics on heating
[DE93-629161] p 974 N94-17633
Influence of the granular surface on the oxygen uptake in YBa2Cu3O(6+delta) ceramics
[DE93-629162] p 974 N94-17634

YELLOWSTONE NATIONAL PARK (ID-MT-WY)
Saving Yellowstone
[NASA-TM-109596] p 1094 N94-15289
TOMS computer graphics
[NASA-TM-109597] p 1094 N94-15290

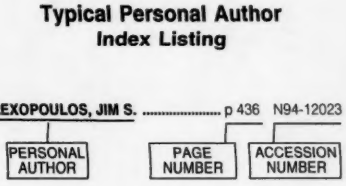
YIELD STRENGTH
The effect of irradiation on the mechanical properties of 6061-T651 aluminum
[DE93-015825] p 958 N94-16168
Bulk and defect properties of ordered intermetallics: A first-principles total-energy investigation
[DE93-015492] p 959 N94-16873

YTTRIUM OXIDES
Vanadium corrosion studies
[AD-A266489] p 959 N94-16781

Z

ZEOLITES
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites
[DE93-015155] p 934 N94-16057
ZETA PINCH
Direct drive foil implosion experiments on Pegasus 2
[DE93-012666] p 1202 N94-16776
ZINC
Growth of new materials for solid state laser applications. The growth of ZnGeP2 by the vertical Bridgman method
[NASA-CR-194571] p 1038 N94-15530
ZINC TELLURIDES
Laser figuring for the generation of analog micro-optics and kineform surfaces p 1196 N94-17346
ZIRCONIUM ALLOYS
Microstructure of Zr3Al after 2 MeV proton bombardment
[DE93-015331] p 1211 N94-16814
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883
ZIRCONIUM CARBIDES
Effects of processing and prolonged high temperature exposure on the microstructure of Nb-1Zr-C sheet
[NASA-TM-106370] p 959 N94-16883
ZIRCONIUM OXIDES
Ion mixing of thin ZrO2 films on sapphire
[DE93-015214] p 1206 N94-14925
Synthesis of ceramic oxide powders in a microwave plasma device
[DE93-012741] p 965 N94-15920
Rheology and microstructure of concentrated zirconia-alumina suspensions for gelcasting composites
[DE93-015339] p 966 N94-16016
Transformation toughening of composite ceramics
[AD-A267304] p 971 N94-16980
Characterization of nanoscale oxide and oxyhydroxide powders using EXAFS spectroscopy
[DE93-015683] p 940 N94-17235
ZONAL FLOW (METEOROLOGY)
Investigate wave-mean flow interaction and transport in the extratropical winter stratosphere
[NASA-CR-194555] p 1098 N94-15639
ZONAL HARMONICS
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

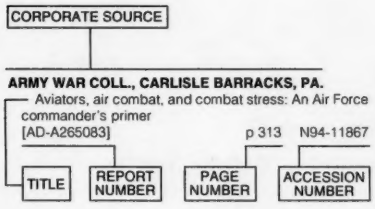
Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

AARHUS UNIV. (DENMARK).
Generation of artificial helioseismic time-series
[NASA-CR-194612] p 1299 N94-15968
Astronomy and astrophysics p 1239 N94-15970

ACADEMIA SINICA, BEIJING (CHINA).
Spaceborne radar for geoscientific applications in North China p 993 N94-15915
Primary studies of Chinese spaceborne SAR p 993 N94-15916

ACADEMIA SINICA, SHANGHAI (CHINA).
Simultaneous compression of the passively mode-locked pulsewidth and pulse train p 913 N94-15566

ACADEMY OF SCIENCES, POTSDAM (GERMAN D.R.).
The third generation SLR station Potsdam no. 7836 p 877 N94-15623

ACADEMY OF SCIENCES OF THE UKRAINE, KHARKOV.
Channel of the system for pulse charged particle beam diagnostics
[DE93-623867] p 1179 N94-14931

ACADEMY OF SCIENCES OF THE UKRAINE, KIEV.
Multiple process simulations for correction factor calculations in experiments with neutrons. LUSMK program
[DE93-623957] p 1179 N94-14932
The Acraman impact structure: Estimation of the diameter by the ejecta layer thickness p 1103 N94-16211
The Karakul depression in Pamirs: The first impact structure in Central Asia p 1241 N94-16212
Investigation of the energy distribution of ions, striking the cathode in an abnormal glow discharge
[DE93-623987] p 1013 N94-17316

ACADEMY OF SCIENCES (USSR), MOSCOW.
Nonstationary behaviour of low background photon detectors p 902 N94-15049

Determination of momentum flux using a bivane and cup anemometer
[AD-A265414] p 1105 N94-15137
Development of an air-to-air refueling automatic flight control system using quantitative feedback theory
[AD-A266718] p 870 N94-15730
An analysis of tactical airlifter characteristics and their impact on theater airlift system performance
[AD-A266719] p 866 N94-15731
A decision criteria to select an associative-memory organization that minimizes the execution time of a mix of associative-search operations
[AD-A266438] p 1149 N94-16560
Manufacturing tolerance requirements for frequency selective surfaces
[AD-A266541] p 999 N94-16797
Hoph bifurcation in viscous, low speed flows about an airfoil with structural coupling
[AD-A266542] p 859 N94-16798
Neighboring extremal guidance for systems with piecewise linear control using time as the reference variable
[AD-A267942] p 874 N94-17010
Optical computing
[AD-A267881] p 1141 N94-17015
Radome depolarization effects on monopulse receiver tracking performance
[AD-A267446] p 1001 N94-17031
Interfacial shear behavior and its influence on fiber damage in sapphire-reinforced gamma titanium aluminide composites
[AD-A267943] p 1060 N94-17043
A fuzzy method for preliminary design random access memory failure rate prediction
[AD-A267948] p 1055 N94-17044
Development and analysis of startup strategies for particle bed nuclear rocket engine
[AD-A267949] p 927 N94-17053
Mesoscale frontogenesis: An analysis of two cold front case studies
[AD-A267950] p 1107 N94-17054
Computational aerodynamics with icing effects
[AD-A267509] p 860 N94-17074
Effects of inspection error on optimal inspection policies and software fault detection models
[AD-A267511] p 1153 N94-17075
Energy potential analysis of zero velocity curves in the restricted three-body problem
[AD-A267512] p 1170 N94-17076
The specific heat of titanium disilicide
[AD-A267543] p 960 N94-17100
The standardized precipitation index and its use in the western contiguous United States
[AD-A267547] p 1107 N94-17102
Implementing a 50x50 gravity field model in an orbit determination system
[AD-A267548] p 888 N94-17103
A modified two-fluid model of conductivity for superconducting surface resistance calculation
[AD-A267549] p 1013 N94-17104
Synthesis, reactivity, and characterization of (-hexacarbocyclic) manganese dicarbonyl complexes with sulfur and phosphorus ligands
[AD-A267592] p 930 N94-17192
Bibliography of short wavelength chemical laser research
[AD-A267619] p 1041 N94-17195
Phased array antenna analysis using hybrid finite element methods
[AD-A267620] p 1002 N94-17196
An experimental investigation of the effects of leading edge geometry on the dynamics of blunt fin-induced shock wave turbulent boundary layer interaction
[AD-A267656] p 860 N94-17221
Numerical solution of SUPG finite-element method for supersonic viscous flow
[AD-A267762] p 860 N94-17222
Design of a fluid elastic actuator with application to structure control
[AD-A267649] p 897 N94-17246
Orographic microbursts in a severe winter windstorm
[AD-A267651] p 1108 N94-17247
Ultrasonic wave propagation model for nondestructive evaluation of solid rocker motor propellant
[AD-A267653] p 976 N94-17248
Two-dimensional acousto-optical interaction theory and experimental analysis
[AD-A267761] p 1193 N94-17254
Validation and analysis of microwave-derived rainfall over the tropics
[AD-A267785] p 1108 N94-17303
Military space programs in the press: An analysis for change
[AD-A267799] p 874 N94-17306
Linear characteristic spatial quadrature for discrete ordinates neutral particle transport on arbitrary triangles
[AD-A267485] p 1185 N94-17365
An examination of two Ada language object-oriented databases
[AD-A267486] p 1154 N94-17366
Estimating task execution delay in a real-time system via static source code analysis
[AD-A267496] p 1161 N94-17367
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
[AD-A267498] p 898 N94-17368
Discrete sliding mode control for nonlinear sampled data systems
[AD-A267500] p 1167 N94-17369
An object-oriented dynamic software process model
[AD-A267726] p 1154 N94-17371
Energy from the sun: Evolution of federal support for solar energy
[AD-A267944] p 1093 N94-17382
Extracavity frequency doubling study of a pulsed photodissociation iodine laser
[AD-A267893] p 1042 N94-17394
Experimental studies on a gas dynamic laser with narrow throat and high area-ratio grid nozzles
[AD-A267818] p 1042 N94-17400
Frequency resolution of an acousto-optical spectrometer
[AD-A267822] p 1035 N94-17401
Study of high speed interference photography with two-dimensional acousto-optical lattice deflection
[AD-A267823] p 1035 N94-17402
A comparative study of analog and digital control laws for the UMCSL truss
[AD-A267980] p 871 N94-17412
A comparison of ceiling and visibility observation for NWS manned observation sites and ASOS sites
[AD-A268356] p 1108 N94-17459
Evaluation of hybrid reinforcement (fiber-reinforced-plastic rod with steel core)
[AD-A268009] p 941 N94-17473
Flow instability tests for a particle bed reactor nuclear thermal rocket fuel element
[AD-A268012] p 929 N94-17474
Computer-human interface issues: Theory and application
[AD-A268013] p 1138 N94-17475
Opposing mesoscale flows in a broken midlatitude squall line
[AD-A268011] p 1109 N94-17492
Optimization of satellite coverage in observing cause and effect changes in the ionosphere, magnetosphere, and solar wind
[AD-A267956] p 1102 N94-17493
An investigation of the Ground-Based High-Resolution Interferometer Sounder (GB-HIS) in a costal marine environment
[AD-A268052] p 1114 N94-17503
A correlative comparison of geomagnetic storms and auroral substorms using geomagnetic indeces
[AD-A268081] p 1102 N94-17512
Reliability and maintainability of modular robot systems: A roadmap for design
[AD-A268104] p 1168 N94-17517
Laser photoionization time-of-flight mass spectrometry of nitrated polycyclic aromatic hydrocarbons and nitrated heterocyclic compounds
[AD-A268126] p 952 N94-17520
Numerical solution of a second order boundary problem for two dimensions using galerkin approximations
[AD-A268128] p 1171 N94-17521
Propagation characteristics of mesoscale convective systems
[AD-A268130] p 1109 N94-17522
System performance modeling and analysis of a fault-tolerant, real time parallel processor
[AD-A268070] p 1162 N94-17551
Further development and testing of a second-order bulk boundary layer model
[AD-A268071] p 1109 N94-17552
Forecasting the ducting of electromagnetic waves on the mesoscale
[AD-A268101] p 1109 N94-17571
Three dimensional visualization of GOES cloud data using OCTRESS
[AD-A268102] p 1109 N94-17572
An analysis of simulated and actual DMSP SSM/T-2 brightness temperatures
[AD-A268103] p 1109 N94-17573
The analysis of low-profile, broadband, monopole, vehicle antennas and matching network synthesis
[AD-A268340] p 1006 N94-17582
State space partitioning methods for solving a class of stochastic network problems
[AD-A267494] p 1173 N94-17585
Application of a NEPTUNE propulsion concept to a manned Mars excursion
[AD-A268053] p 929 N94-17587
An empirical study of tropical cloud clusters using special sensor microwave imager data
[AD-A268072] p 1110 N94-17595

Synthesis, characterization, and polymerization of new ferrocene-fluorene complexes. A novel high-molecular weight conjugated polymer with pendant ferrocene groups
[AD-A267717] p 972 N94-17273

UTAH UNIV., SALT LAKE CITY.
Pulsed laser kinetic studies of liquids under high pressure
[DE93-017826] p 1041 N94-16998
Currents induced in the human body for exposure to ultrawideband electromagnetic pulses
[AD-A268570] p 1130 N94-17621

V

VANDERBILT UNIV., NASHVILLE, TN.
Complex information coordination performance: Differential changes in working memory contributions following training
[AD-A267007] p 1132 N94-15762
Analytical and experimental investigation of the feasibility of accelerated lifetime testing of materials exposed to an atomic oxygen beam
[NASA-CR-193851] p 946 N94-15766
Homogeneously traceable results in claw-free graphs
[AD-A266196] p 1169 N94-16127

VARIAN ASSOCIATES, PALO ALTO, CA.
High temperature superconductivity
[AD-A267006] p 1008 N94-15635

VEGA SPACE SYSTEMS ENGINEERING LTD., HARPENDEN (ENGLAND).
A proposed ground segment design for small satellites p 878 N94-17154

VEXCEL CORP., BOULDER, CO.
Synthetic aperture radar signal processing: Trends and technologies p 992 N94-15908
International collaboration in SAR ground data systems p 993 N94-15917

VIRGINIA POLYTECHNIC INST. AND STATE UNIV., BLACKSBURG.
Verification of a two-dimensional infiltration model for the resin transfer molding process
[NASA-CR-194597] p 964 N94-15656
Olympus propagation measurement results at Virginia Tech p 995 N94-16037
Data acquisition, preprocessing and analysis for the Virginia Tech OLYMPUS experiment p 995 N94-16038
Aerodynamic/dynamic/control interaction
[AD-A266187] p 871 N94-16107
Textile composite processing science p 938 N94-16856

VIRGINIA UNIV., CHARLOTTESVILLE.
Inelastic deformation of metal matrix composites
[NASA-CR-191522] p 930 N94-15106
Integrated fundamental research on current collection
[AD-A266987] p 1008 N94-15494
Collisional dynamics of perturbed particle disks in the solar system
[NASA-CR-193584] p 1239 N94-16648
Environment enhanced fatigue crack propagation in metals: Inputs to fracture mechanics life prediction models
[NASA-CR-191538] p 942 N94-17638

VISCOUSTECH, ALLISON PARK, PA.
Stability of flows in fluidized beds
[DE93-000245] p 1024 N94-16763

VON KARMAN INST. FOR FLUID DYNAMICS, RHODE-SAINT-GENESE (BELGIUM).
Swept shock wave/laminar boundary layer interactions, experimental, and numerical results p 1017 N94-15198

W

WALTER REED ARMY INST. OF RESEARCH, WASHINGTON, DC.
The behavioral toxicology of high-peak, low average power, pulsed microwave irradiation
[AD-A268392] p 1134 N94-17535
WASHINGTON UNIV., SAINT LOUIS, MO.
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-194549] p 931 N94-15190
The planetary data system educational CD-ROM p 1234 N94-16209
Assimilation of solids during ascent of magmas from the Bartoy Field of the Baikal Region, Siberia p 1103 N94-16214
A first-order model for impact crater degradation on Venus p 1265 N94-16268
A Monazite-bearing clast in Apollo 17 melt breccia p 1267 N94-16279
Apollo 17 materials viewed from 2 to 4 mm soil particles: Pre-serenitatis highlands components p 1267 N94-16280
An iridium-rich iron micrometeorite with silicate inclusions from the Moon p 1242 N94-16281
I-Xe structure of ILAFEGH 009 and shallowater: Evidence for early formation and rapid cooling of impact-derived enstatite meteorites p 1243 N94-16305
Composition of Apollo 17 core 76001 p 1275 N94-16326
Composition and maturity of the 60013/14 core p 1275 N94-16327
Solution of elastic-plastic stress analysis problems by the p-version of the finite element method
[NASA-CR-194267] p 1062 N94-17445
WASHINGTON UNIV., SEATTLE.
Study of protein-H2O interactions by multidimensional NMR spectroscopy
[AD-A266955] p 946 N94-15760
Modeling the reflectance of CO2 frost with new optical constants: Application to Martian south polar cap spectra p 1256 N94-16217
The size of complex craters p 1262 N94-16249
Densities of 5-15 micron interplanetary dust particles p 1244 N94-16367
Middle atmospheric electric fields over thunderstorms
[NASA-CR-194619] p 1106 N94-16493
A field measure of the shade fraction p 1068 N94-16677
Mapping the spectral variability in photosynthetic and non-photosynthetic vegetation, soils, and shade using AVIRIS p 1068 N94-16679
Using endmembers in AVIRIS images to estimate changes in vegetative biomass p 1070 N94-16689
Temporal variation in spectral detection thresholds of substrate and vegetation in AVIRIS images p 1073 N94-16706
Convergence of the multiple scattering expansion in XAFS and XANES
[DE93-011001] p 948 N94-16772
J-integral and HRR field associated with stable crack growth in thin aluminum SEN specimen
[AD-A267879] p 960 N94-17041
WAYNE STATE UNIV., DETROIT, MI.
Investigations of YBaCuO materials with near-room-temperature resistivity transitions
[AD-A268016] p 1216 N94-17477
WELLESLEY COLL., MA.
The chromosphere of VV cephei and the distribution of circumstellar dust around red giants and supergiants
[NASA-CR-193594] p 1297 N94-16866
WEST VIRGINIA UNIV., MORGANTOWN.
Effect of tow alignment on the mechanical performance of 3D woven textile composites p 937 N94-16851
WESTINGHOUSE ELECTRIC CORP., BALTIMORE, MD.
SONOS technology for commercial and military nonvolatile memory applications
[DE93-015647] p 1011 N94-16661
WESTINGHOUSE SAVANNAH RIVER CO., AIKEN, SC.
GAM-HEAT: A computer code to compute heat transfer in complex enclosures
[DE93-014724] p 1023 N94-15980
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments
[DE93-013581] p 1112 N94-16009
WESTON OBSERVATORY, MA.
Broadband teleseismic array recording in the Adirondack Mountains, New York State
[AD-A267290] p 1097 N94-14980
WICHITA STATE UNIV., KS.
Supersonic flow visualization of a nacelle in close proximity to a simulated wing
[NASA-CR-194675] p 860 N94-17260
Maximizing participation of women in collegiate aviation education
[NIAR-93-14] p 1222 N94-17261
The airline quality report 1993
[NIAR-93-11] p 863 N94-17262
Design of non-sled setup to measure head injury criteria
[NIAR-92-20] p 872 N94-17263
Characterization of metallic multilayers using x ray diffraction analysis
[NIAR-93-13] p 961 N94-17282
Computer modeling and animation of mechanical systems
[NIAR-93-3] p 1153 N94-17299
WIEN UNIV. (AUSTRIA).
Osmium isotopes in Ivory Coast tektites: Confirmation of a meteoritic component and rhenium depletion p 1244 N94-16321
Manson impact structure, Iowa: First geochemical results for drill core M-1 p 1103 N94-16322
WILSON GREATBATCH LTD., CLARENCE, NY.
Lithium D-cell study
[NASA-CR-192705] p 1011 N94-16505
WISCONSIN UNIV., MADISON.
A high flux radical beam diamond growth
[AD-A266754] p 1207 N94-15955
Isolation of thermostable enzyme mutants by cloning and selection in thermophilic bacteria
[AD-A266378] p 1117 N94-16514
Investigation of cloud properties and atmospheric stability with MODIS
[NASA-CR-193475] p 1107 N94-16717
Reducing data dimension to lower signal processing computational requirements and maximize performance
[AD-A266606] p 999 N94-16728
Methods of tunneling spectroscopy with the STM
[AD-A266507] p 948 N94-16787
Processes involved in the integration of pictures and discourse
[AD-A268150] p 1134 N94-17468
A basic principles description of liquid vapor phase transitions
[AD-A268331] p 1176 N94-17581
Granular fluctuations in plasma turbulence and their role in transport
[DE93-013465] p 1187 N94-17674
WISE OBSERVATORY, TEL AVIV (ISRAEL).
The TAUVEX experiment p 905 N94-15064
WOODS HOLE OCEANOGRAPHIC INST., MA.
Abstracts of manuscripts submitted in 1992 for publication
[AD-A267963] p 1113 N94-17383
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A267868] p 1113 N94-17391
Meridional circulation in the tropical north atlantic
[AD-A268222] p 1114 N94-17555
WORCESTER POLYTECHNIC INST., MA.
Engineering design of sub-micron topographies for simultaneously adherent and reflective metal-polymer interfaces
[NASA-CR-194573] p 964 N94-15700
WRIGHT LAB., EGLIN AFB, FL.
An electronic imaging system for the Aeroballistic Research Facility
[AD-A267157] p 1033 N94-15826
WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.
Supersonic Combustion Research Laboratory. Volume 1: Design and fabrication
[AD-A267667] p 943 N94-14962
Design of round-to-square transition section; analysis and computer code
[AD-A267173] p 872 N94-15847
Detailed example of using ACEC release 3.0 with the DEC VAX Ada compiler
[AD-A267880] p 1152 N94-17014
Display of dynamic, volume graphic images by holographic voxel projection: Initial investigation
[AD-A267622] p 1035 N94-17197
An experimental study of fluctuating wall pressures in a highly swept, sharp fin-induced, Mach 5 shock wave/turbulent boundary layer interaction
[AD-A268394] p 861 N94-17461
Laser velocimetry measurements of vortex flows on a delta wing at Mach 1.9
[AD-A268596] p 861 N94-17609
WRIGHT STATE UNIV., DAYTON, OH.
Iron oxide bands in the visible and near-infrared reflectance spectra of primitive asteroids p 1242 N94-16274
Evaluation of putative neurochemical intermediaries in space/motion sickness
[NASA-CR-193607] p 1118 N94-17090

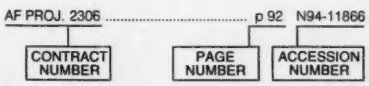
X

XEROX CORP., WEBSTER, NY.
Total quality environmental management leadership through quality
[TABES PAPER 93-540] p 1050 N94-16135

Y

YALE UNIV., NEW HAVEN, CT.
Development and analysis of ARMA parameter estimation schemes in the presence of noise
[AD-A267184] p 989 N94-15786
Studies in turbulence and turbulence control
[AD-A266318] p 1026 N94-16950
Structure of high Reynolds number turbulent boundary layer
[AD-A267476] p 860 N94-17099
Fast algorithms for polynomial interpolation, integration and differentiation
[AD-A267505] p 1154 N94-17370
Fast Fourier Transforms for nonequispaced data 2
[AD-A268383] p 1171 N94-17420
YAMAGUCHI UNIV. (JAPAN).
Identification of new meteorite, Mihonoseki (L), from broken fragments in Japan p 1246 N94-16415
YORK UNIV. (ONTARIO).
Characteristics of aimed arm movements in humans under low gravity p 980 N94-16093
YORK UNIV., TORONTO (ONTARIO).
Laser-liquid interactions under reduced gravity conditions p 977 N94-16077

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

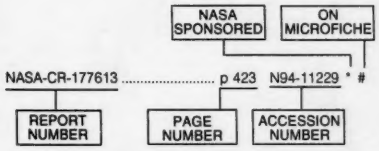
Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *International Aerospace Abstracts (IAA). IAA* is issued on the 1st and 15th of each month and is available from the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, NY 10019.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *IAA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

16 SPACE TRANSPORTATION

Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support*.

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum, Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 7514 Eggenstein-Leopoldshafen 2, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *IAA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
